## Important information

Monthly Bulletin of Bank of Slovenia has been, from the number 2-3 for February-March 2007, volume 16, partly changed in its content and form.

The preannouncement of the change has been published on the web page of the Bank of Slovenia in January 2007.

The main changes are as follows:

- The beginning of publishing the statistical data of value, which refer to the period after the entry to the euro area, in the official domestic currency - euro. The data of value for the previous period will continue to be published in tolar, as the official Slovenian currency in that period. The data in euros are in the tables separated from the data in tolar by line.
- The change in the concept of the international monetary reserves because of the entry to the Economic and monetary union. Among the Slovenian international monetary reserves after the entry to the euro area, compared to the period before, there are no longer assets in euro as well as the claims on the euro area residents. More explanation is available in: "The statistical treatment of the international monetary reserves at the entry of Slovenia to the euro area" (slovenian), in the chapter Methodological information on the internet page: <http://www.bsi.si/en/financial-data.asp?Mapald=64>.
- The change in the presentation of the currency in the circulation to the standards of the euro area.
- The accommodation of the balance sheet of Bank of Slovenia to its activities in the framework of the Eurosystem.
- The beginning of the publishing of the interest rates of the euro area money market as well as the publishing of the whole set of the interest rates of the Monetary financial institutions according to the ECB's methodology.
- The beginning of the publishing of the financial accounts statistics in the new chapter.
- Colour separation of the individual statistical chapters, to alleviate search and because of the link of the chapters to the specialised publications.

More information can be found in Methodological Notes in the Bank of Slovenia monthly Bulletin.

The entry to the euro area (on 1.1.2007) caused a break in the time series of the statistical tables in the Monthly bulletin in cases where the "currency" is an attribute. An expected reclassification takes place, for example of the stock of outstanding loans in euros from the time series of "foreign currency" before the introduction to the time series of "domestic currency" after the introduction of euro. To enable easier reconstruction of this change, the shares of the Euro amounts in stocks of the foreign currency in the tables 1.3, 1.4, 1.5 and 1.6 on 31.12.2004, 31.12.2005 and 31.12.2006 are published in the chapter Methodological notes.

## Summary

At the end of last year, the economic situation was unfavourable in the majority of Slovenia's main trading partners. As unemployment remains high, the outlook for a recovery in demand in the euro area is continuing to deteriorate. Weak foreign demand and declining domestic consumption suggest a further decline in economic activity in Slovenia in the final quarter of last year. The situation in industry also deteriorated sharply in November. The recession is increasingly being reflected on the labour market, where the registered unemployment rate has passed 12% and the number of vacancies is falling. The year-on-year fall in the workforce in employment exceeded 2%, while the year-on-year decline in nominal wages also deepened in November. The current account surplus during the first eleven months of the year stood at more than 2% of GDP, primarily as a result of the large decline in domestic demand. Alongside the refocusing of sales to markets outside the euro area, other factors in last year's weak nominal growth in exports were the fall in the euro and the relatively favourable trend in unit labour costs relative to the euro area. According to the Ministry of Finance's initial estimates, last year's state budget deficit according to the cash flow methodology amounted to 3.1% of GDP, just over 1 percentage point less than in the previous year.

The average annual inflation rate as measured by the HICP stood at 2.8% in 2012, 0.7 percentage points more than in the previous year. Last year the largest contributions to headline inflation again came from energy and food prices, but higher inflation was primarily the result of rises in services prices, mostly as a result of certain fiscal consolidation measures. As a result, core inflation indicators also increased, but have nevertheless remained below the euro area average. Rises in excise duties made a large contribution to inflation, but also provided for weak growth in budget revenues.

The banks have continued the process of reducing lending to the non-banking sector and making repayments of debt to banks in the rest of the world. The banks repaid EUR 3.5 billion during the first eleven months of last year via debt repayments to banks in the rest of the world and bond repayments. Despite partial compensation made by funding at the Eurosystem, the decline in funding was sharply reflected in a decline in loans to the non-banking sector, particularly to non-financial corporations. The year-on-year contraction in loans to non-financial corporations stood at 10.5%. Household financing via consumer loans has continued to decline in reflection of the deterioration in their economic position and their reluctance to spend. The banking system recorded a pre-tax loss of EUR 274 million in the first eleven months of last year, largely as a result of an increase in impairment and provisioning costs. These disposed of almost two-thirds of the banking system's gross income.

# 1 | International Environment

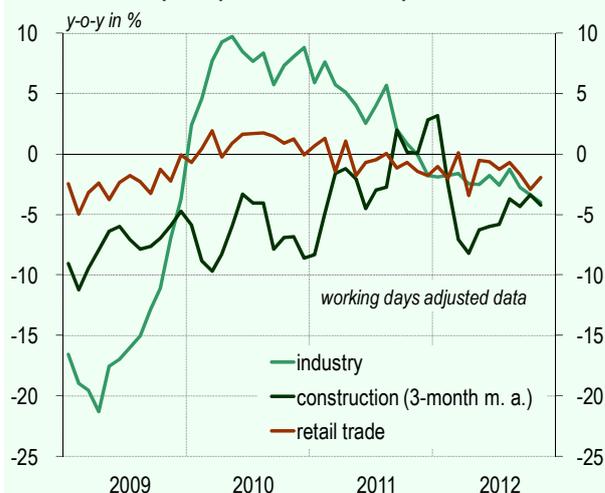

The economic figures moving into 2013 reveal developments to have remained predominantly adverse in the euro area. Industrial production and the amount of construction put in place declined in November, while the trend in turnover suggests that demand in the retail sector remains weak. The unemployment rate remained high in December, and the confidence indicators are significantly below their long-term averages. The euro rose again against the US dollar, while there was significant monthly growth in US dollar oil prices.

## Economic developments

The economic figures moving into 2013 reveal developments to have remained predominantly adverse in the euro area. Industrial production declined for the third consecutive month in November, taking the year-on-year decline to 3.7%. The sharpest decline was in production of consumer durables, a reflection of the decline in household purchasing power in the euro area. The latter was also reflected in a year-on-year decline of 2.6% in turnover in the retail sector in November. The amount of construction put in place in November declined for the third consecutive month, taking the year-on-year decline to 4.7%. The unemployment rate in the euro area remained high in the late part of the year. The initial estimate for December was 11.7%. Other than the manufacturing confidence indicator, the confidence indicators rose in January, but remained significantly below their long-term averages. Confidence remains lowest in the construction sector. There was no significant change in the economic growth forecasts in January. Consensus and the IMF estimate GDP in the euro area to have declined by 0.4% in 2012. Consensus is forecasting a 0.1% decline in GDP this year, while the IMF's forecast is a decline of 0.2%. The IMF also cut its global economic growth forecasts for 2013 and 2014.

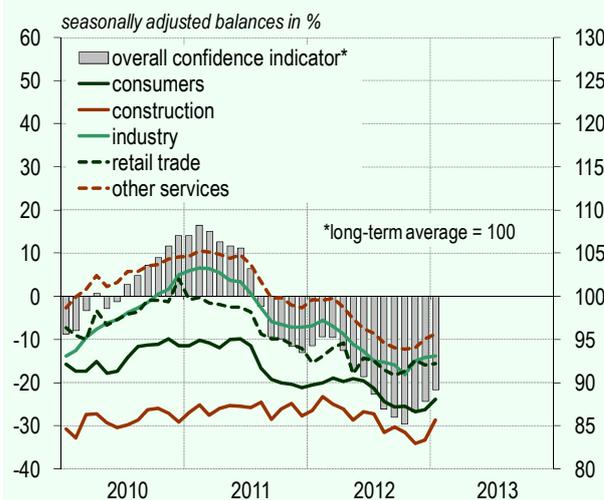

Of the main trading partners, Germany, Austria and Russia continued to record growth last year, while

Euro area: volume turnover in retail trade, real value of construction put in place and industrial production volume

Economic growth forecasts for main trading partners

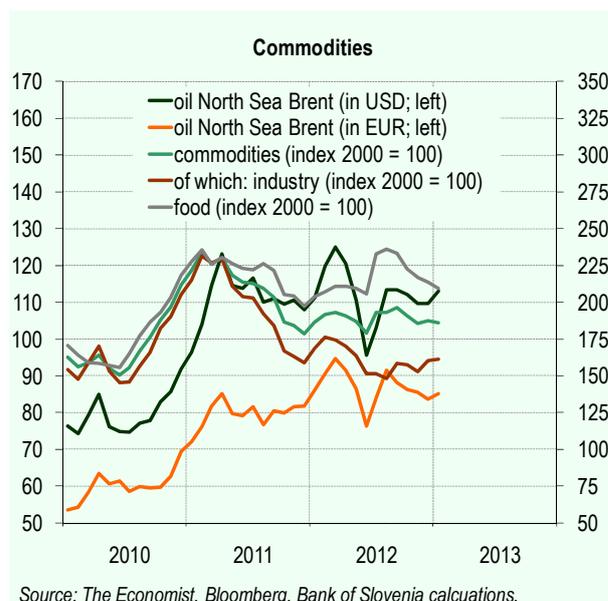

Source: Consensus Economics.

**the situation deteriorated in other countries.** According to initial estimates, Germany recorded economic growth of 0.7% in 2012, although the situation deteriorated in the second half of the year. According to initial estimates export growth remained relatively high last year, while final household consumption and government consumption also increased, but investment declined. Year-on-year economic growth in Russia slowed to 2.9% in the third quarter, while Consensus's January forecasts estimate growth in 2012 to have stood at 3.3%. The weak recession continued in south-eastern Europe in 2012: Consensus's January forecasts estimate economic activity to have declined by 0.1%. According to Consensus, Croatia, Bosnia and Herzegovina, and Serbia recorded significantly larger declines in GDP. The current forecasts are suggesting weak economic growth in the main partners in 2013, with the exception of Russia.

### Global financial markets and commodity prices

**There remained a relatively positive mood on the global financial markets in December.** At the end of the month there were fears in the US of a breakdown in negotiations to avoid the fiscal cliff. On 31 December a provisional agreement was signed on a compromise rise in taxes on capital gains and dividends and the abolition of substantial tax allowances, thus averting a new recession in the US (and worldwide). In Germany confidence in the economy improved for the second consecutive month, the business sentiment index reaching a five-month peak of 102.4. After the approval of the next tranche of assistance, rating agency S&P upgraded Greece by six steps from "selective default" to B-, with a stable outlook. Of the observed market indices, December's highest growth of 10.4% was recorded by Serbia's BELEX15. The MSEELE-MEE for eastern Europe was up 5%, the DJ EuroStoxx 50 for western Europe was up 2.4%, Germany's DAX was up 2.8% and the S&P 500 in the US was up 0.7%.

**US dollar oil prices rose in January, and the euro also strengthened.** Under the influence of a slight improvement in the mood on the financial markets, primarily as a result of successful issues of Spanish and Italian bonds, the euro rose against the US dollar. It averaged USD 1.33 in January, up 1.3% on December. Given the slightly higher economic growth forecasts for China and the fore-

cast increase in demand for oil, the price of Brent crude was up 3.1% on December at USD 113.10 per barrel. The year-on-year rise in the US dollar price of Brent crude stood at 1.7% in January, but the euro oil price fell by 1.2% in year-on-year terms. Other commodity prices were down just under 1% on December, primarily as a result of a fall in food prices. After rising in the final quarter of last year, commodity prices were also down slightly in year-on-year terms in January.

## 2 | Economic Activity

*The available monthly indicators suggest a large decline in GDP in the final quarter of last year. In addition to activity declining in the sectors primarily dependent on the domestic market, in November activity fell also in the export sector. As merchandise exports declined in real terms, there was a sharp decline in industrial production in November, while turnover in the transportation and storage sector also declined. The sharp decline in imports is a sign of the deepening crisis in domestic demand, which is also confirmed by the decline in turnover in trade and in most other private sector services. The decline in construction activity has slowed sharply in recent months, but the outlook is not favourable.*

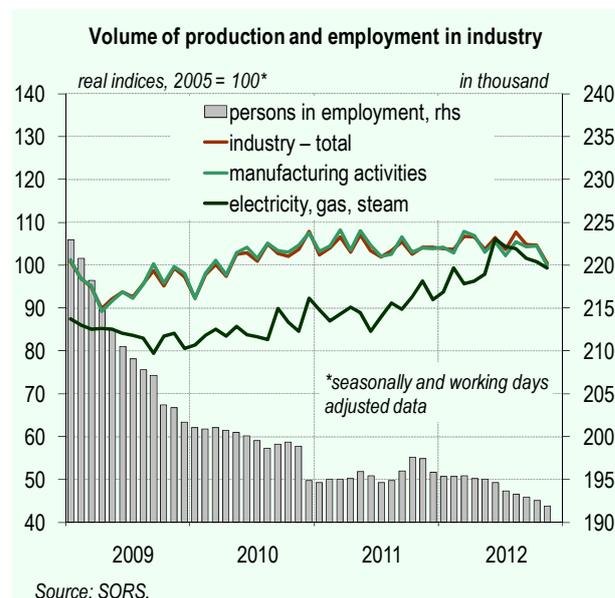

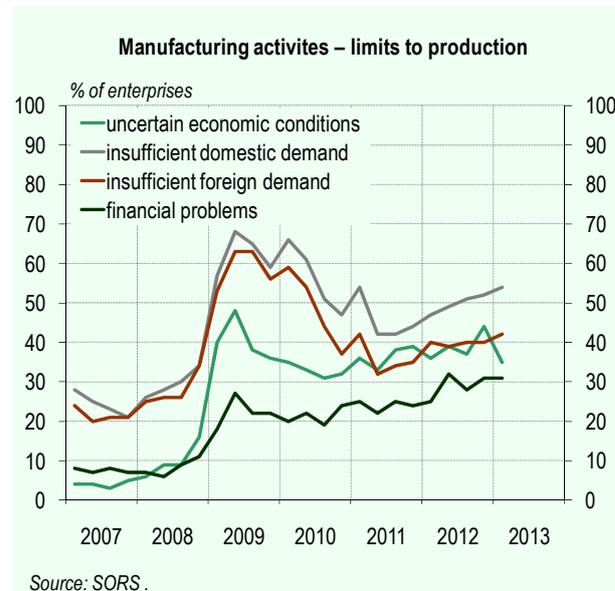

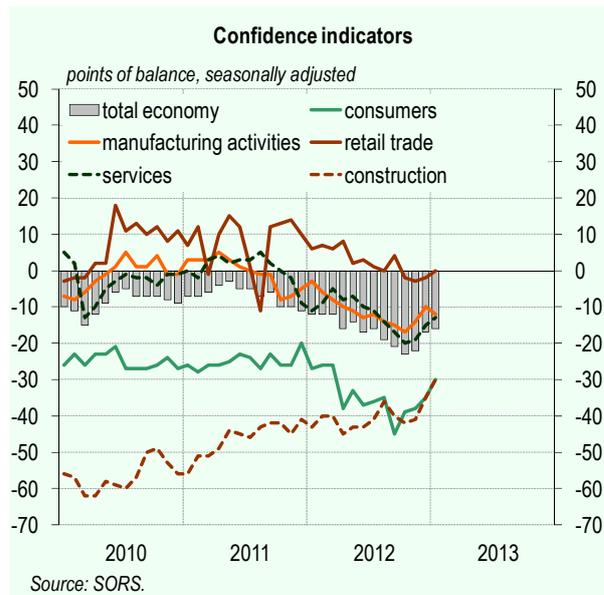

## Economic sentiment indicators

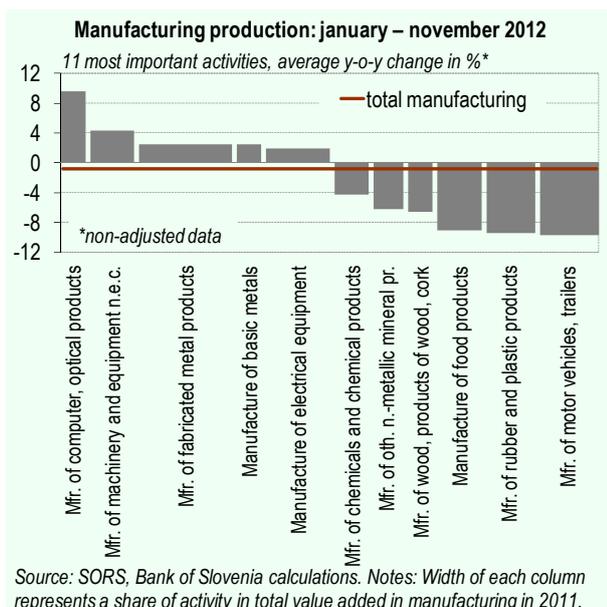

The indicator of economic sentiment rose again in January. Business confidence rose in current terms in January in all sectors other than manufacturing. The retail confidence and service confidence indicators rose as a result of increased optimism surrounding future sales, although firms assessed current demand as worse than in December. The lack of confidence in the construction sector also eased, as the orders indicator rose. The manufacturing confidence indicator declined slightly as a result of a decline in the current orders indicator and a rise in estimated inventories. The lack of confidence in the household sector eased in January, as there was less pessimism surrounding the household financial situation, the economic situation and savings in the upcoming 12 months.

Insufficient demand remains a key limiting factor in corporate performance. In manufacturing the main obstacles continue to arise from insufficient domestic and foreign demand, which are expected to remain weak in the first quarter of this year. Capacity utilisation in the first quarter has fallen below 77%, approximately 1.5 percentage points lower than a year earlier. The uncertainty surrounding the general economic situation has eased, but the proportion of firms in financial difficulties is up on the first quarter of last year. Low demand remains the main limiting factor in the sectors of construction and wholesale and retail trade. The proportion of firms in the wholesale and retail trade sector with difficulties in obtaining loans has increased in recent months, while increasing numbers of firms are likely to have difficulties with high labour costs. The main obstacles in the service sector are insufficient demand and financial difficulties, which since the deterioration last summer have been cited on average by 50% and 40% of all firms respectively.

## Industry

In the previous months, a favourable level of industrial production was maintained relative to the euro area, but in November developments in Slovenian industry deteriorated sharply. Total industrial production was down 4% on October, one of the largest monthly falls in the last four years. All industrial sectors recorded a

decline in output. The monthly fall in output in the manufacturing sector exceeded 4%. With domestic demand declining rapidly, and exports also declining in real terms in November, a sharper monthly decline in inventories was another likely factor in the decline in output. After recording high rates in the first half of last year, year-on-year growth in inventories slowed to just over 1% in November. According to figures adjusted for the number of working days, the year-on-year decline in total industrial production reached 3.6%, similar to that in the euro area.

The manufacturing sectors that have been unable to compensate for the fall in domestic demand and the stagnation in the euro area on other markets are mostly facing a sharp decline in output. Such sectors notably include the food industry, the wood industry, the manufacture of other non-metallic mineral products and the manufacture of rubber and plastic products. The manufacture of vehicles is facing a crisis in the European car market, and its refocusing on markets in other currency zones has been minimal. The situation is also bad in the chemical industry, with turnover being lost on the domestic and foreign markets. The most notable sector recording growth in output is the manufacture of computer, electronic and optical products, which has succeeded in generating high growth in turnover on the markets of other currencies. Turnover in the manufacture of machinery and equipment n.e.c. increased in the euro area and on other markets. The metal industry remains successful on the euro area market, most likely as a result of its integration into international production chains focused on emerging markets. The manufacture of electrical equipment remains relatively successful on the euro area market, despite the general decline in turnover in durables.

++: 3-month moving average compared to the corresponding average 3 months earlier. Data are seasonally and working days adjusted (except for construction where data are seasonally adjusted).

