* The tables of the chapter on "Money and banks" in the monthly bulletin of the Bank of Slovenia are published for the last time in the current form for March 2006 and will be replaced by the structurally similar tables, built in accordance with the standards of the European central bank, i. e. euro area. An exception is the table: "Bank of Slovenia 10-day balance sheet" (current table 1.9), which will not change.

The changes will be explained in the Notes on methodology of the bulletin. The new data will be available to the public from the December 2004 on and in addition to that the time series of the current tables will still be disposable on the home page of the Bank of Slovenia.

I. MONETARY REVIEWS AND POLICY

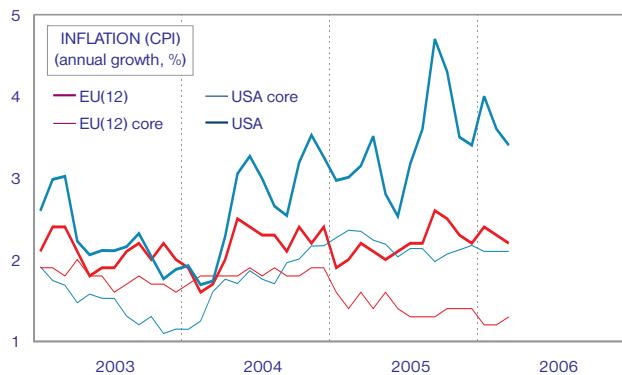

1. External environment
2. The real sector
3. Prices
4. The fiscal sector
5. Balance of Payments
6. Money and credit
7. Banking system
8. Exchange rate
9. Interest rates

At its meeting of 4 May 2006, the Governing Board of the Bank of Slovenia left the bank's key interest rates unchanged. The level of interest rates is in line with the stability of the nominal exchange rate of the tolar against the euro, while current price trends and inflation expectations are in line with the target of medium-term price stability. The 12-monthly average of the year-on-year figures for the harmonised index of consumer prices stood at 2.3% in March, 0.3 percentage points below the reference figure for the price stability convergence criterion.

The Governing Board of the Bank of Slovenia judges that the economic trends are in accordance with the long-term assurance of sustained price stability. High oil prices and commodities prices on world markets are currently the biggest risk factor in short-term price movements. Economic growth (at 4%) and growth in industrial production are favourable, and are fluctuating around the level of the productivity trend, while the indicators of economic sentiment are also reasonably good. Employment in the small business sector continued to rise at the beginning of the year, while growth in employment at companies continued to slow. After rising at the end of last year, unemployment has fallen in the early part of this year, the rate reaching 10.4% in February. The main risks of a decline in the otherwise good economic activity are those associated with high oil prices and commodities prices on world markets, and potential delay in the acceleration of activity in Slovenia's trading partners. The foreign trade position also remains in balance. The current account deficit stood at 1.1% of GDP last year, lower than expected, and the relatively good public finance trends and balance of payments trends have continued this year. According to provisional figures, the general government deficit as measured by the ESA95 methodology fell by 0.5 percentage points from the previous year to 1.8% of GDP in 2005.

1. International Environment

The forecasts for world economic growth this year have been revised upwards. The IMF slightly raised its forecast for this year's world economic growth to the relatively good figure of 4.6%, a higher figure than last year. A slowdown in economic growth during the year is expected in the USA owing to interest rate rises, which will first bring about a cooling in the real estate market and thus household spending. High oil prices will also have a negative impact on household spending, with household purchasing power diminishing. The IMF is forecasting economic growth of 3.4% this year. For the eurozone, the IMF is forecasting higher growth than last year of 2.0%, while Consensus has slightly higher forecasts of 2.1% and the ECB forecasts economic growth in the range of 1.7% to 2.5%. In contrast to the USA, growth will gradually improve over the course of the year. Export growth is still expected to have a beneficial effect, but domestic spending should also pick up gradually.

Expectations regarding interest rate rises in the eurozone have changed slightly. The rises in interest rates should take place more gradually than the financial markets were anticipating before April. The market is now not expecting an interest rate rise in May, and is expecting the next rise to come in June. A rise in the Federal Reserve rate in May remains uncertain, and depends mainly on figures for the USA economy that are yet to be released.

Inflation in both the eurozone and the USA fell slightly in March owing to the slowdown

in growth in food and energy prices. It remains above 2% in the eurozone and 3% in the USA, while core inflation (excluding volatile food and energy prices) in the two economies is stable at approximately 1 percentage point below the headline rate. Oil prices leapt sharply again in April (to more than USD 70 per barrel) owing to rising geopolitical tensions in Nigeria and Iran and declining oil stocks in the USA. Inflation is consequently expected to rise in April.

Annual growth (%)	2003	2004	2005	2006 Mar.
<i>Inflation (CPI)</i>				
EU (12)	2.0	2.1	2.2	2.2
USA	2.3	2.7	3.4	3.4

Notes: Figures in parentheses represent the forecast for the year as a whole.
Sources: Reuters, Eurostat, IMF WEO (April 06th), OECD

The euro has appreciated significantly against the dollar since the end of February. The reason is the financial markets' expectation of further interest rate rises in the eurozone and the upcoming end of the interest rate rises in the USA. In addition, there is also expectation that some Asian central banks will convert some of their dollar reserves into euros.

2. Real Sector

For the moment indicators of activity point to favourable developments in the early part of the year. With growth in retail sales slightly weaker, primarily as a result of lower sales of food products and a slowdown in the extraordinarily high growth recorded in sales of motor vehicles at the end of last year, the volume of work performed in the construction sector moved very favourably in February. The return of high growth in the value of building work and the slower contraction in civil engineering work

were both factors in this improvement. The transport sector also recorded significantly higher year-on-year growth in January compared with the end of last year. With high year-on-year growth in industrial production and the current rate of growth in imports slightly slower than the current rate of growth in exports, for the moment the majority of indicators point to a relatively high level of economic activity at the beginning of the year. Further evidence of these trends comes from the indicators of sentiment in the manufacturing sector, based primarily on favourable export trends, and in the service sector and construction sector. However, consumers and retailers are more pessimistic. Expectations of developments in the manufacturing sector in the next few months are also slightly more cautious.

Despite slowing, the current rate of growth in industrial production remains high. According to provisional figures, year-on-year growth in industrial production rose further from January to reach 8.1% in February. The current rate of growth as measured by the X12 method was 0.5% in February, or approximately 6.0% at an annual level. The rate was thus just over half that in January, while similar movements were shown by the Tramo-Seats seasonally adjusted figures. The high industrial activity at the beginning of the year was again primarily the result of good foreign sales, while year-on-year growth in sales revenues on the domestic market was significantly slower. The slowdown in new industrial orders also points to the possibility of a further slowdown in industrial production, with the decline divided equally between the domestic market and the foreign market. Production of capital goods

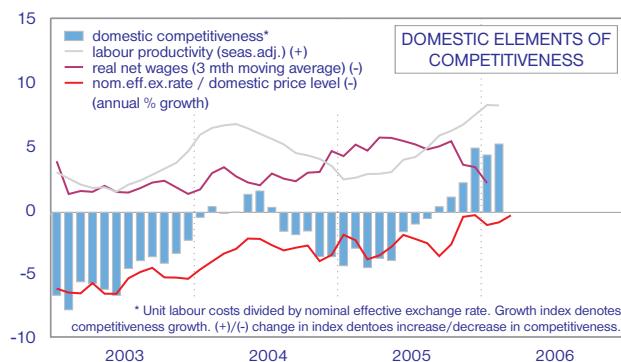

recorded the highest growth in the first two months of the year, but also recorded the most obvious slowdown in the current rate of growth among all product groups. The trend of declining year-on-year growth in inventories ended in February. Inventories of capital goods recorded the largest year-on-year increase in the first two months of the year, while inventories of consumer non-durables recorded the largest decline.

Annual growth (%)	2003	2004	2005	2006 Feb.
Industrial production	1.4	5.4	3.2	8.1

Sources: Statistical Office of the Republic of Slovenia; Slovenian Electricity Authority; Bank of Slovenia calculations. Number in parenthesis refers to the month of last available data. *From 2005 on data on trade and hotels and restaurants is available only in real terms and working day adjusted.

Growth in household income was high at the beginning of the year. Year-on-year growth in total household income averaged a high 9.1% over the first two months of the year. With other earnings from employment recording year-on-year growth of 19.3%, primarily as a result of the low basis from last year caused by the change in tax legislation in January 2005, growth in regular employment earnings was also fairly high. The latter grew by 7.7% year-on-year on average in the first two months of the year, or by 5.5% in real terms. The current rate of growth in other earnings from employment also remains high, despite being slightly lower in recent months than in the middle of last year, while the current rate of growth in regular employment earnings has been slowing since the middle of last year, with the exception of a jump at the end of the year.

Wage growth was relatively slow at the beginning of the year. Year-on-year growth in the average gross wage averaged 5.4% in the first two months of the year, or 3.1% in real terms. The 12-monthly average of the year-on-year rates of growth in wages shows real growth of 2.5% in wages in February, lower than the long-term average, but still double the level recorded by the same indicator a year before. The year-on-year growth in the average gross wage is nevertheless still in line with the projected medium-term growth in productivity. At 4.1%, average year-on-year growth in public sector wages in the first two months of the year was again slower than the rate of 5.8% recorded in the private sector. This is in part a reflection of the restrictive wage policy in the public sector, and in part a consequence of the current good business conditions in the private sector, in addition to the statistical effect of a decline in the number of low-paid jobs.

The employment trend was favourable at the beginning of the year. The workforce grew by 0.9% year-on-year on average over the first two months of the year, while the workforce in employment also grew by a very similar amount. Employment in the small business sector continued to rise, while growth in employment at companies continued to slow. The largest year-on-year increases in employment at companies were in the construction sector (5.5%) and in certain marketable segments in the service sector, while employment in the textile industry fell by more than 15%. After a rise in unemployment at the end of last year, the number of unemployed began to fall in year-on-year compari-

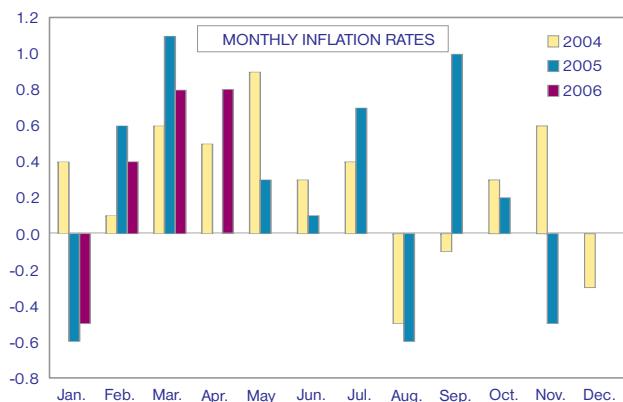

sons at the beginning of the year, while the current rates of growth also confirm the positive trend.

The nominal effective exchange rate of the tolar against a basket of foreign currencies appreciated by 0.1% in March. With the euro exchange rate unchanged, the nominal rise in the value of the tolar was caused by its exchange rates falling against all the other currencies in the basket. From its average of 0.2% in 2005, caused mainly by the rise in the dollar in the second half of the year, the year-on-year depreciation in the nominal effective tolar exchange rate rose to 1.5% on average over the first three months of this year.

