#### Important information

Monthly Bulletin of Bank of Slovenia has been, from the number 2-3 for February-March 2007, volume 16, partly changed in its content and form.

The preannouncement of the change has been published on the web page of the Bank of Slovenia in January 2007.

The main changes are as follows:

- The beginning of publishing the statistical data of value, which refer to the period after the entry to the euro area, in the official domestic currency euro. The data of value for the previous period will continue to be published in tolars, as the official Slovenian currency in that period. The data in euros are in the tables separated from the data in tolars by line.
- The change in the concept of the international monetary reserves because of the entry to the Economic and monetary union. Among the Slovenian international monetary reserves after the entry to the euro area, compared to the period before, there are no longer assets in euro as well as the claims on the euro area residents. More explanation is available in: "The statistical treatment of the international monetary reserves at the entry of Slovenia to the euro area" (slovenian), in the chapter Methodological information on the internet page: http://www.bsi.si/en/financial-data.asp?Mapald=64.
- · The change in the presentation of the currency in the circulation to the standards of the euro area.
- The accommodation of the balance sheet of Bank of Slovenia to its activities in the framework of the Eurosystem.
- The beginning of the publishing of the interest rates of the euro area money market as well as the publishing of the whole set of the interest rates of the Monetary financial institutions according to the ECB's methodology.
- · The beginning of the publishing of the financial accounts statistics in the new chapter.
- Colour separation of the individual statistical chapters, to alleviate search and because of the link of the chapters to the specialised publications.

More information can be found in Methodological Notes in the Bank of Slovenia monthly Bulletin.

The entry to the euro area (on 1.1.2007) caused a break in the time series of the statistical tables in the Monthly bulletin in cases where the "currency" is an attribute. An expected reclassification takes place, for example of the stock of outstanding loans in euros from the time series of "foreign currency" before the introduction to the time series of "domestic currency" after the introduction of euro. To enable easier reconstruction of this change, the shares of the Euro amounts in stocks of the foreign currency in the tables 1.3, 1.4, 1.5 and 1.6 on 31.12.2004, 31.12.2005 and 31.12.2006 are published in the chapter Methodological notes.

- 7. Financial Markets

The forecasts for this year's economic growth for the euro area are continuing to be cut, while those for the USA are more favourable. Consensus's March forecast points to a contraction of 0.4% in economic activity in the euro area in 2012, primarily as a result of the adverse situation on the labour market and the uncertainty surrounding fiscal consolidation in some countries. The economic sentiment indicator also remains low. The forecasts for the USA were raised to 2.3% in March, as a result of the higher level of confidence and the ongoing improvement in the labour market. The price of Brent crude rose again in March to approach the record level of July 2008, which may slow global economic growth. The euro fell slightly against the US dollar, as the central banks' key interest rates remained unchanged.

The economic situation in Slovenia in the first quarter of this year remained unfavourable, but stable. Confidence on the export markets stabilised compared with the final quarter of last year, while activity in the export sector is continuing to increase gradually. At the same time domestic demand is declining, as evidenced in particular by turnover in many segments of wholesale and retail trade and in certain other services. Indicators of demand in the construction sector remain unfavourable, despite the gradual growth in the amount of civil engineering work put in place in recent months. Confidence in the Slovenian economy is low, while the chances of a recovery in domestic demand in early 2012 are small given the cost adjustment in the private sector and the fiscal consolidation.

The deterioration in the economic situation at the end of last year has not yet been fully reflected on the labour market. The number of registered unemployed in February was down in year-on-year terms as a result of a large number of new hires and increased outflows from unemployment to inactivity. The registered unemployment rate increased to 12.5% in January, primarily as a result of a decline in the workforce. The fall in employment remains largest in the construction sector, but came to a halt in the manufacturing sector. Year-on-year growth in the nominal wage bill increased slightly in January in the private sector and also in the public sector, although the total wage bill continues to fall in real terms.

Year-on-year inflation as measured by the HICP was down 0.4 percentage points in March at 2.4%. This was primarily the result of the disappearance of the one-off temporary year-on-year rise in services prices in February. The contribution made by energy prices increased again, and accounts for more than half of the inflation rate. Alongside the decline in real household income, this is further restricting domestic demand. As a result core inflation remains low. Year-on-year headline inflation in March was lower than the euro area average of 2.6%.

The current account deficit increased in year-on-year terms in the early part of this year. With trade in services recording a surplus, the main factors in the current account deficit were the large deficits in merchandise trade, factor income and transfers. The cumulative current account deficit over the last 12 months increased to 1.1% of GDP.

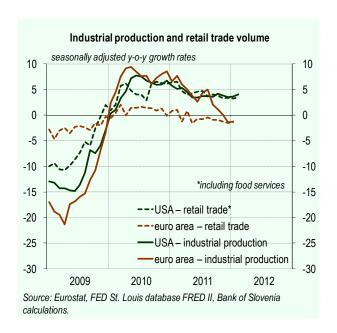

The general government deficit according to ESA 95 methodology amounted to 6.4% of GDP in 2011, while the general government debt stood at 47.6% of GDP at the end of the year. Both figures were thus higher than forecast in the most recent update to the Stability Programme of April 2011, which is forecasting a general government deficit of 3.9% of GDP for this year. After the revision to the budget, this year's state budget deficit is expected to reach 3% of GDP or just over EUR 1 billion. The proposed consolidation covers a wide range of measures to reduce government expenditure. The state budget deficit in the first two months of this year amounted to EUR 626 million, up in year-on-year terms. The main increase was recorded by interest payments, while revenues from the EU budget were also up slightly.

The banking system's total assets declined by EUR 556 million in February. A major factor in the contraction in total assets was the previously planned reduction in government deposits at banks in the amount of EUR 548 million, which coincided with the maturing of RS 64 government bonds in the amount of EUR 1 billion. The banks primarily reduced their most liquid forms of investment: cash in accounts at the central bank and short-term claims against banks. On the funding side, the banks again made net debt repayments to the rest of the world. Household deposits at banks recorded relatively solid growth for the third consecutive month. The banking system recorded a pre-tax profit of EUR 29.1 million in the first two months of the year, despite a decline in gross income. The main factor in this was a decline in impairment and provisioning costs compared with the same period last year. Impairment and provisioning costs in the banking system nevertheless remain relatively high.

The market capitalisation of bonds on the Ljubljana Stock Exchange fell by 0.8% in February, while the market capitalisation of shares fell by 3.1%. The SBI TOP fell by 6%, taking the year-on-year change to -31.4%. The proportion of the market capitalisation of shares on the Ljubljana Stock Exchange accounted for by non-residents amounted to 12.5%. Net inflows into the domestic mutual funds were positive in February, for the first time since April 2011. They amounted to EUR 1.8 million, which alongside the rise of 1.1% in the average unit price brought an increase in assets under management to EUR 1,907 million. The year-on-year change in the average unit price remained negative in February, at -9.1%.

### International Environment

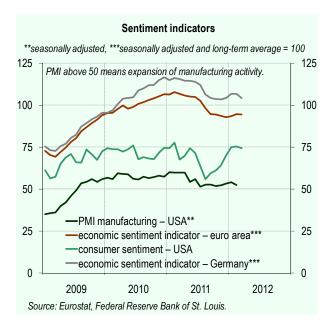

Economic growth forecasts for the euro area are continuing to be cut, primarily as a result of the deteriorating situation on the labour market and uncertainty over the fiscal consolidation. The forecasts for the USA were revised slightly upwards. Final household consumption in the euro area in the final quarter of last year was down 0.4% in quarterly terms, and down 0.6% in year-on-year terms. Investment and international trade also declined as a result of the uncertainty on the financial markets, while government consumption declined as a result of the consolidation measures in the periphery countries. Consensus's March forecast points to a contraction of 0.4% in economic activity in the euro area in 2012, 0.1 percentage points more than the February forecast. The forecast for 2013 remained unchanged at 0.9%. The situation is favourable in the US than in the euro area, as a result of increased confidence in the economy and an improvement in the situation on the labour market. In March Consensus raised its economic growth forecasts for 2012 and 2013 to 2.3% and 2.6% respectively, up 0.1 percentage points on the February forecast in both cases.

Industrial production and volume of retail trade are continuing to decline in the euro area, while year-on-year growth in both figures remains relatively favourable in the US. Industrial production in the euro area in January was down 1.0% in year-on-year terms, as weak monthly growth failed to compensate for the significant decline in December. The largest year-on-year decline was in energy production. The volume of retail trade was down 1.4% in year-on-year terms, having stagnated in current terms. Industrial production in the US in February was up 4.0% in year-on-year terms, although it was unchanged from January. The relatively high year-on-year growth was largely the result of the business equipment,

which was partly a reflection of relatively favourable corporate expectations. Real retail sales in the US has been increasing in year-on-year terms since the end of 2009. In February it was up 0.7% on January, and up 3.5% in year-on-year terms.

Confidence indicators in the euro area and the US declined slightly in March, while the unemployment rate in the US remained unchanged in February. The economic sentiment indicator issued by the European Commission declined slightly in March. Although the indicator remained below its long-term average, confidence in the economy is slightly higher than at the end of last year. According to provisional figures, consumer confidence also declined slightly in the US in March. Consumers assessed the current state of the economy as being better than in January, but the assessment of the economic outlook was worse, largely as a result of high energy prices. The unemployment rate remained unchanged in the US in February at 8.3%, while in the euro area the rate is approaching 11%.

The price of a barrel of Brent crude and food prices rose again in March. The price of a barrel of Brent crude rose again in March as a result of the relatively favourable economic results in the US and the unresolved political dispute with Iran to average USD 124.90 over the month, up 4.4% on February. The sharp rise in oil prices over the last three months - they have now approached the previous record levels from July 2008 - could have a

negative impact on global economic activity. Food prices rose again in monthly terms in March, while prices of other primary commodities fell slightly.

Inflation fell to 2.6% in the euro area in March, but remained unchanged in the US in February at 2.9%. Inflation stood at 2.7% in the euro area in February, again as a result of a slight increase in the contribution made by energy prices, which were up 9.5% in year-on-year terms. The contribution made to inflation by energy prices also increased in the US. Energy prices were up 7.0% in year-on-year terms, but inflation nevertheless remained unchanged in February at 2.9%. Core inflation in the euro area as measured by the HICP excluding energy and unprocessed food remained unchanged at 1.9% in February. Core inflation in the US as measured by the CPI excluding food and energy was down 0.1 percentage points in February at 2.2%.

The euro fell slightly against the US dollar in March, as the major central banks left their key interest rates unchanged. The euro averaged USD 1.320 in March, down 0.2% on February. In the first half of March the euro fell primarily as a result of the uncertainty surrounding the private sector's involvement in the write-off of Greek debts and the slight improvement in economic figures in the US. The euro rose again slightly in the second half of the month. The ECB left its key interest rate unchanged in March at 1.00%. The Federal Reserve also left its key interest rate unchanged in March, at the interval between

Monthly Bulletin, March 2012 5-1.

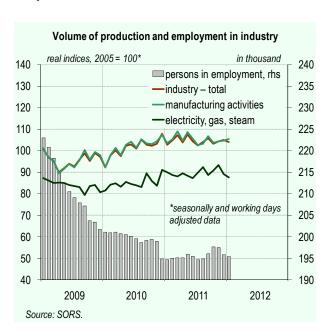

0.00% and 0.25%. It is evident from the minutes of the meeting of the Federal Open Market Committee that a very gradual improvement in the economic situation is expected in the US.

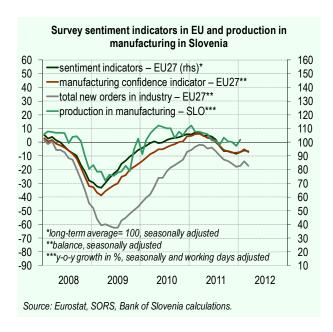

### 2 Economic Activity and Labour Market

#### Real sector

Industrial production in January was down slightly in monthly terms, but was up just over 1% in year-on-year terms. The monthly decline was the result of a decline in output in the mining and energy sectors, while output in the manufacturing sector was up in current terms for the third consecutive month, by just under 1% in January. Year-on-year growth in industrial production has remained around 1% for several months, with the exception of December.

The uncertain situation in the international economy is curbing growth in output in export-oriented manufacturing sectors. Year-on-year growth in output in the manufacturing sector was in line with the decline in confidence in Slovenia's most important trading partners last year, and gradually turned negative towards the end of the year. The confidence indicators in the international

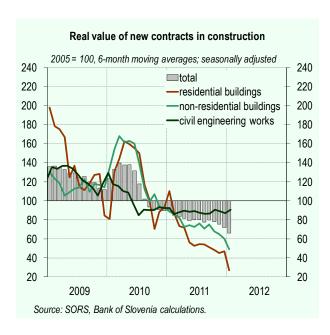

economy stabilised at the beginning of this year. At the same time output in the manufacturing started to grow weakly again in monthly terms, while revenues and orders from the foreign market rose slightly.

Construction activity has increased in recent months, primarily as a result of an increase in activity in the civil engineering segment. According to seasonally adjusted figures, the amount of construction put in place in January was up just under a fifth on December, all construction segments recording an increase. Activity in the civil engineering segment has displayed a trend of increase since last July, partly as a result of work on Block 6 at Šoštanj power station. The year-on-year contraction in activity slowed slightly, but was still around 20%. The

year-on-year contraction in activity remains lowest in the civil engineering segment. The relatively large year-on-year decline was primarily the result of the collapse of most major construction companies in 2011, which is having an adverse impact on their subcontractors.

Signs of improvement, if any, are primarily discernible in the civil engineering segment. The year-on-year decline in the real value of new contracts continued in January. The figure was down by almost 40%. The value of new contracts for buildings was down by almost three-quarters, while the value of contracts for civil engineering

was up by just under a tenth. Confidence in the construction sector remains the lowest of all sectors, despite a gradual increase over the last year. The proportion of companies facing difficulties in obtaining loans and high finance costs remains high. The amount of unsettled past -due liabilities in the construction sector remains the highest among all sectors.

Volume turnover in the retail sector declined in February, as did volume turnover in trade in motor vehicles. February's volume turnover in the retail sector was down 5% on January, and down just over 1% in year-on-

<sup>\*</sup> Volume of industrial production. \*\* Real value of construction put in place. \*\*\* Old methodology.

year terms; volume turnover in trade in motor fuels is likely to be the main factor in the monthly decline. Growth in the latter has made a positive contribution to growth in volume turnover in the retail sector over the last year and a half, but the current negative contribution in the context of a simultaneous rise in fuel prices is an indication that the trend can reverse in the future. In January prices of motor fuels in Slovenia were higher than in Croatia, comparable to those in Austria, and got close to the levels in Hungary and Italy. Volume turnover in the retail sector excluding motor fuels has been falling in line with the decline in consumer purchasing power since the outbreak of the crisis, and is now at the same level as in 2005. The adverse economic situation also brought a decline in volume turnover in trade in motor vehicles in February. It was down by just over 4% on the previous month, and by just over 8% in year-on-year terms. This was the largest year-on-year decline since 2009; even last year year-onyear growth averaged just under 8%.

According to original figures, value turnover in private sector services other than trade in January was up 2.3% in year-on-year terms, largely as a result of services primarily dependent on foreign demand. The services most dependent on foreign demand are transportation and storage, value turnover in which was up just under 5% in year-on-year terms in January. Value turnover in the accommodation and food service activities sector was up just under 3% in year-on-year terms in January, while value turnover in architectural and engi-

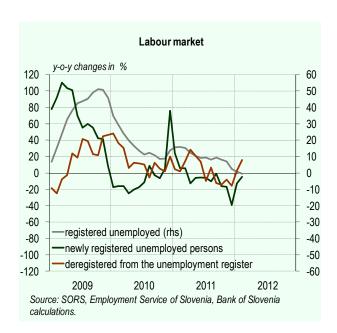

neering activities was up 7%, despite the crisis in the construction sector. Value turnover in programming and broadcasting activities was up almost 77% in year-on-year terms, primarily as a result of January's rise in the RTV licence fee. Value turnover in the sectors of telecommunications and information service activities, legal and accounting activities, publishing activities and travel agency and tour operator activities recorded declines of between 3% and 15%.

The economic sentiment indicator stagnated in March for the third consecutive month at -12 percentage points. Confidence in the service sector increased, primarily as a result of an improvement in the business situation and demand expectations. The retail confidence, consumer confidence and construction confidence indicators remained unchanged. Consumer confidence was unchanged for the second consecutive month, and has remained at a similar level for almost three years now. The manufacturing confidence indicator declined, primarily as a result of a decline in the total orders indicator.

### Labour market

The number of registered unemployed in February was down in monthly and year-on-year terms. The number of registered unemployed stood at 115,036 at the end of February, down 900 on the end of the previous month and down 600 on last February. The year-on-year fall was thus 0.5%. The number of unemployed people

moving into employment was up in monthly and year-onyear terms, and was the highest since 2008. This increase was not just a consequence of the large number of unemployed. The flow from unemployment to employment was also higher as a proportion of the number of unemployed, an indication of greater supply or less mismatching between the structure of labour supply and demand. Other factors in the fall in the number of unemployed were the increased number of outflows for reasons other than employment, and the decline in the number of applications by first-time job-seekers. The registered unemployment rate increased to 12.5% in January as a result of the workforce falling faster than the number of registered unemployed. The stronger flow from unemployment into employment indicates an improvement in the situation on the labour market, but at the same time the outflow into inactivity is increasing while the inflow from inactivity into activity is declining. The number of vacancies has stagnated in recent months. In February there were 13,051 notified vacancies, less than in January and less than in the same month last year, but nevertheless higher than in February 2009 or February 2010.