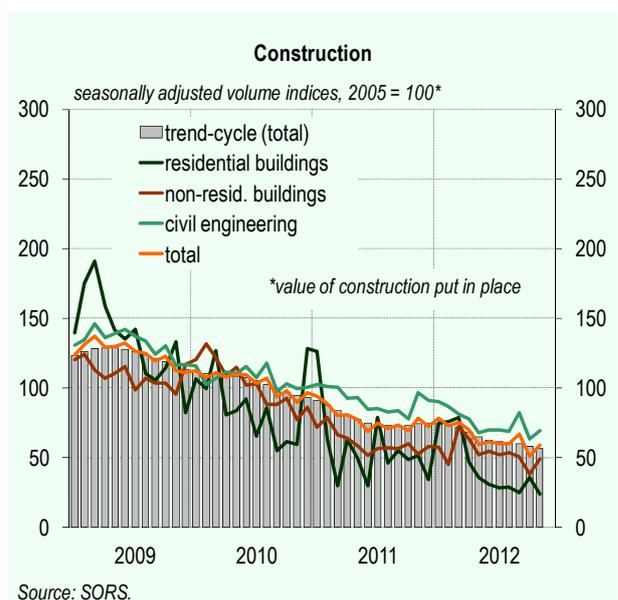

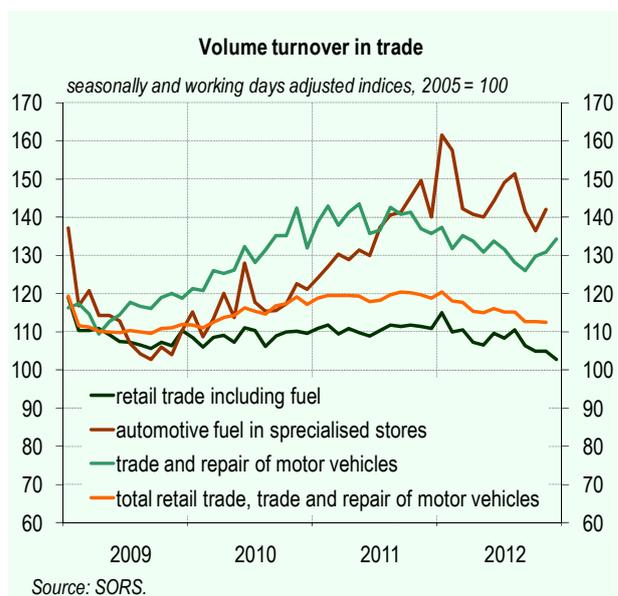

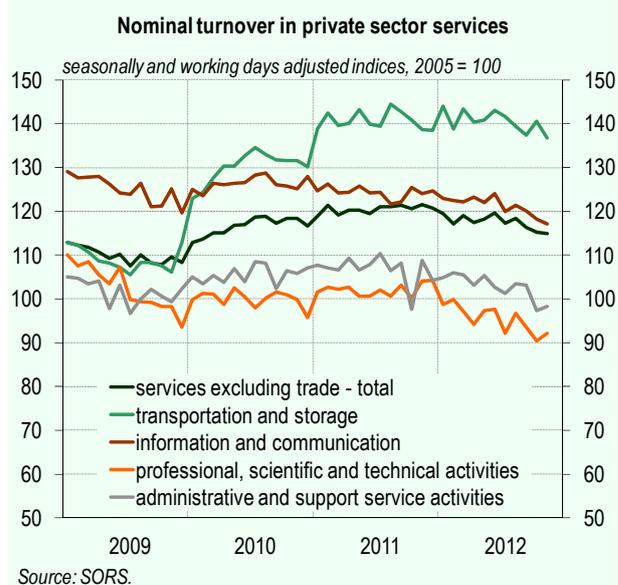

## Private sector services

The main factor in November's decline in nominal turnover in private sector services (excluding trade and financial services) was a decline in turnover in the transportation and storage sector. In the context of weak merchandise exports, turnover was down almost 3% on October. Turnover in the information and communication sector also declined slightly in monthly terms, while the situation in other categories of services did not deteriorate any further in November. Alongside the monthly fluctuations, the year-on-year decline in turnover in services deepened further. Total turnover in November was down more than 5% in year-on-year terms. Turnover in professional, scientific and technical activities and in administrative and support service activities was down a tenth.

The crisis in domestic demand is increasingly being reflected in turnover in wholesale and retail trade. Real turnover in the retail sector excluding vehicles declined by more than 2% in December alone, while real turnover in the final quarter of last year was down almost 4% on the previous quarter. There was a sharp decline in sales of non-food products, while turnover in trade in motor fuels was also down. After five consecutive quarters of contraction, there was positive growth in turnover in the trade and repair of vehicles, at more than 2%. The year-on-year decline in turnover in wholesale and retail trade excluding vehicles approached 7% in the final quarter of last year. Sales in the wholesale and retail trade of food products were down more than a tenth. Turnover in trade in vehicles was down just under 5%.

## Construction

The monthly fluctuations in construction activity remained sharp in November, but the contraction in construction activity has slowed significantly overall in recent months. The contraction in total construction activity as measured by the three-month moving averages stood at 2.3% in November. Civil engineering work recorded weak growth in activity, while there was a decline in the construction of buildings. The year-on-year contraction in total construction activity exceeded 20% in November according to initial figures. According to survey

figures, the proportion of construction firms facing insufficient demand stood at 58% in January, but given the small increase in the real value of new orders in 2012 the outlook might be slightly more favourable in the civil engineering segment.

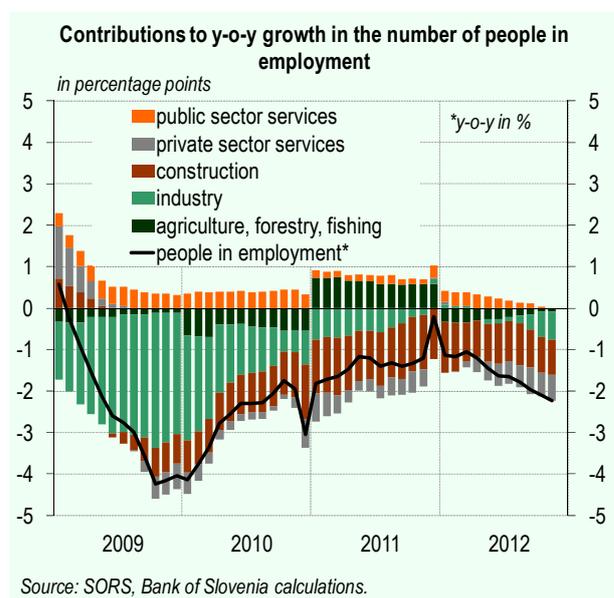

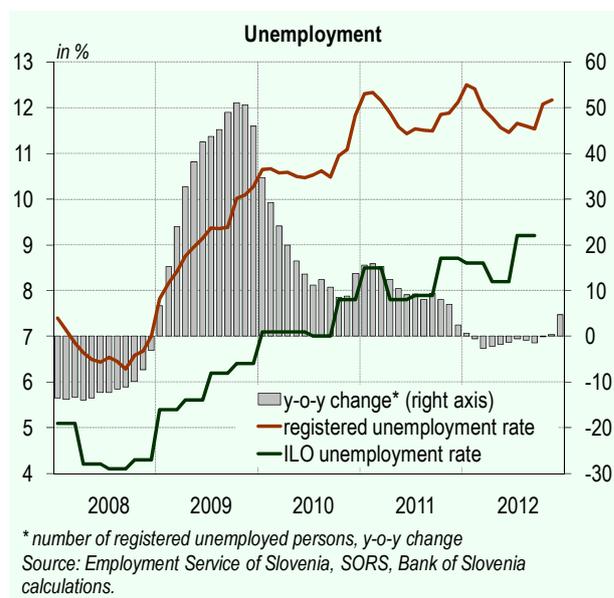

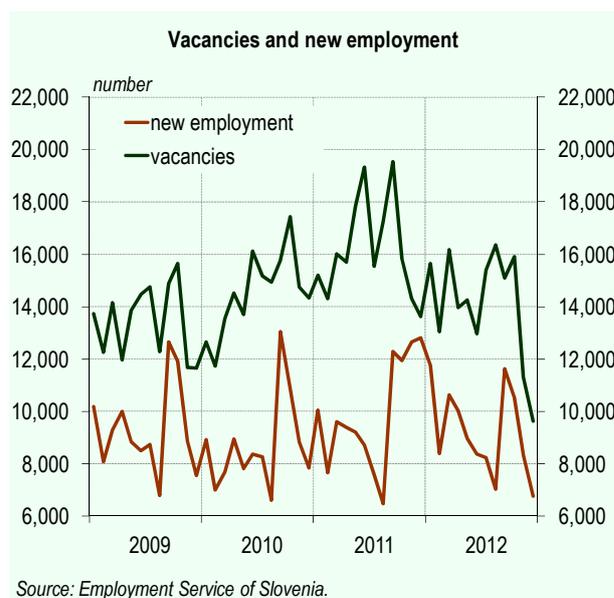

## 3 | Labour Market

The decline in economic activity is increasingly showing its effects on the labour market. Employment continues to decline rapidly, the registered unemployment rate exceeding 12% in November. Employment in the construction sector remained the main factor behind the fall in the number of workers employed, while the fall in the number of workers employed in manufacturing is increasing. Year-on-year growth in employment in public services also turned negative. The sharp decline in the number of vacancies in the final quarter of last year, from an already low level, signals a poor outlook for the labour market this year. Nominal wages are adjusting to the weak economic activity: the average wage was down 2.4% in year-on-year terms in November as extraordinary payments declined.

### Unemployment, vacancies and workforce in employment

**Unemployment rose sharply in December and January.** The number of registered unemployed rose by almost 6% in December to more than 118,000, and then approached 125,000 by the end of January. December's rise was primarily the result of an increase in the number of people made redundant and people whose temporary contracts had expired.

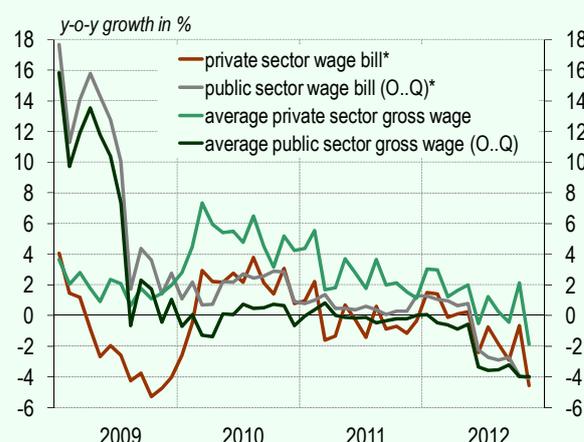

**The number of notified vacancies and new hires fell sharply in December.** The number of vacancies fell below 10,000 in December to its lowest-ever figure. Given that the number of vacancies was already at a very low level after the sharp fall in the second quarter of last year, December's year-on-year fall of almost 30% means a poor outlook for the labour market this year. Furthermore,

at the end of the year there was a deterioration in the relationship between the structure of unemployment and the breakdown of vacancies, as the ratio of new hires to vacancies declined. The year-on-year fall of almost 50% in the number of new hires was mostly the result of the large number of new hires at the end of 2011, but the figure is also down more than 10% on 2010 and 2009. The registered unemployment rate rose to 12.2% in November, partly driven by seasonal factors.

**The fall in the number of workers employed deepened further in November.** November's monthly fall in employment totalled more than 2,000. The largest contributions came from construction and manufacturing; November's seasonal fall in construction was smaller than in previous years, but that in manufacturing was larger. The year-on-year fall in employment accelerated throughout 2012, and in November again exceeded 2%. The year-on-year fall in employment in the private sector was almost 3%, while the employment in public services fell in year-on-year terms for the first time since 2002.

Total wage bill and average monthly gross wage per employee

\*The wage bill is calculated as the product of the average gross wage for employees of legal persons who received pay and the total number of employees of legal persons.

Source: SORS, Bank of Slovenia calculations.

### Wage developments

The average nominal gross wage in November was down in year-on-year terms, partly as a result of a fall in extraordinary payments. It was down 2.4% in year-on-year terms, extraordinary payments having fallen by

more than 1%. The average wage in the public sector was down by just under 4% in year-on-year terms, while the year-on-year fall in the private sector was just under 2%, largely as a result of a fall in extraordinary payments. Wages fell in year-on-year terms in all sectors, with the exception of the mining and manufacturing sectors. In the mining sector this was solely the result of higher extraordinary payments than a year earlier. The manufacturing sector saw a rise in basic wages, but by less than in previous years, while extraordinary payments fell. The average real gross wage was down 5.1% in year-on-year terms in November, while the real gross wage bill was down 7.1%.

## 4 | Price Developments

*Inflation as measured by the HICP averaged 2.8% in 2012, 0.7 percentage points more than in the previous year. The largest contributions to headline inflation last year again came from energy and food prices. However, the rise in inflation was primarily the result of higher year-on-year growth in services prices caused by measures related to fiscal consolidation, and base effects. These factors also raised the core inflation indicators, which have nevertheless remained low, and below the euro area average. Core inflation is thus still reflecting weak purchasing power and consumer caution in the adverse economic situation.*

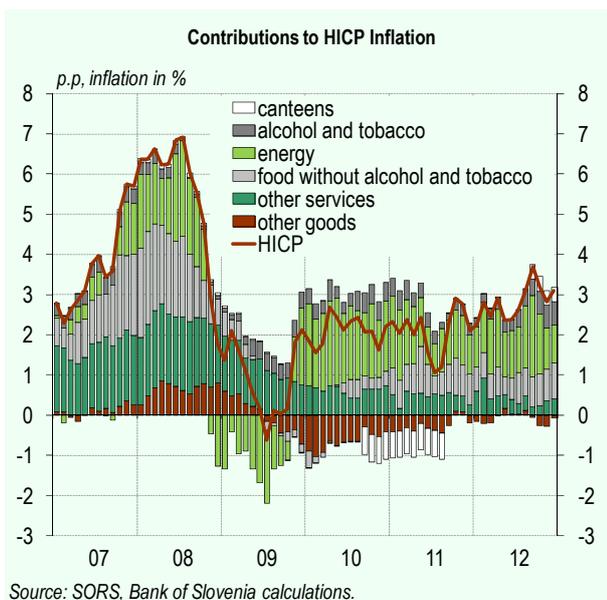

### Headline inflation and structure of inflation

**The average annual inflation rate as measured by the HICP stood at 2.8% last year, up 0.7 percentage points on 2011.** The main factor in this rise was service prices, whose contribution rose from neutral to 0.5 percentage points. This was largely the result of exceptionally sharp price fluctuations caused by changes in the subsidisation of school meals and rises in prices of public services in the second half of the year. Growth in prices of other services remains very low. Last year the largest contribution to headline inflation came for the third con-

secutive year from high year-on-year growth in energy prices, at 1.3 percentage points. The main factors in the movement in energy prices in the first half of the year were the rise in oil prices and the depreciation of the euro, while in the second half of the year the main factor was a rise in excise duties on motor fuels. Growth in energy prices slowed towards the end of the year, as a result of developments in oil prices and the entry of a new supplier on the natural gas market. Prices of non-energy industrial goods fell again last year, albeit by less than in the previous year, primarily as a result of a smaller year-on-year fall in prices of clothing and footwear and prices of cars. Growth in food prices remained high as a result of developments in commodity prices on global markets and rises in excise duties on alcohol and tobacco. Year-on-year growth in prices of unprocessed food increased sharply in the second half of the year, as a result of volatility in prices of fruit and vegetables and a sharper rise in prices of meat in October. The overall contribution made to inflation by food prices remained unchanged at 1.1 percentage points. The average annual inflation rate in the euro area was 2.5%.

**Average inflation as measured by the HICP at constant tax rates stood at 2.1% last year, down slightly on 2011 and 0.7 percentage points lower than headline inflation.** The largest contribution to this difference came from the rise in excise duties on refined petroleum products and tobacco. In contrast to 2011, the contribution made to headline inflation by excise duties on refined

petroleum products was positive last year, at approximately 0.3 percentage points. The government raised excise duties on tobacco products three times. The first two rises were made in accordance with the new Excise Duties Act, while October's rise was carried out because of additional fiscal consolidation requirements. Excise duties on tobacco products rose by 13.2% overall during the year (from EUR 83 to EUR 94 for a thousand cigarettes), their contribution to inflation thereby amounting to approximately 0.3 percentage points. In January 2012 also certain motor vehicles taxes were raised, while in April excise duties on alcohol were raised. The average annual inflation rate in the euro area was also higher than

it would have been had tax rates remained unchanged. The corresponding difference between the inflation rates in the euro area over the first eleven months of the year stood at 0.4 percentage points.

### Core inflation and inflationary trends

**Despite an increase compared with 2011, core inflation remained low last year, and below the euro area average.** The average annual growth in the harmonised index of consumer prices excluding energy, food, alcohol and tobacco stood at 0.7%, 1.1 percentage points more than in 2011, but 0.8 percentage points less the euro area average. The other two core inflation indicators, the HICP excluding energy and unprocessed food and the HICP excluding energy, rose by 0.8 percentage points. However, the rise in core inflation was primarily the result of developments in services prices caused by fiscal measures, and base effects. The core inflation indicators nevertheless remain low, in line with the weak domestic demand as a result of the adverse situation on the labour market and greater consumer caution.

**Inflation in 2013 will be under the influence of the continuing fiscal consolidation measures, and the relaxation of price controls on firms exposed to limited competition.** Planned government measures to reduce the budget deficit, such as a rise in excise duties on refined petroleum products, tobacco products and non-alcoholic sweet beverages and the introduction of a tax

on financial services, will have a significant impact on inflation this year. Other factors in the temporary rise in inflation will be the significant rise in prices of municipal services expected when the responsibility for determining these prices is transferred to local government, and a rise in electricity prices as a result of an increase in the charge to support more sustainable electricity generation. Growth in other components of inflation, which reflect the market situation in the context of weak domestic demand, are expected to remain very low. The forecast movements in oil prices and other commodities prices on global markets are also relatively slow.

### Producer prices on the domestic market

**Year-on-year growth in industrial producer prices on the domestic market in the final quarter of last year was up 0.2 percentage points on the previous quarter.** After increasing in October and November, year-on-year growth in industrial producer prices slowed to 1.0% in December. Year-on-year growth in prices in commodities production increased slightly relative to the previous quarter, primarily as a result of a slowdown in the year-on-year fall in prices in the manufacture of basic metals. By contrast, year-on-year growth in prices of capital goods declined slightly on average in the final quarter. This was primarily the result of a sharper year-on-year fall in prices in the manufacture of fabricated metal products and the manufacture of machinery and equipment, and lower year-on-year growth in prices in the manufacture of computer, electronic and optical equipment. Price developments in

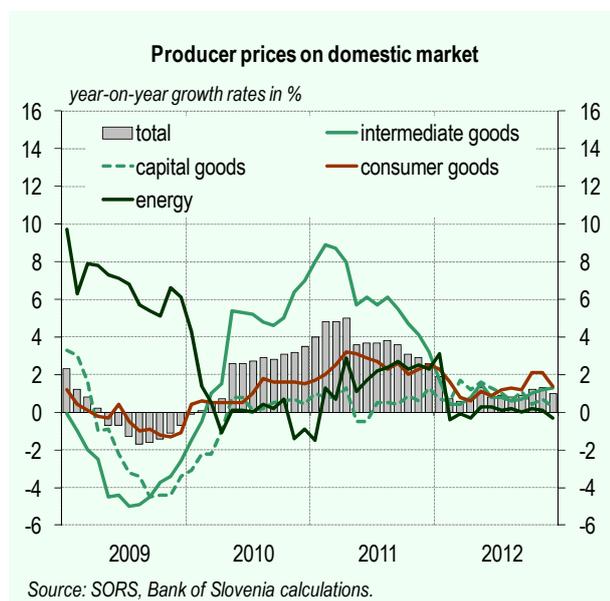

this category also contributed to a decline in year-on-year growth in prices of consumer durables in the final quarter of last year. By contrast, year-on-year growth in prices in the production of consumer non-durables increased. A major factor in this was higher year-on-year growth in prices in the manufacture of food products and beverages and other manufactured goods. As electricity prices fell in November and December, year-on-year growth in energy prices also declined slightly.

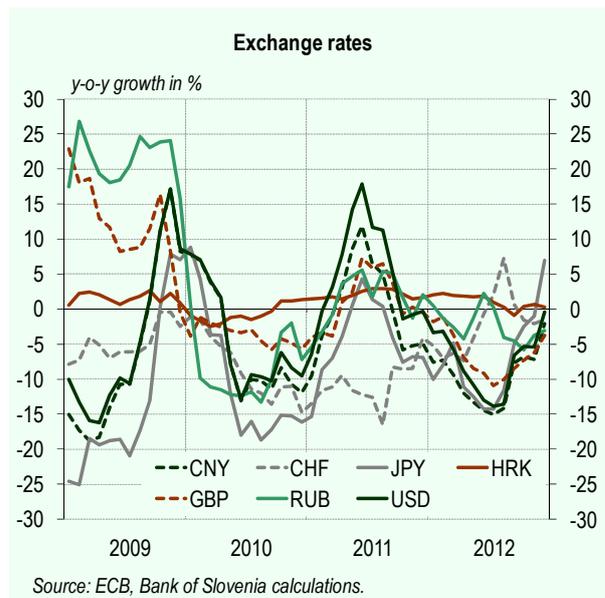

## 5 | Selected Competitiveness Indicators

*Exchange rate developments last year contributed to an improvement in competitiveness, despite the euro's gradual rise against other major global currencies in the second half of the year. The price competitiveness indicator is therefore improving, despite higher growth in prices than in the euro area overall. Cost competitiveness was affected adversely by the decline in productivity in the first three quarters of last year, which despite cuts in labour costs caused an increase in unit labour costs in the total economy. The increase was lower than the euro area average, the gradual improvement in cost competitiveness relative to the euro area thereby continuing. Industry remains prominent in the attainment of cost competitiveness.*

### Nominal harmonised competitiveness indicator

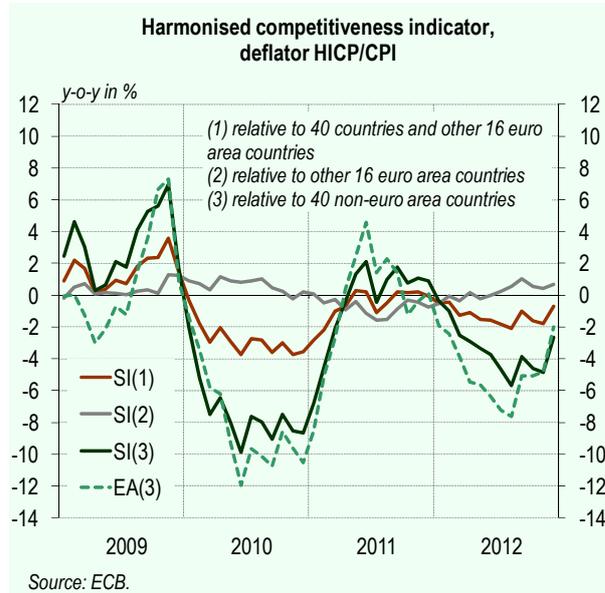

**Since last August the year-on-year decline in the nominal competitiveness indicator has been slowing as a result of the euro's gradual strengthening against other major global currencies.** Slovenia's nominal competitiveness indicator in relation to 40 countries outside the euro area was down just 2.3% in year-on-year terms in December, compared with a figure of 1.9% for the euro area overall. The main factors in the larger decline in Slovenia's indicator were the year-on-year declines in the euro against the South Korean won, the Hungarian forint and the Turkish lira, which have higher weights in the Slovenian indicator. The nominal indicator for Slovenia was down 2.7% on average in 2012.