Competitiveness improved in the early part of the year in terms of domestic costs, but deteriorated in terms of prices. With productivity growing strongly and growth in labour costs in manufacturing slowing, there was a significant decline in growth in unit labour costs at the beginning of the year. Cost competitiveness was up approximately 5% both in year-on-year terms and from the end of last year. The trend of domestic prices growing more slowly than foreign prices, in particular producer prices, that was seen almost throughout last year ended at the beginning of this year. This also brought an end to the improvement in the price-based competitiveness indicators at both the current level and the year-on-year level. Given the average depreciation of the nominal effective tolar exchange rate in the first three months of the year, the year-on-year comparison nevertheless continues to show an improvement in competitiveness as measured by producer prices (2.3%) and consumer prices (1.4%).

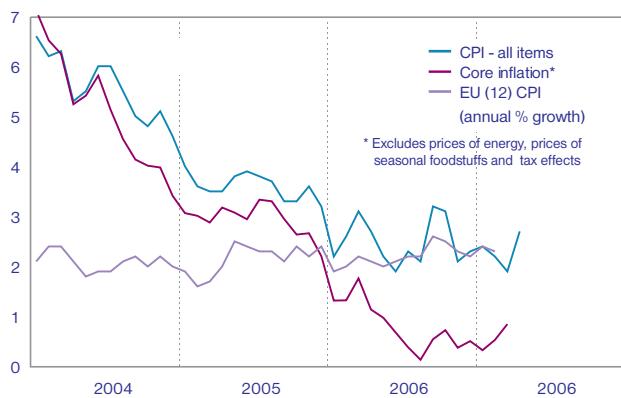

3. Prices

Year-on-year inflation rose to 2.7% in April, under the significant influence of year-on-year changes in prices of seasonal food, clothing and footwear, and transport. Rises in the prices of both goods and services contributed to the overall growth in prices. Prices of goods rose by 0.9% on average, and prices of services by 0.5%. The goods recording the most prominent year-on-year price rises were seasonal food and cars. The prices of both fell significantly less this April than they did last April, with larger price falls having been recorded by seasonal food and cars in March. The same applies to prices of clothing and footwear, where there was an additional normalisation of prices after the end of seasonal sales and the arrival of new collections at shops. Additional pressure on inflation was brought by further rises in prices of refined petroleum products, which were up more than 4% on average, making their contribution to inflation similar to last year's. The higher growth in prices of refined petroleum products therefore did not have a greater impact on year-on-year inflation. After remaining extremely low for almost a year at between 0.0% to 0.5%, core inflation began to rise again, to approximately 1.0%, which points to the gradual normalisation in this price growth.

Growth in producer prices of manufactured goods remains slow, at 2.0% year-on-year in March. Despite these prices growing significantly more quickly abroad, growth in domestic producer

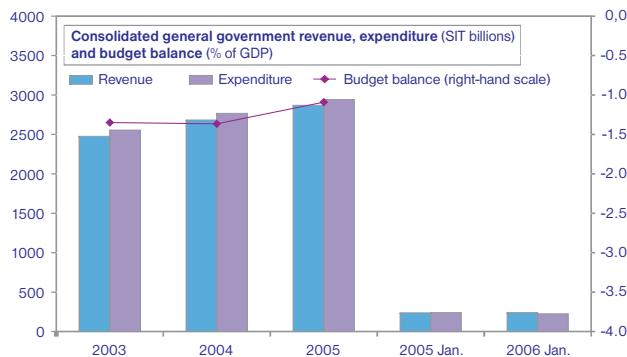

prices remains low. This was primarily the result of extremely low growth in energy prices of 4.6% year-on-year (compared with approximately 25% in the EU25), and is probably a reflection of the lower importance of energy production in Slovenia. Unlike energy prices, growth in other domestic prices is in line with that of foreign prices. Growth in commodities prices has fallen to between 2.0% and 2.5% this year, March's year-on-year rate standing at 2.3%. Growth in producer prices of consumer goods was low in March at 1.5% year-on-year, and remained behind the consumer price index. Prices of capital goods remained more or less unchanged last year, and the year-on-year rate of growth even dropped below zero in March. The movements in producer prices are thus not giving rise to any major pressures on inflation, and in certain segments are even having an anti-inflationary effect.

4. Public Sector

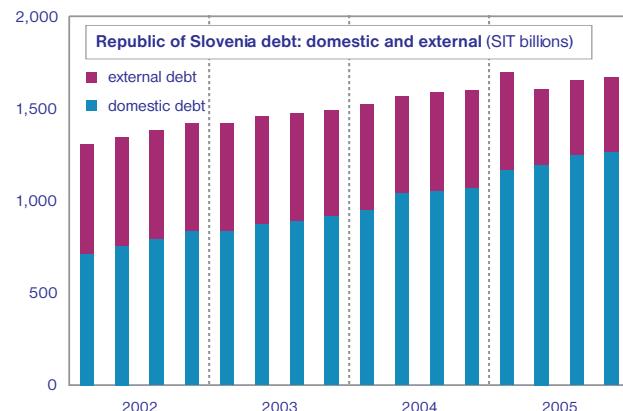

The consolidated public finance position recorded a surplus of SIT 16 billion in January. The state budget finished the first month of the year with a surplus of SIT 11 billion, while local government recorded a surplus of SIT 5 billion. Both the pension fund and the health fund recorded an approximately balanced position in January.

According to initial estimates, general government revenues continued to grow in the first quarter of this year at the slower pace seen since November 2005. The largest year-on-year fall in the first three months of the year was recor-

ded by revenues from payroll tax, as a result of the change in tax legislation that envisages a gradual reduction in this tax until complete abolition in 2009. Revenues from excise duties also recorded a significant year-on-year fall, excise duties on refined petroleum products having remained at the lowest level allowed by EU regulations in the first quarter. As in 2005, revenues from corporate income tax recorded a significant year-on-year increase in the first quarter. Revenues from personal income tax, VAT and taxes on foreign trade also recorded positive growth.

General government expenditure, excluding local government, rose by 2.9% in the first two months of the year, 0.1 percentage points less than the rise in revenues. The lowest expenditure compared with last year's average was subsidies, which totalled just SIT 6 billion in the first two months of the year, compared with a figure of SIT 27 billion in December, mostly on agriculture. Transfers to households, which account for approximately 40% of all general government expenditure, continued to grow at a rate similar to last year's. Within this group, expenditure on unemployment rose significantly in year-on-year terms in the first two months of the year, while growth in pensions was similar to last year's average. Expenditure on investments during the same period continued to decline at a rate similar to last year's. Expenditure on public sector wages rose by an average of 5% year-on-year in January and February. The average gross wage was up 4.1% year-on-year in these two months, while employment in the public sector rose by 1.4% on average over the same period.

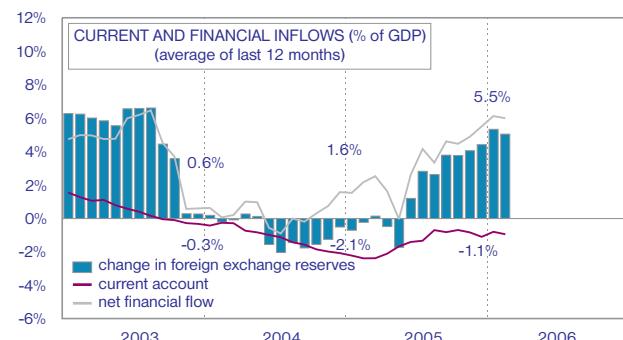

At the end of 2005, Slovenia's public debt stood at SIT 1,674 billion, or 25.5% of GDP, while debt with a government guarantee stood at SIT 652 billion or 9.9% of GDP. The debt increased by SIT 74 billion during 2005. The proportion of internal debt rose throughout the year, to stand at more than three-quarters of Slovenia's total debt at the end of December.

The government continues to borrow by issuing long-term securities. In April it released the third issue of RS61 and RS62 long-term bonds, worth SIT 22.1 billion and SIT 19.7 billion respectively. The average yield on the bids accepted was 4.011% for the RS61s, and 4.347% for the RS62s. The debt on the RS61 bonds now amounts to SIT 71.2 billion, while that on the RS62s is now SIT 69.7 billion.

5. Balance of Payments

Despite a deficit in February, this year's current account results are better than last year's. There was a current account deficit of EUR 98 million in February, just under one-half higher than that in the same month last year. January's surplus turned into

a cumulative deficit of EUR 13 million in February, just under one-quarter of the deficit recorded in the first two months of last year. In the context of these results, the deficit in the last 12 months fell to EUR 261 million, or 0.9% of estimated GDP. The main factor in February's current account deficit was the deficit in merchandise trade and the outflow in net transfers.

February saw the trend of a slowdown in the current rate of growth in imports and exports of goods and services continue, while the year-on-year rates of growth remained relatively high. Exports of goods and services in February were up 17.9% year-on-year at EUR 1,466 million, while imports were up 17.3% at EUR 1,504 million. Despite the deficit in February (of EUR 38 million), there was a cumulative surplus of EUR 54 million in trade in goods and services in the first two months of the year.

Good foreign demand meant that growth in merchandise trade remained high. Merchandise trade with non-EU countries grew faster than that with EU member-states. Exports of goods grew by 18% year-on-year in February to EUR 1,237 million, while imports were up just under 17% at EUR 1,354 million. Exports of goods to EU member-states grew more slowly (17%) than exports to non-EU countries

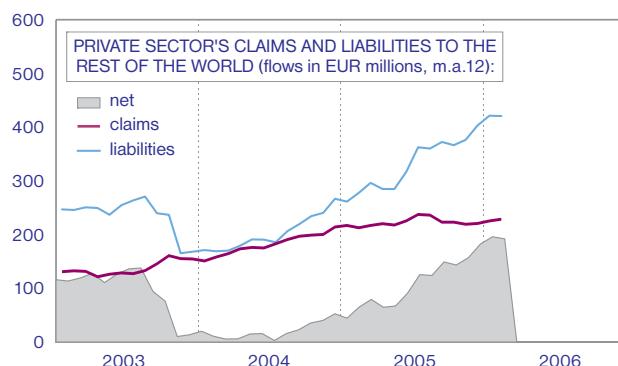

(21%). The gap was even greater on the import side, with imports from EU member-states growing by 10% year-on-year and imports from non-EU countries growing by 47%. In the context of these changes in regional trade, the deficit in merchandise trade in the first two months of the year fell year-on-year by EUR 25 million to EUR 127 million.

Imports of services are growing more quickly than exports. In the first two months of this year exports of services grew by 17% year-on-year, and imports by 19%. The surplus nevertheless rose by EUR 15 million year-on-year to EUR 125 million. Trade in services connected with merchandise trade grew rapidly, with transport exports up 19% and transport imports up 25%. The largest rise of 52% was recorded by revenues from other business services (partly as a result of the fall of EUR 10 million in revenues from brokerage last year), while expenditure grew by just under 20%. Revenues from tourism were up just under 8% year-on-year, 2 percentage points more than the rise in the number of foreign tourists, in the context of a relatively high rise of 14% in expenditure on travel abroad.

There was a net outflow of EUR 12 million in labour and capital income in the first two months of the year, primarily as a result of a rise in outward interest payments. Alongside merchandise trade, the largest contributor to the current account deficit was the outflow of EUR 55 million in net transfers owing to February's high payments into the EU budget.

Source: Bank of Slovenia

Net financial inflows at the beginning of the year were smaller in scale than in the second half

of last year, but were larger than those in the same period last year. There was a net inflow of EUR 246 million via financial transactions in January and February, taking the 12-monthly net inflow to 6% of estimated GDP, 0.5 percentage points more than in 2005.