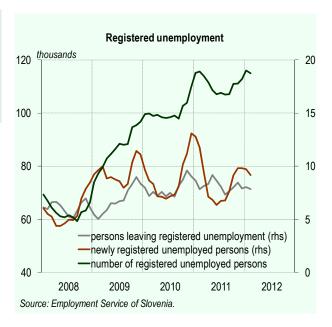

In January the workforce in employment fell in the private sector, but rose in the public sector. The year-on-year fall in the total workforce in employment stood at 1.1% in January, as a result of the fall of 1.7% in the pri-

Monthly Bulletin, March 2012 9–I

vate sector. The workforce in employment in the public sector was up 1.2% in year-on-year terms. The largest fall in employment was again recorded by the construction sector, where it was down 14.2% in year-on-year terms. The trends are more favourable in industries other than construction. The workforce in employment in manufacturing ceased falling in the second half of 2011, and was up around 0.5% in year-on-year terms for the second consecutive month in January, despite the decline in economic activity in the final quarter of last year. The rise in the workforce in employment in the public sector was primarily the result of a rise in employment in health and education, while employment in public administration is continuing to gradually fall.

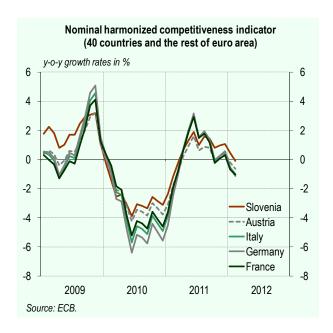

Year-on-year growth in nominal gross wages continues to slow. The average nominal gross wage per employee was EUR 1,529 in January. It was up 2.2% in year -on-year terms, the lowest rate in January in recent years, an indication of the ongoing slowdown in nominal wage growth. The year-on-year increase in the average nominal gross wage was solely the result of an increase of 3.1% in the private sector, while average wages in the public sector continued to stagnate. Year-on-year growth in the total nominal wage bill in the private sector was significantly lower than the growth in the average wage at 1.6%, as a result of the fall in the workforce in employment. The development was the reverse in the public sector: the nominal wage bill was up 1.1% despite the stagnation in wages. The real wage bill continues to fall in both sectors.

### Selected competitiveness indicators

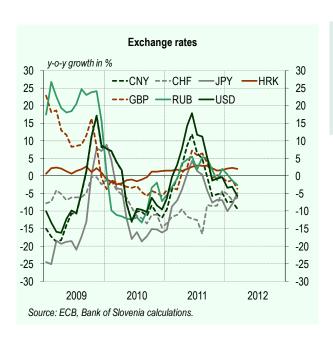

Slovenia's competitiveness as measured by the real harmonised national competitiveness indicator improved in February for the second consecutive month. The real effective exchange rate recorded a year-on-year depreciation of 0.6% in February. This was the result of growth in domestic prices being outpaced by growth in the basket of foreign prices, and of a depreciation in the nominal effective exchange rate. The gap between the year-on-year movements in the real and nominal indicators narrowed as a result of the rise in inflation to a level close to the average of the countries included in

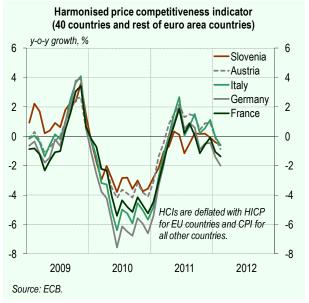

I.–10 Monthly Bulletin, March 2012

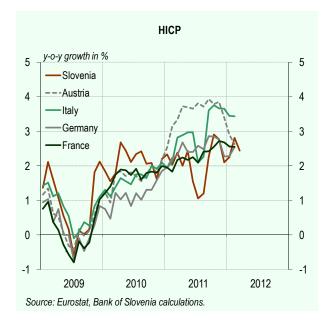

The year-on-year depreciation in Slovenia's price competitiveness indicator in January and February was slightly lower than the average in the main euro area trading partners, primarily as a result of less favourable movements in the nominal harmonised indicator. The increase in the year-on-year depreciation in the nominal effective exchange rates in the main trading partners in the two months in question was the result of a year-on-year depreciation in the euro against most major currencies, notably against the US dollar in the case of Germany and France. Because the euro continues to appreciate against the Croatian kuna, and Slovenia has a much closer trading relationship with Croatia than its main trading partners do, the movement in Slovenia's nominal competitiveness indicator is less favourable. This is also the main reason for the slower year-onyear depreciation in the real competitiveness indicator, as the inflation rate in Slovenia in the first two months of the year has been similar to that in the main trading partners. Slovenia's real effective exchange rate recorded an average year-on-year depreciation in January and February that was 0.4 percentage points less than the average in the main trading partners.

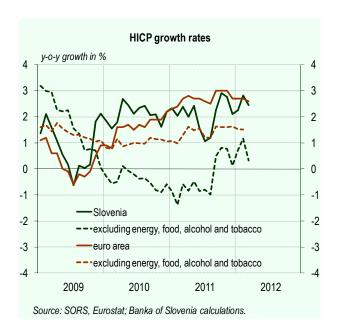

## 3 Price Developments

Year-on-year inflation as measured by the HICP stood at 2.4% in March, down 0.4 percentage points on February. The fall in year-on-year inflation was primarily the result of a base effect, the one-off year-on-year rise in services prices in February having disappeared. Year-onyear growth in services prices was down 1.5 percentage points in March at 1.2%, driven by a fall in prices of telephone and internet services and package holidays. Prices of clothing and footwear in March were up 15.9% on February as a result of the changeover to spring/ summer collections. Year-on-year growth in overall prices of non-energy industrial goods nevertheless declined by 0.2 percentage points to -0.8%. Rises in oil prices on global markets again brought a rise in prices of refined petroleum products, the year-on-year rate of growth in energy prices thereby increasing by 1.0 percentage points to 9.5%. Year-on-year growth in food prices was up 0.1 percentage points at 3.8%, as a result of an increase of 0.4 percentage points in year-on-year growth in prices of processed food, primarily as a result of a rise in prices of alcoholic beverages, and bread and cereal products. Year-on-year growth in prices of unprocessed food declined as a result of a year-on-year fall in prices of fruit and vegetables. Year-on-year headline inflation in March

was lower than the euro area average of 2.6%.

The core inflation indicators are reflecting the low demand. After February's one-off rise caused by the base effect of last year's reduction in the RTV licence fee, the core inflation indicators declined again in March. Core inflation excluding energy, food, alcohol and tobacco was down 0.9 percentage points at 0.3%. Similarly, core inflation excluding energy was down 0.5 percentage points at 1.3%, while core inflation excluding energy and unprocessed food was down 0.6 percentage points at 1.2%.

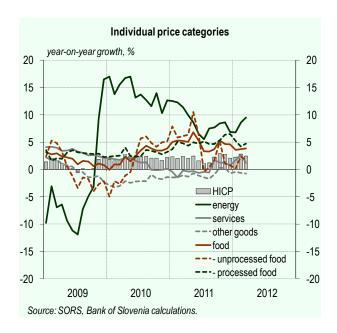

According to the latest detailed figures, the largest contributions to February's rise in year-on-year infla-

Note: Figures may not sum up to official figures due to rounding.

I.-12 Monthly Bulletin, March 2012

tion came from prices of cultural services, motor fuels, and fruit and vegetables. Prices of cultural services contributed 0.4 percentage points to the rise in inflation, primarily as a result of the lower prices of radio and TV subscription in February 2011. The rapid rise in oil prices on global markets was again reflected in year-on-year growth in prices of motor fuels, which raised their contribution to inflation by 0.2 percentage points to 0.6 percentage points. Prices of electricity, district heating and gas were up in year-on-year terms, while prices of heating oil were down as a result of slower growth than in February of last year. The contribution made to inflation by food prices remained unchanged at 0.8 percentage points. As a result of a high monthly rise in prices of fruit and vegetables - these prices fell in current terms last February their contribution to inflation was up 0.3 percentage points. The contribution made to inflation by prices of meat, bread and cereals, and oils and fats declined. As a result of additional post-seasonal discounts in February the year-on-year fall in prices of clothing and footwear deepened, reducing their contribution to inflation by 0.1 percentage points to -0.2 percentage points. The change in car prices was the same, thus ending the trend of a slowdown in their year-on-year fall.

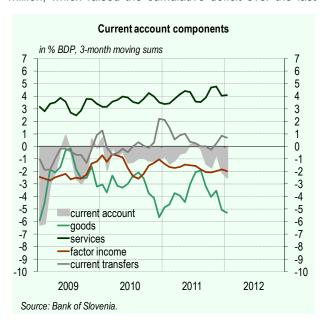

Year-on-year growth in industrial producer prices on the domestic market continued to slow in February. Year-on-year growth in industrial producer prices on the domestic market fell by 1.2 percentage points to 0.7% inFebruary, as a result of a decline in year-on-year growth in prices in all categories. The main factor in the decline was again commodity prices, in particular prices in the manufacture of metals, year-on-year growth in which was down 33.1 percentage points on its peak of February 2011 at -6.6%. This is in line with the movement of commodity prices on global markets. Energy prices were down in year-on-year terms in February, as a result of a fall in prices compared with January and a base effect. Year-on-year growth in prices of consumer goods was down 0.7 percentage points at 1.6%, while prices in the manufacture of food products was down 0.9 percentage point at 1.4%. Year-on-year growth in prices of other consumer goods is also declining, which is having an impact on the non-energy industrial goods component of the HICP. Despite a current rise in import prices in recent months, in particular energy, industrial producer prices on the domestic market fell slightly over this period. Alongside the low price expectations indicator in the manufacturing sector, this is an indication that weak domestic demand is curbing the pass-through of cost pressures into final domestic prices for consumers.

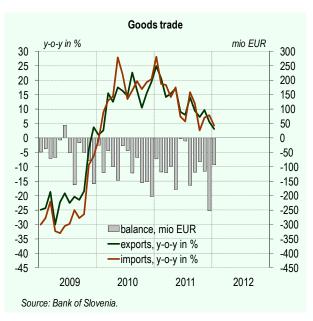

# 4 Balance of Payments

### **Current account**

The increase in the current account deficit seen last December continued in the early part of this year. January's deficit of EUR 36 million was twice the size of the deficit recorded in the same month last year. With trade in services recording a surplus, January's current account deficit was the result of a deficit in merchandise trade and a net outflow of factor income and transfers. The cumulative current account deficit over the last 12 months increased to EUR 402 million or 1.1% of GDP, having stood at less than 1.0% of GDP last January.

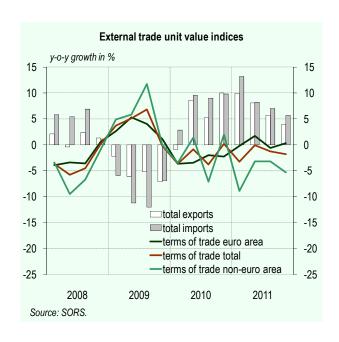

The trend rate of growth in merchandise trade slowed sharply at the end of last year, more quickly on the export side than on the import side. With merchandise trade displaying a slowing trend, year-on-year growth in merchandise imports and exports also slowed for the second consecutive month. Merchandise exports amounted to EUR 1,581 million in January, up 3.1%. The year-on-year slowdown in growth in merchandise imports was slightly slower: merchandise imports were up 4.3% at EUR 1,674 million. The result of these movements in merchandise trade was a deficit in the amount of EUR 93 million, which raised the cumulative deficit over the last

12 months to EUR 1,356 million or 3.8% of GDP, the highest figure since 2009.

Merchandise trade with EU Member States stagnated in the early part of this year, while there was a sharp increase in growth in merchandise trade with non-EU countries for the first time since last July. Merchandise exports to EU Member States were up 0.3% in year-on-year terms in January, while exports to non-EU countries were up more than 10%. The situation was similar on the import side: imports from Member States were up just 0.2%, while imports from non-EU countries were up more than 26%. Slovenia usually records surpluses in its trade with non-EU countries, but in January there was a deficit, which was actually greater than that recorded with

EU Member States. According to SORS figures, of the total merchandise trade deficit of EUR 142 million, EU Member States accounted for EUR 50 million and non-EU countries for EUR 92 million.

Price factors made a major contribution to last year's merchandise trade deficit. Growth in the indices of the average value of imports was 3.3 percentage points higher than growth in the indices of the average value of exports in the first quarter of last year. The gap had narrowed to 1.8 percentage points by the final quarter of last

year. The index of the average value of imports was up 8.5% overall, while that of exports was up 6.9%. The terms of trade thus deteriorated by 1.5%. The terms of trade with the euro area improved by 0.3% last year, while those with countries outside the euro area deteriorated by 4.7%.

The movements in trade in services seen in the last two months continued in January, with imports declining and exports increasing. Imports of services were down 2.6% in year-on-year terms in January, while

### Box: Revision to exports of travel services

The calculation of exports of travel services is based on SORS surveys. For 2011 it was necessary to estimate the average spending by foreign tourists in Slovenia, as the survey that serves as the basis for these figures was not conducted last year. Initially the estimate was based on the survey figures from 2010, adjusted for growth in prices of accommodation and food services other than canteen services. These rose by more than 2% on average in 2011, which was taken into account in the estimation of the average spending by foreign tourists in Slovenia.

The overall decline in private consumption because of the crisis has now been taken into account in the recalculation of the figures for 2011. Data from a survey on travel by the domestic population was also used as a basis for estimating the decline in spending. According to this survey, travel spending by the domestic population in the first three quarters of 2011 was down around 9% in year-on-year terms (average daily spending was EUR 63 during the first three quarters of 2010, compared with EUR 57 over the same period of 2011). This finding on the general decline in spending because of the crisis was then fed into the estimate of spending by foreign tourists in Slovenia. The estimate for exports of travel services in 2011 was thus reduced from EUR 2.129 million to EUR 1,945 million.

The final revision of the figures for 2011, which will be in June of this year, will take account of the change in spending abroad by Slovenian citizens for the whole year, not merely the first three quarters. In addition, the figures of the Croatian National Bank, according to which average spending by foreign tourists in Croatia in 2011 was down almost 10% on the previous year, will also be taken into account.

Four-fifths of the increase in the current account deficit compared with the figures prior to the revision can be attributed to the changes in the methodology for estimating exports of travel services, while the remaining fifth is the result of ordinary updates to merchandise trade data and adjustments in the estimation of capital income and transfers, which can be seen

Table: Changes in current account deficit after final revision of figures

| Current account items, EUR million | Initial figures released for 2011 | Revised figures for 2011 | Change |
|------------------------------------|-----------------------------------|--------------------------|--------|
| Current account position           | -168.1                            | -385.3                   | -217.2 |
| as % GDP                           | -0.5                              | -1.1                     | -0.6   |
| Merchandise position               | -1296.6                           | -1334.8                  | -38.2  |
| Services position                  | 1616.8                            | 1432.7                   | -184.1 |
| Travel services position           | 1301.3                            | 1117.9                   | -183.4 |
| Exports of services                | 4992.4                            | 4819.9                   | -172.5 |
| Exports of travel services         | 2128.8                            | 1945.4                   | -183.4 |
| Imports of services                | 3375.6                            | 3387.2                   | 11.6   |
| Imports of travel services         | 827.5                             | 827.5                    | 0      |
| Factor income position             | -642.6                            | -636.1                   | 6.5    |
| Labour income position             | 196.4                             | 196.4                    | 0      |
| Capital income position            | -839                              | -832.5                   | 6.5    |
| Transfers position                 | 154.3                             | 153                      | -1.3   |

Source: Bank of Slovenia.

exports were up 8.9%. As a result, the surplus rose by EUR 36 million in year-on-year terms to EUR 147 million. After declining in December, exports of transport services were up 7.7% in year-on-year terms in January, despite the slowdown in growth in merchandise exports. Imports of transport services declined by 7.8%. Exports of travel services have also grown significantly faster than imports in the early part of the year. Exports of travel services were up 9.1% in year-on-year terms in January, while imports were up 2.0%. The surplus in travel services thus increased by EUR 12 million in year-on-year terms to EUR 112 million, accounting for three-quarters of the total surplus in services in January.

The deficit in factor income continued to widen in January. The deficit of EUR 67 million was just over a quarter higher than the monthly average in 2011, and

took the cumulative deficit over the last 12 months to EUR 649 million or 1.8% of GDP. There was a small net surplus in labour income in January, but the net outflow of capital income amounted to EUR 77 million. The net outflow of income from equity, largely reinvested and undistributed earnings, accounted for EUR 42 million, over half, of the deficit. As a result of the downgradings in the second half of last year, net interest payments on loans raised in the rest of the world and net payments of income from investments in debt securities are gradually increasing. They totalled EUR 37 million in January, up just over a third on the monthly average in 2011.

The deficit in current transfers widened by EUR 20 million in year-on-year terms in January to 22 million EUR. Private transfers having recorded a small surplus, there was a net outflow in government transfers as a re-

sult of payments into the EU budget, primarily owing to payments from gross national income. These exceeded EUR 23 million in January.