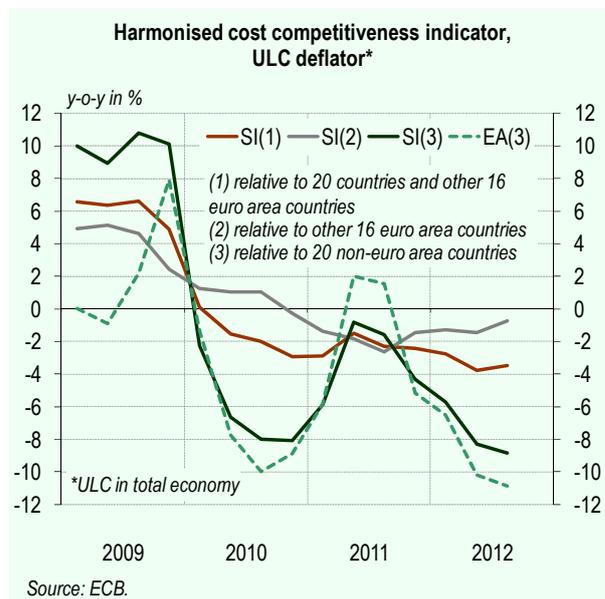

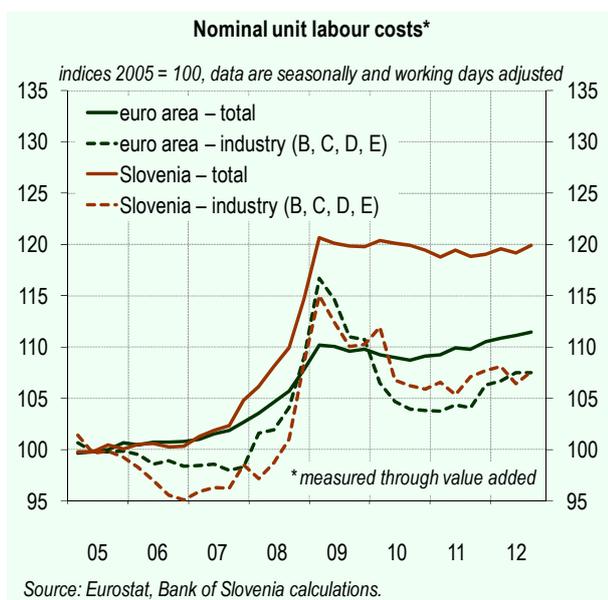

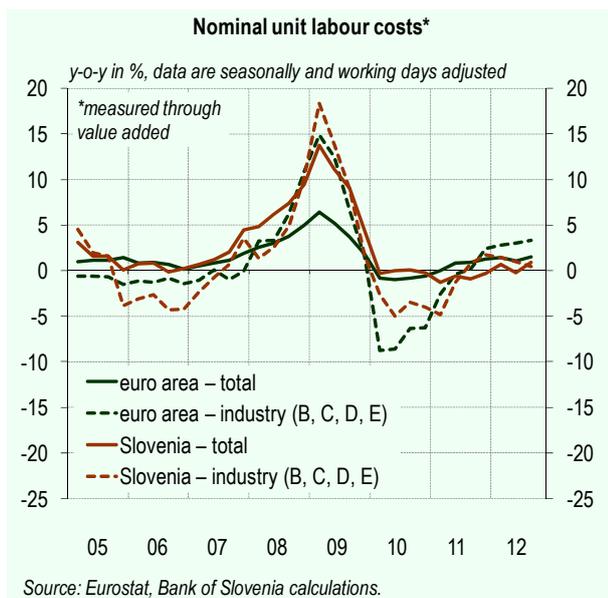

**Real harmonised competitiveness indicators**

The rise in inflation in the second half of last year reduced Slovenia's price competitiveness relative to the euro area average, and to a lesser extent also slowed the improvement relative to the major trading partners outside the euro area. Year-on-year growth in prices in Slovenia was an average of 0.8 percentage points higher than inflation in the euro area between August and December last year. During this period the price competitiveness indicator adjusted for inflation by the HICP/CPI rose relative to the other 16 euro area countries, by an average of 0.6%. The year-on-year decline in Slovenia's price competitiveness indicator measured against 40 major trading partners outside the euro area also slowed sharply, but primarily as a result of the strengthening of the euro.

Developments in unit labour costs in the total economy (ULCs) remain favourable relative to the euro area average. Total nominal ULCs in the euro area overall were up 1.5% in year-on-year terms in the third quarter of last year, 0.2 percentage points more than in the second quarter, while ULCs in Slovenia were up 1.3%, 0.9 percentage points more than in the second quarter. The year-on-year decline in Slovenia's cost competitiveness indicator, which takes account of total ULCs, slowed slightly in relation to the other 16 euro area countries. The improvement in cost competitiveness measured thus nevertheless continued for the second consecutive year.

This harmonised indicator was down just under 9% in year-on-year terms in the third quarter of last year in relation to 20 of the main trading partners outside the euro area. In addition to the movements in the nominal effective exchange rate, this is a reflection of the higher growth in ULCs in the trading partners.

**The difference in the level of ULCs in the total economy with the base year of 2005 compared with the euro area average is gradually diminishing.** In light of the decline in productivity resulting from the fall in GDP, ULCs in the total economy in the first three quarters of 2012 rose slightly, but by less than the euro area average. The shortfall in cost competitiveness that arose as a result of the inflationary cycle and the consequent rise in

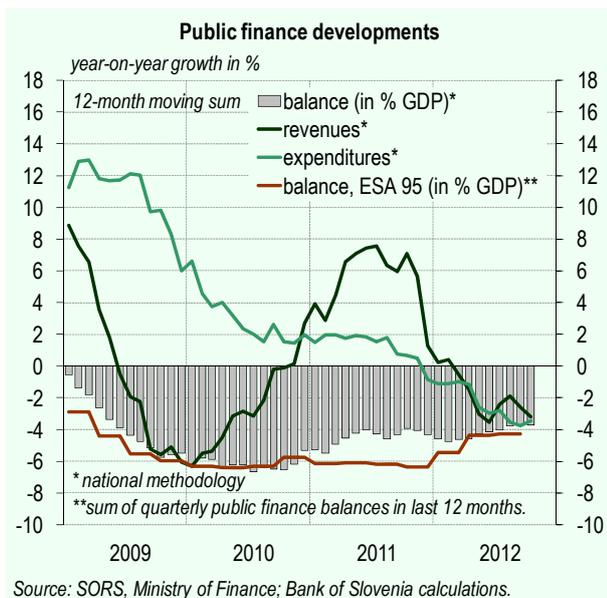

wages in the private sector and wage reform in the public sector has thus persisted. ULCs in manufacturing have continued to move in parallel with the euro area average. The more pronounced nominal wage adjustment and accelerating fall in employment do not suggest further growth in total ULCs towards the end of 2012, despite the projected decline in output.

## 6 | Public Finances

According to the Ministry of Finance's initial estimates, last year's state budget deficit amounted to 3.1% of GDP, close to the government forecasts and just over 1 percentage point less than in the previous year. The deficit was reduced from March onwards, and in the second half of the year this was the result of measures introduced by the Fiscal Balance Act (the ZUJF). While total budget revenues increased, tax revenues declined as a result of the recession and the deterioration in the situation on the labour market. The uncertain political situation caused the yield on Slovenian government bonds to rise slightly in January.

### State budget position, revenues and expenditure

According to the initial estimates of the Ministry of Finance (MoF), last year's state budget deficit amounted to 3.1% of GDP, close to the forecast in the supplementary budget. Last year's state budget deficit amounted to EUR 1,108 million, or 3.1% of estimated GDP, just over 1 percentage point less than in the previous year, when it amounted to 4.2% of GDP. The MoF's October forecast for the state budget deficit in the report on government deficit and debt levels (EDP notification) was slightly higher at EUR 1,186 million or 3.3% of GDP, while in the supplementary budget for 2012 it forecast a deficit of EUR 1,071 million or 3.0% of GDP. The state budget deficit gradually narrowed in year-on-year terms from March onwards, and since the middle of the year this was also driven by measures introduced by the Fiscal Balance Act (the ZUJF). That the deficit was slightly wider

than forecast in the supplementary budget was the result of lower-than-forecast revenues, even though expenditure was also less than forecast in the supplementary budget.

**State budget revenues were up just under 1% last year, but were nevertheless slightly less than fore-**

**cast in the supplementary budget.** Revenues increased by 0.7% last year, but were EUR 57 million down on the forecast in the supplementary budget. The main decline was in tax revenues and revenues from the EU budget, while non-tax revenues were significantly higher than forecast in the revision. The main obstacle to deficit reduction last year was tax revenues, which were down 1.2% in year-on-year terms. This was the result of the decline in economic activity and the deteriorating situation on the labour market, while in addition a number of taxation measures affecting tax revenues were introduced last year. The most important measure reducing tax revenues related to corporate income tax, but the majority of the effects will only be seen this year. The tax rate is being cut again in 2013, to 17%. As a result of rises in excise duties on all products subject to excise duty, revenues from excise duties were higher last year than in the previous year. Further rises in excise duties were also projected for this year, some of which have already been undertaken. Revenues from the EU budget were up in year-on-year terms last year, while expendi-

**Spreads on 10-year government bonds as compared to Germany**

Sources: Bloomberg, Bank of Slovenia calculations.

Note: Spread is calculated as a difference between yield of 10-year government bond and the yield of reference German bond on a daily basis and is used as a measure of country's credit risk. \*In the picture, SLOREP 01/21 is used after 11. January 2011.

ture was lower, as a result of which the net position against the EU budget improved and reached EUR 451 million (compared with EUR 407 million in the previous year). Between 2007 and the end of 2012, Slovenia was particularly successful in drawing disbursements for programmes to strengthen regional development, while its lowest drawings of disbursements were in the field of co-financing major infrastructure projects.

**State budget expenditure declined last year, which made a significant contribution to deficit reduction.**

Expenditure was down 3.9% in year-on-year terms, and was EUR 20 million less than forecast in the supplementary budget. The year-on-year decline seen from April onwards was partly the result of the ZUJF. There was a decline in all categories of expenditure other than interest payments. The most notable contraction last year was again in investment expenditure. For the first time since the outbreak of the economic crisis there was a significant decline in transfers to individuals and households, while expenditure on goods and services and expenditure on wages also declined.

**Financing of the state budget**

**State budget borrowing amounted to EUR 2.9 billion last year.** Last year's borrowing was undertaken via issues of treasury bills (EUR 0.7 billion), long-term loans from domestic banks (EUR 0.5 billion) and, most notably, the issue of long-term US dollar bonds (EUR 1.7 billion).

The proceeds of this borrowing were partly earmarked for repaying maturing debt and financing the deficit in expenditure over revenues and the deficit in the lending and repayments account, but were also partly earmarked for covering the financing needs of this year's budget. The lending and repayment account recorded a deficit of around EUR 0.5 billion. The largest factors in the aforementioned deficit were a government loan to a domestic bank and the contribution of capital to the ESM (European Stability Mechanism), which was established in October with the aim of ensuring financial stability in the euro area and will gradually replace the EFSF (European Financial Stability Facility).

**The required yield on 8-year Slovenian government bonds rose slightly in January after the outbreak of the political crisis in the country.**

In early January the required yield fell to 4.6% and then gradually rose towards 5.0%. In other euro area periphery countries the required yields fell slightly in January.

## 7 | Current Account

*The increase in the current account surplus accelerated in November. The decline in domestic demand remained the main factor in the increase in the surplus. The current account surplus amounted to EUR 200 million in November, compared with a balanced position in the same month of 2011. While services have remained in surplus, the surplus in merchandise trade has increased rapidly in recent months. Net factor income and transfers remain in deficit overall, although there was no significant year-on-year increase. The cumulative current account surplus over the preceding 12 months widened to 2.1% of GDP in November, compared with 0.4% of GDP a year earlier.*

**Merchandise trade**

**Nominal growth in exports was weak in November, but there was a pronounced decline in imports.** Merchandise imports in November were down more than a

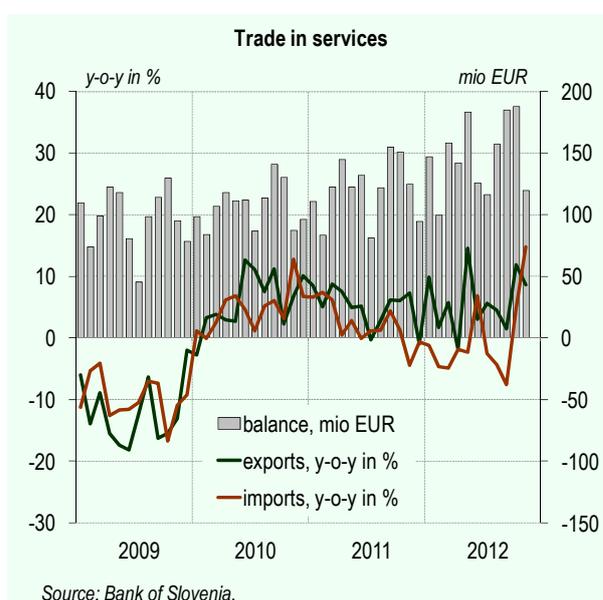

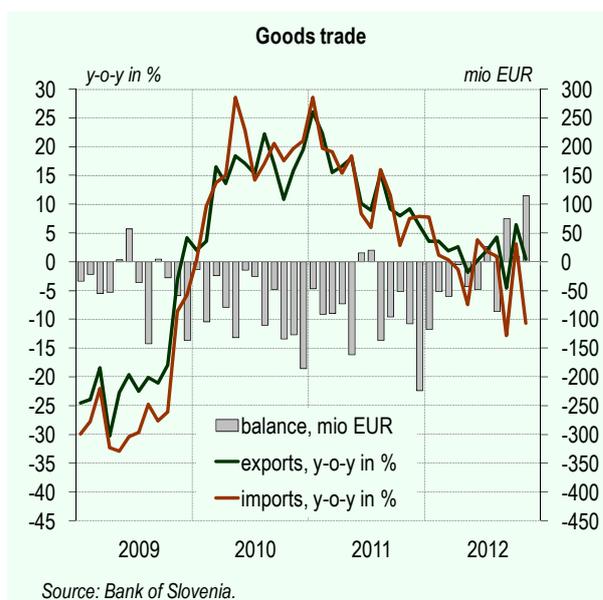

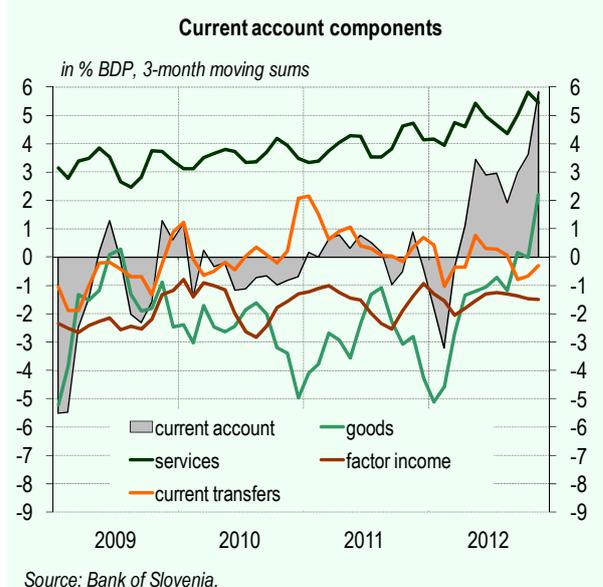

tenth in year-on-year terms, while exports were up just 0.4%. The merchandise trade surplus thus widened to EUR 115 million, just EUR 5 million less than the surplus of trade in services during the month. November's surplus took the cumulative merchandise trade deficit over the first eleven months of 2012 to EUR 188 million, just under a quarter of that recorded in the same period of 2011.

**Given the adverse economic situation in the euro area, the proportion of exports accounted for by markets of other currency zones is continuing to gradually increase.** Merchandise exports to EU Member States during the first eleven months of the year were down 1.3% in year-on-year terms, while exports to non-EU countries were up 6.6%. The proportion of total merchandise exports accounted for by non-EU countries during the first eleven months of last year was up 1.6 percentage points in year-on-year terms at 30.6%.

**High unemployment meant that the largest contraction was recorded by trade in consumer goods.** Total exports of consumer goods during the first eleven months of last year declined by 1.3% in year-on-year terms, as a result of a decline of almost 5% in exports to EU Member States. Growth in exports of capital goods and intermediate goods was positive, as growth in exports to non-EU countries exceeded 6%. As a result of the rapid decline in domestic consumption, imports of consumer goods were down almost 5% in year-on-year terms. Imports of intermediate goods were unchanged in year-on-year terms, while imports of capital goods declined by 3.5%.

### Trade in services

**Following modest growth in the summer, trade in services picked up in October and November, more notably on the import side than on the export side.** Imports of services in November were up 14.7% in year-on-year terms, while exports were up 8.6%. Imports of services during the first eleven months of last year were down 0.5% in year-on-year terms despite growth in the last two months, while exports were up 5.8%. The surplus of trade in services increased by EUR 273 million in year-on-year terms to EUR 1.6 billion or 5% of GDP.

Exports of transport services fluctuated sharply towards the end of last year, while imports rose significantly. After increasing by almost 10% in October, exports of transport services declined by 1.9% in November. Imports increased by nearly a tenth over the same period. The main factors in the high growth in imports of transport services were trade in electricity<sup>1</sup> and road passenger transport services to the rest of the world. Imports of transport services during the first eleven months of last year were down just under 1% in year-on-year terms, while exports were up 2.4%. The surplus of trade in transport services was up EUR 35 million in year-on-year terms at EUR 584 million.

After year-on-year growth was relatively weak in the high holiday season, growth in exports of travel services surged in November. Year-on-year growth in exports of travel services reached 7.6%, as a result of increases of 16% in the number of arrivals and more than 28% in the number of overnight stays by foreign visitors. The largest increases were recorded by visitors arriving from Italy (23%), Austria (19%) and Russia (9%). Imports of travel services again declined sharply in November, by more than 8%. Exports of travel services during the first eleven months of last year were up 3.5% in year-on-year terms, while imports were down just under 13% in year-on-year terms as purchasing power declined and uncer-

<sup>1</sup> Last year saw a sharp increase in cross-border trade in electricity. In the breakdown of transport services, electricity imports amounted to EUR 64 million during the first eleven months of last year, over a third higher than in the whole of 2011. There was also a sharp increase in exports of such services, but the higher level of total exports meant that the impact on overall growth was smaller than on the import side. The increased trade in electricity also had a similar effect on foreign trade intermediation services.

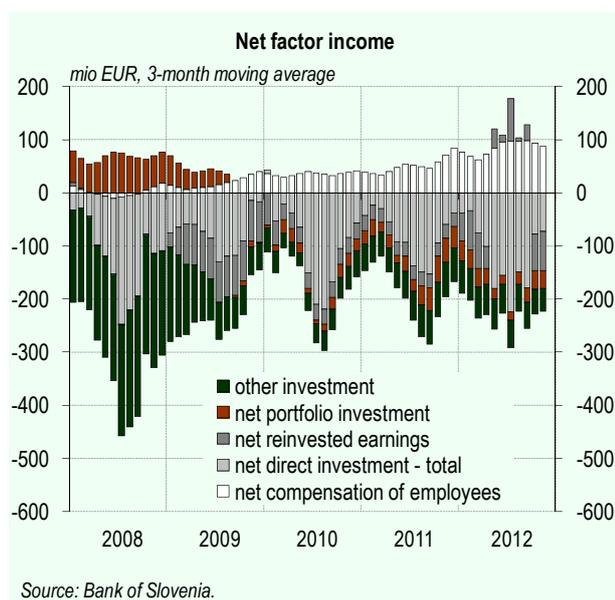

tainty increased on the labour market. The surplus of trade in travel services was up EUR 161 million in year-on-year terms at EUR 1,196 million.

**The main factor in last year's increase in the surplus of trade in services was the narrowing of the deficit in other services.** The deficit in other services (excluding transport and travel services) during the first eleven months of last year narrowed by EUR 77 million in year-on-year terms to EUR 159 million. The deficit has been narrowing as a result of increased surpluses in construction services, foreign trade intermediation services and other business services. The largest deficit among the remaining services was recorded by trade in intellectual property services, at EUR 220 million.

### Factor income and current transfers

**The deficit in net factor income during the first eleven months of last year narrowed by EUR 26 million in year-on-year terms to EUR 510 million.** Outflows of labour income were unchanged, while inflows of labour income from residents in the rest of the world were up just under a half. The surplus in labour income thus widened by EUR 120 million in year-on-year terms to EUR 311 million. The deficit in capital income widened by EUR 95 million in year-on-year terms to EUR 821 million. Outflows of capital income declined by 8.5%, while inflows were down just under two-fifths.

**Weak lending activity and low interest rates meant that the largest decline among all capital income**

**items was recorded by net interest payments to the rest of the world.** They amounted to EUR 190 million during the first eleven months of last year, down EUR 10 million in year-on-year terms. Net payments of income on investments in debt securities also declined, by EUR 17 million to EUR 104 million. The sole factor acting to widen the deficit in capital income was an increase of EUR 122 million in the deficit in income from FDI to EUR 527 million, primarily as a result of Slovenian firms' divestments of EUR 142 million in the rest of the world.