The private sector continues to borrow abroad at a faster rate and in a larger scale than its outward investments. Financial inflows totalled EUR 697 million in the first two months of the year, up 44% year-on-year, while outflows were up less than half of this at EUR 510 million. After a long period of not doing so, the government has also recorded net inflows from the rest of the world this year, having made net repayments over the last few years. Purchases of government bonds and treasury bills by non-residents last year were to a large degree the result of partial reinvestment after the large-scale repayment of eurobonds. These investments, particularly in government bonds, strengthened again at the beginning of this year, and totalled EUR 70 million in January and February.

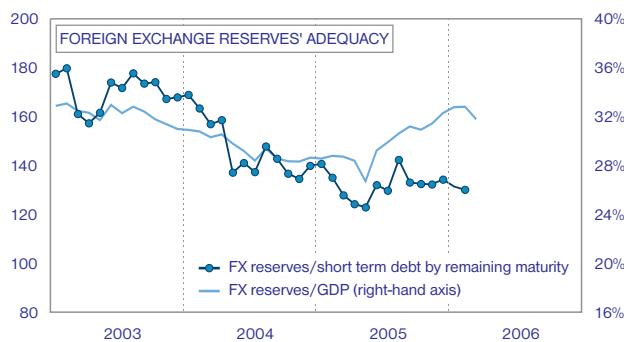

Portfolio and direct investments are again prominent in the structure of outward private

sector financial investments this year, while export financing via loans and trade credits is also continuing to grow. Outward portfolio investments totalled EUR 262 million in the first two months of the year, 70% more than in the same period last year. The key factor in this increase was the banking sector's transactions of EUR 151 million in first-class securities. In the first three months of the year mutual funds increased the share of foreign securities in their portfolios by 9 percentage points to 48.5%. Since the second half of last year, the influx of new money into mutual funds has been directed more towards foreign mutual funds operating in Slovenia: by the end of February, they had received a net inflow equivalent to EUR 109 million, while domestic mutual funds had attracted just EUR 39 million. Prominent among other types of investment in the first two months of the year are trade credits, which after falling sharply in the second half of last year strengthened again to EUR 136 million, recording year-on-year growth of 18%.

This year's high financial inflows originate to a large degree from deposits by non-residents, while portfolio investments by non-residents in Slovenia's private sector also stand out in terms of high growth, albeit at a lower scale. Deposits by non-residents, mainly foreign banks, have already increased by EUR 550 million this year, equivalent to one-half of last year's total increase. At a total of EUR 93 million, foreign portfolio investments in the private sector in the early part of the year were directed primarily into Slovenian companies. Banks did not borrow abroad in the first two months of the year, but the forecasts point to

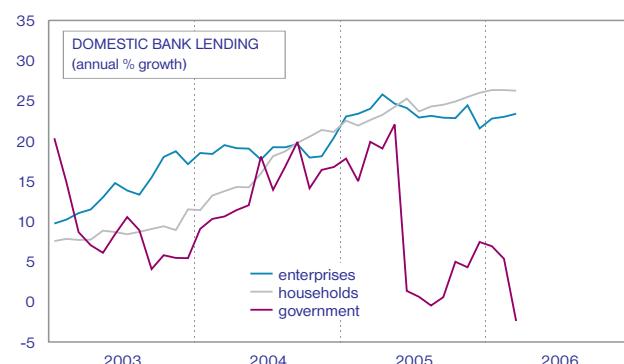

high inflows in the coming months. Companies took on EUR 120 million of foreign loans in the first two months of the year, down 11% year-on-year.

The gross external debt passed EUR 20 billion in February. Banks have been the main factor in this year's rise in debt of EUR 617 million, as they were last year, this time owing to an increase in liabilities for deposits by non-residents. Portfolio investments by non-residents also saw the government external debt increase by EUR 76 million this year to EUR 2.2 billion. At EUR 6.9 billion, debt maturing in less than one year accounts for just over a third of the gross external debt. This was exceeded by just under 30% by total foreign exchange reserves, which stood at EUR 9.0 billion. With gross claims against the rest of the world rising by EUR 418 million, the net external debt fell by EUR 199 million in the first two months of the year to EUR 2.6 billion.

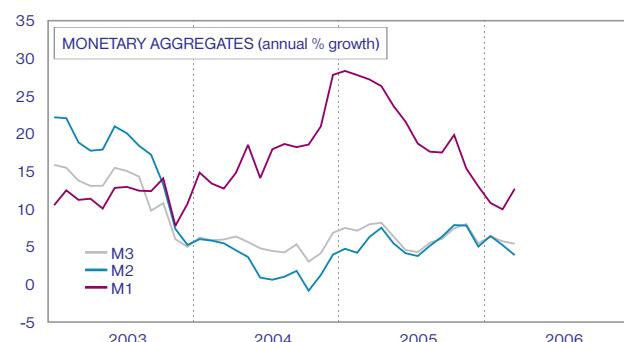

6. Money and Credit*

Bank lending activity is not increasing, but remains relatively high. Year-on-year growth in bank investments averaged 20.9% in 2005, and remained at a similar level in the first quarter of 2006. Corporate lending increased by SIT 219.7 billion in the first quarter of 2006, and household lending by SIT 46.8 billion. The increase in corporate and household lending was similar to that in the final quarter of last year. The government recorded net borrowing of SIT 17.0 billion in the final quarter of last year, but made net repayments of SIT 6.7 billion in the first quarter of this year. The banking sector's relatively high lending activity is to a great extent the result of the deepening of financial intermediation, with Slovenia's figure of 60% for private sector lending as a proportion of GDP significantly lower than in the majority of the eurozone countries. Another factor in the increase in borrowing was the corporate sector's move from foreign sources to domestic sources of financing because of the convergence of domestic interest rates with foreign interest rates. The proportion of the corporate

sector's total financing accounted for by foreign sources fell from just under one-third in 2004 to just over one-tenth in 2005. This proportion rose again slightly in the first two months of the year. Other factors in the increase in private sector lending, in particular household lending, were the increase in housing loans and the increased competition on the lending market.

M1 recorded a seasonal fall in the first quarter of 2006, while growth in the broad monetary aggregates remains low. M1 fell by SIT 10.5 billion in the first quarter of the year (compared with SIT 6.6 billion in the same period last year). The year-on-year rate of growth was 27.2% last March, but just 12.7% this March. Growth in the broad monetary aggregates remains low, as a result of the increase in alternative forms of saving such as mutual funds and investments abroad. Year-on-year growth in M2 averaged 5.2% in the first quarter, while the figure for M3 was 5.8%.

Growth in foreign currency deposits has been gradually rising since February, while growth in tolar time deposits has decreased, probably as a result of the increase in interest rates on foreign currency deposits. Foreign currency

deposits at banks increased by SIT 25.0 billion in February and March, while tolar time deposits fell by SIT 75.1 billion, which to a great extent is the result of a decrease in the government's tolar deposits. Year-on-year growth in foreign currency deposits rose from 6.3% in January to 8.9% in March, while that of tolar time deposits fell from 11.6% to 5.0% over the same period. Interest rates on euro deposits have risen by approximately 0.5 percentage points since the third quarter of last year, while those on short-term tolar deposits have fallen by approximately 0.3 percentage points.

Note: Because of the introduction of the International Financial Reporting Standards (IFRS) at Slovenian banks on 1 January 2006, all the figures cited in this section are based on values estimated in accordance with the IFRS, even though in the first quarter the majority of banks will continue to report to the Bank of Slovenia in accordance with the Slovenian Accounting Standards

7. Banking Sector*

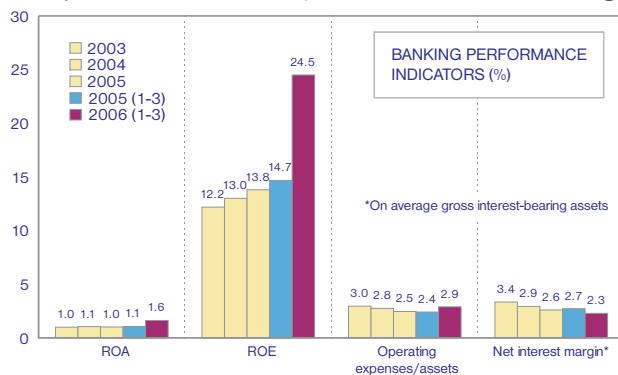

Year-on-year growth in total assets stood at 23.3% at the end of March. The total assets of the banking system increased by SIT 336.9 billion

Source: monthly bank figures.

in the first quarter of the year to SIT 7,316 billion. March's increase in total assets (SIT 84.9 billion) was SIT 14.2 billion more than February's increase, but was significantly lower than January's increase of SIT 181.3 billion, which was also the reason for the decline of almost 2 percentage points in the year-on-year rate of growth from the first two months of the year. At 38.4%, year-on-year growth in the total assets of banks under majority foreign ownership is 19.1 percentage points ahead of that for domestic banks.

Lending to non-bank sectors was the largest contributor to the increase in the banking sector's total assets. The increase in lending to non-bank sectors has accounted for 78% of the increase in the banking sector's turnover this year, or SIT 262.9 billion. Year-on-year growth in lending to non-bank sectors remains at 26.3%, although March's increase in lending was stronger than those in January and February. Lending to non-bank sectors by banks under majority foreign ownership grew significantly faster than that of domestic banks. The first recorded a year-on-year rate of 39.8%, while the second recorded a rate of 22.1%. At 21.7%, year-on-year growth in lending to companies was similar to that recorded last February, while the rate for household lending was a high 26.8%. Households recorded heavy borrowing of SIT 26.8 billion from banks in March, much higher (62.2%) than last year's average monthly increase in such lending. The contraction of the tolar lending market continued, with foreign currency lending to non-bank sectors increasing by 67.2% year-on-year, compared with a rate of just 2.7% for tolar lending.

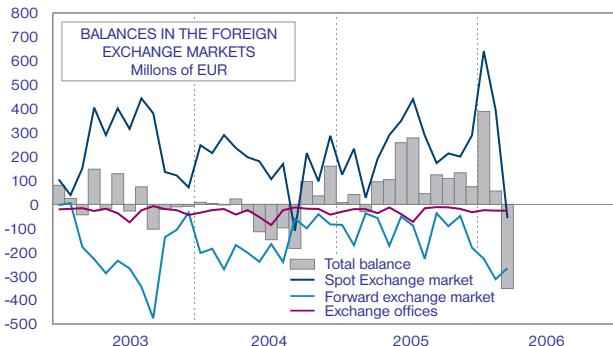

The proportion accounted for by short-term lending has risen slightly.

The increase in bank borrowing abroad accounted for more than one-half of the increase in total assets in the first quarter, while deposits by non-bank sectors accounted for less than one-sixth. On the financing side, banks have recorded an increase of SIT 190.2 billion in liabilities to foreign banks this year, while deposits by non-bank sectors have increased by just SIT 50.3 billion. This imbalance is also seen in the year-on-year rates of growth in the two forms of financing. The first was 73% in March, while the second was just 7.4%. Growth in household deposits was particularly weak at just 6.2% year-on-year, with a decline of SIT 5 billion actually being recorded in March.

In the first quarter banks generated a pre-tax profit of SIT 21.3 billion, up 39.8% from the same period last year. The main factors in the high growth in profit were positive year-on-year growth of 4% in net interest income, strong growth of 29.2% in non-interest income, and, above all, lower costs for net impairments and provisioning (down 40.5%). The largest rise in non-interest income was recorded by net gains on financial assets (liabilities) held for trading (20.5%), while net fees and commissions also increased (19%). Growth in operating costs has been rising over the recent period, and amounted to 11% year-on-year in March, which reflects a number of institutional changes that banks have faced recently (the introduction of the IFRS, preparations for the introduction of the euro, the implementation of the CAD directive), but the rate is still half of that recorded by the banking sector's total assets.