### Capital and financial account

The private sector recorded a net outflow of EUR 334 million in its transactions with the rest of the world in January, the main factor in which was the outflow of residents' currency and deposits to the rest of the world. After declining in December, claims increased by EUR 308 million in January, primarily as a result of an increase in residents' holdings of currency and deposits in the rest of the world. The outflow of currency and deposits in the amount of EUR 427 million was primarily the result of an increase in deposits by NLB. Claims from FDI and trade credits also increased in January, although the net outflow was relatively small. The private sector's investments in foreign securities, which have been declining since last May, fell by a further EUR 139 million in January. The banks accounted for the majority of this, via sales of bonds of euro area issuers. The domestic banks again reduced their claims from loans to non-residents in January.

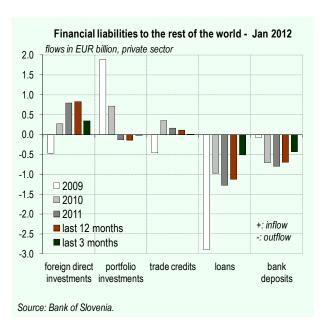

The private sector's liabilities to the rest of the world declined in January, although less markedly than in the previous five months. The largest declines were recorded by liabilities from short-term trade credits for corporates (EUR 91 million), and liabilities from long-term deposits at banks. The latter declined by EUR 135 million

lion, more than last year's total decline in these deposits. Short-term deposits by non-residents also declined sharply last year, but increased by EUR 105 million in January. After declining by EUR 1.3 billion last year, liabilities from loans were up EUR 37 million in January, primarily as a result of an increase of EUR 100 million in short-term loans. Foreign long-term loans to domestic banks, which accounted for the majority of last year's decline, have continued to decline. The private sector's liabilities to the rest of the world declined by EUR 27 million in total in January.

The private sector's cumulative financial flow with the rest of the world during the 12 months to January was a net outflow of EUR 922 million, primarily as a

result of debt repayments by domestic banks and an outflow in households' currency and deposits. Longterm loans raised in the rest of the world by domestic banks declined by EUR 1.1 billion overall during the last 12 months, EUR 362 million more than in the 12 months to January 2011. The process of debt repayments by the banks, which was strongest during the 12 months between June 2009 and May 2010, has been accelerating again since January 2011. The banks are now primarily repaying long-term loans, whereas between June 2009 and May 2010 equal proportions of short-term loans and long-term loans were repaid. The decline in nonresidents' deposits at domestic banks has accelerated sharply in the last 12 months. Non-residents' investments in securities declined for the first time in two and a half years, partly as a result of the repurchase of bonds by the domestic banks. Cumulative FDI over the preceding 12 months has also been increasing since November 2010, primarily as a result of growth in loans and trade credits received from foreign affiliates. Growth in trade credits

from the rest of the world is slowing overall. Liabilities to the rest of the world declined by EUR 816 million over the last 12 months, having increased by EUR 326 million during the 12 months to January 2011.

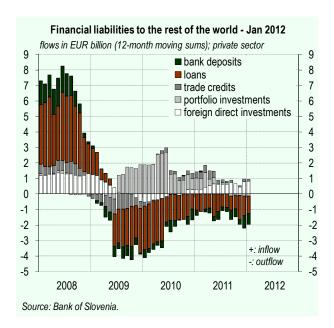

The largest factor in the increase of EUR 104 million in claims against the rest of the world over the last 12 months was the outflow of households' currency and deposits. Claims from currency and deposits increased by EUR 870 million over the last 12 months, solely as a result of an increase of EUR 1.3 billion in households' claims. The other sectors reduced their investments in currency and deposits. Investments in foreign securities and derivatives continued to contract. They declined by EUR 816 million over the last 12 months, primarily as a result of a decline in investments by domestic banks in foreign debt securities. Claims from the loans to the rest of the world also declined, by EUR 234 million. Claims from portfolio investments increased by EUR 366 million during the 12 months to January 2011. In the same period, claims from currency and deposits and from trade

I.–18 Monthly Bulletin, March 2012

credits increased by approximately the same amount. Claims from transactions increased by a total of EUR 1.1 billion in the 12 months to January 2011.

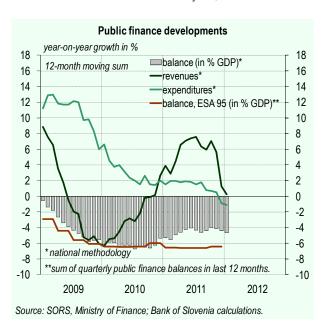

Slovenia's net external debt increased by EUR 182 million in January to stand at EUR 11.6 billion at the end of the month. After declining last December, the gross external debt increased by EUR 446 million in January, primarily as a result of an increase of non-residents' holdings of currency and long-term deposits at the central bank. Gross external claims increased by EUR 264 million in January, the largest contribution coming from an increase in deposits by the banking sector. The banking sector's net external debt declined by EUR 175 million in January, while the net external debt of other

sectors and the government sector recorded a slightly smaller decline. Only the Bank of Slovenia recorded an increase in the net external debt, its debt rising by EUR 546 million.

### 5 | Public Finance

The general government deficit according to the ESA 95 methodology amounted to 6.4% of GDP in 2011, while the general government debt stood at 47.6% at the end of the year. Both figures were thus higher than planned in the Stability Programme. According to the initial SORS estimate, the general government deficit, which amounted to EUR 2,289 million in 2011, was slightly higher than in the previous year, and was 0.9 percentage points more than planned in the latest update to the stability programme of April 2011. Three major transactions of a one-off nature accounted for a deficit in the amount of 1.2% of GDP, namely the capital increases at NLB and Adria Airways, and the transfer to Slovenian Railways. Alongside interest, these were the main factor in the growth in general government expenditure, which was up 2.0% last year. Investment expenditure again declined sharply as also intermediate consumption at the end of the year. The consolidated general government deficit stood at 4.4% of GDP last year, but the deficit un-

der the ESA 95 methodology was 2 GDP percentage points larger. The difference arises from the three major transactions of a one-off nature (1.2% of GDP), higher interest according to the accrual principle, deficits at government units not included in consolidation (both 0.7% of GDP), the capture of called guarantees under ESA 95 methodology (0.1% of GDP) and the deferral of part of the Health Insurance Institute's expenditure to 2012. General government revenues rose by 1.2% last year, the low growth reflecting the general macroeconomic situation. The government has drafted a revision to the state budget under which the state budget deficit is to be limited to just over EUR 1 billion or 3% of GDP. According to the latest update to the Stability Programme, this year's general government deficit is expected to stand at 3.9% of GDP.

The consolidated general government deficit stood at 4.4% of GDP in 2011, almost entirely as a result of the state budget. The state budget deficit in the first two months of this year widened by EUR 137 million in

year-on-year terms, interest expenses having increased by EUR 48 million. The consolidated general government deficit stood at EUR 1,562 million last year, EUR 336 million less than in the previous year. The majority of the improvement came from the state budget, while local government accounted for a quarter. Local government reduced its deficit to just EUR 35 million as a result of reductions in investment expenditure. There was also an improvement in the position of the Health Insurance Institute (HII), but only as a result of the deferral of payments to 2012. The state budget recorded a deficit of EUR 626 million during the first two months of this year. Interest payments were up EUR 48 million in year-onyear terms, while on the revenue side there was a decline of EUR 64 million in revenues from the EU budget. The HII recorded a deficit of EUR 49 million in the first two months of the year. As a result of the wider deficits in the state budget and the HII, the consolidated general government deficit in January was up EUR 96 million in yearon-year terms.

I.-20 Monthly Bulletin, March 2012

High year-on-year growth in the first half of 2011 was followed by a decline in general government revenues in the second half of the year and in January of this year. The growth in general government revenues in the first half of the year was primarily the result of higher tax inflows and a significant increase in disbursement from the EU budget. Tax and non-tax revenues and revenues from the EU budget declined in year-on-year terms in the second half of the year as economic activity contracted. There have been difficulties in monitoring taxes and contributions since October, as a result of the Tax Administration's problems in the introduction of its new information system. The Ministry of Finance has therefore drawn up estimates for the allocation of individual unallocated revenues to different types of taxes and contributions for the period between October and December, which are illustrated in the table. The available information indicates low year-on-year growth in payments of taxes and social security contributions in the first two months of the year. Revenues from the EU budget in January and February were also significantly down on last year.

General government expenditure declined by 0.9% in 2011. Expenditure was down in year-on-year terms from September on, most notably in December. It increased in January, primarily as a result of interest payments on past borrowing. The sharpest declines last year were recorded by investment expenditure and

transfers, subsidies and expenditure on goods and services. While the first of these declined throughout the year, subsidies declined sharply in the second half of the year, and expenditure on goods and services declined in the final quarter, most notably in December. As total expenditure declined, payments for the unemployed increased by almost a third while interest payments were up 7.9%. General government expenditure in January was up 5.1% in year-on-year terms. Interest payments accounted for two-thirds of the increase in expenditure, while subsidies were also up in year-on-year terms.

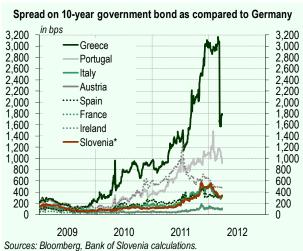

In March the Ministry of Finance issued just over EUR 250 million in treasury bills, thereby continuing its short-term borrowing. State budget borrowing has primarily been undertaken via treasury bill issues since December 2011. Treasury bill issues amounted to EUR 184 million in January, EUR 241 million in February and EUR 254 million in March. March's interest rates on issued treasury bills were lower than in the previous two months, the interest rate on the treasury bills maturing in February 2013 reaching 1.99%. The principal of the RS64 government bonds matured in February in the amount of EUR 1 billion, which constitutes the majority of this year's repayment of long-term debt. A second bailout package was approved for Greece in March, and will include Slovenia, which according to Ministry of Finance estimates will be responsible for EUR 938 million in guarantees.

Note: \*All bond issues disbursed on domestic market are counted under domestic borrowing, despite of the residency of buyers.

Monthly Bulletin, March 2012 21-I

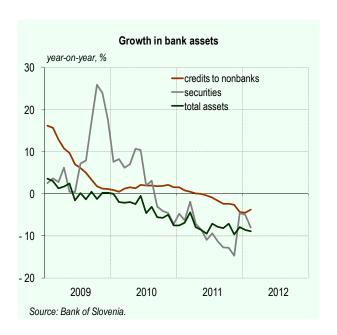

Note: Spread is calculated as a difference between yield of 10-year government bond and the yield of reference German bond on a daily basis and is used as a measure of country's credit risk. \* In the picture SLOREP 01/21 is used after 11. January 2011.

### The required yield on Slovenian 9-year government bonds fell again in March to stand at around 5.1%.

This was approximately 74 basis points lower than the average yield in February. The premium over the benchmark German bonds declined by a similar amount, and averaged around 320 basis points in March. The major rating agencies left Slovenia's sovereign ratings unchanged in March.

# 6 Banking System\*

The banking system's total assets declined by EUR 556 million in February. With the banking system's total assets declining, year-on-year growth in total assets was down 0.5 percentage points in February at -4.5%. The government reduced its stock of deposits at banks by EUR 548 million in February as planned, while the banks primarily reduced their most liquid forms of investment, namely cash in accounts at the central bank (by EUR 301 million) and claims against banks (by EUR 227 million). After temporarily ceasing to make net debt repayments to banks in the rest of the world in January, in February the banks again made net debt repayments. Household deposits recorded a solid increase for the third consecutive month.

Loans to non-banking sectors increased by EUR 165 million in February, as a result of an increase in loans to the government sector. Loans to the government sector increased by EUR 231 million in the banking system overall, but year-on-year growth in loans to non-banking sectors stood at -3.8% in February.

Year-on-year growth in loans to non-financial corporations (NFCs) was up slightly at -6.0%, the stock of loans having recorded a net decline of EUR 24 million. The banks under majority foreign ownership were alone in recording a slight increase in loans to NFCs in February.

The decline in the stock of loans to households continued, and amounted to EUR 36 million in February, taking the decline over the first two months of the year to EUR 72 million. Although this is the weakest month of the year in seasonal terms, the trend of decline in lending to households has continued. Year-on-year growth in loans to households has slowed from just over 8% to 2% during the last year. Loans to households at the small domestic banks were virtually unchanged in February, having recorded a net increase of just EUR 2 million, while the figure was down EUR 26 million at the large domestic banks and EUR 11 million at the banks under majority foreign ownership. Of the household loans, housing loans were up 6.8% in year-on-year terms in February, despite a stagnation in recent months, while consumer lending is declining.

I.-22 Monthly Bulletin, March 2012

<sup>\*</sup> The book figures for banks are used in this section, and differ in methodological terms from the published statistics.

The banking system's investments in securities declined by EUR 150 million in February. The largest decline in available-for-sale financial assets was recorded by government debt securities, at EUR 90 million. There was a decline of EUR 51 million in government debt securities among financial assets held to maturity in February. The maturing of the RS 64 government bonds was the main factor in the decline in government debt securities. The banks also subscribed to the majority of the treasury bills issued by the government in February, taking EUR 187 million out of a total of EUR 241 million.

The banks made net debt repayments of EUR 168 million in the rest of the world in February Deposits by non-banking sectors declined by EUR 396 million in February, as a result of a decline in government deposits. The decline in government deposits amounted to EUR 548 million, was planned, and coincided with the maturing of RS64 government bonds in the amount of EUR 1 billion in February.

Household deposits recorded a relatively solid increase for the third consecutive month. February's net increase stood at EUR 70 million, while government deposits at banks rose by EUR 238 million in the final quarter. The increase was relatively equally distributed between the different groups of banks.

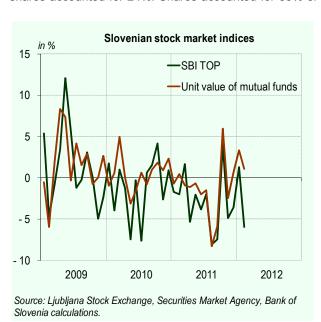

The banking system generated a pre-tax profit of EUR 29 million in the first two months of the year. Interest income during the first two months of the year was up

**Banking performance indicators** 10 5 2.0 2.1 2.1 2.2 2.2 1.5 1.5 1.5 1.5 1.5 0 -0.2 -1.0 -24 -2.5 -5 □ 2009 2010 **2011** \* on average interest--10 **2011** (1-2) bearing assets -11.7 **2012 (1-2)** -15 ROA ROE operating net interest expenses/ margin\* assets Source: Bank of Slovenia.

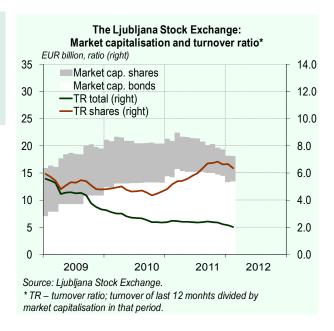

2.1% on the same period last year, while interest expenses were up 5.6%. Non-interest income in February was down a fifth on last year, partly as a result of a decline in income from net fees and commission, and bank losses from trading. The banking system's gross income was thus down 7.5% as a result. The banks created EUR 66 million in provisions, down a half on the same period last year. However the decline compared with last year was primarily the result of last February's high impairment and provisioning costs. The costs of provisioning in the banking system remain relatively high, and were equivalent to 31% of the banks' gross income over the first two months of the year.

## 7 Financial Markets

The SBI TOP fell by 6% in February, taking the year-on-year change to -31.4%. The market capitalisation of shares on the Ljubljana Stock Exchange fell by 3.1% in February. Non-financial corporations accounted for 90% of the market capitalisation of shares, insurance corporations for 6.2% and banks for 4.3%. Despite recording a small increase in January, the volume of trading in shares declined by 4.4% in February. Shares in Krka accounted for almost half of the monthly volume, while Mercator shares accounted for 24%. Shares accounted for 85% of

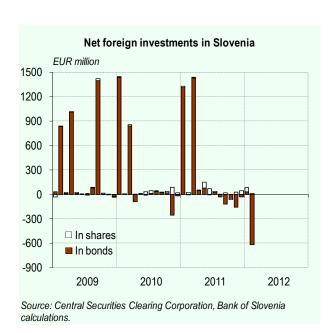

Monthly Bulletin, March 2012 23-1.

total stock market volume in February. The dividend yield on the prime market increased to 3.6%.

The market capitalisation of bonds on the Ljubljana Stock Exchange fell by 0.8% in February. Government bonds still accounted for the vast majority of market capitalisation in February (91.4%), with bank bonds accounting for 5.3% and corporate bonds for 3%. The volume of trading in bonds fell by a negligible 0.1% in February, despite the newly issued Petrol bonds. Slovenska odškodninska družba 2nd-issue bonds accounted for just over 80% of the volume of trading in bonds in February. The proportion of total stock exchange volume accounted for by bonds stood at 14.3% in February.

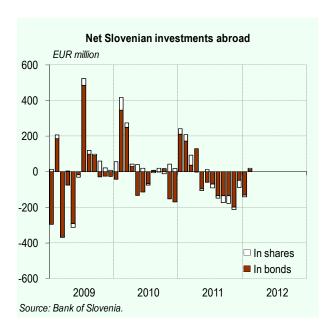

In February the main factor on the financial markets was the positive impact of expectations of high demand for the second Eurosystem LTRO and the approval of the second bailout package for Greece in the amount of EUR 130 billion. As a result, the DJ EuroStoxx index for western Europe rose by 4.3%, the MSELEMEE for eastern Europe by 4.9%, and Frankfurt's DAX by 6.1%. The release of slightly better-than-expected economic figures in the US pushed up the S&P 500 by 4.1%. China's Hang Seng recorded a larger monthly rise than the aforementioned American and European indices, at 6.3%. The Balkan stock markets also rose: Croatia's CROBEX was up 3.5%, Serbia's BELEX 15 was up 9.8% and Macedonia's MBI-10 was up 13.2%.