**Net inflows of government transfers remained down on the previous year.** Private transfers recorded a deficit of EUR 164 million during the first eleven months of the year, while government transfers recorded a surplus of EUR 82 million, although the latter figure was down a half on the same period of 2011. According to provisional figures, the net position of the Slovenian state budget against the EU budget improved significantly in December as a result of high net disbursements.

## 8 | Capital and Financial Account

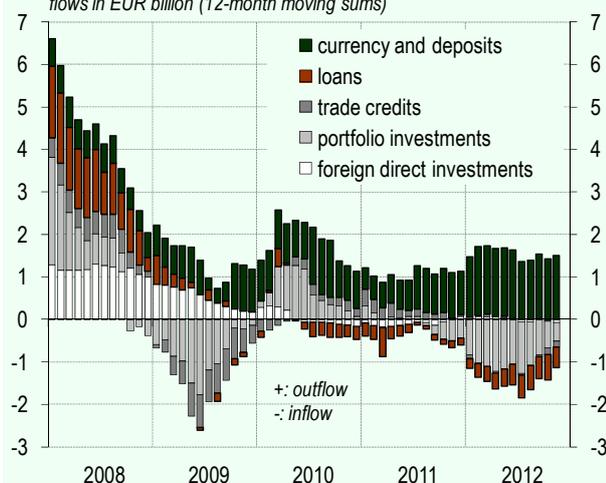

*November's net outflow from the private sector to the rest of the world amounted to EUR 572 million, 63% more than the average over the first eleven months of the year. The main increase was in the banking sector's claims from currency and deposits. The banks continued to make debt repayments in the rest of the world. The private sector's net outflow was compensated for by funding via the ECB and by government borrowing. The net external debt increased by EUR 693 million during the first eleven months of last year, while the gross external debt increased by EUR 802 million. The net external debt stood at EUR 14 billion at the end of November, while the gross external debt stood at EUR 41 billion.*

### Private sector's claims

**The main factors in November's increase of EUR 391 million in claims against the rest of the world were**

**Private sector's financial claims on the rest of the world**

the banking and household sectors, whose holdings of foreign currency and deposits in the rest of the world increased by EUR 276 million and EUR 134 million respectively. In November the domestic banks recorded their second increase in the loans to the rest of

the world last year, after September's increase. Other financial instruments recorded a decline in claims in November, as a result of a decline in investments in debt instruments, while there were increases of EUR 44 million in equity in the form of outward FDI and EUR 14 million in

Signs: inflows or increases in liabilities (+), outflows or increases in claims (-).

domestic investments in foreign equities.

### Private sector's liabilities

The largest contribution to November's decline in the private sector's liabilities to the rest of the world came from the banking sector. It made loan repayments of EUR 258 million to the rest of the world in November, while deposits by non-residents declined by EUR 95 million. As in the previous month, the domestic corporate sector recorded net borrowing from foreign banks and unaffiliated firms, in the amount of EUR 96 million. FDI, non-residents' investments in domestic securities and trade credits recorded an increase in liabilities of EUR 70 million.

### External debt

The net external debt stood at EUR 14 billion in November, down EUR 97 million on the previous month. The largest contribution to the decline came from the commercial banks, at EUR 743 million. Their net external debt was down almost a half on December 2011. The government sector also reduced its net external debt slightly in November, by EUR 56 million, although the increase over the first eleven months of the year amounted to EUR 1.4 billion. Other sectors recorded net borrowing in the rest of the world, most notably corporates with net disbursements of long-term loans in the

amount of EUR 134 million. There were increases in both gross external claims (EUR 134 million) and gross external debt (EUR 37 million).

## 9 | Banking System\*

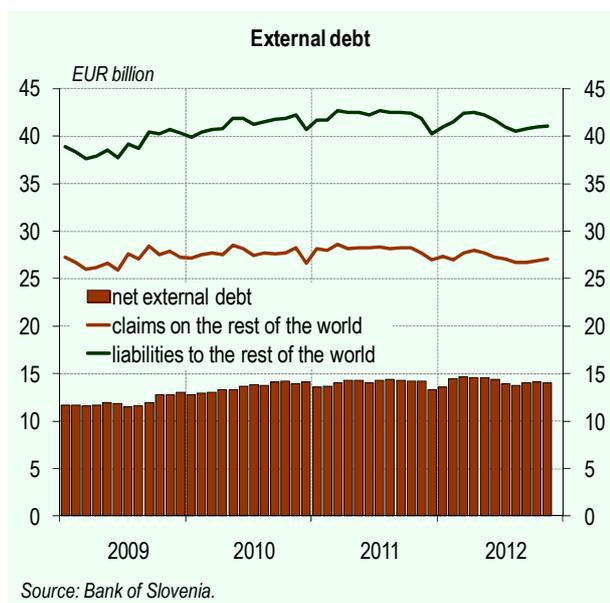

The contraction in the banking system's total assets came to a temporary halt last November, primarily as a result of an increase in government deposits during that month. The government invested a portion of the proceeds of a bond issue in the banks, which was primarily reflected in an increase in the banks' short-term investments in the rest of the world. Bank lending activity has continued to decline, lending to non-financial corporations in particular. The banks strengthened their debt repayments to the rest of the world in November. The banking system recorded a pre-tax loss of EUR 274 million in the first eleven months of 2012.

### Total assets

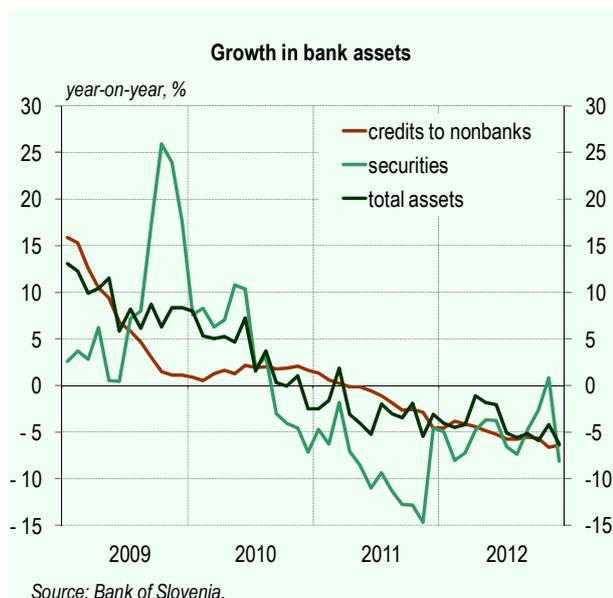

After declining for seven months, the banking system's total assets increased in November, by EUR 26.7 million to EUR 46.7 billion. The year-on-year contraction thus diminished slightly, to 4.2%. The main factor in the increase in total assets on the funding side was the increase in government deposits, while the main factor on the investment side was growth in short-term loans to banks in the rest of the world. The decline in loans to the non-banking sector accelerated further in November as a result of a larger contraction in loans to non-financial corporations.

### Lending activity

The contraction in lending activity to the non-banking sector accelerated further in November. The stock of these loans was down EUR 386 million on October, taking the year-on-year contraction to 6.7%. All sectors recorded a decline in loans, but non-financial corporations recorded the most pronounced decline.

\* This section uses data from the banks that report to the Bank of Slovenia in accordance with the Guidelines for implementing the resolution on reporting by monetary financial institutions. Because of methodological differences, these figures differ from the published statistics.

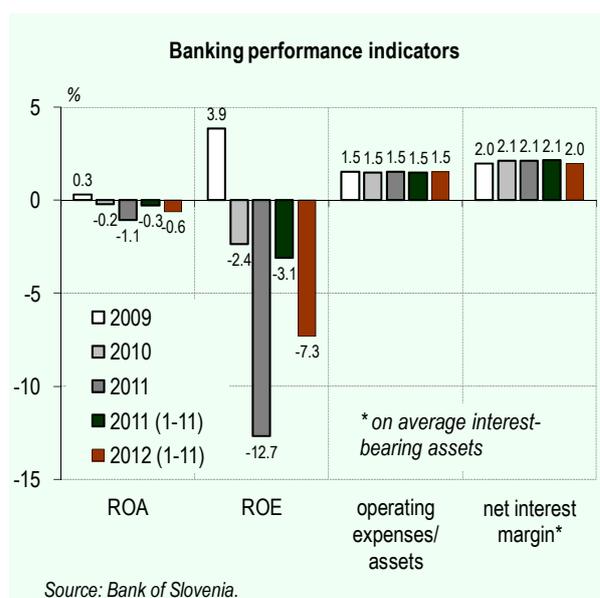

**November's decline of EUR 294 million in loans to non-financial corporations (NFCs) was larger than in any other month of 2012.** All the bank groups recorded a decline in the stock of loans to NFCs, and there was an above-average decline at the banks under majority foreign ownership. The year-on-year contraction in loans to NFCs at this bank group increased by 3.4 percentage points to 9.8%, thereby approaching the year-on-year contraction at the large domestic banks, which reached 11.6%. Impairments accounted for a smaller portion of November's contraction in loans to NFCs, but accounted for 40% of the overall decline of EUR 1.3 billion in loans in the first eleven months of 2012.

**Having been moderate for several months, the contraction in loans to households strengthened again in November.** The stock of these loans was down EUR 26.5 million, the year-on-year contraction thereby increasing to 2.1%. The domestic banks accounted for two-thirds of this contraction. The stock of consumer loans declined again: it was down EUR 209 million during the first eleven months of the year, double the decline in the same period of 2011. The year-on-year contraction in consumer loans reached 8.6% in November, while housing loans continued to record positive growth, at 2.4%.

### Funding

**The decline in liabilities to foreign banks accelerated in November.** The banks repaid EUR 399 million of liabilities to foreign banks in the month, the largest figure

since March 2012. The banks under majority foreign ownership accounted for almost 70% of this, and they reduced their liabilities to foreign banks by EUR 1.4 billion during the first eleven months of the year.

**November's large increase in deposits by the non-banking sector was the result of an increase in government deposits.** The government placed part of the proceeds from the issue of government bonds with the banks. Deposits by non-banking sectors increased by EUR 676 million in November, EUR 557 million of which was government deposits. The year-on-year contraction in deposits by the non-banking sector thus diminished by 3.4 percentage points to 0.8%. The government sector placed its money in short-term deposits, of 1 to 4 months, with the banks under majority foreign ownership receiving 45% of November's increase in deposits. This funding was not redirected into an increase in lending to the non-banking sector, but instead went to the repayment of liabilities to the rest of the world or was placed with parent banks in the rest of the world via loans. The stock of loans to foreign banks increased by EUR 341 million in November, the banks under majority foreign ownership accounting for the majority of the increase.

**After declining for three months, household deposits increased in November.** They increased by EUR 25 million, but the year-on-year rate of growth nevertheless remained negative, at -0.9%. All the bank groups contributed to the increase, most notably the small banks.

## Banking system's operating result

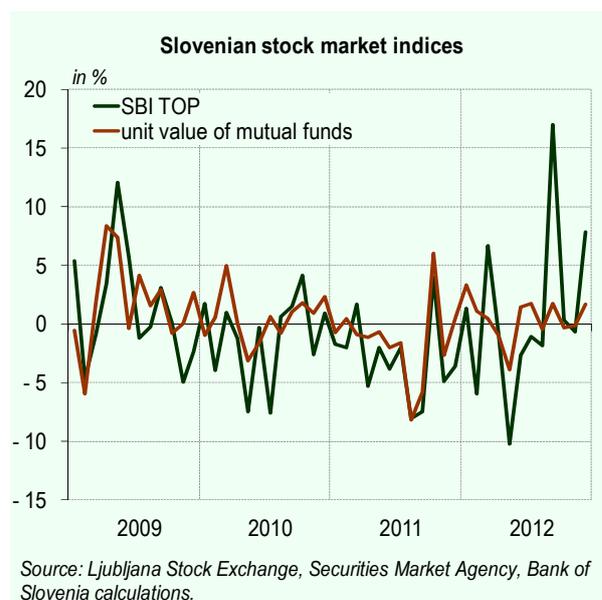

The banking system recorded a pre-tax loss of EUR 273.6 million in the first eleven months of 2012. Year-on-year growth in gross income is slowing, as net interest and net non-interest income have recorded moderate increases. The rate stood at 4.2% in November. Operating costs recorded their lowest monthly figure of 2012, but their positive impact on the operating result was neutralised by the highest impairment and provisioning costs of the year. These amounted to EUR 172 million, taking the total during the first eleven months of the year to EUR 1,012 million. Alongside an increase in impairments of loans to the non-banking sector, there was also an increase in impairments of securities and capital investments.

# 10 | Domestic Financial Markets

The year-on-year change in the SBI TOP stood at +7.8% in December, the first positive change after more than two and a half years. The market capitalisation of shares on the Ljubljana Stock Exchange recorded a similar increase, while the market capitalisation of bonds fell by 0.3%. There were sales of strategic investments by certain over-leveraged Slovenian firms. Non-residents made net investments in both equities and bonds in December, although acquisitions were the main reason for the equity investments. Residents, most notably the insurance corporations and pension funds sector, made net investments in foreign equities and bonds. The domestic mutual funds' assets under management declined to EUR 1,835 million in December, as a result of net withdrawals of EUR 14 million, despite a rise of 1.7% in the average unit price.

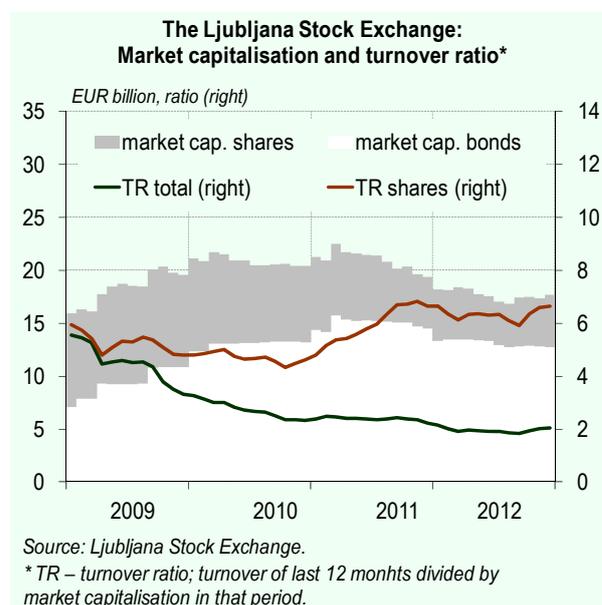

## Developments on the Ljubljana Stock Exchange

The SBI TOP was up 7.8% in both monthly and year-on-year terms in December. This was the first positive year-on-year change in the index in more than

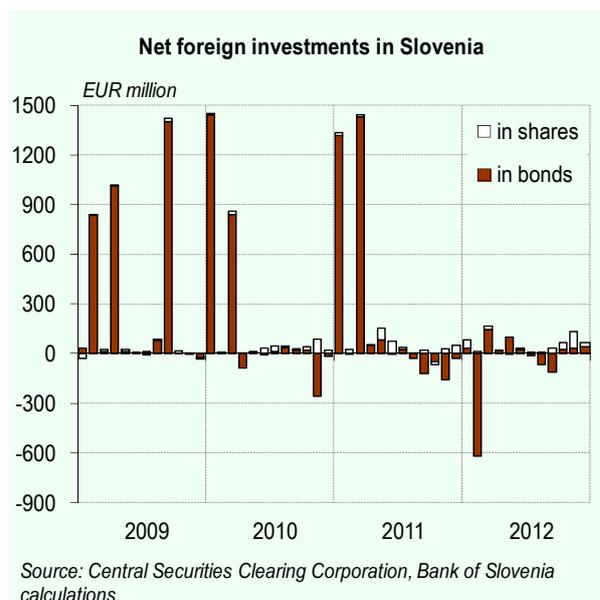

two and a half years. It ended December at 636 points. The market capitalisation of shares on the Ljubljana Stock Exchange amounted to EUR 4,911 million in December, up 7.8% on the end of the previous month. Despite the rise in prices, liquidity on the domestic exchange declined: the volume of trading in December was down 23.8%. As a result of the anticipated sale of government holdings, there was heavy volume in shares of Telekom Slovenije, Zavarovalnica Triglav and Petrol, in addition to Krka. The dividend yield on the prime market stood at 3.9% in December.

The sale of strategic investments in over-leveraged Slovenian firms was a feature of the end of the year. In early December Pozavarovalnica Sava d.d. and Slov-

enska odškodninska družba (SOD) signed an agreement to purchase NKBM's 51% holding in Zavarovalnica Maribor. Pozavarovalnica Sava is to make a capital contribution of EUR 15 million for a holding of 11.79%, taking its total holding in Zavarovalnica Maribor to 60.47%. The remaining 39.21% holding will be purchased by SOD for EUR 50 million. Pozavarovalnica Sava will undertake a capital increase of EUR 55 million by the end of April 2013, and will purchase SOD's remaining holding in Zavarovalnica Maribor. Firms in the Laško Group have signed an agreement with other shareholders to make the ninth attempt at selling the majority holding in Mercator. Sava d.d. and KN 1909, a foreign firm, each purchased half of a holding of 32.63% in Istrabenz d.d. from Petrol d.d. There was a capital increase of almost EUR 9 million at Intereuropa d.d. at the end of December. With the aim of improving the maturity breakdown of their borrowing, Gorenje raised a 5-year syndicated loan in the amount of EUR 50 million at Sberbanka Europe.

**The market capitalisation of bonds on the Ljubljana Stock Exchange fell by 0.3% in December, but the volume of trading in bonds was up 61% at EUR 3.6 million.** The increased volume of trading in bonds was primarily the result of trading in 1st-issue Petrol bonds, which accounted for 60% of the total. Petrol successfully issued its PET3 bonds in December with a nominal value of EUR 30.2 million. SID banka made a partial prepayment of EUR 75 million of its bonds with the ticker symbol of SEDABI 3 04/21/15 on the secondary market in Luxembourg. After the partial cancellation, the remaining total nominal value of the aforementioned SID banka bonds is EUR 1,025 million. The Ministry of Finance issued TZ141 3-month treasury bills with a maturity date of 14 March 2013, a nominal value of EUR 34.6 million and a nominal annual interest rate of 0.69%. With a view to improving its capital adequacy, NKBM offered a prepayment totalling EUR 150 million to holders of hybrid bonds, which are classed as additional own funds. The prepayment was offered in the form of cash, at a discount, or conversion at a discount into an unsubordinated debt security. The outcome of the offer is that NKBM will prepay EUR 7 million and convert EUR 22.65 million of its perpetual FRNs, and will prepay EUR 26.1 million and convert EUR 42.3 million of its perpetual LPNs. The pro-

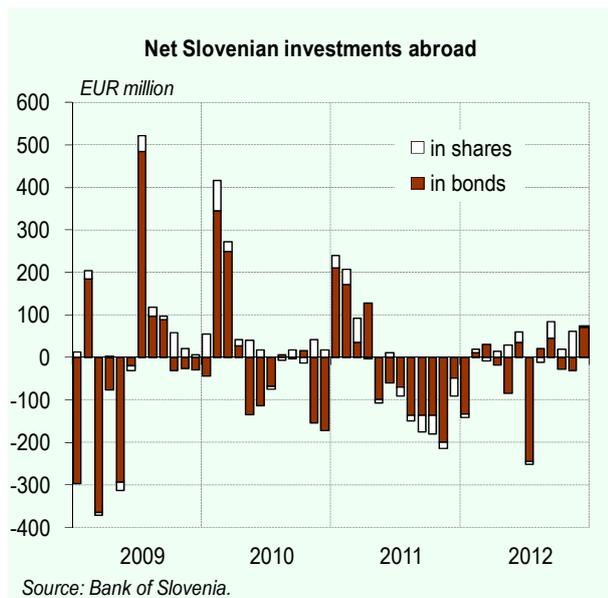

portion of total stock exchange volume accounted for by bonds stood at 13.4% in December.

#### Inward investments by non-residents

**The proportion of the market capitalisation of the Ljubljana Stock Exchange accounted for by non-residents rose to 13.6% in December.** Non-residents made net purchases of EUR 40.7 million in Slovenian bonds and EUR 25.1 million in Slovenian shares. The net purchases of Slovenian shares by non-residents were primarily the result of the second payment to secure a majority holding in Juteks by Belgium's Beaulieu International Group in the amount of EUR 11.2 million, and a capital increase of EUR 7 million at AG d.d. by Montenegrin and Bosnian investment funds. The largest net purchases of Slovenian bonds (EUR 76 million) were made by residents of Belgium, while the largest net sales of bonds (EUR 20.6 million) were made by residents of the UK.

#### Outward investments by residents

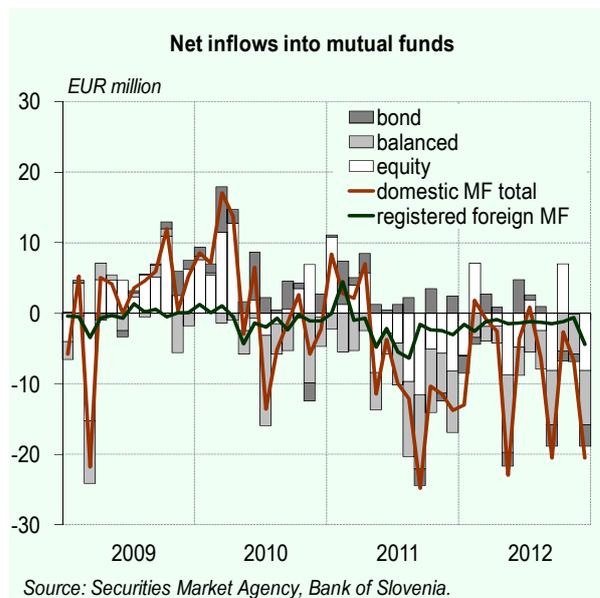

**Slovenian residents made net purchases of EUR 3.9 million in foreign equities and net purchases of EUR 71.1 million in foreign debt securities in December.** The largest net purchases of foreign bonds (EUR 88.2 million) were recorded by insurance corporations and pension funds, while the banks made net sales of bonds (EUR 18.3 million). The heaviest trading was in euro area bonds. The largest net purchases of foreign equities

(EUR 19.2 million) were made by insurance corporations and pension funds, which primarily purchased shares in issuers from the former Yugoslav republics. Other financial intermediaries excluding insurance corporations and pension funds recorded net sales of EUR 31.2 million in equities, and have reduced their exposure across practically all geographic areas.