Note: Because of the introduction of the International Financial Reporting Standards (IFRS) at Slovenian banks on 1 January 2006, all the figures cited in this section are based on values estimated in accordance with the IFRS, even though in the first quarter the majority of banks will continue to report to the Bank of Slovenia in accordance with the Slovenian Accounting Standards

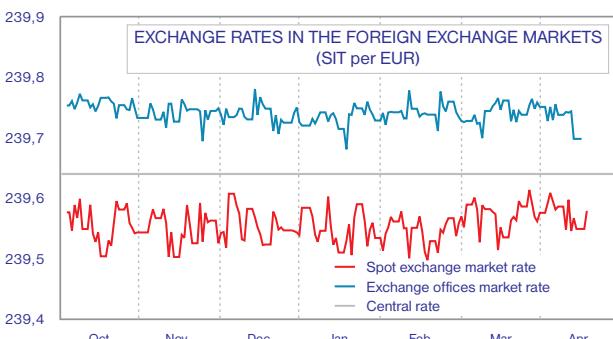

8. Exchange Rate

Net demand for foreign exchange on the market was above-average in March. At EUR 351 million, it was the highest since September 2004. In the context of the net demand for foreign exchange, foreign exchange reserves fell by EUR 247 million in March, and were down EUR 31 million from the end of last year.

Transactions on the spot market accounted for just EUR 58 million of the net demand for foreign exchange. Non-residents recorded net supply of EUR 47 million, and private individuals EUR 18 million. The net demand for foreign exchange by companies (primarily for paying for current transactions with the rest of the world) has been above-average for two consecutive months, at EUR 99 million in February and EUR 122 million in March.

The largest contribution to the overall net demand for foreign exchange came from transactions on the forward market. Only non-residents recorded net demand on the forward market. Banks sold EUR 312 million of foreign exchange to non-residents, and purchased EUR 45 million from domestic companies, EUR 30 million more than in February.

In the context of the net demand for foreign exchange on the spot market, the tolar exchange rate against the euro depreciated by 0.01 percentage point in March to a level 0.03% below the central rate. The euro exchange rate on the exchange office market is relatively stable, having remained at 0.05% above the central rate during the final quarter of last year and the first four months of this year.

9. Interest Rates

The Bank of Slovenia last changed its key tolar interest rates on 3 March. It cut the foreign exchange and reverse foreign exchange swap rates by 0.5 percentage points to 0.75% and 0.25% respectively. This also cut the refinancing rate, which is equal to the ECB refinancing rate plus the Bank of Slovenia foreign exchange swap rate, by 0.25 percentage points to 3.25%, the ECB having simultaneously raised its refinancing rate by 0.25 percentage points. There were also changes in the rate on 60-day tolar bills, from 3.75% to 3.5%, and the lombard loan rate, from 4.75% to 4.5%. On 1 April the Bank of Slovenia also made its first change in the interest rate on the long-term deposit since 30 July 2004, reducing it by 0.5 percentage points to 3.70%.

End of period % per annum	2006			
	2004	2005	Mar.	Apr.
Bank of Slovenia interest rates				
Refinancing rate	3.25	3.75	3.25	3.25

Housing loans	6.68	6.59	6.56	6.56

¹⁾ nominal interest rates

The interbank market responded to the changes to the Bank of Slovenia's key interest rates, prompting the spread between short-term and medium-term interest rates to close further. The yield curve for quoted Sitibor rates is flattening for the period of one day to three months. This indicates the financial markets' expectations of further cuts in the Bank of Slovenia's key interest rates towards the end of this period. The Sonia overnight deposit rate, which over February and March fell sharply in line with the changes in the Bank of Slovenia's key interest rates, has been extremely stable since the beginning of April, fluctuating between 3.35% and 3.40%, down 0.35 percentage points on average from January. The interest rates on 3-month treasury bills also fell in March from 3.28% to 3.17%, which was not reflected in the interest rates on 12-month treasury bills, which remained unchanged at 3.36%.

Declared interest rates on tolar deposits fell again slightly in March and April. Having risen towards the end of last year and this February, the interest rates on longer maturities (one year to more than five years) fell again in March and April, the average reaching a historical low in April. The same applies to the interest rates on short-term deposits, where the trend of decline ceased somewhat towards the end of last year, but has reappeared over last two months. This is a reflection of the response of tolar deposit rates to the reduction of the Bank of Slovenia's key interest rates, while interest rates on foreign currency deposits of up to one year have been moving in the opposite direction over the last two months, rising in response to the rise in ECB interest rates.

The decline in declared lending rates also continued. In April they fell on both short-term and long-term loans to the corporate sector, but remained unchanged on housing loans. After recording a relatively strong increase of 23 basis points in February, interest rates on consumer loans fell again in March and April.

IV. NOTES ON METHODOLOGY

General Notes

Sectors

External sector consists of non-residents.

Residents of the Republic of Slovenia are defined as:

- companies and other legal entities with a registered office in the Republic of Slovenia, except their branches abroad;
- branches of foreign companies entered in the Companies Register of the Republic of Slovenia;
- sole proprietors or natural persons, independently performing business activities as their prime occupation, with a registered office in the Republic of Slovenia or having permanent residence in the Republic of Slovenia;
- natural persons with permanent residence in the Republic of Slovenia;
- natural persons temporarily residing in the Republic of Slovenia holding a residential or working visa valid for no less than six months;
- diplomatic, consular and other representative offices of the Republic of Slovenia abroad financed from the Budget as well as Slovene citizens employed at these representative offices and their family members.

All other persons and entities shall be deemed non-residents.

Domestic sector is broken down to monetary and non-monetary sector.

Monetary sector consists of the Bank of Slovenia and commercial banks. Commercial banks (hereinafter "banks") are deposit money banks that accept sight deposits and have banking licenses granted by the Bank of Slovenia. Only domestic banks, owned by residents or non-residents, are included.

Non-monetary Sector is further divided into following sub-sectors: Non-monetary financial institutions, General Government, Individuals, Enterprises and Non-profit institutions.

Non-monetary financial institutions include Savings banks, Co-operatives and other financial institutions.

General Government comprises Central Government and Other General Government. **Central Government** mainly consists of the Budget. **Other General Government** contains local communities and entities established by General Government - institutions, funds, companies, clubs and other societies engaged in education, health, culture, social insurance, trade unions and other organizations.

Households (Individuals) include resident individuals.

Enterprises comprise firms in private or public ownership or control, except for those included in the General Government.

Non-profit institutions consist of all entities, not included in any other sector.

Characteristics of the data

Data present stocks on assets and liabilities at the end of the period.

Data on stocks nominated in foreign currencies are converted into Tolars using Bank of Slovenia end of period middle exchange rate.

Data in tables are not seasonally adjusted.

Table: Republic of Slovenia: general information

Table shows basic general data on Slovenia and its economy. In the "latest actual" column the latest available data for the current year are published. Data sources for the table are Bank of Slovenia, Ministry of Finance and The Statistical Office of the Republic of Slovenia.

1. MONEY AND BANKS

The tables of the chapter on "Money and banks" in the monthly bulletin of the Bank of Slovenia are published for the last time in the current form for March 2006 and will be replaced by the structurally similar tables, built in accordance with the standards of the European central bank, i. e. euro area. An exception is the table: "Bank of Slovenia 10-day balance sheet" (current table 1.9), which will not change.

The changes will be explained in the Notes on methodology of the bulletin. The new data will be available to the public from the December 2004 on and in addition to that the time series of the current tables will still be disposable on the home page of the Bank of Slovenia.

Last published data are preliminary.

* Because of the gradual implementation of International Accounting Standards in commercial banks in Slovenia data for January, February and March 2006 are not consistent with the data of previous periods.

Sectorization of banks' data as from April 30, 1999

For data from April 30, 1999 on a sectorization has been implemented according to ***Regulation on Introduction and Implementation of Standard Classification of Institutional Sectors***, (hereinafter "SKIS") - Official Gazette 56/98. SKIS which implemented a national standard for economic sectorization is based on European System of Accounts 95 and is in accordance with System of National Accounts 93.

According to SKIS the sectors of the economy are: 1.) Non-financial corporations, 2.) Financial corporations (central bank, commercial banks, other financial institutions), 3.) General government, 4.) Households, 5.) Non-profit institutions serving households and 6.) External Sector (non-residents)

There has been no change regarding definition of *Non-resident*.

Domestic sector is broken down to monetary sector and non-monetary sectors.

Monetary sector consists of the Bank of Slovenia and commercial banks. Commercial banks (hereinafter "banks") are deposit money banks that accept sight deposits and have banking licenses granted by the Bank of Slovenia. Domestic banks, owned by residents or non-residents, are included.

Non-monetary Sectors are: Non-financial corporations, Non-monetary financial institutions, General government, Households, Non-profit institutions serving households.

Non-financial corporations are legal persons - market producers of goods and non-financial services.

Non-monetary financial institutions consist of Savings banks, Co-operatives and *Other financial institutions*. *Other financial institutions* are: 1. Other financial intermediaries, except insurance corporations and pension funds (mutual funds, investment funds and financial leasing comp.), 2. Financial auxiliaries (securities brokers, stock exchanges) and 3. Insurance corporations and pension funds.

General government consists of: 1. Central government (administrative departments of state and central government agencies), 2. Local government (local administration, local agencies) and 3. Social security funds.

Households: resident individuals as consumers and resident individuals as sole proprietorships and partnerships being market producers and having no independent legal status. The data of the latter have been prior to April 30, 1999 included in the sector Enterprises.

Non-profit institutions serving households are clubs, political parties, trade unions, churches or religious societies, humanitarian and charity organizations, professional societies.

Table 1.1.: Monetary Aggregates

Table 1.1 shows stock data at the end of month for base money, monetary aggregates M1, M2 and M3, calculated according to the national definition and according to the harmonised definition of the European Central Bank (hereinafter: ECB).

The definition of base money is define as the sum of: *Banknotes in circulation, Banks' settlement accounts, Overnight deposit and Other deposits at the Bank of Slovenia* (Savings banks' settlement accounts, Savings banks' and Savings and loan undertakings' reserve accounts, transactional accounts of the Central and Local Government).

Data sources are banks' and Bank of Slovenia's bookeeping data, which refer to the end of the month.

Calculation of monetary aggregates according to the national definition is shown on the liabilities' side of Table 1.2: Monetary Survey – Consolidated Balance Sheet of the Monetary System (See methodological notes referring to Table 1.2).

Harmonised monetary aggregates for Slovenia are calculated according to ECB's definition of harmonised monetary aggregates of euro area, which is evident from documents published on web pages of the ECB (<http://www.ecb.int>). Main differences between the two definitions of monetary aggregates are as follows:

- limited maturity of items included (harmonised aggregates include liabilities of up to 2 years only),
- equal treatment of the foreign exchange liabilities (which are, in harmonised aggregates, included into adequate items together with those in domestic currency),
- status of the monetary neutral sector (the central government in the harmonised aggregates has the status of a monetary neutral sector) and
- inclusion of the money market fund shares / units into M3.

Composition of harmonised monetary aggregates, as defined by the ECB is:

- HM1 contains *currency in circulation* and *overnight (sight) deposits*.
- HM2 includes beside HM1 also *deposits with agreed maturity of up to 2 years* and *deposits redeemable at notice of up to 3 months*.
- HM3 includes *HM2, repurchase agreements* and *debt securities with a maturity of up to 2 years*. *Money market fund shares / units* financial instrument, which is according to ECB's definition also part of HM3, will be included in calculation when such institutions appear in Slovenia.