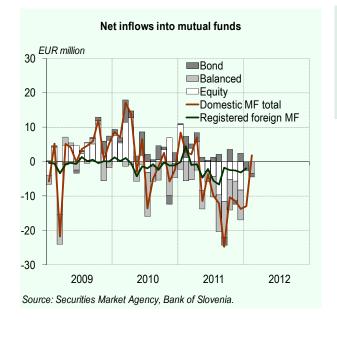

The proportion of the market capitalisation of shares on the Ljubljana Stock Exchange accounted for by non-residents amounted to 12.5% in February. Nonresidents made net sales of EUR 617.6 million in Slovenian bonds in February, the largest net sales of the period since 2003 during which figures have been available. The majority of the net sales were the result of the sale of RS64 government bonds, in particular by residents of Belgium and Luxembourg. Non-residents made net purchases of Slovenian shares in the amount of EUR 11.6 million in February, of which EUR 4.1 million was the product of trading in shares in the KD Group and EUR 3.6 million was the product of trading in shares in Krka. The largest net purchases of Slovenian shares (EUR 8.1 million) were made by residents of Austria, followed by residents of the US (EUR 5.2 million).

Residents made net purchases of EUR 11 million in bonds and EUR 8.6 million in shares of foreign issuers in February. The largest net purchases of foreign debt securities were made by the sector of other financial intermediaries excluding insurance corporations and pension funds and the household sector, in the amounts of EUR 6.5 million and EUR 4.4 million respectively. The banking sector recorded net payments of EUR 0.8 million from bonds of foreign issuers in February. The main net purchasers of foreign shares were other financial intermediaries and insurance corporations and pension funds (EUR 14.2 million), while households were the main net sellers (UR 6.4 million).

I.-24 Monthly Bulletin, March 2012

February saw positive net inflows into the domestic mutual funds for the first time since April 2011. They amounted to EUR 1.8 million, which along with the rise of 1.1% in the average unit price brought an increase in assets under management to EUR 1,907 million. The year-on-year change in the average unit price remained negative in February, at -9.1%. The mutual funds under majority bank ownership recorded net inflows of EUR 0.7 million in February, while the nonbank mutual funds recorded net inflows of EUR 1.1 million. These were the first net inflows into funds under majority bank ownership for almost two years. The net payments into equity funds of EUR 7.1 million outweighed all the net withdrawals from bond funds, balanced funds and money-market funds, which totalled EUR 5.3 million. These were the first net inflows into equity funds for nine months. In terms of the sectoral breakdown, the main inflows into the mutual funds came from insurance corporations and pension funds, which made net payments of EUR 8 million in February. Non-financial corporations also recorded net inflows, of EUR 1.6 million. The household sector still has less confidence in the current unstable situation on the market, and thus recorded net withdrawals of EUR 7 million. The proportion of the domestic mutual funds' assets under management accounted for by liquid assets<sup>1</sup> stood at 11.2%.

Monthly Bulletin, March 2012 11-III

# IV. NOTES ON METHODOLOGY

#### **General notes**

#### **Sectors**

For data from 30 April 1999 onwards, a sectorization has been implemented according to the Regulation on Introduction and Implementation of Standard Classification of Institutional Sectors (hereinafter SKIS), published in the Official Gazette No. 56/98. SKIS, which implemented a national standard for economic sectorization, based on the European System of Accounts 95 and is in accordance with the System of National Accounts 93. According to SKIS, the economy is divided into the following sectors: non-financial corporations, financial corporations (central bank, commercial banks, and other financial institutions), general government, households, non-profit institutions serving households, and the external sector (non-residents).

The external sector comprises non-residents; the domestic sector, residents.

Residents of the Republic of Slovenia are defined as:

- companies and other legal entities with a registered office in the Republic of Slovenia, not including their branches abroad;
- branches of foreign companies entered in the Register of Companies of the Republic of Slovenia;
- sole proprietors or natural persons independently performing business activities as their primary occupation, with a registered office in the Republic of Slovenia or having permanent residence in the Republic of Slovenia;
- natural persons with permanent residence in the Republic of Slovenia;
- natural persons temporarily residing in the Republic of Slovenia, holding a residential or working visa valid for no less than six months; and
- diplomatic, consular and other representative offices of the Republic of Slovenia abroad which are financed from the Budget, as well as Slovene citizens employed at these representative offices and their family members.

All other persons and entities shall be deemed non-residents.

The domestic sector is broken down to the monetary sector and non-monetary sectors. The monetary sector consists of the Bank of Slovenia and other monetary financial institutions (banks, savings banks and money market funds). Domestic monetary financial institutions, owned by both residents and non-residents, are included.

Non-monetary sectors are: non-financial corporations, non-monetary financial institutions, general government, house-holds, and non-profit institutions serving households. Non-financial corporations (enterprises) are legal persons – market producers of goods and non-financial services.

The non-monetary financial institutions sector comprises other financial institutions. Other financial institutions are: other financial intermediaries, except insurance corporations and pension funds (mutual funds, investment funds and financial leasing companies), financial auxiliaries (securities brokers/dealers, stock exchanges) and insurance corporations and pension funds.

The general government consists of the central government (administrative departments of state and central government agencies), local government (local administration, local agencies) and social security funds.

"Households" refers to resident individuals as consumers, resident individuals as sole proprietorships, and partnerships being market producers and having no independent legal status. The data of the latter, prior to 30 April 1999, were included in the enterprises sector.

Non-profit institutions serving households are clubs, political parties, trade unions, churches or religious societies, humanitarian and charity organizations, and professional societies.

#### Characteristics of the data

- The data present stocks of assets and liabilities at the end of the period.
- Data on stocks denominated in foreign currencies are converted into domestic currency using the official end-ofperiod middle exchange rate.
- Data in tables are not seasonally adjusted.

#### Table: Republic of Slovenia: General Information

The table shows basic general data on Slovenia and its economy. In the "Latest actual" column, the latest available data for the current year are published. Sources of the data are the Bank of Slovenia, the Ministry of Finance and the Statistical Office of the Republic of Slovenia.

#### 1. MONEY AND MONETARY FINANCIAL INSTITUTIONS

Data in all tables present stocks items at the end of the period. Last published data are preliminary.

The change in the reporting could cause some inconsistencies in conceptual definitions of some items in the year 2005 data.

Until the end of December 2006 the data is published in the currency SIT, from 1 January 2007 the data is published in the currency EUR. The currency EUR in the data until the end of December 2006 is considered as foreign currency, from 1 January 2007 as domestic currency.

#### Change of Methodology

In May 2006 the tables of the Money and Monetary Financial Institutions chapter, have been changed. Structurally similar tables are based on the methodology of the European Central Bank (ECB) or of the euro area and no more on the methodology of the International Monetary Fund. The data source for the data of the MFI's in the changed tables is the report of the monetary financial institutions and not the bookkeeping report of the banks and savings banks. The main methodological changes are explained below.

The data from the new tables is available since December 2004, while the time series of the old tables up to March 2006 are still available on the Bank of Slovenia internet page (http://www.bsi.si/en/).

The main differences between the methodology of the ECB and the tables in the monthly bulletin up to April 2006 are as follows:

- The sector of the monetary financial institutions, MFI, contains banks, savings banks, savings and loans undertakings and money market funds, but it does not include old LB in KBM banks, while the banking sector without savings banks, savings and loans undertakings and money market funds but with the old LB and KBM is presented in the old bulletin tables.
- Balance sheet total according to the ECB's methodology differs from the balance sheet total according to the IMF's
  methodology mainly because of the different treatment of the loans. The loans are recorded on gross basis in the new
  tables and net of provisions in the old set. Consequently the stock of the loans is different.
- There is a difference among the stock of the items loans and deposits and debt securities among the claims and liabilities, because of the inclusion of the negotiable/non-negotiable securities into the items loans/deposits and debt securities. According to the ECB's methodology, the non-negotiable debt securities are included into the loans/deposits and the negotiable debt securities into the debt securities.
- According to the ECB's methodology, the deals by procuration and internal affairs are included on a net basis, while before they were shown on a gross basis.
- There are differences in the composition of monetary aggregates according to national definition and harmonized monetary aggregates according to the ECB's definition that are described below.

Since April 2006 the data of the specific balance sheet items (loans, deposits, securities other than shares and issued debt securities) are in line with the ECB's request recorded according to their nominal values. The nominal value of a specific instrument is an amount of the principal, which is owed by the debtor to the creditor:

- loans: unpaid principal, not included the accrued interest, the commissions and other expenses,
- deposits: amount of the time deposits, the accrued interest not included,
- debt securities: nominal value.

Interest, which is subscribed to the principal and thus increases it, is the component of the nominal value.

#### Description of the balance sheet instruments

Below is a short description of the balance sheet aggregate items or instruments, as defined by the European Central bank:

#### Cash

Holdings of domestic and foreign banknotes and coins in circulation that are commonly used to make payments.

#### Loans

For the purposes of the statistical reporting scheme, this item consists of funds lent by reporting agents to borrowers, which are not evidenced by documents or are represented by a single document (even if it has become negotiable). It includes assets in the form of deposits, bad debt loans, in respect of which repayment is overdue or otherwise identified as being impaired, traded loans, subordinated debt in the form of deposits or loans and claims under reverse repos. The stock of loans is included into the item according to the "gross" principle.

#### Securities other than shares

Holdings of securities other than shares or other equity, which are negotiable and usually traded on secondary markets or can be offset on the market, and which do not grant the holder any ownership rights over the issuing institution. Besides negotiable debt securities this item includes: negotiable loans that have been restructured into a large number of identical documents and that can be traded on secondary markets and subordinated debt in the form of debt securities. The item does not include the accrued interest – which are classified into the item remaining assets, except when the separation is not possible (when the interest is the inseparable part of the market price).

#### Shares and other equity

Holdings of securities which represent property rights in corporations or quasi-corporations. These securities generally entitle the holders to a share in the profits of corporations or quasi-corporations and to a share in their own funds in the event of liquidation. Mutual fund shares and money market fund shares/units are included here.

#### Remaining assets

This item may also include: financial derivative positions with gross positive market values, non-financial assets (tangible or intangible), accrued interest receivable on loans and securities, the surplus from the deals by procuration, internal affairs.

#### **Deposits**

Amounts owed to creditors by reporting agents, other than those arising from the issue of negotiable debt securities. Deposits also cover loans as liabilities of MFIs, which represent amounts received by MFIs that are not structured in the form of deposits, non-negotiable debt securities issued, liabilities for the loans received and where they are not separately stated also deposits redeemable at notice, repos and traded loans.

#### Debt securities issued

Securities other than equity issued by reporting agents, which are negotiable and usually traded on secondary markets or which can be offset on the market, and which do not grant the holder any ownership rights over the issuing institution, and the subordinated debt issued by MFI's in the form of the debt securities. The accrued interest are not included in the stock data, but classified to the remaining liabilities. The amount of debt securities is shown net of own purchase.

#### Capital and reserves

This category comprises the amounts arising from the issue of equity capital, including also non-distributed benefits or funds, specific and general provisions against loans, securities and other types of assets. The item is adequately netted for the own shares owned. This item also includes the difference between the revenues and expenditures during the year and the money market fund shares/units issued.

#### Remaining liabilities

The remaining liabilities consist of accrued interest payable on deposits and debt securities, provisions representing the liabilities vis-r-vis third persons, gross amounts payable in respect of transit items, financial derivative positions. The surplus of the liabilities over claims from the deals by procuration, internal affairs is also included here.

#### **Tables**

In May 2006 the tables from 1.1. to 1.8 have been changed and substituted with the new ones, which enables partial continuity of the old time series.

The entry to the euro area (on 1,1.2007) caused a break in the time series of the statistical tables in the Monthly bulletin in cases where the "currency" is an attribute. An expected reclassification of the data between the individual columns in the tables, which keep the same name takes place, for example of the stock of outstanding loans in euros from the time series of "foreign currency" before the introduction to the time series of "domestic currency" after the introduction of euro. To enable easier reconstruction of this change, the shares of the Euro amounts in stocks of the foreign currency on 31.12.2004, 31.12.2005 and 31.12.2006 are published in the Methodological notes for the tables 1.3, 1.4, 1.5 in 1.6, where the reclassification occurred.

<u>Note 1:</u> With the publication of April 2011data the corrected time series on Deposit with agreed maturity and Deposit redeemable at notice (Tables 1.2., 1.4., 1.6.) were published for the period January 2009 to May 2010 due to the change on the source of the data.

#### Table 1.1.: Monetary Aggregates

The table shows stock data at the end of month for monetary aggregates M1, M2 and M3, calculated according to the definition of the European Central Bank.

The main characteristics of monetary aggregates under the ECB's definition:

- Inclusion of liabilities of MFI sectors to EMU non-monetary sectors,
- Exclusion of the monetary neutral sector (the central government has the status of a monetary neutral sector),
- · Limited maturity of items included (liabilities of up to 2 years and deposits redeemable at notice of up to 3 months only),
- · Equal treatment of the liabilities in domestic and foreign currency,
- · Inclusion of the money market fund shares/units into M3.

Monthly Bulletin, March 2012 3-IV

### BANK OF SLOVENIA

Composition of monetary aggregates, as defined by the ECB is:

- M1 contains currency in circulation and overnight deposits,
- M2 includes beside M1 also deposits with agreed maturity of up to 2 years and deposits redeemable at notice of up to
- M3 includes M2, repurchase agreements and debt securities with the maturity of up to 2 years and money market fund shares/units.

The table is split into two parts: the first part (before the entry of Slovenia into EMU until the end of December 2006) presents Monetary aggregates of Slovenia and the second part (after the entry of Slovenia into EMU from 1 January 2007 onwards) presents the contribution of Slovenia to monetary aggregates of EMU.

The item 'Currency in circulation' is calculated on the basis of the Capital Share Mechanism (CSM) which foresees the split of the total amount of issued banknotes in the euro area between the different national central banks of the euro area with respect to their share in the capital of the ECB (8% of the total value of the euro area banknotes in circulation is allotted to the ECB). Coins (which are in fact the liability of the central government) are added to the total amount of banknotes. The item 'Cash' held by the MFIs is deducted from the total amount of currency (banknotes and coins).

The contribution of the Slovenia to the euro area monetary aggregates does not represent monetary aggregates of Slovenia. The concept of residency is the one of the euro area. Due to the consolidation within the MFI sector on the level of euro area countries the aggregate M3 could become smaller than M2.

#### Table 1.2.: Consolidated Balance Sheet of the Monetary Financial Institutions

The table shows the end of the month consolidated balance sheet of Bank of Slovenia and other monetary financial institutions, presented in the tables 1.3. and 1.4. The bilateral claims and liabilities of the sectors S.122 and S.121 are netted out. On the liability side of the balance sheet the liabilities to the central government sector (S.1311) in certain items are excluded and are included in the remaining liabilities.

The item 'Banknotes and coins' is for series after 1 January 2007 calculated on the basis of the Capital Share Mechanism (CSM) which foresees to split of the total amount issued in the euro area between the different National central banks of the euro area with respect to their share in the capital of the ECB (8% of the total value of the euro area banknotes in circulation is allotted to the ECB). Coins (which are in fact the liability of the central government) are added to the total amount of banknotes.

#### Table 1.3.: Balance Sheet of the Bank of Slovenia

The table shows the Bank of Slovenia's assets and liabilities at the end of month in line with the methodology of the ECB. According to the ECB's methodology the item 'Banknotes and coins' includes the data of coins in circulation (which are in fact the liability of the central government) and excludes the data of issued payment notes, which are included in the remaining assets.

The item 'Banknotes and coins' is for series after 1 January 2007 calculated on the basis of the Capital Share Mechanism (CSM) which foresees to split of the total amount issued in the euro area between the different National central banks of the euro area with respect to their share in the capital of the ECB (8% of the total value of the euro area banknotes in circulation is allotted to the ECB). Coins are added to the total amount of banknotes

#### Table 1.7.: Balance sheet of the Bank of Slovenia - by instruments

The table shows the data of the balance sheet of the Bank of Slovenia, split by instruments of the monetary policy. The table is composed according to accounting rules of the ECB an differs from the table 1.3. Balance Sheet of the Bank of Slovenia, which is composed according to the statistical methodology of the ECB.

#### Table 1.8.: Investment funds

#### General

Methodology of investment fund statistics in Slovenia is based on Regulation (EC) No 958/2007 of the ECB of 27 July 2007 concerning statistics on the assets and liabilities of investment funds and Guideline of the ECB of 1 August 2007 on monetary, financial institutions and markets statistics (recast). Time series in tables are available from December 2008 on, when the new reporting of investment funds was introduced. The data is revised when publishing data for the next period.

Note 1: Financial sectors comprise Bank of Slovenia, other monetary financial institutions (banks, saving banks and monetary funds) and other financial institutions (other financial intermediaries, except insurance corporation and pension funds, financial auxiliaries and insurance corporations and pension funds).