### Domestic mutual funds

The domestic mutual funds' assets under management declined to EUR 1,835 million in December, as a result of net withdrawals of EUR 14 million, despite a rise of 1.7% in the average unit price. Investors made net withdrawals from high-risk funds, which were partly offset by net investments in safer funds. Equity funds recorded net withdrawals of EUR 22.3 million in December, while there were net inflows of EUR 6.2 million and

EUR 2.5 million into balanced funds and money-market funds respectively. In December eight sub-funds were merged into other sub-funds operated by umbrella funds, a sign of consolidation in the large number of sub-funds operated by Investment Fund Management Companies. The banking sector recorded its largest net withdrawals since the outbreak of the economic crisis at EUR 25.1 million, as a result of a reduction in the banking sector's investments in securities and a switch towards lower-risk investments. By contrast, in the household sector there was a slight renewal of confidence in the capital markets in December: the net inflows of EUR 8.8 million into mutual funds were the largest since the outbreak of the economic crisis. The proportion of the domestic mutual funds' assets under management accounted for by liquid assets<sup>2</sup> stood at 11.3% in December.

<sup>2</sup>Liquid assets include cash, deposits, money-market instruments and government bonds.

# IV. NOTES ON METHODOLOGY

## General notes

### Sectors

For data from 30 April 1999 onwards, a sectorization has been implemented according to the Regulation on Introduction and Implementation of Standard Classification of Institutional Sectors (hereinafter SKIS), published in the Official Gazette No. 56/98. SKIS, which implemented a national standard for economic sectorization, based on the European System of Accounts 95 and is in accordance with the System of National Accounts 93. According to SKIS, the economy is divided into the following sectors: non-financial corporations, financial corporations (central bank, commercial banks, and other financial institutions), general government, households, non-profit institutions serving households, and the external sector (non-residents).

The external sector comprises non-residents; the domestic sector, residents.

Residents of the Republic of Slovenia are defined as:

- companies and other legal entities with a registered office in the Republic of Slovenia, not including their branches abroad;
- branches of foreign companies entered in the Register of Companies of the Republic of Slovenia;
- sole proprietors or natural persons independently performing business activities as their primary occupation, with a registered office in the Republic of Slovenia or having permanent residence in the Republic of Slovenia;
- natural persons with permanent residence in the Republic of Slovenia;
- natural persons temporarily residing in the Republic of Slovenia, holding a residential or working visa valid for no less than six months; and
- diplomatic, consular and other representative offices of the Republic of Slovenia abroad which are financed from the Budget, as well as Slovene citizens employed at these representative offices and their family members.

All other persons and entities shall be deemed non-residents.

The domestic sector is broken down to the monetary sector and non-monetary sectors. The monetary sector consists of the Bank of Slovenia and other monetary financial institutions (banks, savings banks and money market funds). Domestic monetary financial institutions, owned by both residents and non-residents, are included.

Non-monetary sectors are: non-financial corporations, non-monetary financial institutions, general government, households, and non-profit institutions serving households. Non-financial corporations (enterprises) are legal persons – market producers of goods and non-financial services.

The non-monetary financial institutions sector comprises other financial institutions. Other financial institutions are: other financial intermediaries, except insurance corporations and pension funds (mutual funds, investment funds and financial leasing companies), financial auxiliaries (securities brokers/dealers, stock exchanges) and insurance corporations and pension funds.

The general government consists of the central government (administrative departments of state and central government agencies), local government (local administration, local agencies) and social security funds.

“Households” refers to resident individuals as consumers, resident individuals as sole proprietorships, and partnerships being market producers and having no independent legal status. The data of the latter, prior to 30 April 1999, were included in the enterprises sector.

Non-profit institutions serving households are clubs, political parties, trade unions, churches or religious societies, humanitarian and charity organizations, and professional societies.

### Characteristics of the data

- The data present stocks of assets and liabilities at the end of the period.
- Data on stocks denominated in foreign currencies are converted into domestic currency using the official end-of-period middle exchange rate.
- Data in tables are not seasonally adjusted.

## Table: Republic of Slovenia: General Information

The table shows basic general data on Slovenia and its economy. In the "Latest actual" column, the latest available data for the current year are published. Sources of the data are the Bank of Slovenia, the Ministry of Finance and the Statistical Office of the Republic of Slovenia.

## 1. MONEY AND MONETARY FINANCIAL INSTITUTIONS

Data in all tables present stocks items at the end of the period. Last published data are preliminary. The change in the reporting could cause some inconsistencies in conceptual definitions of some items in the year 2005 data.

Until the end of December 2006 the data is published in the currency SIT, from 1 January 2007 the data is published in the currency EUR. The currency EUR in the data until the end of December 2006 is considered as foreign currency, from 1 January 2007 as domestic currency.

### Change of Methodology

In May 2006 the tables of the Money and Monetary Financial Institutions chapter, have been changed. Structurally similar tables are based on the methodology of the European Central Bank (ECB) or of the euro area and no more on the methodology of the International Monetary Fund. The data source for the data of the MFI's in the changed tables is the report of the monetary financial institutions and not the bookkeeping report of the banks and savings banks. The main methodological changes are explained below.

The data from the new tables is available since December 2004, while the time series of the old tables up to March 2006 are still available on the Bank of Slovenia internet page (<http://www.bsi.si/en/>).

The main differences between the methodology of the ECB and the tables in the monthly bulletin up to April 2006 are as follows:

- The sector of the monetary financial institutions, MFI, contains banks, savings banks, savings and loans undertakings and money market funds, but it does not include old LB in KBM banks, while the banking sector without savings banks, savings and loans undertakings and money market funds but with the old LB and KBM is presented in the old bulletin tables.
- Balance sheet total according to the ECB's methodology differs from the balance sheet total according to the IMF's methodology mainly because of the different treatment of the loans. The loans are recorded on gross basis in the new tables and net of provisions in the old set. Consequently the stock of the loans is different.
- There is a difference among the stock of the items loans and deposits and debt securities – among the claims and liabilities, because of the inclusion of the negotiable/non-negotiable securities into the items loans/deposits and debt securities. According to the ECB's methodology, the non-negotiable debt securities are included into the loans/deposits and the negotiable debt securities into the debt securities.
- According to the ECB's methodology, the deals by procurement and internal affairs are included on a net basis, while before they were shown on a gross basis.
- There are differences in the composition of monetary aggregates according to national definition and harmonized monetary aggregates according to the ECB's definition that are described below.

Since April 2006 the data of the specific balance sheet items (loans, deposits, securities other than shares and issued debt securities) are in line with the ECB's request recorded according to their nominal values. The nominal value of a specific instrument is an amount of the principal, which is owed by the debtor to the creditor:

- loans: unpaid principal, not included the accrued interest, the commissions and other expenses,
- deposits: amount of the time deposits, the accrued interest not included,
- debt securities: nominal value.

Interest, which is subscribed to the principal and thus increases it, is the component of the nominal value.

### Description of the balance sheet instruments

Below is a short description of the balance sheet aggregate items or instruments, as defined by the European Central bank:

#### Cash

Holdings of domestic and foreign banknotes and coins in circulation that are commonly used to make payments.

#### Loans

For the purposes of the statistical reporting scheme, this item consists of funds lent by reporting agents to borrowers, which are not evidenced by documents or are represented by a single document (even if it has become negotiable). It includes assets in the form of deposits, bad debt loans, in respect of which repayment is overdue or otherwise identified as being impaired, traded loans, subordinated debt in the form of deposits or loans and claims under reverse repos. The stock of loans is included into the item according to the "gross" principle.

#### Securities other than shares

Holdings of securities other than shares or other equity, which are negotiable and usually traded on secondary markets or can be offset on the market, and which do not grant the holder any ownership rights over the issuing institution. Besides negotiable debt securities this item includes: negotiable loans that have been restructured into a large number of identical

documents and that can be traded on secondary markets and subordinated debt in the form of debt securities. The item does not include the accrued interest – which are classified into the item remaining assets, except when the separation is not possible (when the interest is the inseparable part of the market price).

#### Shares and other equity

Holdings of securities which represent property rights in corporations or quasi-corporations. These securities generally entitle the holders to a share in the profits of corporations or quasi-corporations and to a share in their own funds in the event of liquidation. Mutual fund shares and money market fund shares/units are included here.

#### Remaining assets

This item may also include: financial derivative positions with gross positive market values, non-financial assets (tangible or intangible), accrued interest receivable on loans and securities, the surplus from the deals by procurement, internal affairs.

#### Deposits

Amounts owed to creditors by reporting agents, other than those arising from the issue of negotiable debt securities. Deposits also cover loans as liabilities of MFIs, which represent amounts received by MFIs that are not structured in the form of deposits, non-negotiable debt securities issued, liabilities for the loans received and where they are not separately stated also deposits redeemable at notice, repos and traded loans.

#### Debt securities issued

Securities other than equity issued by reporting agents, which are negotiable and usually traded on secondary markets or which can be offset on the market, and which do not grant the holder any ownership rights over the issuing institution, and the subordinated debt issued by MFI's in the form of the debt securities. The accrued interest are not included in the stock data, but classified to the remaining liabilities. The amount of debt securities is shown net of own purchase.

#### Capital and reserves

This category comprises the amounts arising from the issue of equity capital, including also non-distributed benefits or funds, specific and general provisions against loans, securities and other types of assets. The item is adequately netted for the own shares owned. This item also includes the difference between the revenues and expenditures during the year and the money market fund shares/units issued.

#### Remaining liabilities

The remaining liabilities consist of accrued interest payable on deposits and debt securities, provisions representing the liabilities vis-à-vis third persons, gross amounts payable in respect of transit items, financial derivative positions. The surplus of the liabilities over claims from the deals by procurement, internal affairs is also included here.

## Tables

In May 2006 the tables from 1.1. to 1.8 have been changed and substituted with the new ones, which enables partial continuity of the old time series.

The entry to the euro area (on 1.1.2007) caused a break in the time series of the statistical tables in the Monthly bulletin in cases where the "currency" is an attribute. An expected reclassification of the data between the individual columns in the tables, which keep the same name takes place, for example of the stock of outstanding loans in euros from the time series of "foreign currency" before the introduction to the time series of "domestic currency" after the introduction of euro. To enable easier reconstruction of this change, the shares of the Euro amounts in stocks of the foreign currency on 31.12.2004, 31.12.2005 and 31.12.2006 are published in the Methodological notes for the tables 1.3, 1.4, 1.5 in 1.6, where the reclassification occurred.

*Note 1:* With the publication of April 2011 data the corrected time series on Deposit with agreed maturity and Deposit redeemable at notice (Tables 1.2., 1.4., 1.6.) were published for the period January 2009 to May 2010 due to the change on the source of the data.

### Table 1.1.: Monetary Aggregates

The table shows stock data at the end of month for monetary aggregates M1, M2 and M3, calculated according to the definition of the European Central Bank.

The main characteristics of monetary aggregates under the ECB's definition:

- Inclusion of liabilities of MFI sectors to EMU non-monetary sectors,
- Exclusion of the monetary neutral sector (the central government has the status of a monetary neutral sector),
- Limited maturity of items included (liabilities of up to 2 years and deposits redeemable at notice of up to 3 months only),
- Equal treatment of the liabilities in domestic and foreign currency,
- Inclusion of the money market fund shares/units into M3.

Composition of monetary aggregates, as defined by the ECB is:

- M1 contains currency in circulation and overnight deposits,
- M2 includes beside M1 also deposits with agreed maturity of up to 2 years and deposits redeemable at notice of up to 3 months,
- M3 includes M2, repurchase agreements and debt securities with the maturity of up to 2 years and money market fund shares/units.

The table is split into two parts: the first part (before the entry of Slovenia into EMU until the end of December 2006) pre-

sents Monetary aggregates of Slovenia and the second part (after the entry of Slovenia into EMU from 1 January 2007 onwards) presents the contribution of Slovenia to monetary aggregates of EMU.

The item 'Currency in circulation' is calculated on the basis of the Capital Share Mechanism (CSM) which foresees the split of the total amount of issued banknotes in the euro area between the different national central banks of the euro area with respect to their share in the capital of the ECB (8% of the total value of the euro area banknotes in circulation is allotted to the ECB). Coins (which are in fact the liability of the central government) are added to the total amount of banknotes. The item 'Cash' held by the MFIs is deducted from the total amount of currency (banknotes and coins).

The contribution of the Slovenia to the euro area monetary aggregates does not represent monetary aggregates of Slovenia. The concept of residency is the one of the euro area. Due to the consolidation within the MFI sector on the level of euro area countries the aggregate M3 could become smaller than M2.

### Table 1.2.: Consolidated Balance Sheet of the Monetary Financial Institutions

The table shows the end of the month consolidated balance sheet of Bank of Slovenia and other monetary financial institutions, presented in the tables 1.3. and 1.4. The bilateral claims and liabilities of the sectors S.122 and S.121 are netted out. On the liability side of the balance sheet the liabilities to the central government sector (S.1311) in certain items are excluded and are included in the remaining liabilities.

The item 'Banknotes and coins' is for series after 1 January 2007 calculated on the basis of the Capital Share Mechanism (CSM) which foresees to split of the total amount issued in the euro area between the different National central banks of the euro area with respect to their share in the capital of the ECB (8% of the total value of the euro area banknotes in circulation is allotted to the ECB). Coins (which are in fact the liability of the central government) are added to the total amount of banknotes.

### Table 1.3.: Balance Sheet of the Bank of Slovenia

The table shows the Bank of Slovenia's assets and liabilities at the end of month in line with the methodology of the ECB. According to the ECB's methodology the item 'Banknotes and coins' includes the data of coins in circulation (which are in fact the liability of the central government) and excludes the data of issued payment notes, which are included in the remaining assets.

The item 'Banknotes and coins' is for series after 1 January 2007 calculated on the basis of the Capital Share Mechanism (CSM) which foresees to split of the total amount issued in the euro area between the different National central banks of the euro area with respect to their share in the capital of the ECB (8% of the total value of the euro area banknotes in circulation is allotted to the ECB). Coins are added to the total amount of banknotes.

**Table 1.7.: Balance sheet of the Bank of Slovenia – by instruments**

The table shows the data of the balance sheet of the Bank of Slovenia, split by instruments of the monetary policy. The table is composed according to accounting rules of the ECB and differs from the table 1.3. Balance Sheet of the Bank of Slovenia, which is composed according to the statistical methodology of the ECB.

**Table 1.8.: Investment funds**

#### General

Methodology of investment fund statistics in Slovenia is based on Regulation (EC) No 958/2007 of the ECB of 27 July 2007 concerning statistics on the assets and liabilities of investment funds and Guideline of the ECB of 1 August 2007 on monetary, financial institutions and markets statistics (recast). Time series in tables are available from December 2008 on, when the new reporting of investment funds was introduced. The data is revised when publishing data for the next period.

*Note 1:* Financial sectors comprise Bank of Slovenia, other monetary financial institutions (banks, saving banks and monetary funds) and other financial institutions (other financial intermediaries, except insurance corporation and pension funds, financial auxiliaries and insurance corporations and pension funds).

*Note 2:* Non-financial sectors are formed by non-financial corporations, general government, households and non-profit institutions serving households.

*Note 3:* Monetary funds are included in the sector of other monetary financial institutions and not in the other financial intermediaries, where investment funds are classified.

#### Deposit

This item consists of transferable deposits (sight deposits) and other deposits. Other deposits are deposits, which cannot be used for payments and cannot be exchanged for transferable deposits without significant constraints or extra costs. They comprise deposits with agreed maturity, certificates of deposits, which are non-tradable or whose tradability, although theoretically possible, is very limited and other non-transferable deposits.

#### Debt securities

Debt securities are short-term or long-term. Short-term ones include all instruments of monetary market with original maturity of one year or less. Long-term debt securities are securities with original maturity of more than one year and include bonds, instruments of monetary market with original maturity of more than one year and other debt securities. Interest-bearing securities are shown including interests. In case interests cannot be included with debt securities, they are shown separately under the item other assets.

#### Shares and other equity

The item includes shares and units/shares of investment fund. Shares are financial assets, which represent the right of ownership to the joint-stock companies. These financial assets usually give the owners the right to certain share in profit of the joint-stock companies and to certain share in their net assets when winding up. Units/shares of investment fund include units or shares of open-end and closed-end investment funds.

#### Other assets

Under this item the claims on sold or mature investment, claims on Asset Management Company and trustee, interest and dividend claims, claims on securities' obligations, other corporate claims, accruals and prepaid expenditure are reported. Accruals and prepaid expenditure include deferred expenses or costs, short-term accrued revenues and also deferred interests. Financial derivatives are either financial assets or financial liabilities; in balance sheet they are recorded as unnetted.

#### Loans

The item includes loans borrowed, covering loans, repurchase agreements and other forms of loan as techniques and tools for managing the investments of investment funds.

#### Investment fund shares/units

Investment fund shares/units represent total liability to shareholders or investors of investment fund.

#### Other liabilities

The item other liabilities include corporate liabilities of investment fund, namely liabilities from financial instruments' purchase, management liabilities, tax liabilities, liabilities of distribution of profits or other payments to holders of units or shareholders, other corporate liabilities, accruals and income collected in advance and financial derivatives. Accruals and income collected in advance include accrued costs or accrued charges and prepaid income. Under this item deferred

interests are also reported.

## 2. FINANCIAL MARKETS AND PAYMENT SYSTEMS

### Interest rates (tables 2.1–2.4)

#### Table 2.1: Bank of Slovenia Interest Rates

**Lombard loan:** Within the framework of a standing Lombard facility, the Bank of Slovenia provides one-day Lombard loans to banks and savings banks with securities used as collateral. The pledged securities should amount to 110% of the amount of the Lombard loan.

The **repo interest rate** for the temporary purchase of treasury bills and tolar and foreign currency bills of the Bank of Slovenia with obligatory repurchase in seven days was the weighted arithmetic average of daily repo interest rates until March 2004 (effective interest rate). The new seven-day repo was introduced in March 2004; it is offered on a closed basis. The interest rate given is the latest valid interest rate.

**Interest rate on banks' obligatory reserves:** 1 percent per year since October 1991.

The **overnight-deposit interest rate** is an interest rate applying to deposits placed by banks and savings banks on an overnight term with the Bank of Slovenia.

**Long-term deposit** at the Bank of Slovenia was established in July 2004. The variable interest rate is defined once every two months for the next two-month period. It refers to the interest rate for 60-day tolar bills valid at the time of quotation, increased by 0.2 percentage points.

**Tolar bills** are registered securities subscribed by banks and savings banks with a maturity of 60 or 270 days. Sixty-day bills are offered on a permanent basis; 270-day bills were sold by auction until February 2004, and since then have been offered on a closed basis. Interest rates for tolar bills are given nominally; in the case of auctions they are effective rates. Offers of 270-tolar bills have been frozen since November 2004.

**Foreign currency bills** are transferable registered securities not issued in series. They are offered on a permanent basis and can be purchased by banks (or by other legal persons through banks until 3 May 2000). They are sold for euros (or German marks until February 1999, or U.S. dollars until June 2006) at a discount with maturities of two to four months.

A **penalty rate** is generally employed in cases of overdue payments. The penalty rate has been determined by the Law on the Legal Penalty Rate since 28 June 2003.

**Interest rates** for a certain type of instrument in the table are those last valid in a period (except in the case of effective interest rates). The annual averages of interest rates are computed as simple arithmetic averages of monthly data, if such data are available.

#### Table 2.2: Interbank Money Market Rates and Indexation Clause

##### Interbank market

###### SIONIA/SITIBOR

Until 31 December 2006, the figures are annual nominal interest rates for unsecured Slovenian tolar deposits on the Slovenian interbank market. The interest rate for overnight deposits (SIONIA) is the weighted average interest rate for overnight deposits.

SITIBOR is the rate at which Slovenian interbank term deposits are offered by one prime bank to another prime bank.

SIONIA and SITIBOR were valid from 14 July 2003 to 31 December 2006. Break of series in January 2007.

###### EONIA/EURIBOR

**Eonia®** (Euro OverNight Index Average) is the effective overnight reference rate for the euro. It is computed as a weighted average of all overnight unsecured lending transactions undertaken in the interbank market, initiated within the euro area by the contributing banks.

The Euro Interbank Offered Rate – "**Euribor®**" – is the money market reference rate for the euro. It is sponsored by the European Banking Federation, which represents the interests of 4,500 banks in 24 Member States of the European Union and Iceland, Norway and Switzerland, as well as the Financial Markets Association. Euribor® is the rate at which euro interbank term deposits are being offered within the EMU zone by one prime bank to another

##### Indexation clauses

###### TOM

The tolar indexation clause (TOM) is an annual interest rate calculated by the Statistical Office of the Republic of Slovenia

and used for preserving the value of financial liabilities and assets in domestic currency.