HM2 and HM3 are, for the period prior to July 2002, partly calculated as estimation, because of the unavailability of relevant bookkeeping breakdowns.

Table 1.2.: Monetary Survey - Consolidated Balance Sheet of the Monetary System

Table 1.2 shows consolidated balance sheet of all banks' and Bank of Slovenia at the end of the month. Data for banks are aggregated.

Domestic assets consist of banks' and Bank of Slovenia's claims on General Government arising from succession to the former SFR Yugoslavia and the bank rehabilitation program, and claims from loans and securities on other non-monetary sectors. Claims from succession and the bank rehabilitation program represent: claims of the Bank of Slovenia on the Succession Fund of the Republic of Slovenia (on account of the former National Bank of Yugoslavia Dinar cash), counterpart claims for Bank of Slovenia liabilities to the International Monetary Fund, government guaranteed bank rehabilitation bonds, government bonds for unpaid foreign currency deposits and claims on the former National Bank of Yugoslavia for foreign currency deposits.

Other assets include fixed assets of banks and of the Bank of Slovenia and some other items (doubtful claims, etc.).

In September 2003, the liability part of the Table changed due to methodological changes in the calculation of monetary aggregates under the national definition, because of gradual harmonisation with the definitions of the European Central Bank (changes were made to all time series).

To aggregate M1, *a vista* Savings deposits at banks were added, and therefore, it consists of currency in circulation and demand deposits at banks (including *a vista* Savings deposits) as well as at the Bank of Slovenia.

To aggregate M2, Tolar restricted deposits and securities in Tolar including subordinated debt were added, so that the aggregate consists in addition to M1 also of Tolar time deposits at banks, and Government time deposits at the Bank of Slovenia and of Tolar securities.

To aggregate M3, other foreign currency liabilities to central government and securities in foreign currency were added, so that M3 consists of M2 and foreign currency deposits and securities at banks.

Other liabilities consist of capital and reserves of banks and of the Bank of Slovenia and also include some other items.

In the Table as from April 30, 1999 in conformity with SKIS, items of assets and liabilities to other general government mean assets and liabilities to both Local Government and Social Security Funds. By analogy, enterprises mean non - financial corporations and non - profit institutions serving households, and individuals mean households.

From July 31, 1996 onwards, the data for Komercialna banka Triglav are no longer included in banks' data due to its bankruptcy.

Foreign assets/Bank of Slovenia and *Foreign assets/Deposit money banks* were changed because of changes in Tables 1.3. and 1.4. for the period from April 2000 onwards.

Table 1.3.: Balance Sheet of the Bank of Slovenia

The Table shows the Bank of Slovenia's assets and liabilities at the end of month.

Foreign Assets consist of: foreign currency, deposits abroad (*sight* and *time* deposits, from April 2000 on also foreign exchange deposits held by BS on the basis of repurchase agreements) first class securities of foreign issuers, monetary gold, reserve position and SDR holdings at the International Monetary Fund and other claims. *Other claims* mainly include balances on fiduciary accounts and with international financial organization.

Because of consolidation of statistical and bookkeeping records in February 2003, *International monetary reserves* are not presented as subitem of Foreign assets. International monetary reserves are shown in Tables 3.12. and 1.9..

Claims on General Government consist mainly of net claims on the National Bank of Yugoslavia taken over by the Succession Fund of the Republic of Slovenia. Claims on the state budget, which are the counterpart of the succeeded liabilities to the International Monetary Fund, are also included.

Repurchase agreements include loans extended to banks based on securities and foreign currency (currency swap). From April 2000 on the amount of the foreign currency swap is shown as a part of the foreign assets of the Central Bank, because of the gradual permanent purchase of foreign currency from the part of Central Bank. In accordance to this are claims based on currency swap with domestic banks shown for the period up to March 2000 in the item *Repurchase* and thereupon in the item *Deposits*.

Other claims include some Bank of Slovenia's small deposits with banks and advance payments to the banks for repayments of Bank of Slovenia bills sold to other buyers through banks as agents.

General Government Deposits comprise deposits of Central Government budget.

Restricted deposits mainly result from deposits earmarked for import payments and deposits covering letters of credit, guarantees and credits taken abroad.

Money transfers in transit comprise money in transit.

Revision in time series caused changes in items *Deposits/Enterprises* and *Deposits/Nonmonetary financial institutions* for the period from February 1998 on. Whereas item *Deposits/Other demand deposits*, which represents the sum of the mentioned two remains unchanged.

Table 1.4.: Balance Sheet of Deposit Money Banks

The Table summarizes data on assets and liabilities of banks at the end of the month.

Demand deposits comprise giro accounts of enterprises and non-profit institutions, General Government, non-monetary financial institutions and giro and current accounts of households (see Table 1.6.).

Savings deposits include short and long-term tolar savings deposits of households (see Table 1.6.).

Time deposits consist of short and long-term time deposits of households, General Government, non-monetary financial institutions, enterprises and non-profit institutions (see Table 1.6.).

Restricted deposits represent deposits of enterprises and non-profit institutions, General Government and individuals to be used for money transfers to foreign countries or in cover of letters of credit, loans taken abroad or euro-checks, and can also be used for foreign currency exchange office transactions.

Note 1: In June 1996 foreign liabilities of banks for the undue foreign debt of former SFR Yugoslavia in the amount of SIT 49,027 million were taken over by the Government. Liabilities of banks to the Government were increased for the same amount. The banks decreased their foreign liabilities and claims on the Government for the part of matured allocated debt which they had been repaying to the government fiduciary account since January 1994 totalling SIT 18,078 million.

Bank of Slovenia's claims on and liabilities to banks are equal to the corresponding items in the banks' aggregated balance sheet with few exceptions: Item 'Reserves' (Giro and reserves accounts) on the assets side of banks' balance sheet is almost the same as item 'Deposits of banks' (Giro and reserves accounts, foreign currency deposits) on the liabilities' side of the Bank of Slovenia's balance sheet (Table 1.3.). Similar applies to items 'Liabilities to the banking system' arising from the Bank of Slovenia loans and 'Claims on domestic banks' based on loans in the Bank of Slovenia balance sheet (Table 1.3.). Discrepancies result from differences in accounting accuracy.

In February 2003 were items *Currency and Deposits* and *Loans from BS* diminished by the amount - claim i.e. liabilities based on currency swap of central banks with domestic banks, for period from April 2000 on. (More in Methodological notes for Table 1.3. - *Repurchase*). Total assets i.e. total liabilities were diminished accordingly.

Claims on and liabilities to domestic non-monetary sectors are shown in detail in Tables 1.5. and 1.6. Foreign assets and foreign liabilities are shown in detail in Tables 1.7. and 1.8.

Table 1.5.: Deposit Money Banks' Claims on Domestic Non-monetary Sector

The Table shows banks' claims resulting from loans and securities classified by domestic non-monetary sectors, which are also represented in Table 1.4. in item 'Claims on non-monetary sectors - Total'.

As from April 30, 1999 SKIS has been implemented in the sectorial distribution of the economy and therefore:

- the sector *Enterprises and non-profit institutions* comprises the data on SKIS Sectors *Non-financial corporations* and *Non-profit institutions serving households*;
- the sector *Central government* comprises the data on SKIS subsector *Central government*;
- the sector *Other general government* comprises the data on SKIS subsectors *Local government* and *Social security funds*;
- the sector *Individuals* comprises the data on SKIS sector *Households*;
- the sector *Non-monetary financial institutions* comprises the data on *Savings banks* and *Savings cooperatives* as well as the data on SKIS sector *Other financial institutions*.

Marketable securities are long or short-term securities acquired and held by a bank with the intention of reselling them in the short term.

Investment securities are long or short-term securities acquired and held for yield or capital growth purposes and are usually held to maturity.

Table 1.6.: Deposit Money Banks' Liabilities to Domestic Non-monetary Sector

The Table shows banks' liabilities from deposits of domestic non-monetary sectors which correspond to the 'Liabilities to non-monetary sectors - Total' in Table 1.4.

As from April 30, 1999 SKIS has been implemented in the sectorial distribution of the economy and therefore:

- the sector *Enterprises and non-profit institutions* comprises the data on SKIS Sectors *Non financial corporations* and *Non-profit institutions serving households*;
- the sector *Total General government* comprises the data on SKIS sector *General government*;
- the sector *Individuals* comprises the data on SKIS sector *Households*;
- the sector *Non-monetary financial institutions* comprises the data on *Savings banks* and *Savings cooperatives* as well as the data on SKIS sector *Other financial institutions*.

Table 1.7.: Deposit Money Banks' Claims to Non-residents

The Table shows banks' claims to non-residents by currency- Tolars and foreign currencies. Deposit Money Banks' Claims to non-residents are shown in Table 1.4. in item 'Total – Foreign assets'.

In February 2003 was item *Deposits* diminished by the amount - claim based on currency swap of domestic banks with central banks, for period from April 2000 on. (More in Methodological notes for Table 1.3. - *Repurchase*). Item Total claims on non-residents was diminished accordingly.

Table 1.8.: Deposit Money Banks' Liabilities to Non-residents

The Table shows banks' liabilities to non-residents broken by currency- Tolars and foreign currencies. Deposit Money Banks' Liabilities to non-residents are shown in Table 1.4. in item 'Total – Foreign liabilities'.

Table 1.9.: Bank of Slovenia 10-day balance sheet

In April 2002 the definition of base money has been changed to the sum of: *Banknotes in circulation*, *Banks' settlement accounts*, *Overnight deposit* and *Other deposits at the Bank of Slovenia* (Savings banks' settlement accounts, Savings banks' and Savings and loan undertakings' reserve accounts, transactional accounts of the Central and Local Government).

The data time series have been recalculated according to the change in definition.

The off balance items *Buy/sell foreign exchange swap* and *Sell/buy foreign exchange swap* are from April 2003 on are included in the table.

Bank of Slovenia 10-day balance sheet together with off balance items is in terms agreed for publication shown on web page:

http://www.bsi.si/html/eng/financial_data/hit/balance_bs_dekadna.html

2. FINANCIAL MARKETS

Interest rates (Table 2.1. - 2.6.)

Annual interest rates.

r = real rate over Tolar indexation clause

r(D) = real rate over foreign exchange indexation clause

n = overall nominal rate

TOM = Tolar indexation clause

EUR = foreign exchange clause

Table 2.1.: Bank of Slovenia Interest Rates

Lombard loan: Within the framework of standing lombard facility Bank of Slovenia provides one-day lombard loans to banks and savings banks with securities used as collateral. The pledged securities should amount to 110% of the amount of lombard loan.

Repo interest rate for the temporary purchase of treasury Bills, tolar and foreign currency Bank of Slovenia's Bills with obligatory repurchase in 7 days was the weighted arithmetic average of daily repo interest rates until March 2004 (effective interest rate). The new 7-day repo was introduced in March 2004, it is offered on a closed basis. The interest rate announced is the latest valid interest rate.

Interest rate on banks' obligatory reserves: 1 percent per year since October 1991.

The overnight-deposit interest rate is an interest rate applying to the deposits placed by banks and savings banks on an overnight term with the Bank of Slovenia.

Long-term deposit at Bank of Slovenia has been established in July 2004. Variable interest rate is defined every 2 months for the next two months. It refers to 60-day tolar bills' interest rate valid at the time of quotation, increased by 0,2 percentage points.