Note 2: Non-financial sectors are formed by non-financial corporations, general government, households and non-profit institutions serving households.

Note 3: Monetary funds are included in the sector of other monetary financial institutions and not in the other financial intermediaries, where investment funds are classified.

#### Deposit

This item consists of transferable deposits (sight deposits) and other deposits. Other deposits are deposits, which cannot be used for payments and cannot be exchanged for transferable deposits without significant constraints or extra costs. They comprise deposits with agreed maturity, certificates of deposits, which are non-tradable or whose tradability, although theoretically possible, is very limited and other non-transferable deposits.

#### **Debt securities**

Debt securities are short-term or long-term.

Short-term ones include all instruments of monetary market with original maturity of one year or less.

Long-term debt securities are securities with original maturity of more than one year and include bonds, instruments of monetary market with original maturity of more than one year and other debt securities.

Interest-bearing securities are shown including interests. In case interests cannot be included with debt securities, they are shown separately under the item other assets.

#### Shares and other equity

The item includes shares and units/shares of investment fund.

Shares are financial assets, which represent the right of ownership to the joint-stock companies. These financial assets usually give the owners the right to certain share in profit of the joint-stock companies and to certain share in their net assets when winding up.

Units/shares of investment fund include units or shares of open-end and closed-end investment funds.

#### Other assets

Under this item the claims on sold or mature investment, claims on Asset Management Company and trustee, interest and dividend claims, claims on securities' obligations, other corporate claims, accruals and prepaid expenditure are reported. Accruals and prepaid expenditure include deferred expenses or costs, short-term accrued revenues and also deferred interests.

Financial derivatives are either financial assets or financial liabilities; in balance sheet they are recorded as unnetted.

#### Loans

The item includes loans borrowed, covering loans, repurchase agreements and other forms of loan as techniques and tools for managing the investments of investment funds.

#### Investment fund shares/units

Investment fund shares/units represent total liability to shareholders or investors of investment fund.

#### Other liabilities

The item other liabilities include corporate liabilities of investment fund, namely liabilities from financial instruments' purchase, management liabilities, tax liabilities, liabilities of distribution of profits or other payments to holders of units or shareholders, other corporate liabilities, accruals and income collected in advance and financial derivatives.

Accruals and income collected in advance include accrued costs or accrued charges and prepaid income. Under this item deferred interests are also reported.

Monthly Bulletin, March 2012 7–IV.

#### 2. FINANCIAL MARKETS AND PAYMENT SYSTEMS

#### Interest rates (tables 2.1-2.4)

#### Table 2.1: Bank of Slovenia Interest Rates

Lombard loan: Within the framework of a standing Lombard facility, the Bank of Slovenia provides one-day Lombard loans to banks and savings banks with securities used as collateral. The pledged securities should amount to 110% of the amount of the Lombard loan.

The *repo interest rate* for the temporary purchase of treasury bills and tolar and foreign currency bills of the Bank of Slovenia with obligatory repurchase in seven days was the weighted arithmetic average of daily repo interest rates until March 2004 (effective interest rate). The new seven-day repo was introduced in March 2004; it is offered on a closed basis. The interest rate given is the latest valid interest rate.

Interest rate on banks' obligatory reserves: 1 percent per year since October 1991.

The overnight-deposit interest rate is an interest rate applying to deposits placed by banks and savings banks on an overnight term with the Bank of Slovenia.

Long-term deposit at the Bank of Slovenia was established in July 2004. The variable interest rate is defined once every two months for the next two-month period. It refers to the interest rate for 60-day tolar bills valid at the time of quotation, increased by 0.2 percentage points.

Tolar bills are registered securities subscribed by banks and savings banks with a maturity of 60 or 270 days. Sixty-day bills are offered on a permanent basis; 270-day bills were sold by auction until February 2004, and since then have been offered on a closed basis. Interest rates for tolar bills are given nominally; in the case of auctions they are effective rates. Offers of 270-tolar bills have been frozen since November 2004.

Foreign currency bills are transferable registered securities not issued in series. They are offered on a permanent basis and can be purchased by banks (or by other legal persons through banks until 3 May 2000). They are sold for euros (or German marks until February 1999, or U.S. dollars until June 2006) at a discount with maturities of two to four months.

A penalty rate is generally employed in cases of overdue payments. The penalty rate has been determined by the Law on the Legal Penalty Rate since 28 June 2003.

Interest rates for a certain type of instrument in the table are those last valid in a period (except in the case of effective interest rates). The annual averages of interest rates are computed as simple arithmetic averages of monthly data, if such data are available.

#### Table 2.2: Interbank Money Market Rates and Indexation Clause

#### Interbank market

#### SIONIA/SITIBOR

Until 31 December 2006, the figures are annual nominal interest rates for unsecured Slovenian tolar deposits on the Slovenian interbank market. The interest rate for overnight deposits (SIONIA) is the weighted average interest rate for overnight deposits.

SITIBOR is the rate at which Slovenian interbank term deposits are offered by one prime bank to another prime bank.

SIONIA and SITIBOR were valid from 14 July 2003 to 31 December 2006. Break of series in January 2007.

#### EONIA/EURIBOR

Eonia® (Euro OverNight Index Average) is the effective overnight reference rate for the euro. It is computed as a weighted average of all overnight unsecured lending transactions undertaken in the interbank market, initiated within the euro area by the contributing banks.

The Euro Interbank Offered Rate – "Euribor®" – is the money market reference rate for the euro. It is sponsored by the European Banking Federation, which represents the interests of 4,500 banks in 24 Member States of the European Union and Iceland, Norway and Switzerland, as well as the Financial Markets Association. Euribor® is the rate at which euro interbank term deposits are being offered within the EMU zone by one prime bank to another

#### Indexation clauses

#### TOM

The tolar indexation clause (TOM) is an annual interest rate calculated by the Statistical Office of the Republic of Slovenia and used for preserving the value of financial liabilities and assets in domestic currency.

TOM (monthly): since 5 August 1995, the average of the previous 3 months' inflation. (Until June 1995, indexation was based on the so-called R, which was equal to the previous month's inflation rate; from 1 June to 4 August 1995, indexation

was based on the average of the previous 3 months' inflation.) From February 1996, 4 months; from December 1996, 6 months; and from May 1997, 12 months. Financial liabilities and assets in domestic currency with maturity less than 1 year have not been revalued since July 2002.

#### Foreign exchange indexation clause USD and CHF

The monthly rate is the growth rate of the end-of-month exchange rate for USD and CHF.

The annual rate is computed from the monthly rate on the conform basis, taking into account the actual number of days in the month and the year.

#### Table 2.3: European Central Bank Interest Rates

Counterparties can use the **deposit facility** to make overnight deposits with the NCBs. The interest rate on the deposit facility normally provides a floor for the overnight market interest rate.

Main refinancing operations are regular liquidity-providing reverse transactions with a frequency and maturity of one week. They are executed by the NCBs on the basis of standard tenders and according to a pre-specified calendar. The main refinancing operations play a pivotal role in fulfilling the aims of the Eurosystem's open market operations and provide the bulk of refinancing to the financial sector.

Counterparties can use the **marginal lending facility** to obtain overnight liquidity from NCBs against eligible assets. The interest rate on the marginal lending facility normally provides a ceiling for the overnight market interest rate.

#### Table 2.3.1.: Harmonised long-term interest rates for convergence assessment purposes

The long-term interest rate statistics refer to the monthly average interest rates for long-term government bonds issued by the central government, guoted as percentages per annum.

The fourth Maastricht criterion is based on the level of long-term interest rates. Article 4 of the Protocol on the convergence criteria, as referred to in Article 121 of the Treaty, states that compliance with the fourth convergence criterion "shall mean that, observed over a period of one year before the examination, a Member State has had an average nominal long-term interest rate that does not exceed by more than 2 percentage points that of, at most, the three best performing Member States in terms of price stability. Interest rates shall be measured on the basis of long-term government bonds or comparable securities, taking into account differences in national definitions."

The European Central Bank and the European Commission have, together with the national central banks, identified the representative debt securities that can be used to measure long-term nominal interest rates and, if necessary, alternative long-term interest rate indicators where suitable government bonds are not available

Data until December 2006 refer to the yield to maturity on a reference long-term general government bond, issued in Slovenian tolars and with a nominal interest rate. Since 1.1.2007 the data show the yield to maturity on a basket of long-term general government bonds, issued in euro and with a nominal interest rate.

Until 2003 a yield to maturity on a primary market is presented, and afterwards a yield to maturity on a secondary market.

#### 2.4: Monetary Financial Institutions Interest Rates

#### Data from January 2003-April 2005

Estimates on MIR statistics refer to interest rates on new business applied by the eight biggest resident banks (selected by balance-sheet-total criterion) to loans denominated in Slovenian tolars vis-ŕ-vis domestic households and non-financial corporations.

Interest rates are calculated as a weighted average of all interest rates on new business in the instrument category.

Loans to non-financial corporations (breakdown by amount category): loans in SIT are converted into EUR by the monthly average exchange rate and then classified according to amount up to and including EUR 1 million, or over EUR 1 million.

"Loans to households for other purposes" include only loans to sole proprietors for current and capital assets. Data on APRC in the period from January to August 2003 refer to six respondents, and from August 2003 to December 2003, to seven out of eight total respondents.

Data from May 2005-December 2006 covers business conducted in SIT by the total MFI population in Slovenia.

MFI interest rate statistics cover those interest rates that resident monetary financial institutions (MFIs, i.e. "credit institutions") apply to euro-denominated deposits and loans by households and non-financial corporations which are residents of the euro area.

Monthly Bulletin, March 2012 9-IV.

The legal requirements for MFI interest rate statistics are laid down in Regulation ECB/2001/18, which defines the statistical standards according to which monetary financial institutions must report their interest rate statistics. This regulation is complemented by the Manual on MFI Interest Rate Statistics, which further clarifies and illustrates the statistical requirements. The MFI interest rate statistics refer to the interest rates individually agreed between a credit institution or other institution and its customer. They are converted to an annual basis, taking into account the frequency of interest payments, and are quoted in percentages per annum. At the euro area level 45 interest rate indicators with the corresponding volumes are collected, of which 31 refer to new business and 14 to outstanding amounts.

**Outstanding amounts** are defined as the stock of all deposits placed by customers, i.e. households and non-financial corporations, with credit institutions or other MFIs, and the stock of all loans granted by credit institutions to customers. An interest rate on outstanding amounts reflects the weighted average interest rate applied to the stock of deposits or loans in the relevant instrument category in the time reference period. Interest rates on outstanding deposits cover all deposits placed and not yet withdrawn by customers in all periods up to and including the reporting date. Interest rates on outstanding loans cover all loans used and not yet repaid by customers in all periods up to and including the reporting date, although excluding bad loans and loans for debt restructuring at rates below market conditions. MFI interest rates on outstanding amounts are hence statistics on the interest rates actually applied to all "open" deposits and loans.

New business is defined as any new agreement between the household or non-financial corporation and the credit or other institution. New agreements comprise all financial contracts, the terms and conditions of which specify for the first time the interest rate on the deposit or loan, and all new negotiations of existing deposits and loans. The prolongation of existing deposit and loan contracts which are carried out automatically, i.e. without any active involvement of the household or non-financial corporation, and which do not involve any renegotiating of the terms and conditions of the contracts, including the interest rate, are not considered new business.

The annual percentage rate of charge (APRC) is an effective lending rate that covers the total cost of credit to the consumer, i.e. the interest payments as well as all other related charges. It covers the total cost of credit to the consumer, as defined in Article 18(2) of the Consumer Credit Act. Charges defined in Article 18 of the Consumer Credit Act are excluded. APRC is compiled only for consumer credit and loans to households for house purchases (sole proprietors excluded).

Weighting method: The interest rates on new business are weighted by the size of the individual agreement.

The new interest rate statistics replace the average bank interest rates published by the Bank of Slovenia. The coverage and definition of the new statistics differ substantially from those previously published. Therefore, a direct comparison of the new and old rates is not possible.

- \* Households = sole proprietorships + individuals + non-profit institutions serving households
- \*\*APRC data includes households without sole proprietorships and without non-profit institutions serving households

Note 1: For this instrument category, new business and outstanding amounts coincide.

Note 2: For this instrument category, households and non-financial corporations are merged and shown under the household sector.

#### Exchange rates (Tables 2.6.1-2.6.2)

#### Table 2.6.1: Selected Bank of Slovenia Exchange Rates - Average Rates to 31.12.2006

These tables show the Bank of Slovenia middle rates until 31 December 2006. Annual rates are computed as arithmetical averages of monthly rates. Monthly averages are computed as arithmetical averages of daily rates (Sundays and holidays excluded).

A new currency, the Croatian kuna (= 1,000 former Croatian dinars) was introduced on 30 May 1994. The Polish złoty was denominated on 1 January 1995 at the exchange rate of 1 new złoty for 10,000 old złotys.

#### Table 2.6.2: European Central Bank exchange rates

Reference exchange rates of the European Central Bank are shown, representing middle exchange rates of the Bank of Slovenia. The average yearly and monthly exchange rates are calculated as the arithmetical average of daily exchange rates, excluding days on which the TARGET system was closed. This includes Saturdays, Sundays and the following holidays: New Year's Day (1 January), Good Friday, Easter Monday, Labour Day (1 May), Christmas (25 December) and 26 December.

Conversion rates between the euro and the currencies of EU Member States that have adopted the euro are irrevocably fixed and valid since 1 January 1999 (since 1 January 2001 for the Greek drachma).

The conversion rate for the Slovenian tolar is valid as of 1 January 2007, the conversion rate for the Cyprus pound and Maltese lira as of 1 January 2008 and the conversion rate for the Slovak koruna as of 1 January 2009.

#### Payment systems (Tables 2.7 to 2.13)

#### General

Data prior to 2007 are published in tolars; from 2007, data are published in euros.

Due to rounding in Tables 2.11 to 2.15, sums of guarterly data do not always totally comply with relevant yearly data.

#### Table 2.7: TARGET2 and SEPA internal credit transfer (SEPA IKP) transactions

Note 1: On 1st January 2007 the transaction limit for payments submitted to the Giro Clearing system (multilateral net system for small value payments), raised from EUR 8.354,21 to EUR 50.000.

Note 2: SEPA internal credit transfer system (the SEPA IKP) is operated by the clearing company Bankart d.o.o. SEPA IKP system was established on 4 March 2009. Before SEPA IKP establishement the same transactions were processed in Giro Clearing payment system, operated by Banka Slovenije. Giro Clearing payment system was closed down on 1 August 2009. Data regarding transactions in the Giro Clearing payment system are published until March 2009. Data regarding transactions in both systems are published together (the sum of transactions in the Giro Clearing and SEPA IKP systems) for the period from March to July 2009. Data regarding payments in the SEPA IKP system are published from August 2009 on.

<u>Note 3:</u> Until 29th December 2006 payments data on domestic payments between Slovenian participants are published for domestic Slovenian RTGS system (values in billion Slovenian tolars). As of 1st January 2007 domestic payments of Slovenian TARGET participants represents payments sent from Slovenian credit institutions to another Slovenian payment institution, direct participated in the TARGET system.

As of 19th November 2007 payments in TARGET 2 system are considered.

Note 4: As of 1st January 2007 cross-border payments of Slovenian TARGET participants represents payments sent from Slovenian credit institutions to non-Slovenian credit institutions, direct participated in the TARGET system. As of 19th November 2007 payments in TARGET 2 system are considered.

Note 5: Gross value is the total value of all payment orders executed in the payment system.

<u>Note 6:</u> Net value is the amount required for the settlement of the gross value of payments in a payment system that uses netting. It represents the sum of the net monetary liabilities of all participants of the payment system to other participants of the payment system, calculated as the positive difference between the payment orders sent to the system and the payment orders received from the system for each participants of the payment system in an individual settlement cycle.

#### **Table 2.8 Payment Cards**

Note 1: Credit card: A card indicating that the holder has been granted a line of credit. The credit granted may be settled in full by a specific date each month (delayed debit card, i.e. charge card), or may be settled in part, with the balance taken as extended credit (credit card).

Note 2: Debit card: A card which enables the holder to have purchases directly charged to funds on the cardholder's bank account.

Note 3: Cards issued abroad: Payment cards issued abroad and used for payments in Slovenia, mostly by non-residents.

Note 4: Volume and value of transactions abroad: Use of cards issued in Slovenia for payments abroad.

Monthly Bulletin, March 2012 11-IV

NK OF SLOVENI

Number of payment cards in circulation: Number of valid payment cards held by residents and non-residents issued in Slovenia. Data refer to the end of each quarter/year.

Number and value of payments refer to the use of payment cards in each quarter/year.

Domestic card: Payment card issued by banks and enterprises resident in Slovenia without licence agreements with foreign issuers.

Licence card: Payment card issued by banks and enterprises resident in Slovenia under licence agreements with foreign issuers.

Bank card: Payment card issued by banks.

Retailer card: Payment card issued by non-banking institutions, mostly for use at specific retail outlets.

Personal card: Payment card issued to a natural person (family cards included).

Business card: Payment card issued to a legal entity.

#### Table 2.9 Other Payment Instruments and Innovative Payment Schemes

Note 1: Data refer to the end of each guarter.

Note 2: Prior to 2007 the data refer to payment transactions and money withdrawals at manual POS and EFT POS terminals in Slovenia. From 2007 on, the data on money withdrawals are not included.