TOM (monthly): since 5 August 1995, the average of the previous 3 months' inflation. (Until June 1995, indexation was based on the so-called R, which was equal to the previous month's inflation rate; from 1 June to 4 August 1995, indexation was based on the average of the previous 3 months' inflation.) From February 1996, 4 months; from December 1996, 6 months; and from May 1997, 12 months. Financial liabilities and assets in domestic currency with maturity less than 1 year have not been revalued since July 2002.

#### **Foreign exchange indexation clause USD and CHF**

The monthly rate is the growth rate of the end-of-month exchange rate for USD and CHF. The annual rate is computed from the monthly rate on the conform basis, taking into account the actual number of days in the month and the year.

### **Table 2.3: European Central Bank Interest Rates**

Counterparties can use the **deposit facility** to make overnight deposits with the NCBs. The interest rate on the deposit facility normally provides a floor for the overnight market interest rate.

**Main refinancing operations** are regular liquidity-providing reverse transactions with a frequency and maturity of one week. They are executed by the NCBs on the basis of standard tenders and according to a pre-specified calendar. The main refinancing operations play a pivotal role in fulfilling the aims of the Eurosystem's open market operations and provide the bulk of refinancing to the financial sector.

Counterparties can use the **marginal lending facility** to obtain overnight liquidity from NCBs against eligible assets. The interest rate on the marginal lending facility normally provides a ceiling for the overnight market interest rate.

#### **Table 2.3.1.: Harmonised long-term interest rates for convergence assessment purposes**

The long-term interest rate statistics refer to the monthly average interest rates for long-term government bonds issued by the central government, quoted as percentages per annum.

The fourth Maastricht criterion is based on the level of long-term interest rates. Article 4 of the Protocol on the convergence criteria, as referred to in Article 121 of the Treaty, states that compliance with the fourth convergence criterion »shall mean that, observed over a period of one year before the examination, a Member State has had an average nominal long-term interest rate that does not exceed by more than 2 percentage points that of, at most, the three best performing Member States in terms of price stability. Interest rates shall be measured on the basis of long-term government bonds or comparable securities, taking into account differences in national definitions.«

The European Central Bank and the European Commission have, together with the national central banks, identified the representative debt securities that can be used to measure long-term nominal interest rates and, if necessary, alternative long-term interest rate indicators where suitable government bonds are not available

Data until December 2006 refer to the yield to maturity on a reference long-term general government bond, issued in Slovenian tolar and with a nominal interest rate. Since 1.1.2007 the data show the yield to maturity on a basket of long-term general government bonds, issued in euro and with a nominal interest rate.

Until 2003 a yield to maturity on a primary market is presented, and afterwards a yield to maturity on a secondary market.

## **2.4: Monetary Financial Institutions Interest Rates**

### **Data from January 2003–April 2005**

Estimates on MIR statistics refer to interest rates on new business applied by the eight biggest resident banks (selected by balance-sheet-total criterion) to loans denominated in Slovenian tolar vis-à-vis domestic households and non-financial corporations.

Interest rates are calculated as a weighted average of all interest rates on new business in the instrument category.

Loans to non-financial corporations (breakdown by amount category): loans in SIT are converted into EUR by the monthly average exchange rate and then classified according to amount up to and including EUR 1 million, or over EUR 1 million.

“Loans to households for other purposes” include only loans to sole proprietors for current and capital assets.

Data on APRC in the period from January to August 2003 refer to six respondents, and from August 2003 to December 2003, to seven out of eight total respondents.

### **Data from May 2005–December 2006 covers business conducted in SIT by the total MFI population in Slovenia.**

MFI interest rate statistics cover those interest rates that resident monetary financial institutions (MFIs, i.e. “credit institutions”) apply to euro-denominated deposits and loans by households and non-financial corporations which are residents of the euro area.

The legal requirements for MFI interest rate statistics are laid down in Regulation ECB/2001/18, which defines the statistical standards according to which monetary financial institutions must report their interest rate statistics. This regulation is complemented by the Manual on MFI Interest Rate Statistics, which further clarifies and illustrates the statistical requirements. The MFI interest rate statistics refer to the interest rates individually agreed between a credit institution or other

institution and its customer. They are converted to an annual basis, taking into account the frequency of interest payments, and are quoted in percentages per annum. At the euro area level 45 interest rate indicators with the corresponding volumes are collected, of which 31 refer to new business and 14 to outstanding amounts.

**Outstanding amounts** are defined as the stock of all deposits placed by customers, i.e. households and non-financial corporations, with credit institutions or other MFIs, and the stock of all loans granted by credit institutions to customers. An interest rate on outstanding amounts reflects the weighted average interest rate applied to the stock of deposits or loans in the relevant instrument category in the time reference period. Interest rates on outstanding deposits cover all deposits placed and not yet withdrawn by customers in all periods up to and including the reporting date. Interest rates on outstanding loans cover all loans used and not yet repaid by customers in all periods up to and including the reporting date, although excluding bad loans and loans for debt restructuring at rates below market conditions. MFI interest rates on outstanding amounts are hence statistics on the interest rates actually applied to all "open" deposits and loans.

**New business** is defined as any new agreement between the household or non-financial corporation and the credit or other institution. New agreements comprise all financial contracts, the terms and conditions of which specify for the first time the interest rate on the deposit or loan, and all new negotiations of existing deposits and loans. The prolongation of existing deposit and loan contracts which are carried out automatically, i.e. without any active involvement of the household or non-financial corporation, and which do not involve any renegotiating of the terms and conditions of the contracts, including the interest rate, are not considered new business.

**The annual percentage rate of charge (APRC)** is an effective lending rate that covers the total cost of credit to the consumer, i.e. the interest payments as well as all other related charges. It covers the total cost of credit to the consumer, as defined in Article 18(2) of the Consumer Credit Act. Charges defined in Article 18 of the Consumer Credit Act are excluded. APRC is compiled only for consumer credit and loans to households for house purchases (sole proprietors excluded).

**Weighting method:** The interest rates on new business are weighted by the size of the individual agreement.

The new interest rate statistics replace the average bank interest rates published by the Bank of Slovenia. The coverage and definition of the new statistics differ substantially from those previously published. Therefore, a direct comparison of the new and old rates is not possible.

\* Households = sole proprietorships + individuals + non-profit institutions serving households

\*\*APRC data includes households without sole proprietorships and without non-profit institutions serving households

*Note 1:* For this instrument category, new business and outstanding amounts coincide.

*Note 2:* For this instrument category, households and non-financial corporations are merged and shown under the household sector.

## Exchange rates (Tables 2.6.1–2.6.2)

### Table 2.6.1: Selected Bank of Slovenia Exchange Rates – Average Rates to 31.12.2006

These tables show the Bank of Slovenia middle rates until 31 December 2006. Annual rates are computed as arithmetical averages of monthly rates. Monthly averages are computed as arithmetical averages of daily rates (Sundays and holidays excluded).

A new currency, the Croatian kuna (= 1,000 former Croatian dinars) was introduced on 30 May 1994.

The Polish złoty was denominated on 1 January 1995 at the exchange rate of 1 new złoty for 10,000 old złotys.

### Table 2.6.2: European Central Bank exchange rates

Reference exchange rates of the European Central Bank are shown, representing middle exchange rates of the Bank of Slovenia. The average yearly and monthly exchange rates are calculated as the arithmetical average of daily exchange rates, excluding days on which the TARGET system was closed. This includes Saturdays, Sundays and the following holidays: New Year's Day (1 January), Good Friday, Easter Monday, Labour Day (1 May), Christmas (25 December) and 26 December.

Conversion rates between the euro and the currencies of EU Member States that have adopted the euro are irrevocably fixed and valid since 1 January 1999 (since 1 January 2001 for the Greek drachma).

The conversion rate for the Slovenian tolar is valid as of 1 January 2007, the conversion rate for the Cyprus pound and Maltese lira as of 1 January 2008, the conversion rate for the Slovak koruna as of 1 January 2009 and the conversion rate for the Estonian kroon as of 1 January 2011.

## Payment systems (Tables 2.7 to 2.13)

### General

Data prior to 2007 are published in tolar; from 2007, data are published in euros.

Due to rounding in Tables 2.11 to 2.15, sums of quarterly data do not always totally comply with relevant yearly data.

### Table 2.7: TARGET2 and SEPA internal credit transfer (SEPA IKP) transactions

*Note 1:* On 1st January 2007 the transaction limit for payments submitted to the Giro Clearing system (multilateral net system for small value payments), raised from EUR 8.354,21 to EUR 50.000.

*Note 2:* SEPA internal credit transfer system (the SEPA IKP) is operated by the clearing company Bankart d.o.o. SEPA IKP system was established on 4 March 2009. Before SEPA IKP establishment the same transactions were processed in Giro Clearing payment system, operated by Banka Slovenije. Giro Clearing payment system was closed down on 1 August 2009. Data regarding transactions in the Giro Clearing payment system are published until March 2009. Data regarding transactions in both systems are published together (the sum of transactions in the Giro Clearing and SEPA IKP systems) for the period from March to July 2009. Data regarding payments in the SEPA IKP system are published from August 2009 on.

*Note 3:* Until 29th December 2006 payments data on domestic payments between Slovenian participants are published for domestic Slovenian RTGS system (values in billion Slovenian tolar). As of 1st January 2007 domestic payments of Slovenian TARGET participants represents payments sent from Slovenian credit institutions to another Slovenian payment institution, direct participated in the TARGET system. As of 19th November 2007 payments in TARGET 2 system are considered.

*Note 4:* As of 1st January 2007 cross-border payments of Slovenian TARGET participants represents payments sent from Slovenian credit institutions to non-Slovenian credit institutions, direct participated in the TARGET system. As of 19th November 2007 payments in TARGET 2 system are considered.

*Note 5:* Gross value is the total value of all payment orders executed in the payment system.

*Note 6:* Net value is the amount required for the settlement of the gross value of payments in a payment system that uses netting. It represents the sum of the net monetary liabilities of all participants of the payment system to other participants of the payment system, calculated as the positive difference between the payment orders sent to the system and the payment orders received from the system for each participants of the payment system in an individual settlement cycle.

### Table 2.8 Payment Cards

*Note 1:* Credit card: A card indicating that the holder has been granted a line of credit. The credit granted may be settled in full by a specific date each month (delayed debit card, i.e. charge card), or may be settled in part, with the balance taken as extended credit (credit card).

*Note 2:* Debit card: A card which enables the holder to have purchases directly charged to funds on the cardholder's bank account.

*Note 3:* Cards issued abroad: Payment cards issued abroad and used for payments in Slovenia, mostly by non-residents.

*Note 4:* Volume and value of transactions abroad: Use of cards issued in Slovenia for payments abroad.

**Number of payment cards in circulation:** Number of valid payment cards held by residents and non-residents issued in Slovenia. Data refer to the end of each quarter/year.

**Number and value of payments refer** to the use of payment cards in each quarter/year.

**Domestic card:** Payment card issued by banks and enterprises resident in Slovenia without licence agreements with

foreign issuers.

**Licence card:** Payment card issued by banks and enterprises resident in Slovenia under licence agreements with foreign issuers.

**Bank card:** Payment card issued by banks.

**Retailer card:** Payment card issued by non-banking institutions, mostly for use at specific retail outlets.

**Personal card:** Payment card issued to a natural person (family cards included).

**Business card:** Payment card issued to a legal entity.

## Table 2.9 Other Payment Instruments and Innovative Payment Schemes

*Note 1:* Data refer to the end of each quarter.

*Note 2:* Prior to 2007 the data refer to payment transactions and money withdrawals at manual POS and EFT POS terminals in Slovenia. From 2007 on, the data on money withdrawals are not included.

## Table 2.10 Electronic Banking

*Note 1:* Only credit transfers debited from payers' accounts are included.

*Note 2:* Payments by Bank of Slovenia as payment service provider for non-MFI subjects are also included from 2011 on.

## Table 2.11 Credit Transfers

**A paper-based order** is a payment instrument related to a credit or debit transfer, in which the payer submits an order on a paper-based form. In case of credit transfer it means any instruction by an account holder to his payment service provider requesting the transfer of funds from his account to another account (also between accounts of the same account holder). Includes submissions by telefax if they require manual intervention in order to be transformed into electronic payments.

**Special payment order** is a special form of paper-based payment order, which is issued by a payee (beneficiary) to be paid by the debtor. The special payment order is presented by the payer at the bank, which then debits his transaction account and transfers the amount to the account of the payee, potentially via several other credit institutions as intermediaries and/or one or more payment and settlement systems. A contemporary form can assure automated processing with ICR technology (Intelligent Character Recognition) or classic manual processing.

**A non-paper-based credit transfer** is any credit transfer which the payer submits without the use of paper forms i.e. electronically. Includes submissions by telefax or other means if they are transformed into electronic payments without manual intervention.

**A standing order** is a non-paper-based credit transfer and means an instruction from a payer to his bank to make a regular payment of a fixed amount to a named creditor. The payer authorises his bank (the bank at which he maintains a transaction account) to pay a specified amount regularly to another account. The payment must be repeated at least five times. The execution of payments occurs under exact conditions on a particular day of the month.

**Direct credit** is special form of payment instrument related to a credit transfer, initiated by the payer, which enables a cashless fund transfer from payer to payee. Direct credit is used for the execution of small value payments, e.g., salaries, pensions, dividends and similar payments, to a large number of creditors.

## Table 2.12 Debit Transfers

**Direct debit** is an authorised debit on the payer's bank account initiated by the payee. It is a payment instrument consisting of automatic debiting of the debtor's account for goods and services delivered by the creditor. The debtor (payer) authorises his bank to transfer funds from his bank account to the creditor's account and the creditor to submit a payment order to the creditor's bank to be paid. A typical example is an electricity bill payment.

*Note 1:* A special money order was used until the end of 2009. Special money order was a standardised paper-based debit instrument used to remit money to the named payee. A special money order was issued by a bank, allowing the individual named on the order form to receive a specified amount of cash on demand.

## Table 2.13: Network of Commercial Banks

*Note 1:* Statistical regions, source: Statistical Office of the Republic of Slovenia, 31 March 2000. Map of Slovenia by Geodetic Institute of Slovenia

*Note 2:* Data referring to the Post Bank of Slovenia do not include units of the Post of Slovenia that operate for the Post Bank of Slovenia on a contractual basis.

### 3. BALANCE OF PAYMENTS AND EXTERNAL POSITION

#### Balance of Payments

##### General notes

In most respects the Slovenian Balance of Payments (BOP) conforms to the methodology of the IMF's Balance of Payments Manual, fifth edition (1993).

##### Characteristics of the Data

Minus sign (-) indicates imports or surplus of imports over exports in the current account, increase in assets or decrease in liabilities in the capital and financial accounts, and growth of reserve assets.

Data on transactions are converted from the original currencies to EUR using the daily Bank of Slovenia or ECB's exchange rates, or average exchange rates for the period if the exact date of transaction is not known.

##### Revision policy

Revision of balance of payments, the international investment position and gross external debt data occur as follows:

- Revisions in monthly data are published with the release of:
  - the following month's data;
  - the corresponding quarterly data;
  - the corresponding revised quarterly data;
  - the international investment position and external debt data for the corresponding year; and
  - the revised international investment position and external debt data for the corresponding year.
- Revisions in quarterly data are published with the release of:
  - the following month's data;
  - the data on the following quarter;
  - the international investment position and external debt data for the corresponding year; and
  - the revised international investment position and external debt data for the corresponding year
- Revisions for the annual balance of payments, international investment position and external debt data are published with the release of the data for the following years.

Annual data are revised for the year t-1 and t-2. In the case of major methodological changes or discrepancies among the data sources, data for the year t-3 will be revised as well.

##### Data sources

**The external trade statistics (Statistical Office of the Republic of Slovenia)** is the main source of data on trade in goods. Since 1 May 2004, the source of data on trade in goods among Slovenia and EU Member States is the **Intrastat reporting**. The source of data on trade in goods with other countries is the single administrative document (**Extrastat reporting**).

##### Reports on account balances and transactions between residents and non-residents (C, PPT, PPV):

- report on account balances at domestic banks – PPV (until 31 December 2004),
- report on account balances abroad – C (until 31 December 2006),
- report on transactions through accounts at domestic banks – PPT (until 31 December 2008),
- report on transactions through accounts abroad – C (until 31 December 2008).

All banks which conducted international payment transactions and all residents with open accounts abroad were obliged to report. The resident issuer/beneficiary of the payment was obliged to forward data on the type of transaction. Since 2009 only banks which conduct international payment transactions report transactions with nonresidents that exceed threshold EUR 50.000. Data are used for quality control purposes only.

**Reports on trade in services, part of trade in goods and on current/capital transfers with nonresidents (BST)** are the sources of data on services (excl. travel), data on coverage adjustments of goods item and data on current and capital transfers (excl. transfers with EU budget) from 2008 onwards.

**Reports on transactions with securities (VRP) and data from the Securities Clearing Corporation (KDD)** are the sources of portfolio investments (debt and equity securities) and financial derivatives since 2004.

**Reports on purchased/sold foreign debt securities without domestic brokers (DVP)** are the sources of portfolio investments in foreign debt securities, carried out without domestic brokers, from 2007 onwards.

**Data regarding drawn/un-drawn credit transactions from foreign credit registration forms (KR)** are the source of data on loans of all sectors until 2004; in 2005 and 2006 they are only the source for the non-banking sector. A registration was obligatory for all financial credits and long-term commercial credits; since 1997 from the same source are also obta-

ined the data on the purpose of direct payments of foreign lenders, used to settle the obligations of domestic borrowers to other non-residents.

**Reports on monetary financial institutions (PORFI)** are the source for data on loans, cash and deposits of the banking sector since 2005.

**Reports on credits received and granted and deposits with non-residents (KRD)** are the source for data regarding loans and deposit of all sectors, except banks, since 2007.

**Reports on short-term receivables and liabilities from operations with non-residents (SKV)** are the source for short-term trade credits and advances since 2002.

**Reports on investments (SN)** are until 2007 the source for reinvested earnings of direct investments. From 2008 onwards these reports are source also for all other direct investment transactions in equity and related income as well as for portfolio equity transactions without involvement of domestic dealers.

**Report on Modern Payment Instruments (SPI)** for data on acquisition of fuel by nonresident transport operators at Slovene petrol stations settled via payment cards of foreign issuers from 2008 onwards.

#### Accounting data of the Bank of Slovenia

##### Accounting data of banks (KNB)

**Budget data on the transactions of government sector between the Republic of Slovenia and EU** (from 2004 onwards)

**Quarterly data on financial account's statistics** are source for financial derivatives for all sectors except the central bank (since 2007).

##### Estimates and other sources

- estimate of purchases of foreign currency and cheques from foreigners in exchange offices (part of the travel category) - until 2004,
- estimate of expenditures on travel abroad including purchases of goods abroad - until 2004
- estimate of Italian pensions (IMAD) until the end of 1998,
- estimate of transactions with foreign currencies and the deposits of Slovene households (until 2006),
- estimate of labour income (SORS),
- data on pensions paid to non-residents (ZPIZ),
- survey on the write-downs of debt from trade in goods and services abroad,
- estimates for exports and imports of travel - from 2005 onwards (detailed explanation under item Travel),
- estimate of cash transactions on tourism and labour income (from 2007 onwards),
- quarterly data on consumption of foreign embassies in Slovenia (SORS, from 2008 onwards),
- migrants' transfers - outflows (bilateral data between countries, from 2008 onwards),
- households' transfers (SORS, from 2008 onwards),
- assets acquired directly by tenders and programmes of EU (SORS, from 2008 onwards),
- data on nonresidents' investments in real-estate in Slovenia (GURS, from 2008 onwards),
- data on purchases/sales of real-estate in Croatia (Croatian National Bank, from 2008 onwards),
- data on direct investment of Slovene households in the form of real estate abroad (main data source Household Budget Survey, SORS)
- data on purchases/sales of emission allowances between residents and nonresidents (Slovenian Environment Agency, from 2008 onwards until 2011, From 2012 onwards data is collected by BST monthly report).

## Current account

### Goods

Data regarding general goods can be obtained from the Statistical Office of the Republic of Slovenia. Prior to Slovenia's accession to the EU data were available from standard customs documents. Since 1 May 2004, data are available from single administrative documents for trade in goods with non-EU countries and from Intrastat reports for trade with EU Member States.

**Adjustments of CIF/FOB** – data on import by CIF value were adjusted to FOB value with the help of a coefficient which is equal to the weighted average of coefficients between CIF and FOB values of the goods imported (in an available sample), separated with regard to type of goods, type of transport and partner's country. For 2004, a new CIF/FOB coefficient was calculated (1.0306); prior to that the coefficient was 1.0393. Since 2004 on, the coefficient is calculated every year based on a five year average.

**Coverage adjustments** - made for goods exported and imported without customs declarations (the ITRS source until 2007, the reports of duty free shops and consignment warehouses until 2005, BST reports as source from 2008 onwards). Since 1 May 2004, coverage adjustments also include estimated data on imports of motor vehicles from EU by natural persons not covered by Intrastat System.

## Services

### Transport

Transportation services are classified according to mode of transport and furthermore according to what is carried. The source of records on transportation services is the ITRS until 2007 and BST reports from 2008 onwards.

#### Travel - methodology until 2004

The ITRS sources used in the compilation of the "Incoming travel" category include: a.) health- and education-related services; b.) payments made by non-residents to Slovenian tourist agencies; c.) net withdrawals in tolar from non-resident accounts; d.) money spent in casinos by non-residents; e.) data on sales of goods to non-residents in duty-free shops and consignment warehouses; f.) payments with credit cards; and g.) sales of tolar to non-residents abroad. The data on sales of tolar to non-residents in Slovenia are estimated based on the number of border crossings by foreign travellers and on the number of nights spent in the country by foreign tourists. Data for the category "Expenditure on travel" come from the ITRS and estimations.