Tolar bills are registered securities subscribed by banks and savings banks with maturity of 60 and 270 days. 60-day bills are offered on a permanent basis, 270-day bills were sold by auction till February 2004, afterwards are offered on a closed basis. Interest rates for tolar bills are nominal given, in the case of auctions they are effective rates. Offers of 270-tolar Bills have been frozen since November 2004.

Foreign currency bills are transferable registered securities not issued in series. They are offered on permanent basis and can be purchased by banks (by other legal persons through banks till 3rd May 2000). They are sold for Euros (till 16.02.1999 for German Marks) or US Dollars at a discount with maturities of two to four months.

Penalty rate is generally used in cases of overdue payments. The penalty rate is determined by the Law on the legal penalty rate since 28.06.2003.

Interest rates for a certain type of instrument in the table are those last valid in a period (except in the case of effective interest rates). The annual averages of interest rates are computed as simple arithmetic averages of monthly data, if such data are available.

Table 2.2.: Interbank Money Market Rates and Indexation Clause

Interbank market

The figures are annual nominal interest rates for unsecured Slovenian tolar deposits on the Slovenian interbank market. Interest rate for overnight deposits (SIONIA) is weighted average interest rate for overnight deposits. Interest rate for deposits till 30 days is weighted average interest rate for deposits with maturity till 30 days.

The annual averages of interbank interest rates are computed as simple arithmetic averages of monthly data.

Tolar indexation clause

Tolar indexation clause (TOM) is annual interest rate, calculated by the Statistical Office of Republic of Slovenia and used for preserving the value of financial liabilities and assets in domestic currency.

TOM (monthly): since 5th August 1995: average of previous 3 months' inflation (until June 1995 indexation was based on so called R that was equal to the previous months' inflation rate, from 1st June till 4th August 1995 indexation was based on the average of previous 3 months' inflation); since February 1996: 4 months; since December 1996: 6 months; since May 1997: 12 months.

Financial liabilities and assets in domestic currency, with maturity less than 1 year, are not revalued since July 2002.

Foreign exchange indexation clause

Monthly rate is growth rate of Bank of Slovenia's end of month exchange rate for EUR (DEM) or USD.

Annual rate is computed from monthly rate on the conform basis, taking into account the actual number of days in the month and in the year.

Figures for 1993 to 1998 in columns 4, 6 and 8 represent growth of the category in the period December to December.

Table 2.3.: Average Commercial Banks' Interest Rates

Average interest rates (r and $r(D)$) are weighted arithmetic averages of the minimum and maximum interest rates.

Spread is the difference between the weighted minimum and maximum interest rate: $r_{min}=r - spread$, $r_{max}=r+spread$.

Nominal interest rates (n) are total annual interest rates.

The figures for the latest month are always provisional; updated figures in the following Monthly Bulletin are not marked with sign *.

With September 1995 was abolished the revaluation with the tolar indexation clause for obligations in domestic currency till 30 days, with July 2002 also revaluation for all loans and deposits in domestic currency with maturity less than 1 year.

Note 1: With the 1st July 2002 the "Law on changes and completions of the law on penalty rate and tolar indexation clause" came into force. It prohibits the use of tolar indexation clause for assets and obligations in domestic currency with the maturity less than 1 year. At the same time have most banks also stopped using the foreign exchange clause for short-term loans and deposits, which has reduced the number of reporting banks and led to series breaks.

Table 2.4.: Average Commercial Banks' Interest Rates on New Loans

Up to and including December 2005 average interest rates on new loans are calculated on a basis of the data of the eight biggest banks, selected by balance-sheet-total criterion. Starting in January 2006 data series represent average interest rates of all monetary and financial institutions.

New loans represent new contracts in the reference month. Data for consumer loans to households is collected on the representative sample of new loans (limited number of reports, minimal amount of a single loan) up to and including December 2005, further on data represents all new consumer contracts. Any automatically changed conditions of lending contracts do not represent new business. Interest rate on new business is a nominal interest rate increased by a sum of base interest rate or interest rate bounded to the euro exchange clause and subsidy per annum. Average interest rate on new business does not include any administrative or other costs.

All the interest rates are nominal weighted arithmetic averages, where value of certain type of loan represents the weight, except for foreign currency loans where the growth of foreign exchange rate is not taken into consideration.

The interest rates are presented separately, according to their type:

- NOM = a nominal interest rate, without indexation,
- TOM = an interest rate is bound to the base interest rate (TOM),
- D = an interest rate is bound to the euro exchange clause.

The annual averages are computed as simple arithmetic averages of monthly data.

...* - confidential data

Table 2.5.: Average Commercial Banks' Interest Rates on Basis of Interest Income and Interest Expenses

Interest rates are computed as the ratio of the amount of interest to the average balance of assets. Interest is represented by the interest income and interest expenses. The average amount of investments/assets is a sum of daily values divided by the number of days.

Because of the change in the frame of accounts for banks and savings banks since May 2002 the revalorization and interest incomes are no more represented separately, so the calculation of the real effective interest rates is no longer possible.

Table: Breakdown of bank` assets and liabilities by type of Indexation Clauses

		Loans			Deposits			Total		
		TOM	D	NOM	TOM	D	NOM	TOM	D	NOM
2001	Jul.-Sep.	91.3	7.7	1.0	64.3	2.7	33.0	77.4	5.1	17.4

Ljubljana Stock Exchange (Tables 2.7. to 2.9.)**Table 2.7.: The Ljubljana Stock Exchange: Turnover by Market Segment and by Type of Securities**

Shares – Privatization Investment Funds shares are not included.
 PIF - Privatization Investment Funds shares.

Turnover is measured by a single counting.

Table 2.8.: The Ljubljana Stock Exchange: Market Capitalization and Turnover Ratio

Market capitalization by market segment and by type of securities is calculated as the sum of market capitalization of individual securities. Market capitalization of an individual security is calculated as the product of the number of listed securities and the market price at the end of period.

Turnover ratio is calculated as turnover in a period divided by market capitalization at the end of period.
 Short-term securities are not included in calculations of market capitalization and turnover ratio.

Table 2.9.: The Ljubljana Stock Exchange: Slovenian Stock Exchange Index and Bond Index

SBI - Slovenian Stock Exchange Index (index value: January 1994=1000)
 BIO - Bond Index.
 SBI, BIO - value of SBI and BIO at the end of period.
 dT - change of index value by points.
 d% - change of index value in percentage.
 Min, Max - minimum and maximum value of index in a period.

Exchange rates (Tables 2.10.1. to 2.11.4.)**Tables 2.10.: Selected Bank of Slovenia Exchange Rates- Average Rates**

The tables show Bank of Slovenia middle rates. Annual rates are computed as arithmetical averages of monthly rates. Monthly averages are computed as arithmetical averages of daily rates (Sundays and holidays are not included).

As from 1st January 1999, with introduction of European Monetary Union, the European Currency Unit (XEU) was replaced by the Euro (EUR) at the exchange rate 1 :1. Fixed exchange rates between the Euro and the national currencies of the EMU Member States (valid from 1st January 2001):

1EUR =	40.33990 BEF
=	1.95583 DEM
=	340.75000 GRD
=	166.38600 ESP
=	6.55957 FRF
=	0.78756 IEP
=	1936.27000 ITL
=	40.33990 LUF
=	2.20371 NLG
=	13.76030 ATS
=	200.48200 PTE
=	5.94573 FIM

Due to the introduction of Euro in January 2002 the exchange rates of members of EMU currencies (ATS, FRF, DEM, ITL) are replaced by the exchange rates of some EU accession countries (CZK, HUF, PLN, SKK).

Introduction of a new currency, the Kuna (=1,000 previous Croatian Dinars) on 30th May 1994.
 The Polish zloty was denominated on 1st January 1995 at the exchange rate 1 new zloty for 10.000 old zlotys.

Tables 2.11.: Turnover and Foreign Exchange Market

Annual rates are computed as arithmetical averages of monthly rates. Monthly rates are averages computed from daily rates on working days, weighed with turnover. Foreign currency exchange offices also report transactions on Saturdays, not shown in the table, but included in the monthly and annual totals.

Totals also include transactions between banks and enterprises and between banks solely. In addition to that the transactions between enterprises are included until 30th September 1999 and the transactions of banks with non-residents and households from 1st October 1999.

On the spot exchange market the timing of settlement is at latest 2 working days from the agreement. The forward exchange market is designed for transaction where the timing of settlement is at least 2 working days after the agreement.

The data by the contract agreement are defined by the agreement time of the transaction. The data by the contract settlement are time defined by the settlement time of the transaction.

Data for the turnover on the forward exchange market are available from October 1999. Also the data for turnover by the settlement are available only from October 1999.

3. BALANCE OF PAYMENTS AND EXTERNAL POSITION

Balance of Payments (Tables 3.1. to 3.4.)

General notes

In most respects the Slovenian Balance of Payments (BOP) conforms to the methodology of the IMF's *Balance of Payments Manual, fifth edition* (1993).

Characteristics of the Data

Minus sign (-) indicates imports or surplus of imports over exports in the current account, increase in assets or decrease in liabilities in the capital and financial accounts, and growth of reserve assets. Data for transactions are converted from original currencies to EUR using the daily Bank of Slovenia exchange rates, or average exchange rates of the period if the exact date of transaction is not known.

Revision policy

Revision of balance of payments, international investment position and gross external debt data occur as follow:

- revision for **monthly data** are made with the release of:
 - the corresponding quarterly data;
 - the corresponding revised quarterly data;
 - the international investment position data for the corresponding year; and
 - the revised international investment position data for the corresponding year;
- revision for **quarterly data** are made with the release of:
 - the data for the following quarter;
 - the international investment position data for the corresponding year; and
 - the revised international investment position data for the corresponding year;
- revision for **annual** international investment position and external data are made with the release of the data for following years.

Data sources

BOP is compiled on the basis of monthly available data on transactions (ITRS), stock positions and estimates.

- **Reports on transactions**
 - accounts of domestic banks held with correspondent banks abroad (including the central bank),
 - nonresident accounts held with domestic banks,
 - non-bank resident accounts abroad,
 - other accounts between residents and nonresidents,
 - payments between residents and nonresidents in Slovenian Tolars.
- Classification of transactions is using the descriptions of transactions provided by the banks' clients;
- **Reports on short-term claims and liabilities to non-residents (form SKV)** is a source for short-term trade credits since 2002.
- **Customs declarations;** from 1.5.2004 data on goods item for EU countries are collected through reports (**Intrastat**), while data for other countries are collected through Customs declarations (**Exstrastat**).
- **Reports to the Bank of Slovenia on registered credits granted to and disbursed abroad;** For the period from 1997 also data on nature of direct payments from foreign creditors, which settle liabilities of domestic debtors to other nonresidents, are available from these reports.
- **Yearly surveys on balance and transactions with affiliated enterprises (SN)** is a source for reinvested earnings of direct investments.
- **Accounting data of the Bank of Slovenia;**
- **Commercial banks balance sheet data;**
- **Estimates.**
- **Monthly survey of duty free shops.**

There are several estimation models used in the BOP for the valuation of data on imports, incoming travel, labor income, Italian pensions (till the end of 1998), foreign currency and deposits of resident households.