#### **Table 2.10 Electronic Banking**

Note 1: Only credit transfers debited from payers' accounts are included.

Note 2: Payments by Bank of Slovenia as payment service provider for non-MFI subjects are also included from 2011 on.

#### **Table 2.11 Credit Transfers**

A paper-based order is a payment instrument related to a credit or debit transfer, in which the payer submits an order on a paper-based form. In case of credit transfer it means any instruction by an account holder to his payment service provider requesting the transfer of funds from his account to another account (also between accounts of the same account holder). Includes submissions by telefax if they require manual intervention in order to be transformed into electronic payments.

Special payment order is a special form of paper-based payment order, which is issued by a payee (beneficiary) to be paid by the debtor. The special payment order is presented by the payer at the bank, which then debits his transaction account and transfers the amount to the account of the payee, potentially via several other credit institutions as intermediaries and/ or one or more payment and settlement systems. A contemporary form can assure automated processing with ICR technology (Intelligent Character Recognition) or classic manual processing.

A non-paper-based credit transfer is any credit transfer which the payer submits without the use of paper forms i.e. electronically. Includes submissions by telefax or other means if they are transformed into electronic payments without

A standing order is a non-paper-based credit transfer and means an instruction from a payer to his bank to make a regular payment of a fixed amount to a named creditor. The payer authorises his bank (the bank at which he maintains a transaction account) to pay a specified amount regularly to another account. The payment must be repeated at least five times. The execution of payments occurs under exact conditions on a particular day of the month.

Direct credit is special form of payment instrument related to a credit transfer, initiated by the payer, which enables a cashless fund transfer from payer to payee. Direct credit is used for the execution of small value payments, e.g., salaries, pensions, dividends and similar payments, to a large number of creditors.

#### **Table 2.12 Debit Transfers**

Direct debit is an authorised debit on the payer's bank account initiated by the payee. It is a payment instrument consisting of automatic debiting of the debtor's account for goods and services delivered by the creditor. The debtor (payer) authorises his bank to transfer funds from his bank account to the creditor's account and the creditor to submit a payment order to the creditor's bank to be paid. A typical example is an electricity bill payment.

A special money order is a standardised paper-based debit instrument used to remit money to the named payee. A special money order is issued by a bank, allowing the individual named on the order form to receive a specified amount of cash on demand

#### Table 2.13: Network of Commercial Banks

Note 1: Statistical regions, source: Statistical Office of the Republic of Slovenia, 31March 2000.

Map of Slovenia by Geodetic Institute of Slovenia

Note 2: Data referring to the Post Bank of Slovenia do not include units of the Post of Slovenia that operate for the Post Bank of Slovenia on a contractual basis

#### 3. BALANCE OF PAYMENTS AND EXTERNAL POSITION

#### **Balance of Payments**

#### **General notes**

In most respects the Slovenian Balance of Payments (BOP) conforms to the methodology of the IMF's Balance of Payments Manual, fifth edition (1993).

#### **Characteristics of the Data**

Minus sign (-) indicates imports or surplus of imports over exports in the current account, increase in assets or decrease in liabilities in the capital and financial accounts, and growth of reserve assets.

Data on transactions are converted from the original currencies to EUR using the daily Bank of Slovenia or ECB's exchange rates, or average exchange rates for the period if the exact date of transaction is not known.

#### **Revision policy**

Revision of balance of payments, the international investment position and gross external debt data occur as follows:

Revisions in monthly data are published with the release of:

- the following month's data;
- the corresponding quarterly data;
- the corresponding revised quarterly data;
- the international investment position and external debt data for the corresponding year; and
- the revised international investment position and external debt data for the corresponding year.

Revisions in quarterly data are published with the release of:

- the following month's data;
- the data on the following quarter;
- the international investment position and external debt data for the corresponding year; and
- the revised international investment position and external debt data for the corresponding year.

Revisions for the **annual** balance of payments, international investment position and external debt data are published with the release of the data for the following years.

Annual data are revised for the year t-1 and t-2. In the case of major methodological changes or discrepancies among the data sources, data for the year t-3 will be revised as well.

#### **Data sources**

- The external trade statistics (Statistical Office of the Republic of Slovenia) is the main source of data on trade in goods. Since 1 May 2004, the source of data on trade in goods among Slovenia and EU Member States is the Intrastat reporting. The source of data on trade in goods with other countries is the single administrative document (Exstrastat reporting).
- Reports on account balances and transactions between residents and non-residents (C, PPT, PPV):
  - report on account balances at domestic banks PPV (until 31 December 2004),
  - report on account balances abroad C (until 31 December 2006),
  - report on transactions through accounts at domestic banks PPT (until 31 December 2008),
  - report on transactions through accounts abroad C (until 31 December 2008).

All banks which conducted international payment transactions and all residents with open accounts abroad were obliged to report. The resident issuer/beneficiary of the payment was obliged to forward data on the type of transaction. Since 2009 only banks which conduct international payment transactions report transactions with nonresidents that exceed threshold EUR 50.000. Data are used for quality control purposes only.

Monthly Bulletin, March 2012 13-IV

## BANK OF SLOVENI

- Reports on trade in services, part of trade in goods and on current/capital transfers with nonresidents (BST) are the sources of data on services (excl. travel), data on coverage adjustments of goods item and data on current and capital transfers (excl. transfers with EU budget) from 2008 onwards.
- Reports on transactions with securities (VRP) and data from the Securities Clearing Corporation (KDD) are the sources of portfolio investments (debt and equity securities) and financial derivates since 2004.
- Reports on purchased/sold foreign debt securities without domestic brokers (DVP) are the sources of portfolio investments in foreign debt securities, carried out without domestic brokers, from 2007 onwards.
- Data regarding drawn/un-drawn credit transactions from foreign credit registration forms (KR) are the source of data on loans of all sectors until 2004; in 2005 and 2006 they are only the source for the non-banking sector. A registration was obligatory for all financial credits and long-term commercial credits; since 1997 from the same source are also obtained the data on the purpose of direct payments of foreign lenders, used to settle the obligations of domestic borrowers to other non-residents.
- Reports on monetary financial institutions (PORFI) are the source for data on loans, cash and deposits of the banking sector since 2005.
- Reports on credits received and granted and deposits with non-residents (KRD) are the source for data regarding loans and deposit of all sectors, except banks, since 2007.
- Reports on short-term receivables and liabilities from operations with non-residents (SKV) are the source for short-term trade credits and advances since 2002.
- Reports on investments (SN) are until 2007 the source for reinvested earnings of direct investments. From 2008 onwards these reports are source also for all other direct investment transactions in equity and related income as well as for portfolio equity transactions without involvement of domestic dealers.
- Accounting data of the Bank of Slovenia
- Accounting data of banks (KNB)
- Budget data on the transactions of government sector between the Republic of Slovenia and EU (from 2004

Qarterly data on financial account's statistics are source for financial derivatives for all sectors except the central bank (since 2007).

- Estimates and other sources
  - estimate of purchases of foreign currency and cheques from foreigners in exchange offices (part of the travel category) - until 2004
  - estimate of expenditures on travel abroad including purchases of goods abroad until 2004
  - estimate of Italian pensions (UMAR) until the end of 1998,
  - estimate of transactions with foreign currencies and the deposits of Slovene households (until 2006),
  - estimate of labour income (SURS),
  - data on pensions paid to non-residents (ZPIZ),
  - survey on the write-downs of debt from trade in goods and services abroad.
  - estimates for exports and imports of travel from 2005 onwards (detailed explanation under item Travel),
  - estimate of cash transactions on tourism and labour income (from 2007 onwards),
  - quarterly data on consumption of foreign embassies in Slovenia (SURS, from 2008 onwards),
  - migrants' transfers outflows (bilateral data between countries, from 2008 onwards),
  - households' transfers (SURS, from 2008 onwards).
  - assets acquired directly by tenders and programms of EU (SURS, from 2008 onwards),
  - data on nonresidents' investments in real-estate in Slovenia (GURS, from 2008 onwards).
  - data on purchases/sales of real-estate in Croatia (Croatian National Bank, from 2008 onwards),
  - data on purchases/sales of emission allowances between residents and nonresidents (Slovenian Environment Agency, from 2008 onwards).

#### **Current account**

#### Goods

Data regarding general goods can be obtained from the Statistical Office of the Republic of Slovenia. Prior to Slovenia's accession to the EU data were available from standard customs documents. Since 1 May 2004, data are available from single administrative documents for trade in goods with non-EU countries and from Intrastat reports for trade with EU Member States

Adjustments of CIF/FOB - data on import by CIF value were adjusted to FOB value with the help of a coefficient which is equal to the weighted average of coefficients between CIF and FOB values of the goods imported (in an available sample), separated with regard to type of goods, type of transport and partner's country. For 2004, a new CIF/FOB coefficient was calculated (1.0306); prior to that the coefficient was 1.0393. Since 2004 on, the coefficient is calculated every year based on a five year average.

Coverage adjustments - made for goods exported and imported without customs declarations (the ITRS source until 2007, the reports of duty free shops and consignment warehouses until 2005, BST reports as source from 2008 onwards). Since 1 May 2004, coverage adjustments also include estimated data on imports of motor vehicles from EU by natural persons not covered by Intrastat System.

#### Services

#### Transport

Transportation services are classified according to mode of transport and furthermore according to what is carried. The source of records on transportation services is the ITRS until 2007 and BST reports from 2008 onwards.

#### Travel - methodology until 2004

The ITRS sources used in the compilation of the "Incoming travel" category include: a.) health- and education-related services; b.) payments made by non-residents to Slovenian tourist agencies; c.) net withdrawals in tolars from non-resident accounts; d.) money spent in casinos by non-residents; e.) data on sales of goods to non-residents in duty-free shops and consignment warehouses; f.) payments with credit cards; and g.) sales of tolars to non-residents abroad.

The data on sales of tolars to non-residents in Slovenia are estimated based on the number of border crossings by foreign travellers and on the number of nights spent in the country by foreign tourists.

Data for the category "Expenditure on travel" come from the ITRS and estimations.

#### Travel - methodology since 2005 onwards

Main data sources to estimate the export of travel are the following surveys and researches conducted by Statistical Office of the Republic of Slovenia (SURS):

- Survey on foreign tourists in summer season is used to define the structure of foreign tourists according to their
  primary aim of travel (business travel, health care, education, other) and expenditures of each type of foreign
  tourists; three-year's survey -last conducted in 2009)
- Survey on foreign travelers (to define the structure of travelers broken down by same-day travelers and transit travelers and their respective expenditures).
- Arrivals and over-night stays of foreign tourists broken down by countries of their residency (monthly survey).
- Number of border crossings (to define the population of foreigners entering Slovenia).

Based on data sources the following six categories of data are calculated and finally broken down by countries using data on mobile phone operators;

- Business travel,
- Health related travel,
- Education,
- Other,
- Same- day travelers,
- Transit travelers.

Main data source to estimate the import of travel is SURS's survey TU\_ČAP (Quarterly survey on travel of domestic citizens). The Survey provides the value of expenditures of domestic population traveling abroad (same - day trips and longer trips) and the amount spent for transportation to and from the foreign destination, which is then subtracted from total expenditures in order to avoid double counting (since it is already included in transport services).

Based on TU\_ČAP data source the following five categories of data are calculated and finally broken down by countries using data on mobile phone operators;

- Business travel,
- Health related travel,
- Education,
- Other,
- Same day travelers.

#### Construction services

The source of data is the ITRS until 2007, all construction undertakings are recorded under construction services on net basis (the revenues earned on works performed abroad are recorded net of the corresponding expenditures). From 2008 onwards the sources of data on construction services are BST reports.

#### Insurance services

Premiums on life and non-life insurance are split into two components: (i) the service charge included in insurance services; and (ii) the premium in a narrow sense, recorded as a current transfer. The calculation of the service charge is based on a fixed percentage of premium payments. The source of data on insurance services is ITRS until 2007, this source was replaced by BST reports for 2008 data onwards. Insurance services include commissions of insurance companies and 45 % of premium payments. Insurance claims and other part of nonlife insurance premiums are included in current transfers, claims and part of life insurance premiums represent assets/liabilities of financial account.

#### Government services

All transactions settled through the accounts of Slovenian embassies abroad, as well as transactions coded as government services settled through the accounts of Slovenian banks with foreign correspondents, are included in this item until 2007 with the ITRS as the source of data. From 2008 onwards the source of data is BST report, government services include all services of slovenian representative bodies abroad. From the same year there are included data on consumption of foreign embassies in Slovenia. Data are provided by SURS (on the basis of taxation data).

Monthly Bulletin, March 2012

Also for all other types of services the ITRS source has been discontinued as of 2008, when the new source (BST report) for data on trade in services (excl. travel) has been introduced.

#### Income

Labour income - receipts. Since 2002, data from the Labour Force Survey (SURS) and Eurostat data have replaced ITRS and estimates as sources of labour income for the work of Slovene residents abroad.

Labour income - expenditures. ITRS is the source for labour income - expenditures until 2004. Data relating to 2005 onwards are provided by SURS on the basis of Labour Office register for the number of nonresidents, who at the end of each quarter possess valid work permits and who actually worked in Slovenia less than one year and data by The Health Insurance Institute of Slovenia for nonresidents, who at the end of each guarter don't need valid work permits and who actually worked in Slovenia less than one year. Data on daily migrant workers from Austria, Italy, Hungary and Croatia are

Since 2002, labour income (receipts and expenditures) is included according to the gross principle (including taxes and social contributions).

Capital income - Since 2004, VRP reports have replaced ITRS as a source for income from equity securities. Annual reports on capital investments are the source for data regarding reinvested earnings. Data on reinvested earnings in the current year are estimated - (a three year monthly average of actual data on total earnings, less extraordinary incomes [the source being annual reports on investments], is decreased by dividends and other incomes, paid in the current month (the source being monthly reports on investments from 1.1.2008 onwards, previously the source was ITRS). The estimate is replaced by actual data only when these data are available. Data on disproportionally large exceptional payments of profits relative to the recent level of dividends and earnings (superdividends) are excluded from income and included in direct investment as withdrawals of equity (from 2008 onwards). Until 2003, the source of income from debt securities was ITRS; since 2004 the sources are reports on securities transactions (VRP reports) and KDD data. Until 2004, the source on income from other investments was ITRS for the banking sector; the source was later changed to reports on monetary financial institutions (PORFI). Until 2006, the source on income from other investments for the non-banking sector was ITRS; since 2007, the source is KDD reports. Income from loans (including long-tern commercial credits) and cash reserves have been managed according to the accrual principle since 2002; since 2007, total income from other investments is managed according to the same principle. Since 2004, the accrual principle is used for income from bonds and

#### Current transfers

Current transfers of other sectors are subdivided into workers' remittances, insurance and other transfers. Current transfers of the government sector and other transfers of other sectors are from 2002 onwards subdivided into taxes, subsidies, social contributions, social benefits and other transfers. The main data sources are the ITRS and estimates until 2007, from 2008 onwards the sources are BST reports and from 2004 onwards, data on EU transfers of the government sector are obtained directly from the Ministry of Finance (budget data). Migrants' transfers - outflows (data provided by foreign central banks) and transfers of households (SURS survey) are included from 2008 onwards.

#### Capital and financial account

#### Capital account

#### Capital transfers

The ITRS is the source of data until 2007. Migrants' transfers cover not only payments recorded by domestic banks, but also the changes in residency of accounts held with these banks. From 2008 onwards data are obtained from BST reports, but data on capital transfers between the Republic of Slovenia and the EU are from 2004 onwards obtained directly from the Ministry of Finance (budget data). Since 2002, the Bank of Slovenia also estimates the value of write-downs of debt from trade in goods and services abroad. From 2008 onwards, there are also included data on assets acquired directly by tenders and programms of EU (SURS, Annual survey on investment in tangible assets).

#### Financial account

#### Direct investment

Direct investment is until 2007 recorded on the basis of reported payments through domestic banks and data from customs declarations, from 2008 the source is direct monthly report SN. Data on reinvested earnings are based on yearly surveys on balance and transactions with affiliated enterprises (SN) and are included monthly as one-twelfth of the yearly figure. Data regarding reinvested earnings for the current year are estimated. Until 1997, the purchase and sale of all shares and equity were included in this item. Data on disproportionally large exceptional payments of profits relative to the recent level of dividends and earnings (superdividends) are included in direct investment as withdrawals of equity (from 2008 onwards).

From the beginning of 1997, purchase and sale of shares that assure more than 50 percent of a company's equity (a controlling interest of shares) and shares issued by domestic companies on the primary markets with the purpose of increasing the nominal capital of the company are included in this item, due to capital control measures. With the new Foreign Exchange Act in 1999, the 10% rule is applied to direct investment. Data of Surveying and Mapping Authority of the Republic of Slovenia on nonresidents' investments in real-estate in Slovenia are included from 2008 onwards. From the same year data on Slovenian residents' purchases/sales of real-estate in Croatia are included (data source is Croatian National Bank).

Since 2001, there is a break in the data series in the category "Direct Investments - Other Capital". Since that time, loans and long-term commercial credits between affiliated companies (10% or more of capital share) are included in this category. Until 2000, these types of transactions were included in the category "Other Investments". Since 2002, the category "Direct Investments - Other Capital" also includes short-term commercial credits between affiliated companies.