#### Travel - methodology since 2005 onwards

**Main data** sources to estimate the **export** of travel are the following surveys and researches conducted by Statistical Office of the Republic of Slovenia (SORS):

- Survey on foreign tourists in summer season is used to define the structure of foreign tourists according to their primary aim of travel (business travel, health care, education, other) and expenditures of each type of foreign tourists ; three-year's survey -last conducted in 2009)
- Survey on foreign travelers (to define the structure of travelers broken down by same-day travelers and transit travelers and their respective expenditures).
- Arrivals and over-night stays of foreign tourists broken down by countries of their residency (monthly survey).
- Number of border crossings (to define the population of foreigners entering Slovenia).

Based on data sources the following six categories of data are calculated and finally broken down by countries using data on mobile phone operators;

- Business travel,
- Health - related travel,
- Education,
- Other,
- Same- day travelers,
- Transit travelers.

**Main data** source to estimate the **import** of travel is SORS's survey TU\_ČAP (Quarterly survey on travel of domestic citizens). The Survey provides the value of expenditures of domestic population traveling abroad (same - day trips and longer trips) and the amount spent for transportation to and from the foreign destination, which is then subtracted from total expenditures in order to avoid double counting (since it is already included in transport services).

Based on TU\_ČAP data source the following five categories of data are calculated and finally broken down by countries using data on mobile phone operators;

- Business travel,
- Health - related travel,
- Education,
- Other,
- Same - day travelers.

### Construction services

The source of data is the ITRS until 2007, all construction undertakings are recorded under construction services on net basis (the revenues earned on works performed abroad are recorded net of the corresponding expenditures). From 2008 onwards the sources of data on construction services are BST reports.

### Insurance services

Premiums on life and non-life insurance are split into two components: (i) the service charge included in insurance services; and (ii) the premium in a narrow sense, recorded as a current transfer. The calculation of the service charge is based on a fixed percentage of premium payments. The source of data on insurance services is ITRS until 2007, this source was replaced by BST reports for 2008 data onwards. Insurance services include commissions of insurance companies and 45 % of premium payments. Insurance claims and other part of nonlife insurance premiums are included in current transfers, claims and part of life insurance premiums represent assets/liabilities of financial account.

### Government services

All transactions settled through the accounts of Slovenian embassies abroad, as well as transactions coded as government services settled through the accounts of Slovenian banks with foreign correspondents, are included in this item until 2007 with the ITRS as the source of data. From 2008 onwards the source of data is BST report, government services include all services of slovenian representative bodies abroad. From the same year there are included data on consumption of foreign embassies in Slovenia. Data are provided by SORS (on the basis of taxation data).

Also for all other types of services the ITRS source has been discontinued as of 2008, when the new source (BST report) for data on trade in services (excl. travel) has been introduced.

## Income

**Labour income – receipts.** Since 2002, data from the Labour Force Survey (SORS) and Eurostat data have replaced ITRS and estimates as sources of labour income for the work of Slovene residents abroad.

**Labour income - expenditures.** ITRS is the source for labour income - expenditures until 2004. Data relating to 2005 onwards are provided by SORS on the basis of Labour Office register for the number of nonresidents, who at the end of each quarter possess valid work permits and who actually worked in Slovenia less than one year and data by The Health Insurance Institute of Slovenia for nonresidents, who at the end of each quarter don't need valid work permits and who actually worked in Slovenia less than one year. Data on daily migrant workers from Austria, Italy, Hungary and Croatia are also included.

Since 2002, labour income (receipts and expenditures) is included according to the gross principle (including taxes and social contributions).

**Capital income** – Since 2004, VRP reports have replaced ITRS as a source for income from equity securities. Annual reports on capital investments are the source for data regarding reinvested earnings. Data on reinvested earnings in the current year are estimated - (a three year monthly average of actual data on total earnings, less extraordinary incomes [the source being annual reports on investments], is decreased by dividends and other incomes, paid in the current month (the source being monthly reports on investments from 1.1.2008 onwards, previously the source was ITRS). The estimate is replaced by actual data only when these data are available. Data on disproportionately large exceptional payments of profits relative to the recent level of dividends and earnings (superdividends) are excluded from income and included in direct investment as withdrawals of equity (from 2008 onwards). Until 2003, the source of income from debt securities was ITRS; since 2004 the sources are reports on securities transactions (VRP reports) and KDD data. Until 2004, the source on income from other investments was ITRS for the banking sector; the source was later changed to reports on monetary financial institutions (PORFI). Until 2006, the source on income from other investments for the non-banking sector was ITRS; since 2007, the source is KDD reports. Income from loans (including long-term commercial credits) and cash reserves have been managed according to the accrual principle since 2002; since 2007, total income from other investments is managed according to the same principle. Since 2004, the accrual principle is used for income from bonds and notes.

### Current transfers

Current transfers of other sectors are subdivided into workers' remittances, insurance and other transfers. Current transfers of the government sector and other transfers of other sectors are from 2002 onwards subdivided into taxes, subsidies, social contributions, social benefits and other transfers. The main data sources are the ITRS and estimates until 2007, from 2008 onwards the sources are BST reports and from 2004 onwards, data on EU transfers of the government sector are obtained directly from the Ministry of Finance (budget data). Migrants' transfers - outflows (data provided by foreign central banks) and transfers of households (SORS survey) are included from 2008 onwards.

## Capital and financial account

### Capital account

#### Capital transfers

The ITRS is the source of data until 2007. Migrants' transfers cover not only payments recorded by domestic banks, but also the changes in residency of accounts held with these banks. From 2008 onwards data are obtained from BST reports, but data on capital transfers between the Republic of Slovenia and the EU are from 2004 onwards obtained directly from the Ministry of Finance (budget data). Since 2002, the Bank of Slovenia also estimates the value of write-downs of debt from trade in goods and services abroad. From 2008 onwards, there are also included data on assets acquired directly by tenders and programmes of EU (SORS, Annual survey on investment in tangible assets).

### Financial account

#### Direct investment

Direct investment is until 2007 recorded on the basis of reported payments through domestic banks and data from customs declarations, from 2008 the source is direct monthly report SN. Data on reinvested earnings are based on yearly surveys on balance and transactions with affiliated enterprises (SN) and are included monthly as one-twelfth of the yearly figure. Data regarding reinvested earnings for the current year are estimated. Until 1997, the purchase and sale of all shares and equity were included in this item. Data on disproportionately large exceptional payments of profits relative to the recent level of dividends and earnings (superdividends) are included in direct investment as withdrawals of equity (from 2008 onwards). From 2007 onwards, data on foreign direct investments of households in the form of real estate are included.

From the beginning of 1997, purchase and sale of shares that assure more than 50 percent of a company's equity (a controlling interest of shares) and shares issued by domestic companies on the primary markets with the purpose of increasing the nominal capital of the company are included in this item, due to capital control measures. With the new Foreign Exchange Act in 1999, the 10% rule is applied to direct investment. Data of Surveying and Mapping Authority of the Republic of Slovenia on nonresidents' investments in real-estate in Slovenia are included from 2008 onwards. From the same year data on Slovenian residents' purchases/sales of real-estate in Croatia are included (data source is Croatian National Bank).

Since 2001, there is a break in the data series in the category »Direct Investments - Other Capital«. Since that time, loans and long-term commercial credits between affiliated companies (10% or more of capital share) are included in this category. Until 2000, these types of transactions were included in the category »Other Investments«. Since 2002, the category »Direct Investments - Other Capital« also includes short-term commercial credits between affiliated companies. Since 2005 other capital claims / liabilities does not include banking sector's claims/liabilities with direct investment relationship (these data are included in item other investment/loans).

#### Portfolio investment

Transactions are divided into assets and liabilities, with further breakdown into equity and debt portfolio investment. Until 1997 only data on sales and purchases of debt securities through banks were included in this item. Since February 1997 the equity securities with the exception of direct investment are included in this item too. With the new Foreign Exchange Act in 1999, portfolio investment transactions include all transactions below the 10% rule. Equity portfolio investment to individual sectors is subdivided into mutual funds and other investment. VRP and KDD data are the main sources from 2004 onwards. Since 2007 on this item includes also assets of debt portfolio instruments held by Bank of Slovenia, which are no longer considered as international reserves, but as claims to EMU member states and claims in EUR currency to all other nonresidents. From 2007 onwards data on transactions in assets of foreign debt instruments that occur without involvement of domestic dealers are collected on a report DVP, and from 2008 onwards assets and liabilities in portfolio equity investments deriving from transactions without involvement of domestic dealers are collected on report SN.

#### Financial derivatives

From 2004 until 2006 these types of transactions are included in VRP and KDD sources. Since 2007 quarterly data on financial account's statistics are source for financial derivatives for all sectors except the central bank. From 2009 onwards financial derivatives of Bank of Slovenia are included in other investment/financial derivatives item or international monetary reserves item (depending on the residency of the counterpart).

#### Other investments

##### Short-term trade credits

Until 2002, short-term trade credits were estimated based on the following calculation:

- {(export of goods FOB + coverage adjustments - (export payments + free export of goods + direct investments in goods + drawings of granted long-term trade credits))}
- {(import of goods FOB + coverage adjustments - (import payments + free import of goods + direct investments in goods + drawings of received long-term trade credits))}

Since 2002, short-term commercial credits and advances are included based on SKV reports. Short-term trade credits between affiliated companies are included in direct investments.

##### Loans and long-term trade credits

From 2001 onwards, inter-company debt transactions between affiliated enterprises (10% or more capital share) are not recorded as loans, but are recorded as direct investment – other capital transactions. Loans (including long-term trade credits) and related income have been calculated according to the accrual principle from 2002 onwards, and according to the cash principle prior to 2002. From 2005 onwards claims/liabilities of banking sector regardless of capital affiliation to nonresidents are included in this item (the direct investment relationships are not distinguished in the data source).

##### Currency and deposits

Until the adoption of Euro currency (1.1.2007) the foreign currency of residents is estimated based on the following formula:

deposited currency and cheques on foreign currency accounts of individuals - withdrawals of cash and cheques from foreign currency accounts of individuals + the estimated net purchase of foreign currency by residents + estimated expenditures for tourist travel abroad + estimated expenditures of tourist travel to the former Yugoslavia + the estimated purchase of goods abroad - estimated labour expenditures abroad - estimated Italian pensions (until the end of 1998) + net withdrawals from non-resident accounts in local currency + the change of deposit balances of residents on accounts at BIS Member State banks (before 2002).

From the adoption of Euro currency (1.1.2007) onwards item foreign currency of households is estimated by using data on net inflows of foreign currency from tourism, data on net income on compensation of employees (decreased by consumption abroad/in the economy) and BIS (Bank for International Settlements) data on deposits held by residents with the banks abroad.

Since 2002, the category "Accounts Abroad of Other Sectors" also includes BIS data regarding deposits of residents on accounts at BIS Member State banks.

With adoption of EUR in 2007 as a national currency Slovenia became a member of EMU which affects the following changes in currency and deposits item;

- the item currency and deposits/ claims includes also estimated counterpart of the transactions in cash in current account of the balance of payments (tourism and labour income),
- claims of the Bank of Slovenia to EMU member states and all claims in EUR currency to all other states are included in the item currency and deposits/ claims.
- net position of the Bank of Slovenia to the Eurosystem (net result of incoming and outgoing payments conducted in EUR currency through TARGET and STEP2 system) is included in the item currency and deposits/ other liabilities.

##### International monetary reserves

Reserve assets and related income have been calculated according to the accrual principle from 2002 onwards, and according to the cash principle prior to 2002.

Following Slovenia's entry to the EMU in 2007, claims to other residents of the euro area (denominated in euros and in other currencies) and claims in euros to EMU non-residents are not included in reserve holdings. From 2007 onwards, these transactions are shown in the appropriate categories of the capital and financial account sector of the Bank of Slovenia (investments in securities and other investments).

International monetary reserves item includes also financial derivatives (from 2009 onwards).

### Table 3.1: Balance of Payments 1988–1993

The balance of payments is based on the methodology of the International Monetary Fund (Balance of Payments Manual, IMF, 1993). The balance of payments for the period 1998 - 1991 does not include transactions with republics of the former Yugoslavia. The import and export of goods is shown without processing transactions, processing is included in services.

*Note 1:* For 1988 and 1989, official sector data is included in "Other sectors".

*Note 2:* For 1988 through 1990, "Statistical errors" include sales of claims from bilateral agreements to the former National Bank of Yugoslavia and its purchases of foreign currency through Slovenian foreign currency exchange offices.

*Note 3:* Reserve assets of the Bank of Slovenia.

### Table 3.2: Balance of Payments

The data for the current year are revised monthly. Data become final according to the revision practice (see revision practice).

In June 2001, Slovenia acquired a 16.39% share in the holdings of the former Yugoslavia with the Bank for International Settlements (BIS), consisting of gold SIT 16.9 mio (EUR 77.8 million), foreign currencies SIT 1.1 mio SIT (EUR 5.3 million) and shares SIT 3.0 mio (EUR 13.8 million). This transaction is not considered to be a flow of the balance of payments, but rather a part of the "Other changes" category, which reconciles the international investment position in consecutive periods.

\* Years 1994 in 1995: Data for balance of payments in ECU for years 1994 and 1995 are not obtained in the same manner as data for other years. The data for merchandise trade are converted from US dollar to ECU using average monthly exchange rates. The data for merchandise trade in Euros or ECU since 1996 are computed from values in original currencies using daily exchange rates for Euro or ECU.

*Note 1:* Exports and imports of goods - f.o.b. parity

*Note 2:* June 1996: Includes the issue of government bonds in exchange for a part of allocated foreign debt in the amount of SIT 63.7 mio (EUR 374.9 million). Banks' liabilities under foreign loans are decreased for the same amount and transferred to "Liabilities to government".

*Note 3:* Issues of eurobonds:

- August 1996 (EUR 253.7 million)
- June 1997 (EUR 205.1 million)
- May 1998 (EUR 500.0 million)
- March 1999 (EUR 400.0 million)
- March 2000 (EUR 400.0 million)
- February 2001 (EUR 100.0 million)
- April 2001 (EUR 450.0 million)
- October 2012 (USD 2250.0 million)

Issues of government bonds since 2007:

- March 2007, SLOVEN4 (EUR 1000.0 million)
- February 2008, RS63 (EUR 1000.0 million)
- February 2009, RS64 (EUR 1000.0 million)
- March 2009, RS65 (EUR 1500.0 million)
- September 2009, RS66 (EUR 1500.0 million)
- January 2010, RS67 (EUR 1500.0 million)
- March 2010, RS68 (EUR 1000.0 million)
- January 2011, RS69 (EUR 1000.0 million)
- March 2011, RS70 (EUR 1000.0 million)

*Note 4:* For 1993–2001, short-term claims include net changes in commercial credits (received and granted). From 2002 onwards, short-term commercial credits are included on the basis of SKV reports on the assets and liabilities side of the balance of payments. Short-term commercial credits between affiliated enterprises are included under the heading "Direct investments", while other commercial credits are included in "Other investments/trade credits".

*Note 5:* Includes mostly Bank of Slovenia fiduciary accounts. In June 1996 the amount of 21.2 mio SIT (EUR 124.9 million) was transferred to regular Bank of Slovenia reserve accounts.

*Note 6:* Use of IMF credit (assumed upon membership in January 1993).

*Note 7:* Reserve assets of the Bank of Slovenia. Following Slovenia's entry to the EMU in 2007, claims to other residents of the euro area (denominated in euros and other currencies) and claims in euros to EMU non-residents are not included in reserve holdings. From 2007 onwards, these transactions are shown in the appropriate categories of the capital and financial account sector of the Bank of Slovenia (investments in securities and other investments). More explanation is available in: "The statistical treatment of the international monetary reserves at the entry of Slovenia to the euro area" (slovenian), in the chapter Methodological information on the internet page: <http://www.bsi.si/en/financial-data.asp?Mapald=64>.

*Note 8:* The data on reinvested earnings for 2012 are not yet available. Therefore, the balance of payments includes an estimate (from the three year monthly average for the period 2009 to 2011 of actual data on total earnings less extraordinary incomes [the source being annual reports on investments], less dividends and other incomes paid in the current month).

In 2013, the estimate will be replaced with actual data on reinvestment of earnings; the estimate for 2013 shall take into consideration the new three year average (2010 to 2012).

*Note 9:* From 2001 onwards, there is a time series break in the categories "Direct investment" and "Loans". From 2001, inter-company debt transactions between affiliated enterprises (10% or more capital share) are included in the "Direct investment" category; before that they were included under the heading "Loans". Since 2002, the category "Direct investments" also includes short-term trade credits between affiliated enterprises.

*Note 10:* Transfers from the EU budget since 2004 have been recorded as either current or capital transfers, according to the nature of their use. Data are provided by the Ministry of Finance.

*Note 11:* In the balance of payment of Slovenia to the EMU the presentation of the category net of errors and omissions does not make sense.

### Tables 3.3 and 3.4: Current account and capital and financial account by countries

The tables show the main categories of current and capital and financial account of the balance of payments, by countries, for the last available year. The most important countries and/or groups of countries are shown.

### Table 3.5.: Trade in goods by countries

The data source is the Statistical Office of the Republic of Slovenia (external trade statistics). Import is valued at FOB parity; export is valued at CIF parity.

## International Investment Position of Slovenia

### General notes

The international investment position is the balance sheet of the stock of external financial assets and liabilities. The financial items that constitute the position consist of claims on non-residents, liabilities to non-residents, monetary gold and SDRs.

The methodology of the international investment position (IIP) of Slovenia is based on the fifth edition of the Balance of Payments Manual, IMF, 1993. The manual distinguishes four sectors – monetary authorities, general government, banks and other sectors.

The structure of the statement is similar to the balance of payments (financial account): here as well are holdings and liabilities, first classified by instruments, followed by sectors and finally by maturity. The change to the balance of holdings and liabilities in a specific period is the result of transactions or flows shown in the balance of payments and also exchange rate changes, price changes and other changes.

### Revision policy

See note "Revision policy" in the section "Balance of Payments".

### Data sources

Data sources for the international investment position of Slovenia are mainly the same as those for the financial account of the balance of payments.

### Direct investment

Data on direct investment are collected from:

- concessional surveys on equity investment (SN),
- reports on loans granted to or received from non-residents (KR) - until 2006,
- reports on accounts abroad (C) - until 2006,
- short-term commercial credits with non-residents (SKV), and
- assets and liabilities in loans and deposits to nonresidents (KRD) for non-bank sectors since 2007.

In accordance with the recommendations of the IMF, this item comprises investment where the direct investor owns 10% or more of ordinary shares or voting power. Equity shares are until 2006 valued at book value according to accounting standards. From 2007 the equity of listed companies is recorded according to market value and equity of unlisted companies is recorded according to book value in line with accounting standards. Reinvested earnings are included. Data of Surveying and Mapping Authority of the Republic of Slovenia on nonresidents' investments in real-estate in Slovenia are included from 2008 onwards. From 2007 data on foreign direct investment of households in the form of real estate are included.

Claims on and liabilities to affiliated enterprises are included in the category "Direct investment–other capital". Intercompany claims or liabilities between affiliated banks and affiliated financial intermediaries recorded under direct investment capital are limited to those associated with permanent debt (loan capital representing a permanent interest). Until 2000, all long-term intercompany claims were considered liabilities between affiliated banks, and affiliated financial intermediaries were included in this item as well as permanent debt. From 2005 onwards other capital item of direct investment does not include claims/liabilities of banking sector to affiliated enterprises (those data are included in item other investment/ loans).

Data on claims and liabilities of Slovene enterprises in indirectly-affiliated enterprises from 1996 onwards are included in the category "Direct investment abroad" (in cases where an enterprise abroad having Slovene direct investment holds 10% or more equity in another foreign enterprise). In the category "Direct investment in Slovenia", data on the investment

of foreign enterprises in indirectly-affiliated enterprises in Slovenia are included (in the case that a Slovene enterprise with foreign direct investment holds 10% or more equity in another Slovene enterprise). From 2007 all claims and liabilities to foreign direct investors/ direct investment enterprise and fellow companies that belong to the same foreign direct investor / direct investment enterprise are included.

#### **Portfolio investment**

Until 2002, data on equity securities and other equity shares were available from enterprises' surveys (form SN), but only data from surveys where the direct investor owns less than 10% of ordinary shares or voting power are included. (In the balance of payments, transactions with equity securities and other shares are collected from the ITRS [see note to tables 3.1–3.4] /Capital and financial account/Portfolio investment.) From 2007 data on equity shares below 10% that are traded without involvement of domestic dealers are collected (report SN). From 2003 onwards, data from the reports VRP (operations in securities reported by brokerage houses, banks and investment companies) and KDD (Central Securities Clearing Corporation) are included. Also data on investments in mutual funds and investments of households in other equity securities are available since 2003. From 2007 data on assets of foreign debt securities that are traded without involvement of domestic dealers are collected (report DVP).

Data on residents' holdings of debt securities are available from VRP direct reports.

Liabilities of debt securities of the government, banking and other sectors are available from credit registration and Central Securities Clearing Corporation data (KDD). For domestic securities issued abroad, the source is VRP reports.

#### **Financial derivatives**

From 2004 until 2006 these data are included in VRP and KDD sources. Since 2007 quarterly data on financial account's statistics are source for financial derivatives for all sectors except the central bank. From 2009 onwards financial derivatives of Bank of Slovenia are included in other investment/financial derivatives item or international monetary reserves item (depending on the residency of the counterpart).