Current account

Goods

Data for the General merchandise are based on customs declarations. Data on imports c.i.f. and exports f.o.b. are compiled by the Statistical Office. **Adjustments for valuation** of data on imports and **coverage** of data on imports and exports are made by the Bank of Slovenia. The imports data are adjusted from c.i.f. basis to f.o.b. basis by the coefficient which is equal to the weighted average of coefficients between the c.i.f. and f.o.b. values of imported goods (for the available sample), separately calculated for each type of merchandise, transport means and country of the exporter. Since 2004 the coefficient amounts to 1.0306, prior 2004 it amounted to 1.0393. The **coverage adjustments** are made for goods imported without customs declaration and for which data are available from ITRS or reports of duty free shops and consignment warehouses. Since 1.5.2004 the coverage adjustments include as an estimate also data on imports of motor vehicles from EU by natural persons, not covered in Intrastat System.

Services

Transport

The source for recording of transportation services is the ITRS.

Travel

The ITRS sources used in the compilation of the **incoming travel** item include: a.) health and education related services, b.) payments made by nonresidents to Slovenian tourist agencies, c.) net withdrawals in tolars from nonresident accounts, d.) money spent in casinos by nonresidents, e.) data on sales of goods to nonresidents in duty free shops and consignment warehouses, f.) payments with credit cards and g.) sales of Tolars to nonresidents abroad.

The data on sales of Tolars to nonresidents in Slovenia are estimated on the number of border crossings of foreign travellers and on the number of nights spent by foreign tourists.

Data source for the item expenditure on travel are ITRS and estimations.

Construction services

The source of data is ITRS. All construction works are recorded under construction services.

Insurance services

Premiums on life and non-life insurance are split into two components: (i) the service charge included in insurance services and (ii) the premium in a narrow sense recorded as current transfer. The calculation of service charge is based on a fixed percentage of the premium payments.

Government services

All transactions settled through accounts of Slovenian embassies abroad as well as transactions coded as government services settled through accounts of Slovenian banks with foreign correspondents are included in this item.

Income

The ITRS is used as a main source for recording of **compensation of employees**. As many wages are not paid through domestic banks, supplementary estimations of such receipts from the neighboring countries are made. Data on **reinvested earnings and income on equity** are available in an annual survey of Slovenian direct investors abroad and of foreign direct investment enterprises in Slovenia. The present recording of **other investment income** (interest income) is based on the actual payments with the exception of income on reserve assets and loans (including long-term trade credits), which is based on an accrual principle from 2002 onwards.

Current transfers

In this item workers' remittances, insurance and other transfers of other sectors are included. The **insurance** item is calculated as a difference between the insurance premiums received and the claims paid on the credit side and vice versa on the debit side. The main source for **other transfers** are the ITRS and the customs documents.

Capital and financial account

Capital account

Capital transfers

Migrants' transfers covers not only payments recorded by domestic banks but also the changes in residency of accounts held with these banks.

Financial account

Direct investment

Direct investment is recorded on the basis of reporting of payments through domestic banks and of data from customs declarations. Data on reinvested earnings is based on yearly surveys on balance and transactions

with affiliated enterprises (SN) and are included monthly as one twelfth of the yearly figure. Until 1997 purchase and sale of all shares and equity have been included in this item. From the beginning of 1997, purchase and sale of shares that assure more than 50 percent of company's equity, a control package of shares, shares issued by domestic companies on the primary markets with the purpose to increase the nominal capital of the company are included in this item, due to capital control measures. With the new Foreign Exchange Act in 1999 direct investment 10% rule is applied. From 2001 onwards inter-company debt transactions between affiliated enterprises (10 percent or more capital share) are recorded as direct investment - other capital transactions. Until 2001 this kind of transactions are recorded as loans. Since 2002 the item other capital within direct investments includes also data on short-term trade credits between affiliated enterprises.

Portfolio investment

Until 1997 only data on sales and purchases of debt securities through banks were included in this item. Since February 1997 equity securities, not having the characteristics described in the note on Direct investment are included in this item too. With the new Foreign Exchange Act in 1999 portfolio investment transactions include all transactions below the 10% rule.

Loans

From 2001 onwards inter-company debt transactions between affiliated enterprises (10 percent or more capital share) are not recorded as loans, but are recorded as direct investment - other capital transactions. Loans (including long-term trade credits) and related income has been calculated according to the accrual principle from 2002 onwards and according to the cash principle prior 2002.

Other investment

Other investments except equity between affiliated enterprises are included here and not under Direct investment. Short-term trade credits are estimated and recorded on net basis as change of assets till 2001. Estimation is based on comparison of data on imports and exports from customs declarations with corresponding settlements. Since 2002 onwards short-term trade credits are included on the basis of reports on short-term claims and liabilities to non-residents. Short-term trade credits between affiliated enterprises are included in direct investments. Item currency and deposits of households is estimated by using data on net purchases of foreign currency in foreign exchange offices, net deposits to households' foreign exchange accounts at domestic banks, estimated expenditure of resident households abroad (see Travel).

International monetary reserves

Reserve assets and related income has been calculated according to the accrual principle from 2002 onwards and according to the cash principle prior 2002.

Tables 3.1.: Balance of Payments 1988 - 1992

Excluding transactions with former Yugoslav Republics; processing is included in services, excluded in merchandise.

Note 1: For 1988 and 1989, Official sector data is included in Other sectors.

Note 2: For 1988 through 1990, Statistical errors include sales of claims from bilateral agreements to the former National Bank of Yugoslavia and its purchases of foreign currency through Slovenian foreign currency exchange offices.

Note 3: Reserve assets of the Bank of Slovenia.

Tables 3.2. and 3.3.: Balance of Payments

The data for the current year are revised monthly. Data become final according to the revision practice (see revision practice).

In June 2001 Slovenia acquired 16.39% share in holdings of former Yugoslavia with BIS (Bank for International Settlements), consisting of gold 16.9 mio SIT (EUR 77.8 million), foreign currencies 1.1 mio SIT (EUR 5.3 million) and shares 3.0 mio SIT (EUR 13.8 million). This transaction is not considered to be a balance of payments' flow, but a part of 'other changes' item, which reconciles the international investment position in consecutive periods.

Note 1: CD: customs declarations - foreign trade definitions (Statistical Office of Republic of Slovenia).

Note 2: June 1996: includes issue of government bonds in exchange for a part of allocated foreign debt in the amount of 63.7 mio SIT (EUR 374.9 million). Banks' liabilities under foreign loans are decreased for the same amount and transferred to liabilities to Government.

Note 3: Issues of government bonds:

- August 1996 (EUR 253.7 million);
- June 1997 (EUR 205.1 million);
- May 1998 (EUR 500.0 million);
- March 1999 (EUR 400.0 million);
- March 2000 (EUR 400.0 million) and in February 2001 (EUR 100.0 million);
- April 2001 (EUR 450.0 million).

Note 4: For 1993-2001, short-term claims include net changes in commercial credits (received and granted). Since 2002 onwards short-term commercial credits are included on the basis of SKV reports on assets' and liabilities' side of balance of payments. Short-term commercial credits between affiliated enterprises are included in direct investments item while other commercial credits are included in other investments/trade credits.

Note 5: Includes mostly BS fiduciary accounts. In June 1996 the amount of 21.2 mio SIT (EUR 124.9 million) was transferred to regular BS reserve accounts.

Note 6: Use of IMF credit (assumed upon membership in January 1993).

Note 7: Reserve assets of the Bank of Slovenia.

Note 8: The data on reinvested earnings for the years 2005 and 2006 are not yet available, therefore a three-year average (from 2002 to 2004) of last available actual data from annual surveys on capital investments is included as an estimation. In the year 2006 this estimation will be replaced with the actual data on reinvested earnings for the year 2005 and with average RIE (2003-2005) for the year 2006.

Note 9: From 2001 there is a time series break on the items direct investment and loans. From 2001 inter-company debt transactions between affiliated enterprises (10 percent or more capital share) are included in the direct investment item, before that they were included in loans item. Since 2002 the item direct investments includes also short-term trade credits between affiliated enterprises.

Note 10: Transfers from EU budget are since 1.5.2004 recorded in current and capital transfers according to the nature of their use. Split between current and capital transfers is provided by the Ministry of Finance.

Table 3.5: Merchandise trade

Exports f.o.b. and imports c.i.f. Year 2005: provisional data (Source: Statistical Office of RS).

The effective exchange rate: Growth of index denotes growth of value of Tolar, and vice versa.

3.6 Short-term commercial credits

Tables include positions of claims and liabilities of short-term commercial credits by countries/groups of countries in the last eight months. Data source is direct reporting of enterprises (reports SKV).

International Investment Position of Slovenia (Table 3.7.)

General notes

The international investment position is the balance sheet of the stock of external financial assets and liabilities. The financial items that comprise the position consist of claims on nonresidents, liabilities to nonresidents, monetary gold, and SDRs.

Methodology of the international investment position (IIP) of Slovenia is based on the fifth edition of the *Balance of Payments Manual*, IMF, 1993. The Manual distinguishes four sectors - monetary authorities, general government, banks, and other sectors.

Revision policy

See revision policy notes for "Balance of Payments" (Tables 3.1. to 3.4.).

Data sources

Data sources for the international investment position of Slovenia are mainly the same as those for the balance of payments financial account. However, there are differences with some items as follows:

Direct investment

Data on direct investment are collected from:

- concessional surveys on equity investment (SN),
- reports on loans granted to or received from nonresidents,
- short term commercial credits with nonresidents (SKV),
- reports on accounts abroad.

Source for the balance of payments is *international transactions' reporting system* - ITRS and reports on loans granted to or received from nonresidents and reports on short term commercial credits with nonresidents.

In accordance with the recommendations of IMF, this item comprises investment where direct investor owns 10 percent or more of ordinary shares or voting power. Equity shares are valued at book value according to the accounting standards. Reinvested earnings are included.

Claims on and liabilities to affiliated enterprises are included in direct investment-other capital item. Inter-company claims or liabilities between affiliated banks and affiliated financial intermediaries recorded under direct investment capital are limited to those associated with permanent debt (loan capital representing a permanent interest). Until 2000 all long term intercompany claims are liabilities between affiliated banks and affiliated financial intermediaries were included in this item (not only permanent debt).

Data on claims and liabilities of Slovene enterprises in indirectly affiliated enterprises from 1996 onwards are included in the item 'Direct investment abroad' (in case when enterprise abroad having Slovene direct investment holds 10% or more of equity in other foreign enterprise). In the item 'Direct investment in Slovenia' data on investment of foreign enterprises in indirectly affiliated enterprises in Slovenia are included (in case that Slovene enterprise with foreign direct investment holds 10% or more of equity in other Slovene enterprise).

Portfolio investment

Data on equity securities and other equity shares are also available from enterprises' surveys (form SN), but only data from surveys where direct investor owns less than 10 percent of ordinary shares or voting power, are included. (In the balance of payments, transactions with equity securities and other shares are collected from ITRS (see note to Tables 3.1. to 3.4. /Capital and financial account/Portfolio investment)).

Data on residents' holdings of debt securities are available from direct reports from banks, and brokerage houses. For the balance of payments these data are collected from ITRS.

Liabilities of debt securities of government, banking and other sectors are available from credit registration from and Central Securities Clearing Corporation.

Trade credits and loans

Source for short-term trade credits are *reports of enterprises on stock of external claims and liabilities* (form SKV).

Sources for long-term trade credits and loans are credit registration forms and are the same for the international investment position and the balance of payments. Until 2000 the balance of payments did not distinguish loans between affiliated companies from loans between unaffiliated companies and included all loans in other investment items.

Currency & deposits, other assets, other liabilities and reserve assets

Sources of data for these items are banks' reports and Bank of Slovenia accounting data and are consistent with those for the balance of payments.

In the IIP arrears on loans and long term commercial credits are included in other claim/liabilities as short term item. Balance of payments does not include arrears.