Since 2005 other capital claims / liabilities does not include banking sector's claims/liabilities with direct investment relationship (these data are included in item other investment/loans.

#### Portfolio investment

Transactions are divided into assets and liabilities, with further breakdown into equity and debt portfolio investment. Until 1997 only data on sales and purchases of debt securities through banks were included in this item. Since February 1997 the equity securities with the exception of direct investment are included in this item too. With the new Foreign Exchange Act in 1999, portfolio investment transactions include all transactions below the 10% rule. Equity portfolio investment to individual sectors is subdivided into mutual funds and other investment. VRP and KDD data are the main sources from 2004 onwards. Since 2007 on this item includes also assets of debt portfolio instruments held by Bank of Slovenia, which are no longer considered as international reserves, but as claims to EMU member states and claims in EUR currency to all other nonresidents. From 2007 onwards data on transactions in assets of foreign debt instruments that occur without involvement of domestic dealers are collected on a report DVP, and from 2008 onwards assets and liabilities in portfolio equity investments deriving from transactions without involvement of domestic dealers are collected on report SN.

#### Financial derivatives

From 2004 until 2006 these types of transactions are included in VRP and KDD sources. Since 2007 qarterly data on financial account's statistics are source for financial derivatives for all sectors except the central bank. From 2009 onwards financial derivatives of Bank of Slovenia are included in other investment/financial derivatives item or international monetary reserves item (depending on the residency of the counterpart).

#### Other investments

#### Short-term trade credits

Until 2002, short-term trade credits were estimated based on the following calculation:

- {[export of goods FOB + coverage adjustments (export payments + free export of goods + direct investments in goods + drawings of granted long-term trade credits)]
- {[import of goods FOB + coverage adjustments (import payments + free import of goods + direct investments in goods + drawings of received long-term trade credits)]

Since 2002, short-term commercial credits and advances are included based on SKV reports. Short-term trade credits between affiliated companies are included in direct investments.

#### Loans and long-term trade credits

From 2001 onwards, inter-company debt transactions between affiliated enterprises (10% or more capital share) are not recorded as loans, but are recorded as direct investment – other capital transactions. Loans (including long-term trade credits) and related income have been calculated according to the accrual principle from 2002 onwards, and according to the cash principle prior to 2002. From 2005 onwards claims/liabilities of banking sector regardless of capital affiliation to nonresidents are included in this item (the direct investment relationships are not distinguished in the data source).

#### Currency and deposits

Until the adoption of Euro currency (1.1.2007) the foreign currency of residents is estimated based on the following formula: deposited currency and cheques on foreign currency accounts of individuals - withdrawals of cash and cheques from foreign currency accounts of individuals + the estimated net purchase of foreign currency by residents + estimated expenditures for tourist travel abroad + estimated expenditures of tourist travel to the former Yugoslavia + the estimated purchase of goods abroad - estimated labour expenditures abroad - estimated Italian pensions (until the end of 1998) + net withdrawals from non-resident accounts in local currency + the change of deposit balances of residents on accounts at BIS Member State banks (before 2002).

From the adoption of Euro currency (1.1.2007) onwards item foreign currency of households is estimated by using data on net inflows of foreign currency from tourism, data on net income on compensation of employees (decreased by consumption abroad/in the economy) and BIS (Bank for International Settlements) data on deposits held by residents with the banks abroad.

Since 2002, the category "Accounts Abroad of Other Sectors" also includes BIS data regarding deposits of residents on accounts at BIS Member State banks.

With adoption of EUR in 2007 as a national currency Slovenia became a member of EMU which affects the following changes in currency and deposits item;

- the item currency and deposits/ claims includes also estimated counterpart of the transactions in cash in current account of the balance of payments (tourism and labour income),
- claims of the Bank of Slovenia to EMU member states and all claims in EUR currency to all other states are included in the item currency and deposits/ claims.
- net position of the Bank of Slovenia to the Eurosystem (net result of incoming and outgoing payments conducted in EUR currency through TARGET and STEP2 system) is included in the item currency and deposits/ other liabilities.

#### International monetary reserves

Reserve assets and related income have been calculated according to the accrual principle from 2002 onwards, and according to the cash principle prior to 2002.

Monthly Bulletin, March 2012 17-IV

Following Slovenia's entry to the EMU in 2007, claims to other residents of the euro area (denominated in euros and in other currencies) and claims in euros to EMU non-residents are not included in reserve holdings. From 2007 onwards, these transactions are shown in the appropriate categories of the capital and financial account sector of the Bank of Slovenia (investments in securities and other investments).

International monetary reserves item includes also financial derivatives (from 2009 onwards).

#### Table 3.1: Balance of Payments 1988-1993

The balance of payments is based on the methodology of the International Monetary Fund (Balance of Payments Manual, IMF, 1993). The balance of payments for the period 1998 - 1991 does not include transactions with republics of the former Yugoslavia. The import and export of goods is shown without processing transactions, processing is included in services.

Note 1: For 1988 and 1989, official sector data is included in "Other sectors".

Note 2: For 1988 through 1990, "Statistical errors" include sales of claims from bilateral agreements to the former National Bank of Yugoslavia and its purchases of foreign currency through Slovenian foreign currency exchange offices.

Note 3: Reserve assets of the Bank of Slovenia.

#### Table 3.2: Balance of Payments

The data for the current year are revised monthly. Data become final according to the revision practice (see revision practice)

In June 2001, Slovenia acquired a 16.39% share in the holdings of the former Yugoslavia with the Bank for International Settlements (BIS), consisting of gold SIT 16.9 mio (EUR 77.8 million), foreign currencies SIT 1.1 mio SIT (EUR 5.3 million) and shares SIT 3.0 mio (EUR 13.8 million). This transaction is not considered to be a flow of the balance of payments, but rather a part of the "Other changes" category, which reconciles the international investment position in consecutive periods

\* Years 1994 in 1995: Data for balance of payments in ECU for years 1994 and 1995 are not obtained in the same manner as data for other years. The data for merchandise trade are converted from US dollar to ECU using average monthly exchange rates. The data for merchandise trade in Euros or ECU since 1996 are computed from values in original currencies using daily exchange rates for Euro or ECU.

Note 1: Exports and imports of goods - f.o.b. parity

Note 2: June 1996: Includes the issue of government bonds in exchange for a part of allocated foreign debt in the amount of SIT 63.7 mio (EUR 374.9 million). Banks' liabilities under foreign loans are decreased for the same amount and transferred to "Liabilities to government".

Note 3: Issues of eurobonds:

- August 1996 (EUR 253.7 million)
- June 1997 (EUR 205.1 million)
- May 1998 (EUR 500.0 million)
- March 1999 (EUR 400.0 million)
- March 2000 (EUR 400.0 million)
- February 2001 (EUR 100.0 million)
- April 2001 (EUR 450.0 million)

Issues of government bonds since 2007:

- March 2007, SLOVEN4 (EUR 1000.0 million)
- February 2008, RS63 (EUR 1000.0 million)
- February 2009, RS64 (EUR 1000.0 million)
- March 2009, RS65 (EUR 1500.0 million)
   September 2009, RS66 (EUR 1500.0 million)
- January 2010, RS67 (EUR 1500.0 million)
- March 2010, RS68 (EUR 1000.0 million)
- January 2011, RS69 (EUR 1000.0 million)
- March 2011, RS70 (EUR 1000.0 million)

<u>Note 4</u>: For 1993–2001, short-term claims include net changes in commercial credits (received and granted). From 2002 onwards, short-term commercial credits are included on the basis of SKV reports on the assets and liabilities side of the balance of payments. Short-term commercial credits between affiliated enterprises are included under the heading "Direct investments", while other commercial credits are included in "Other investments/trade credits".

Note 5: Includes mostly Bank of Slovenia fiduciary accounts. In June 1996 the amount of 21.2 mio SIT (EUR 124.9 million) was transferred to regular Bank of Slovenia reserve accounts.

Note 6: Use of IMF credit (assumed upon membership in January 1993).

Note 7: Reserve assets of the Bank of Slovenia. Following Slovenia's entry to the EMU in 2007, claims to other residents of

the euro area (denominated in euros and other currencies) and claims in euros to EMU non-residents are not included in reserve holdings. From 2007 onwards, these transactions are shown in the appropriate categories of the capital and financial account sector of the Bank of Slovenia (investments in securities and other investments). More explanation is available in: "The statistical treatment of the international monetary reserves at the entry of Slovenia to the euro area" (slovenian), in the chapter Methodological information on the internet page: <a href="http://www.bsi.si/en/financial-data.asp?Mapald=64">http://www.bsi.si/en/financial-data.asp?Mapald=64</a>.

Note 8: The data on reinvested earnings for 2011 are not yet available. Therefore, the balance of payments includes an estimate (from the three year monthly average for the period 2008 to 2010 of actual data on total earnings less extraordinary incomes [the source being annual reports on investments], less dividends and other incomes paid in the current month). In 2012, the estimate will be replaced with actual data on reinvestment of earnings; the estimate for 2012 shall take into consideration the new three year average (2009 to 2011).

<u>Note 9</u>: From 2001 onwards, there is a time series break in the categories "Direct investment" and "Loans". From 2001, inter-company debt transactions between affiliated enterprises (10% or more capital share) are included in the "Direct investment" category; before that they were included under the heading "Loans". Since 2002, the category "Direct investments" also includes short-term trade credits between affiliated enterprises.

Note 10: Transfers from the EU budget since 2004 have been recorded as either current or capital transfers, according to the nature of their use. Data are provided by the Ministry of Finance.

Note 11: In the balance of payment of Slovenia to the EMU the presentation of the category net of errors and omissions does not make sense.

#### Tables 3.3 and 3.4: Current account and capital and financial account by countries

The tables show the main categories of current and capital and financial account of the balance of payments, by countries, for the last available year. The most important countries and/or groups of countries are shown.

#### Table 3.5.: Trade in goods by countries

The data source is the Statistical Office of the Republic of Slovenia (external trade statistics). Import is valued at FOB parity; export is valued at CIF parity.

#### **International Investment Position of Slovenia**

#### **General notes**

The international investment position is the balance sheet of the stock of external financial assets and liabilities. The financial items that constitute the position consist of claims on non-residents, liabilities to non-residents, monetary gold and SDRs.

The methodology of the international investment position (IIP) of Slovenia is based on the fifth edition of the Balance of Payments Manual, IMF, 1993. The manual distinguishes four sectors – monetary authorities, general government, banks and other sectors.

The structure of the statement is similar to the balance of payments (financial account): here as well are holdings and liabilities, first classified by instruments, followed by sectors and finally by maturity. The change to the balance of holdings and liabilities in a specific period is the result of transactions or flows shown in the balance of payments and also exchange rate changes, price changes and other changes.

#### Revision policy

See note "Revision policy" in the section "Balance of Payments".

#### Data sources

Data sources for the international investment position of Slovenia are mainly the same as those for the financial account of the balance of payments.

#### Direct investment

Data on direct investment are collected from:

- concessional surveys on equity investment (SN),
- reports on loans granted to or received from non-residents (KR) until 2006,
- reports on accounts abroad (C) until 2006,
- short-term commercial credits with non-residents (SKV), and
- assets and liabilities in loans and deposits to nonresidents (KRD) for non-bank sectors since 2007.

In accordance with the recommendations of the IMF, this item comprises investment where the direct investor owns 10% or more of ordinary shares or voting power. Equity shares are until 2006 valued at book value according to accounting standards. From 2007 the equity of listed companies is recorded according to market value and equity of unlisted companies is recorded according to book value in line with accounting standards. Reinvested earnings are included. Data of Surveying and Mapping Authority of the Republic of Slovenia on nonresidents' investments in real-estate in Slovenia are included from 2008 onwards.

Claims on and liabilities to affiliated enterprises are included in the category "Direct investment-other capital". Intercom-

Monthly Bulletin, March 2012

ANK OF SLOVENL

pany claims or liabilities between affiliated banks and affiliated financial intermediaries recorded under direct investment capital are limited to those associated with permanent debt (loan capital respresenting a permanent interest). Until 2000, all long-term intercompany claims were considered liabilities between affiliated banks, and affiliated financial intermediaries were included in this item as well as permanent debt. From 2005 onwards other capital item of direct investment does not include claims/liabilities of banking sector to affiliated enterprises (those data are included in item other investment/ loans).

Data on claims and liabilities of Slovene enterprises in indirectly-affiliated enterprises from 1996 onwards are included in the category "Direct investment abroad" (in cases where an enterprise abroad having Slovene direct investment holds 10% or more equity in another foreign enterprise). In the category "Direct investment in Slovenia", data on the investment of foreign enterprises in indirectly-affiliated enterprises in Slovenia are included (in the case that a Slovene enterprise with foreign direct investment holds 10% or more equity in another Slovene enterprise). From 2007 all claims and liabilities to foreign direct investors/ direct investment enterprise and fellow companies that belong to the same foreign direct investor / direct investment enterprise are included.

#### Portfolio investment

Until 2002, data on equity securities and other equity shares were available from enterprises' surveys (form SN), but only data from surveys where the direct investor owns less than 10% of ordinary shares or voting power are included. (In the balance of payments, transactions with equity securities and other shares are collected from the ITRS [see note to tables 3.1-3.4] /Capital and financial account/Portofolio investment.) From 2007 data on equity shares bellow 10% that are traded without involvement of domestic dealers are collected (report SN).

From 2003 onwards, data from the reports VRP (operations in securities reported by brokerage houses, banks and investment companies) and KDD (Central Securities Clearing Corporation) are included. Also data on investments in mutual funds and investments of households in other equity securities are available since 2003. From 2007 data on assets of foreign debt secuirities that are traded without involvement of domestic dealers are collected (report DVP).

Data on residents' holdings of debt securities are available from VRP direct reports.

Liabilities of debt securities of the government, banking and other sectors are available from credit registration and Central Securities Clearing Corporation data (KDD). For domestic securities issued abroad, the source is VRP reports.

#### Financial derivates

From 2004 until 2006 these data are included in VRP and KDD sources. Since 2007 qarterly data on financial account's statistics are source for financial derivatives for all sectors except the central bank. From 2009 onwards financial derivatives of Bank of Slovenia are included in other investment/financial derivatives item or international monetary reserves item (depending on the residency of the counterpart).

#### Trade credits and loans

The source for short-term trade credits is a report of enterprises on the stock of external assets and liabilities (form SKV).

Until 2006 sources for long-term trade credits and loans are credit registration forms (forms KR) and from 2007 onwards statistical reports on assets and liabilities in loans and deposits to nonresidents for non-bank sectors (forms KRD) and are the same for the international investment position and the balance of payments. Until 2000, the balance of payments did not distinguish loans between affiliated companies from loans between unaffiliated companies and included all loans in other investment items.

From 2005 onwards monetary statistics (PORFI) is the source for banking sector data (claims and liabilities are included regardless of direct investment affiliation).

#### Currency and deposits, other assets, other liabilities and reserve assets

For these categories, the sources largely coincide with the sources for the balance of payments:

- the accounting data of commercial banks (KNB) until 2004,
- the account balances of banks in original currencies (PPV) until 2004,
- the account balances abroad of companies (C) until 2006,
- assets and liabilities in loans and deposits to nonresidents (KRD) for non-bank sectors since 2007
- the source for banking sector data (PORFI) since 2005,
- the accounts of the Bank of Slovenia.

In the International Investment Position, mature, unpaid loans and long-term commercial credits are included in other holdings and liabilities as short-term items. These transactions are not included in the balance of payments.

Until 2002, there is a difference between the International Investment Position and the balance of payments for other liabilities and holdings of other sectors, where contractual joint ventures are shown in the investment position. The source for this item is a JV report.

The International Investment Position includes data of the Bank for International Settlements (BIS) on deposits of local residents at BIS Member State banks. Since 2001, an estimate of the balance of foreign currency held by households is also included. However, any further investments of foreign currencies (primarily investments in real estate abroad and foreign securities, without domestic brokers) are not excluded from this estimate, since data of this type are not available.

Net position of the Bank of Slovenia to the Eurosystem (net result of incoming and outgoing payments conducted in EUR currency through TARGET and STEP2 system) is also included in the item liabilities/currency and deposits.

1V - 20Monthly Bulletin, March 2012

#### Table 3.6: International Investment Position of Slovenia

IIP data do not include:

- data on real estate owned by Slovenian households abroad (mainly real estate in Croatia); from 2001 onwards, these
  data are partially included under the heading "Assets/other investment/currency and deposits/households"; and
- claims on other countries in the territory of the former Socialist Federal Republic of Yugoslavia, subject to negotiations on succession (except the part reported by the Fund of the Republic of Slovenia for Succession from 2001 onwards), expropriated assets in these territories and other assets transferred to the Slovenian government during the process of privatization. In December 2006 claims subject to succession to former Yugoslavia were revalued and 'Sklad RS za sukcesijo' was transformed into 'Javna Agencija Republike Slovenije za nasledstvo'.

Additional data on direct investment are available in a special publication of the Bank of Slovenia: "Neposredne naložbe – Direct Investment", and on the Bank of Slovenia Web site: http://www.bsi.si/iskalniki/ecb\_en.asp?Mapald=714.

#### Table 3.7: International Investment Position by countries

The table includes data for the last available year by countries in which Slovenes invest (in holdings) and includes data from which countries foreigners invest in Slovenia (in liabilities). The most important countries and/or groups of countries are shown.