#### **Trade credits and loans**

The source for short-term trade credits is a report of enterprises on the stock of external assets and liabilities (form SKV).

Until 2006 sources for long-term trade credits and loans are credit registration forms (forms KR) and from 2007 onwards statistical reports on assets and liabilities in loans and deposits to nonresidents for non-bank sectors (forms KRD) and are the same for the international investment position and the balance of payments. Until 2000, the balance of payments did not distinguish loans between affiliated companies from loans between unaffiliated companies and included all loans in other investment items. From 2005 onwards monetary statistics (PORFI) is the source for banking sector data (claims and liabilities are included regardless of direct investment affiliation).

#### **Currency and deposits, other assets, other liabilities and reserve assets**

For these categories, the sources largely coincide with the sources for the balance of payments:

- the accounting data of commercial banks (KNB) - until 2004,
- the account balances of banks in original currencies (PPV) - until 2004,
- the account balances abroad of companies (C) - until 2006,
- assets and liabilities in loans and deposits to nonresidents (KRD) for non-bank sectors since 2007
- the source for banking sector data (PORFI) - since 2005,
- the accounts of the Bank of Slovenia.

In the International Investment Position, mature, unpaid loans and long-term commercial credits are included in other holdings and liabilities as short-term items. These transactions are not included in the balance of payments.

Until 2002, there is a difference between the International Investment Position and the balance of payments for other liabilities and holdings of other sectors, where contractual joint ventures are shown in the investment position. The source for this item is a JV report.

The International Investment Position includes data of the Bank for International Settlements (BIS) on deposits of local residents at BIS Member State banks. Since 2001, an estimate of the balance of foreign currency held by households is also included. However, any further investments of foreign currencies (primarily investments in real estate abroad and foreign securities, without domestic brokers) are not excluded from this estimate, since data of this type are not available. From 2007 onwards, the level of foreign currency holdings of domestic household sector equals the level that was reached at the end of the year 2006 (2.948,6 EUR million), when Slovenia joined the European Monetary Union.

Net position of the Bank of Slovenia to the Eurosystem (net result of incoming and outgoing payments conducted in EUR currency through TARGET and STEP2 system) is also included in the item liabilities/currency and deposits.

### **Table 3.6: International Investment Position of Slovenia**

IIP data do not include:

- data on direct investment of Slovenian households. From 2007 onwards only estimation of the value of real estate direct investment abroad by Slovenian household sector is included,
- claims on other countries in the territory of the former Socialist Federal Republic of Yugoslavia, subject to negotiations on succession (except the part reported by the Fund of the Republic of Slovenia for Succession from 2001 onwards), expropriated assets in these territories and other assets transferred to the Slovenian government during the process of privatization. In December 2006 claims subject to succession to former Yugoslavia were revalued and 'Skld RS za sukcesijo' was transformed into 'Javna Agencija Republike Slovenije za nasledstvo'.

Additional data on direct investment are available in a special publication of the Bank of Slovenia: "Neposredne naložbe – Direct Investment", and on the Bank of Slovenia Web site: [http://www.bsi.si/iskalniki/ecb\\_en.asp?Mapald=714](http://www.bsi.si/iskalniki/ecb_en.asp?Mapald=714).

**Table 3.7: International Investment Position by countries**

The table includes data for the last available year by countries in which Slovenes invest (in holdings) and includes data from which countries foreigners invest in Slovenia (in liabilities). The most important countries and/or groups of countries are shown.

**Gross External Debt****General notes**

The methodology is based on External Debt Statistics: Guide for Compilers and Users, IMF, 2003. The guide is available at the following Web address: <http://www.imf.org/external/pubs/ft/eds/Eng/Guide/index.htm>.

**Revision policy**

See note "Revision policy" in the section "Balance of Payments".

**Data sources**

In order to maintain consistency, the data sources are the same as those for the International Investment Position. The sources for equities, financial derivatives and monetary gold are not used because these types of instruments are not included in the balance of external debt according to the IMF definition.

**Tables 3.8 and 3.9: Net External Debt**

The tables present gross external debt, gross external assets in debt instruments, and net debt position. The data are the same as presented in the international investment position (IIP). In the table »Net External Debt«, data are sorted by sectors, maturities and instruments; in the table »International Investment Position«, data are sorted by instrument, sectors and maturities.

**Tables 3.10 and 3.11: Gross External Debt**

Gross external debt, at any given data, is the outstanding amount of those current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and are owed to non-residents by residents of an economy. The types of financial instruments included in the presentation of the gross external debt position are as follows: debt securities (money market instruments, bonds and notes), trade credits (short- and long-term), loans (short- and long-term), cash, deposits and other debt liabilities. Maturity of debt liabilities is based on the formal criterion of original maturity. Long-term debt is defined as debt with an original maturity of more than one year or with no maturity stated. Short-term debt, which includes cash, is debt repayable at notice or with an original maturity of one year or less.

**International reserves****Table 3.12.: International reserves**

Until December 2006, the Bank of Slovenia's foreign exchange reserves included convertible foreign currencies, deposits abroad and first-class securities of foreign issuers. From 1 January 2007, the Bank of Slovenia's foreign exchange reserves include convertible foreign currencies, deposits in foreign currencies outside the euro area and first-class securities in foreign currencies of issuers outside the euro area. The decline of value presented in the data is due to Slovenia's inclusion in the EMU.

Since 2009 foreign exchange reserves of the Bank of Slovenia include also positions on financial derivatives based on daily pricing of these instruments. The value of financial derivatives may also be negative.

**4. PUBLIC FINANCE****General**

Data prior to 2007 are published in tolar; from 2007, data are published in euros. Quarterly and yearly data on Gross domestic product are not yet reconciled.

**General - methodology ESA 95**

Non-financial and financial data are prepared in compliance with the European System of Accounts from the year 1995 (ESA 95). This methodology was adopted by Council Regulation (EC) No. 2223/96 of 25 June on the European System of Accounts in the Community. ESA 95 methodology is the central economic methodology of each EU member state and therefore ensures comparability of data. Data on non-financial accounts of general government are prepared by the Statistical Office of the Republic of Slovenia. In accordance with a memorandum of understanding between the Ministry of Finance, the Bank of Slovenia and the Statistical Office of the Republic of Slovenia, the data on financial accounts are

compiled by the Bank of Slovenia. The data on financial accounts are consolidated.

#### **Table 4.1: Non-financial and Financial Accounts (ESA 95) of the General Government sector**

**EDP debt** is gross debt as defined in the Maastricht treaty. It comprises general government liabilities in the form of currency (coins), deposits, debt securities (securities other than shares and other equity) and loans only.

#### **Tables 4.2 and 4.3: Non-financial Account of the General Government sector**

**Fiscal burden** is a sum of the direct taxes, indirect taxes, social contributions and capital taxes.

**Intermediate consumption** consists of the value of the goods and services consumed as inputs by a process of production. The goods and services may be either transformed or used up by the production process.

#### **Tables 4.4 and 4.5: Financial Account of the General Government sector**

**Change in EDP debt** is a difference between the current and preceding EDP debt figure.

**Deficit-debt adjustment (DDA)** is a sum of the deficit/surplus of non-financial account and change in EDP debt. DDA can be also calculated as a sum of the difference between financial assets and liabilities (which are not included in EDP debt) and other flows.

**Other liabilities** consist of data, which are not included in the EDP debt: financial derivatives, shares and other equity, insurance technical reserves and other liabilities.

**Other flows** are sum of the statistical discrepancy (difference between deficit/surplus of non-financial and financial account) and changes of the debt which are not transactions (foreign exchange holding gains and losses, other valuation effects, other changes in volume of debt).

**Borrowing requirement** consists of a negative deficit/surplus of financial account plus financial assets minus financial liabilities.

#### **Table 4.6: Revenues and Expenditures of the General Government**

*Note 1:* The data of the current and previous year are revised monthly until the data on the previous year become final.

*Note 2:* Total revenue excludes receipts from the EU, and likewise, total expenditure excludes payments to the EU budget.

*Note 3:* Current expenditure also includes social security contributions (besides of the expenditures on goods and services, interest payments, current reserves and current transfers).

*Note 4:* On 1 October 2011, the Tax Administration of the Republic of Slovenia (DURS) introduced new information system and due to that, large number of recorded data on the tax and social security contribution revenues remained on unallocated fund accounts, while totals for those two categories were unaffected. We are publishing the data where certain categories of taxes and social security contributions were estimated by the Ministry of finance. The funds are expected to be correctly allocated already next month. Source: <http://www.mf.gov.si>

#### **Tables 4.7: Lending, Repayments and Financing of the General Government**

General government operations (consolidated state budget, local governments, pension fund and health insurance fund).

*Note 1:* The data of the current and previous year are revised monthly until the data on the previous year become final.

#### **Table 4.8: Central budget debt**

The Republic of Slovenia is defined as a legal person. The data from tables 4.6., 4.7. and 4.8. originate in the Bulletin of Government Finance published by the Ministry of Finance.

The obligation of the Central budget of Republic of Slovenia to Bank of Slovenia is due to settlement of the Special drawing rights of the International monetary fund by Bank of Slovenia as a fiscal agent, in line with the agreement between the Ministry of finance of Republic of Slovenia and Bank of Slovenia.

## **5. FINANCIAL ACCOUNTS**

### **Financial accounts (Tables 5.1 to 5.6)**

Tables 5.1, 5.2, 5.4 and 5.5 show stocks and transactions in financial assets and liabilities held by individual institutional

sectors, by individual financial instruments. The basis for the financial accounts methodology is ESA95.

**Tables 5.3 and 5.6** present net items by individual sectors. Net financial assets present difference between financial assets and liabilities (stocks). Net financial transactions present difference between transactions in financial assets and transactions in liabilities.

The general principle for stocks and transactions is valuation at the current market price. As a rule accrued interest is included in the instrument to which it relates (deposits, loans, securities).

The transactions represent the difference between increases (acquisitions) and decreases (disposals) or the net turnover in an individual financial instrument. Changes in market prices and exchange rates, and other changes (reallocations of financial instruments/sectors, changes in methodology, write-downs of claims/debts, etc.) are excluded from the transactions.

Sectors, according to SKIS, are used.

#### Financial instruments in financial accounts

Individual financial instruments are the same among assets and liabilities, except Monetary gold and SDRs which only appear in financial asset tables.

Monetary gold and SDRs represent financial assets of the central bank. No other institutional unit or sector shall show a liability from the above mentioned instruments.

Currency and deposits consists of three sub-categories of financial instruments:

- currency represents bank notes and coins normally used for payments and includes bank notes and coins in circulation and represents the liability of the unit which issued them (as a rule, the central bank). The category "Household Currency and NIPSH (non-profit institutions serving households)" includes the foreign currency of residents which is estimated based on net purchases.
- transferable deposits consist of sight deposits in domestic or foreign currency. Transferable deposits can be converted into currency or transferred by cheque, payment order, debit entry or the like, without significant restrictions or additional costs.
- other deposits consist of deposits that cannot be used to make payments at any time and are not convertible into currency or transferable deposits without significant restrictions or additional costs.

Securities, excluding shares, are comprised of the following:

- short-term debt securities (with an original maturity of up to one year bills and other short-term debt securities);
- long-term debt securities (with an original maturity of more than one year: bonds);
- financial derivatives (options, swaps, standardised futures, interest rate futures and warrants).

Loans consist of all types of loans created when creditors lend funds to debtors, either directly or through brokers, that are either evidenced by non-negotiable documents or not evidenced by documents. The initiative concerning a loan normally lies with the borrower. Loans also include loans for financing trade credits, financial leasing, repurchase agreements, and repayable margin payments related to financial instruments when these agreements and payments are liabilities of corporations that are not monetary financial institutions. Loans do not include trade credits or advances. Loans are broken down into short-term loans (with an original maturity of up to one year) and long-term loans (with an original maturity of more than one year).

Shares and other equities represent:

- Shares which are quoted (on a domestic or foreign market);
- Unquoted shares;
- Other equities;
- Shares/units of investment funds.

Shares/units of investment funds include shares of investment companies, investment coupons (referring to one or more units of mutual funds) and units of pension funds.

Insurance technical reserves comprise the insurance technical reserves of insurance corporations and pension funds against policyholders and beneficiaries, and are divided into three sub-categories of financial instruments.

Net equity of households in life insurance reserves including:

- net life insurance provisions;
- net provisions for life insurance policies where the investment risk is borne by the policyholders;
- net health insurance provisions.

Net equity of households in pension fund reserves consists of provisions deriving from pensions.

Prepayments of insurance premiums and reserves for outstanding claims represent net prepayments of insurance policies, net reserves for outstanding claims and other net insurance technical reserves.

Other assets and liabilities are broken down as follows:

- Commercial credits and advances;
- Other (other assets and liabilities, excluding commercial credits and advances).

Commercial credits and advances consist of financial claims or liabilities arising from the direct extension of credit by suppliers or buyers for goods and services transactions, and advance payments for work that is in progress or to be undertaken and associated with such transactions. Other (other assets and liabilities excluding commercial credits and advances) consists of all other claims and liabilities arising from timing differences between transactions and payments made in respect of taxes, social contributions, wages, rents, dividends, interest and transactions in financial assets on the secondary market. As a rule, accrued interest is included in the instrument to which it relates. However, should it be impossible to include the interest in the relevant instrument, it is disclosed in the category "Other".

Financial accounts data may differ from other statistical data because of:

- valuation method (current market value),
- data sources,
- time of data recording,
- time of data revision,
- methodological differences in financial instrument classification and
- other methodological differences.

Data for the period before the 1st of January 2007 are converted into EUR based on exchange rate 1 EUR = 239,64 SIT.

## 6. NON-FINANCIAL ACCOUNTS AND GENERAL ECONOMIC STATISTICS

### General notes

The Standard Classification of Activities is defined by the Decree on the Introduction and Use of the Standard Classification of Activities (Official Gazette of the Republic of Slovenia, No. 69/2007, 17/2008) and is in line with the classification of activities NACE Rev.2 (Nomenclature statistique des activités économiques dans la Communauté européenne) as a compulsory statistical standard of the European Union, which is directly connected to the international classification of the activities of United Nations ISIC Rev. 4 (International Standard Industrial Classification).

The basic activities of an economy are:

- A Agriculture, forestry and fishing
- B Mining and quarrying
- C Manufacturing
- D Electricity, gas steam and air conditioning supply
- E Water supply, sewerage, waste management and remediation activities
- F Construction
- G Wholesale and retail trade; repair of motor vehicles and motorcycles
- H Transportation and storage
- I Accommodation and food service
- J Information and communication
- K Financial and insurance activities
- L Real estate activities
- M Professional, scientific and technical activities
- N Administrative and support service activities
- O Public administration and defence, compulsory social security
- P Education
- Q Human health and social work activities
- R Arts, entertainment and recreation
- S Other service activities
- T Activities of private households as employers, undifferentiated goods- and services- production activities of households for own use
- U Activities of extraterritorial organizations and bodies

Methodological notes and a detailed classification for the real sector are published on the Statistical Office's Web site: [http://www.stat.si/skd\\_nace\\_2008.asp](http://www.stat.si/skd_nace_2008.asp) (in Slovene).

### General

Data prior to 2007 are published in tolar; from 2007, data are published in euros.

## Non-financial accounts and general economic statistics

### Tables 6.1 and 6.2: Expenditure of Gross Domestic Product

Real yearly growth rates are calculated from the GDP data in constant prices, reference year 2005.

### Tables 6.3 and 6.4: Gross Domestic Product by Activity

Real yearly growth rates are calculated from the GDP data in constant prices, reference year 2005.

### Tables 6.5 and 6.6: Industrial Production Index

For the period from January 1992 to January 2004, industrial production indices are calculated from quantitative data on the production of industrial products. From February 2004 onwards, the basis for calculating the production indices are data on the value of production.

**Tables 6.7 and 6.8: Turnover and New Orders in Industry**

Data for the year 2010 are provisional.

For the period from January 1998 to January 2003, indices on turnover are estimated on the basis of the monthly data on the quantity of sold industrial products and the average annual prices of industrial products. Data from February 2003 onwards are gathered with the regular monthly survey on turnover, new orders and value of stocks in industry.

Real yearly growth rates are calculated from the real index on turnover and new orders in industry. The deflator is the industrial producer prices index.

**Tables 6.9 and 6.10: Business Tendency and Consumer Surveys**

The sentiment indicator is the weighted average of the confidence indicator in manufacturing and retail trade, plus the consumer confidence indicator. Sentiment indicators of certain activities or consumers are calculated from answers shown in the table.

The results are shown as a balance by individual questions. The balance is the difference between positive and negative answers, expressed as percentages. The balance shows the movement of the observed economic indicator (present situation or future expectations), and not the real size of economic indicators.

**Table 6.11: Employment by Labour Force Survey (ILO)**

The Slovene Labour Force Survey was carried out in compliance with International Labour Organisation (ILO) guidelines for labour force statistics and with Eurostat requirements. This enables the comparability of our data to the data of other countries. Data in column 5 – self-employed persons include family-member assistants as well.

*Note 1:* From 2008 onwards the revised classification of activities SKD 2008 is used, which is internationally comparable with the NACE Rev. 2 classification of activities.

**Table 6.12: Unemployment by Labour Force Survey (ILO)**

The Slovene Labour Force Survey was carried out in compliance with International Labour Organisation (ILO) guidelines for labour force statistics and with Eurostat requirements. This enables the comparability of our data to the data of other countries.

**Table 6.13: Average Wages and Salaries**

Real wages and salaries are deflated by the consumer price index (CPI).

From January 2005 onwards a new methodology for the calculations of average monthly wages and salaries has been used. The statistical survey also includes legal entities with one or two persons in paid employment in the private sector. Individual private entrepreneurs and persons employed by them, own account workers and farmers are not covered.

Published data are the results of new research: the Monthly Report on Earnings at Legal Entities. Data are collected by the Agency of the Republic of Slovenia for Public Legal Records and Related Services (with the common questionnaire (Form 1-ZAP/M). Statistical work was done by SORS. SORS also calculated the average monthly wages and salaries data for 2004 according to the new methodology.

**Table 6.14 Nominal effective exchange rate and Real harmonised competitiveness indicators**

Nominal effective exchange rate, Euro area-17 countries vis-a-vis the EER-40 group of trading partners (AU, CA, DK, HK, JP, NO, SG, KR, SE, CH, GB, US, BG, CZ, LV, LT, HU, PL, RO, CN, DZ, AR, BR, CL, HR, IS, IN, ID, IL, MY, MX, MA, NZ, PH, RU, ZA, TW, TH, TR, VE); Currency denominator: Euro.

Real harmonised competitiveness indicators consumer prices, industrial producer prices and unit labour costs in total economy deflated; ECB EER-20 group of currencies and Euro area 17 country currencies (FR, BE, LU, NL, DE, IT, IE, PT, ES, FI, AT, GR, SI, AU, CA, CN, DK, HK, JP, NO, SG, KR, SE, CH, GB, US, CY, CZ, EE, HU, LV, LT, MT, PL, SK, BG, RO); Currency denominator: Euro.

The growth of the index value represents decrease of competitiveness.

*Note 1:* Data for harmonised competitiveness indicators unit labour costs in total economy deflated are quarterly.

Explanations to harmonised competitiveness indicators calculations are available in special methodological paper »Calculations of harmonised competitiveness indicators«, on the Web site of Bank of Slovenia: <http://www.bsi.si/publikacije-in-raziskave.asp?Mapald=1039>.

### **Tables 6.15 and 6.16: Consumer Price Index**

The Harmonized Index of Consumer Prices (HICP) is a comparable index of consumer prices produced by each Member State and used for international comparison of consumer price inflation. In Slovenia it is available from the year 2001 onwards.

### **Tables 6.17 and 6.18: Industrial Producer Price Index**

The index of industrial producer prices measures changes in the level of producer prices of industrial products that are sold by producers on the Slovenian market. The tables show the price indices and growth rates by end-use of products, as well as by main divisions of activities, v2 (2008).

## Review of the links between the data on Slovenia in the Bulletin of the Bank of Slovenia and the Euro area data in the ECB's Bulletin

The table below shows the correspondence between the statistical tables on Slovenia in the Bulletin of the Bank of Slovenia and on the Euro area in the ECB's Bulletin, i.e. where are the data on Slovenia included into the Euro area aggregates. The ECB's Bulletin is available on the internet address: <http://www.ecb.int/pub/mb/html/index.en.html>.

Labels in Monthly Bulletin of the Bank of Slovenia	Labels in Monthly Bulletin of the ECB
1.1. Monetary aggregates	2.3 Monetary statistics (Monetary aggregates and counterparts)
1.2. Consolidated Balance Sheet of Monetary Financial Institutions	2.2 Consolidated balance sheet of euro area MFI s
1.4. Balance Sheet of Other Monetary Financial Institutions or	2.4 MFI loans, breakdown
1.5. Selected Assets of Other Monetary Financial Institutions by Sector	2.6 MFI holdings of securities, breakdown

Exchange rates <sup>2</sup>				
<b>Addendum</b>				
Population			29 (for Q4 2012)	

## Notes:

\* The period to which data relate is shown in the parenthesis. NLT stands no-later-than.

<sup>1</sup> The data on interest rates are published by the Bank of Slovenia and the Ministry of Finance separately. The data on representative interest rates of the BoS and interbank money market rates are disseminated whenever the change occurs.<sup>2</sup> The data are disseminated daily on Bank of Slovenia's page Currency Exchange rates (for display) and on Archive of financial data.