The item "Assets / Currency and deposits of other sectors" in international investment position also includes data from the Bank for International Settlements (BIS) on deposits of Slovenian households in the banks in member states of BIS.

Till 2002 the item "Other liabilities of other sectors" in the IIP consists of the data on contractual joint ventures, which are not available for the balance of payments.

Table 3.7.: International Investment Position of Slovenia

IIP data do not include:

- data on real estate owned by Slovenian households abroad (mainly real estate in Croatia),
- claims on other countries on the territory of former SFR Yugoslavia, subject of negotiations on succession (except the part reported by Sklad RS za sukcesijo from 2002 onwards), expropriated assets in these territories and other assets transferred to the Slovenian government during the process of privatization.

Additional data on Direct Investment are available in a special publication of the Bank of Slovenia: 'Neposredne naložbe – Direct Investment' and on Bank of Slovenia Web site: <http://www.bsi.si/html/eng/publications/index.html>.

Gross External Debt (Tables 3.8 to 3.11)

General notes

Methodology is based on External Debt Statistics: Guide for Compilers and Users, IMF, 2003.

The guide is available under the following web address:

<http://www.imf.org/external/pubs/ft/eds/Eng/Guide/index.htm>.

Revision policy

See revision policy notes for "Balance of Payments" (Tables 3.1. to 3.4.).

Data sources

Gross external debt consists of debt liabilities from the international investment position (IIP). Data sources for Tables 3.8 to 3.10 are the same as those for the international investment position excluding the data on direct investment.

Table 3.8 Net External Debt

The table presents gross external debt, gross external assets in debt instruments, and net debt position. The data are the same as presented in the international investment position (IIP). The net external debt position is equal to gross external debt deducted by gross external assets in debt instruments.

Table 3.9 Gross External Debt

Gross external debt, at any given time, is the outstanding amount of those current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and are owed to non-residents by residents of an economy. The types of financial instruments included in the presentation of the gross external debt position are as follows: debt securities (money market instruments, bonds and notes), trade credits (short- and long-term), loans (short- and long-term), cash, deposits and other debt liabilities. Maturity for debt liabilities is based on the formal criterion of original maturity. Long-term debt is defined as debt with an original maturity of over one year or with no maturity stated. Short-term debt, which includes cash, is debt repayable at notice or with an original maturity of one year or less. Since September 2003 bonds and notes are valued at market value. Other debt instruments are valued at nominal value. Since 2002 accrued interest is included by loans and long-term trade credits.

Before July 2003, gross external debt was presented in Table 3.9 External Debt and in Table 3.12.2 International Investment Position of Slovenia - Liabilities:

Stocks as at 31 December 2002		bil. of EUR		
NET POSITION		NET POSITION		
CLAIMS-total	1,4	=	NET POSITION	1,4
	13,6	=	CLAIMS-total	13,6
LIABILITIES-total	15,0	=	LIABILITIES-total	15,0
EQUITY AND EQUITY SECURITIES	3,5	=	EQUITY AND EQUITY SECURITIES	3,5
DEBT LIABILITIES	11,5	=	GROSS EXTERNAL DEBT	11,5
EXTERNAL DEBT (World Bank concepts - Grey Book)	8,4			
Long-term debt	8,3			
Public and publicly guaranteed	3,1			
Private non-guaranteed *	5,2	→ 4,7 →	Public and publicly guaranteed debt **	3,2
Short-term debt	0,1	0,6	Private non-guaranteed debt	8,3
DEBT INSTRUMENTS INCLUDED ONLY IN TABLE INTERNAT. INVESTMENT POSITION OF SLOVENIA	3,1			
Money market instruments - general government **	0,1		Part of debt instruments of private non-guaranteed gross external debt-total	3,6
Short-term trade credits - other sectors	1,7		Short-term trade credits	1,7
Currency and deposits-banks	0,7		Currency and deposits	0,7
Other liabilities-banks and other sectors	0,2		Other debt liabilities	0,2
Liabilities to direct investors and affiliated enterprises-			* Liabilities to direct investors and affiliated enterprises	1,0
Short-term trade credits	0,4			

*Liabilities to direct investors and affiliated enterprises are not broken down by debt instruments (concept of new standard). An amount of 1.0 bil. of EUR included: 0.4 bil. of EUR short-term trade credits and 0.6 bil. of EUR loans (short- and long-term)

** Data from Central Securities Clearing Corporation

Table 3.10 Debt – Service Payment Schedule

Service payments projected are estimates of payments due on existing debt outstanding and do not include interest rate changes.

Table 3.11 Debt indicators

Note 1: Short-term debt includes the value of short-term external debt outstanding (original maturity) and the value of long-term external debt outstanding (original maturity) due to be paid in one year or less.

International Liquidity (Table 3.12.)

Table 3.12.: International Liquidity

* Because of the gradual implementation of International Accounting Standards in commercial banks in Slovenia data for January and February 2006 are not consistent with the data of previous periods.

Foreign exchange reserves of the Bank of Slovenia and banks include foreign cash in convertible currencies, deposits abroad and first class securities of foreign issuers. Balances on fiduciary accounts are included in 'Other foreign assets'.

Foreign exchange reserves of banks are only part of item 'Foreign Assets' in Table 1.4. Foreign assets also include other foreign currencies, deposits abroad, foreign securities and other foreign assets, which do not have the nature of high liquid international funds.

4. GENERAL ECONOMIC INDICATORS

**Table 4.1. Derivation and Expenditure on Gross Domestic Product and
Table 4.2. Quarterly Real Gross Domestic Product**

* New data according to the new methodology. Millions of Tolars, constant previous year prices, reference year 1995.

The Statistical Office of the Republic of Slovenia has published the gross domestic product revision for the period 1995-2004 in September 2005. The reasons for the revision are sectoral allocation of financial services indirectly measured (FISIM) and the transition to GDP estimates at constant prices of the previous year.

Methodological notes are published also on the internet page: www.stat.si.

Table 4.3.: Industry

Indices on industrial production are provisional from February 2004.

Methodological notes are published on the internet page: www.stat.si.

Table 4.5.: Employment and Unemployment

The majority of data for the period before 1997 are estimations based on methodologies used in those years.

Table 4.6.: Average Wages and Salaries

Real wages are deflated with consumer price index.

In case of data for January 2005 and forthwith, the methodology concerning average monthly earnings has been changed, so that legal persons with 1 or 2 employees in the private sector are now taken into account. The Survey, however, does not include individual private entrepreneurs and persons employed by them, own account workers and farmers.

The published data are the result of the new survey Monthly Report on Earnings at Legal Entities. Data for this report are collected by the Agency for Public and Legal Records and Services (with Obrazec 1 - ZAP/M questionnaire) and are then submitted to the Statistical Office of Slovenia for statistical processing.

To enable index calculation for 2005, the Statistical Office of Slovenia recalculated 2004 data according to the new methodology.

Table 4.7.: Registered Households' Income

Real aggregates are deflated with consumer prices index.

Table 4.8.: Prices

The data in the table will be recalculated according to base year 2005.

Notes on methodology are published on the internet page: www.stat.si

5. PUBLIC FINANCE

Table 5.1.: General Government Revenues and Expenditures

Note 1: The data of the current and previous year are revised monthly until the data on previous year became final.

Tables 5.2.: General Government Lending, Repayments and Financing

General Government Operations (Consolidated state budget, local governments, pension fund and health insurance fund).

Note 1: The data of the current and previous year are revised monthly until the data on previous year became final.

Tables 5.3.: Debt of Republic of Slovenia

Republic of Slovenia is defined as a legal person. The data from tables 5.1, 5.2. and 5.3. originate in the Bulletin on Government Finance, published by the Ministry of Finance.

6. PAYMENT SYSTEMS AND PAYMENT INSTRUMENTS

6.2. Payment cards

Note 1: Credit cards: A card indicating that the holder has been granted a line of credit. The credit granted may be settled in full by the specific date each month (delayed debit card ie. charge card), or may be settled in part, with the balance taken as extended credit (credit card).

Note 2: Debit cards: A card which enables the holder to have purchases directly charged to funds on the cardholder's bank account.

Note 3: Cards, issued abroad: payment cards issued abroad and used for payments in Slovenia, mostly by non-residents.

Note 4: Volume and value of transactions abroad: use of cards issued in Slovenia for payments abroad.

Number of payment cards in circulation: number of valid payment cards held by residents and non-residents, issued in Slovenia. Data refer to the end of each quarter/year.

Number and value of payments refer to the use of payment cards in each quarter/year.

Domestic cards: payment cards issued by banks and enterprises residents in Slovenia without licence agreements with foreign issuers.

Licence cards: payment cards issued by banks and enterprises residents in Slovenia under licence agreements with foreign issuers.

Bank card: payment cards issued by banks.

Retailer cards: payment card issued by non-banking institutions, mostly for use at specific retail outlets.

Personal cards: payment cards issued to natural persons (family cards included).

Business cards: payment cards issued to legal entities.

6.3. Other payment instruments and innovative payment schemes

Note 1: Data refer to the end of each quarter

Note 2: Data refer to payment transactions and money withdrawals at POS terminals in Slovenia.

6.4. Electronic banking

Note 1: Only debt transactions are included.

6.5. Credit and debit transfers

A paper-based payment order is a standardised payment instrument related to a credit transfer, in which the payer submits an order on a paper-based form. It means any instruction by an account holder to his payment service provider requesting the transfer of funds from his account to another account (also between accounts of the same account holder). A contemporary form can assure automated processing with ICR technology (Intelligent Character Recognition) or classic manual processing. A special form of paper-based payment order is the so-called special payment order, which is issued by a creditor to be paid by the debtor. The special payment order is presented by the debtor at the bank, which then credits his transaction account and transfers the amount to the account of the creditor. The special payment order was developed by the BoS in 1997.

A non-paper based payment order is an electronic payment order related to a credit transfer, which the customer of the bank submits to his bank on electronic storage media.

A standing order is an instruction from a customer to his bank to make a regular payment of a fixed amount to a named creditor. The payer authorises his bank (the bank at which he maintains a transaction account) to pay a specified amount regularly to another account. The payment must be repeated at least five times. The execution of payments occurs under exact conditions on a particular day of the month.

Direct credit is special form of payment instrument related to a credit transfer, initiated by the payer, which enables a cashless fund transfer from payer to payee. Direct credit is used for the execution of small value payments, e.g., salaries, pensions, dividends and similar payments to a large number of creditors.

Direct debit is a preauthorised debit on the payer's bank account initiated by the payee. It is a payment

instrument consisting of automatic debiting of the debtor's account for goods and services delivered by the creditor. Direct debit is initiated by the payee. The debtor (payer) authorises his bank to transfer funds from his bank account to the creditor's account and the creditor to submit a payment order to the creditor's bank to be paid. A typical example is an electricity bill payment.

A special money order is a standardised paper-based debit instrument used to remit money to the named payee. A special money order is issued by a bank, allowing the individual named on the order form to receive a specified amount of cash on demand.

6.6. Network of commercial banks

Note 1: In the number of head offices two banks with the license for operation pursuant to the Constitutional Law only are included (Kreditna banka Maribor d.d. and Ljubljanska banka d.d. Ljubljana).

Note 2: Statistical Regions, Source: Statistical Office of the Republic of Slovenia, March 31, 2000. Data up to year 2000 are presented according to Standard Classification of Territorial Units - Statistical Regions of the Republic of Slovenia, January 1, 1999.

Note 3: Data referring to the Postal bank of Slovenia do not include units of the Post of Slovenia that operate for the Postal bank of Slovenia on the contractual basis.