#### **Gross External Debt**

#### General notes

The methodology is based on External Debt Statistics: Guide for Compilers and Users, IMF, 2003. The guide is available at the following Web address: <a href="http://www.imf.org/external/pubs/ft/eds/Eng/Guide/index.htm">http://www.imf.org/external/pubs/ft/eds/Eng/Guide/index.htm</a>.

#### Revision policy

See note "Revision policy" in the section "Balance of Payments".

#### Data sources

In order to maintain consistency, the data sources are the same as those for the International Investment Position. The sources for equities and financial derivates are not used because these types of instruments are not included in the balance of external debt according to the IMF definition.

#### Tables 3.8 and 3.9: Net External Debt

The tables present gross external debt, gross external assets in debt instruments, and net debt position. The data are the same as presented in the international investment position (IIP). In the table "Net External Debt", data are sorted by sectors, maturities and instruments; in the table "International Investment Position", data are sorted by instrument, sectors and maturities.

#### Tables 3.10 and 3.11: Gross External Debt

Gross external debt, at any given data, is the outstanding amount of those current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and are owed to non-residents by residents of an economy. The types of financial instruments included in the presentation of the gross external debt position are as follows: debt securities (money market instruments, bonds and notes), trade credits (short- and long-term), loans (short- and long-term), cash, deposits and other debt liabilities. Maturity of debt liabilities is based on the formal criterion of original maturity. Long-term debt is defined as debt with an original maturity of more than one year or with no maturity stated. Short-term debt, which includes cash, is debt repayable at notice or with an original maturity of one year or less.

#### International reserves

#### Table 3.12.: International reserves

Until December 2006, the Bank of Slovenia's foreign exchange reserves included convertible foreign currencies, deposits abroad and first-class securities of foreign issuers.

From 1 January 2007, the Bank of Slovenia's foreign exchange reserves include convertible foreign currencies, deposits in foreign currencies outside the euro area and first-class securities in foreign currencies of issuers outside the euro area. The decline of value presented in the data is due to Slovenia's inclusion in the EMU.

Since 2009 foreign exchange reserves of the Bank of Slovenia include also positions on financial derivatives based on daily pricing of these instruments. The value of financial derivatives may also be negative.

Monthly Bulletin, March 2012 21-IV.

#### 4. PUBLIC FINANCE

#### General

Data prior to 2007 are published in tolars; from 2007, data are published in euros. Quarterly and yearly data on Gross domestic product are not yet reconciled.

#### General - methodology ESA 95

Non-financial and financial data are prepared in compliance with the European System of Accounts from the year 1995 (ESA 95). This methodology was adopted by Council Regulation (EC) No. 2223/96 of 25 June on the European System of Accounts in the Community.

ESA 95 methodology is the central economic methodology of each EU member state and therefore ensures comparability of data.

Data on non-financial accounts of general government are prepared by the Statistical Office of the Republic of Slovenia. In accordance with a memorandum of understanding between the Ministry of Finance, the Bank of Slovenia and the Statistical Office of the Republic of Slovenia, the data on financial accounts are compiled by the Bank of Slovenia. The data on financial accounts are consolidated.

## Table 4.1: Non-financial and Financial Accounts (ESA 95) of the General Government sector

**EDP debt** is gross debt as defined in the Maastricht treaty. It comprises general government liabilities in the form of currency (coins), deposits, debt securities (securities other than shares and other equity) and loans only.

#### Tables 4.2 and 4.3: Non-financial Account of the General Government sector

Fiscal burden is a sum of the direct taxes, indirect taxes, social contributions and capital taxes.

**Intermediate consumption** consists of the value of the goods and services consumed as inputs by a process of production. The goods and services may be either transformed or used up by the production process.

#### Tables 4.4 and 4.5: Financial Account of the General Government sector

Change in EDP debt is a difference between the current and preceding EDP debt figure.

**Deficit-debt adjustment (DDA)** is a sum of the deficit/surplus of non-financial account and change in EDP debt. DDA can be also calculated as a sum of the difference between financial assets and liabilities (which are not included in EDP debt) and other flows.

Other liabilities consist of data, which are not included in the EDP debt: financial derivatives, shares and other equity, insurance technical reserves and other liabilities.

Other flows are sum of the statistical discrepancy (difference between deficit/surplus of non-financial and financial account) and changes of the debt which are not transactions (foreign exchange holding gains and losses, other valuation effects, other changes in volume of debt).

Borrowing requirement consists of a negative deficit/surplus of financial account plus financial assets minus financial liabilities.

#### Table 4.6: Revenues and Expenditures of the General Government

Note 1: The data of the current and previous year are revised monthly until the data on the previous year become final.

Note 2: Total revenue excludes receipts from the EU, and likewise, total expenditure excludes payments to the EU budget.

<u>Note 3:</u> Current expenditure also includes social security contributions (besides of the expenditures on goods and services, interest payments, current reserves and current transfers).

Note 4: On 1 October 2011, the Tax Administration of the Republic of Slovenia (DURS) introduced new information system and due to that, large number of recorded data on the tax and social security contribution revenues remained on unallocated fund accounts, while totals for those two categories were unaffected. We are publishing the data where certain categories of taxes and social security contributions were estimated by the Ministry of finance. The funds are expected to be correctly allocated already next month. Source: http://www.mf.gov.si

IV.-22

#### Tables 4.7: Lending, Repayments and Financing of the General Government

General government operations (consolidated state budget, local governments, pension fund and health insurance fund).

Note 1: The data of the current and previous year are revised monthly until the data on the previous year become final.

#### Table 4.8: Central budget debt

The Republic of Slovenia is defined as a legal person. The data from tables 4.6., 4.7. and 4.8. originate in the Bulletin of Government Finance published by the Ministry of Finance.

The obligation of the Central budget of Republic of Slovenia to Bank of Slovenia is due to settlement of the Special drawing rights of the International monetary fund by Bank of Slovenia as a fiscal agent, in line with the agreement between the Ministry of finance of Republic of Slovenia and Bank of Slovenia.

#### 5. FINANCIAL ACCOUNTS

#### Financial accounts (Tables 5.1 to 5.6)

**Tables 5.1, 5.2, 5.4 and 5.5** show stocks and transactions in financial assets and liabilities held by individual institutional sectors, by individual financial instruments. The basis for the financial accounts methodology is ESA95.

Tables 5.3 and 5.6 present net items by individual sectors.

Net financial assets present difference between financial assets and liabilities (stocks).

Net financial transactions present difference between transactions in financial assets and transactions in liabilities.

The general principle for stocks and transactions is valuation at the current market price. As a rule accrued interest is included in the instrument to which it relates (deposits, loans, securities).

The transactions represent the difference between increases (acquisitions) and decreases (disposals) or the net turnover in an individual financial instrument. Changes in market prices and exchange rates, and other changes (reallocations of financial instruments/sectors, changes in methodology, write-downs of claims/debts, etc.) are excluded from the transactions.

Sectors, according to SKIS, are used.

#### Financial instruments in financial accounts

Individual financial instruments are the same among assets and liabilities, except Monetary gold and SDRs which only appear in financial asset tables.

Monetary gold and SDRs represent financial assets of the central bank. No other institutional unit or sector shall show a liability from the above mentioned instruments.

Currency and deposits consists of three sub-categories of financial instruments:

- currency represents bank notes and coins normally used for payments and includes bank notes and coins in circulation and represents the liability of the unit which issued them (as a rule, the central bank). The category "Household Currency and NIPSH (non-profit institutions serving households)" includes the foreign currency of residents which is estimated based on net purchases.
- transferable deposits consist of sight deposits in domestic or foreign currency. Transferable deposits can be converted into currency or transferred by cheque, payment order, debit entry or the like, without significant restrictions or additional costs.
- other deposits consist of deposits that cannot be used to make payments at any time and are not convertible into currency or transferable deposits without significant restrictions or additional costs.

Securities, excluding shares, are comprised of the following:

- short-term debt securities (with an original maturity of up to one year bills and other short-term debt securities);
- long-term debt securities (with an original maturity of more than one year: bonds);
- financial derivatives (options, swaps, standardised futures, interest rate futures and warrants).

Loans consist of all types of loans created when creditors lend funds to debtors, either directly or through brokers, that are either evidenced by non-negotiable documents or not evidenced by documents. The initiative concerning a loan normally lies with the borrower. Loans also include loans for financing trade credits, financial leasing, repurchase agreements, and repayable margin payments related to financial instruments when these agreements and payments are liabilities of corporations that are not monetary financial institutions. Loans do not include trade credits or advances.

Loans are broken down into short-term loans (with an original maturity of up to one year) and long-term loans (with an original maturity of more than one year).

Shares and other equities represent:

- Shares which are quoted (on a domestic of foreign market);
- Unquoted shares;
- Other equities;
- Shares/units of investment funds.

Monthly Bulletin, March 2012 23-IV

Shares/units of investment funds include shares of investment companies, investment coupons (referring to one or more units of mutual funds) and units of pension funds.

Insurance technical reserves comprise the insurance technical reserves of insurance corporations and pension funds against policyholders and beneficiaries, and are divided into three sub-categories of financial instruments. Net equity of households in life insurance reserves including:

- net life insurance provisions;
- net provisions for life insurance policies where the investment risk is borne by the policyholders;
- net health insurance provisions.

Net equity of households in pension fund reserves consists of provisions deriving from pensions.

Prepayments of insurance premiums and reserves for outstanding claims represent net prepayments of insurance policies, net reserves for outstanding claims and other net insurance technical reserves.

Other assets and liabilities are broken down as follows:

- Commercial credits and advances:
- Other (other assets and liabilities, excluding commercial credits and advances).

Commercial credits and advances consist of financial claims or liabilities arising from the direct extension of credit by suppliers or buyers for goods and services transactions, and advance payments for work that is in progress or to be undertaken and associated with such transactions.

Other (other assets and liabilities excluding commercial credits and advances) consists of all other claims and liabilities arising from timing differences between transactions and payments made in respect of taxes, social contributions, wages, rents, dividends, interest and transactions in financial assets on the secondary market. As a rule, accrued interest is included in the instrument to which it relates. However, should it be impossible to include the interest in the relevant instrument, it is disclosed in the category "Other".

Financial accounts data may differ from other statistical data because of:

- valuation method (current market value),
- data sources.
- time of data recording,

Data for the period before the 1st of January 2007 are converted into EUR based on exchange rate 1 EUR = 239,64 SIT.

## 6. NON-FINANCIAL ACCOUNTS AND GENERAL ECONOMIC STATISTICS

#### **General notes**

The Standard Classification of Activities is defined by the Decree on the Introduction and Use of the Standard Classification of Activities (Official Gazette of the Republic of Slovenia, No. 69/2007, 17/2008) and is in line with the classification of activities NACE Rev.2(Nomenclature statistique des activités économiques dans la Communanté européenne) as a compulsory statistical standard of the European Union, which is directly connected to the international classification of the activities of United Nations ISIC Rev. 4(International Standard Industrial Classification).

The basic activities of an economy are:

- A Agriculture, forestry and fishing
- B Mining and quarrying
- C Manufacturing
- D Electricity, gas steam and air conditioning supply
- E Water supply, sewerage, waste management and remediation activities
- F Construction
- G Wholesale and retail trade; repair of motor vehicles and motorcycles
- H Transportation and storage
- I Accommodation and food service
- J Information and communicationK Financial and insurance activities
- L Real estate activities
- M Professional, scientific and technical activities
- N Administrative and support service activities
- O Public administration and defence, compulsory social security
- P Education
- Q Human health and social work activities
- R Arts, entertainment and recreation
- S Other service activities
- T Activities of private households as employers, undifferentiated goods- and services- production activities of households for own use
- U Activities of extraterritorial organizations and bodies

Methodological notes and a detailed classification for the real sector are published on the Statistical Office's Web site: http://www.stat.si/skd\_nace\_2008.asp (in Slovene).

#### General

Data prior to 2007 are published in tolars; from 2007, data are published in euros.

#### Non-financial accounts and general economic statistics

#### Tables 6.1 and 6.2: Expenditure of Gross Domestic Product

Real yearly growth rates are calculated from the GDP data in constant prices, reference year 2005.

#### Tables 6.3 and 6.4: Gross Domestic Product by Activity

Real yearly growth rates are calculated from the GDP data in constant prices, reference year 2005.

#### Tables 6.5 and 6.6: Industrial Production Index

For the period from January 1992 to January 2004, industrial production indices are calculated from quantitative data on the production of industrial products.

From February 2004 onwards, the basis for calculating the production indices are data on the value of production.

#### Tables 6.7 and 6.8: Turnover and New Orders in Industry

Data for the year 2010 are provisional.

For the period from January 1998 to January 2003, indices on turnover are estimated on the basis of the monthly data on the quantity of sold industrial products and the average annual prices of industrial products. Data from February 2003 onwards are gathered with the regular monthly survey on turnover, new orders and value of stocks in industry.

Real yearly growth rates are calculated from the real index on turnover and new orders in industry. The deflator is the industrial producer prices index.

#### Tables 6.9 and 6.10: Business Tendency and Consumer Surveys

The sentiment indicator is the weighted average of the confidence indicator in manufacturing and retail trade, plus the consumer confidence indicator. Sentiment indicators of certain activities or consumers are calculated from answers shown in the table.

The results are shown as a balance by individual questions. The balance is the difference between positive and negative answers, expressed as percentages. The balance shows the movement of the observed economic indicator (present situation or future expectations), and not the real size of economic indicators.

#### Table 6.11: Employment by Labour Force Survey (ILO)

The Slovene Labour Force Survey was carried out in compliance with International Labour Organisation (ILO) guidelines for labour force statistics and with Eurostat requirements. This enables the comparability of our data to the data of other countries.

Data in column 5 - self-employed persons include family-member assistants as well.

Note 1: From 2008 onwards the revised classification of activities SKD 2008 is used, which is internationally comparable with the NACE Rev. 2 classification of activities.

#### Table 6.12: Unemployment by Labour Force Survey (ILO)

The Slovene Labour Force Survey was carried out in compliance with International Labour Organisation (ILO) guidelines for labour force statistics and with Eurostat requirements. This enables the comparability of our data to the data of other countries.

Monthly Bulletin, March 2012 25-IV.

#### Table 6.13: Average Wages and Salaries

Real wages and salaries are deflated by the consumer price index (CPI).

From January 2005 onwards a new methodology for the calculations of average monthly wages and salaries has been used. The statistical survey also includes legal entities with one or two persons in paid employment in the private sector. Individual private entrepreneurs and persons employed by them, own account workers and farmers are not covered.

Published data are the results of new research: the Monthly Report on Earnings at Legal Entities. Data are collected by the Agency of the Republic of Slovenia for Public Legal Records and Related Services (with the common questionnaire (Form 1–ZAP/M). Statistical work was done by SORS. SORS also calculated the average monthly wages and salaries data for 2004 according to the new methodology.

## Table 6.14 Nominal effective exchange rate and Real harmonised competitiveness indicators

Nominal effective exchange rate, Euro area-17 countries vis-a-vis the EER-40 group of trading partners (AU, CA, DK, HK, JP, NO, SG, KR, SE, CH, GB, US, BG, CZ, LV, LT, HU, PL, RO, CN, DZ, AR, BR, CL, HR, IS, IN, ID, IL, MY, MX, MA, NZ, PH, RU, ZA, TW, TH, TR, VE); Currency denominator: Euro.

Real harmonised competitiveness indicators consumer prices and unit labour costs in total economy deflated; ECB EER-20 group of currencies and Euro area 17 country currencies (FR, BE, LU, NL, DE, IT, IE, PT, ES, FI, AT, GR, SI, AU, CA, CN, DK, HK, JP, NO, SG, KR, SE, CH, GB, US, CY, CZ, EE, HU, LV, LT, MT, PL, SK, BG, RO); Currency denominator: until 31.12.2006 Slovenian tolar, from 01.01.2007 Euro.

The growth of the index value represents decrease of competitiveness.

Note 1: Data for harmonised competitiveness indicators unit labour costs in total economy deflated are quarterly.

Explanations to harmonised competitiveness indicators calculations are available in special methodological paper "Calculations of harmonised competitiveness indicators", on the Web site of Bank of Slovenia: http://www.bsi.si/publikacije-in-raziskave.asp?Mapald=1039.

#### Tables 6.15 and 6.16: Consumer Price Index

The Harmonized Index of Consumer Prices (HICP) is a comparable index of consumer prices produced by each Member State and used for international comparison of consumer price inflation. In Slovenia it is available from the year 2001 onwards.

#### Tables 6.17 and 6.18: Industrial Producer Price Index

The index of industrial producer prices measures changes in the level of producer prices of industrial products that are sold by producers on the Slovenian market. The tables show the price indices and growth rates by end-use of products, as well as by main divisions of activities, v2 (2008).

IV.-26 Monthly Bulletin, March 2012

BANKA SLOVENIJE BANK OF SLOVENIA EUROSYSTEM

Monthly Bulletin, March 2012 27-IV.

## Review of the links between the data on Slovenia in the Bulletin of the Bank of Slovenia and the Euro area data in the ECB's Bulletin

The table below shows the correspondence between the statistical tables on Slovenia in the Bulletin of the Bank of Slovenia and on the Euro area in the ECB's Bulletin, i.e. where are the data on Slovenia included into the Euro area aggregates. The ECB's Bulletin is available on the internet address: http://www.ecb.int/pub/mb/html/index.en.html.
