Slovaška

Banka Slovenije letos praznuje 30 let. Na dan, ko je bila razglašena samostojnost Republike Slovenije, je bila kot ena od ključnih institucij za njeno delovanje ustanovljena Banka Slovenije. Tega dne je bil sprejet Zakon o Banki Slovenije in izvoljen njen prvi guverner France Arhar.

Pogled na zadnjih 30 let daje vedeti, da je Banka Slovenije tvorno prispevala k razvoju države in sodelovala pri številnih pomembnih mejnikih za Slovenijo, od uvedbe prvega slovenskega denarja – tolarja, oblikovanja nekaterih pomembnih povezav v mednarodnih institucijah, do članstva v Evropskem sistemu centralnih bank in prevzema skupne evropske valute – evra. Od ustanovitve dalje je najpomembnejša naloga Banke Slovenije ohranjanje stabilne rasti cen, kar danes zagotavljamo z vodenjem monetarne politike skupaj z drugimi centralnimi bankami v okviru Evrosistema. Sodelujemo pri vzdrževanju regulatornega okvira, v katerem poslujejo finančne institucije, z drugimi centralnimi bankami Evrosistema pa si delno delimo tudi nadzor nad poslovanjem bank in hranilnic. Naša skupna pristojnost je med drugim skrb za stabilen finančni sistem: z ukrepi makrobonitetne politike naslavljamo tveganja, ki bi lahko ovirala njihovo posredniško funkcijo. Zagotavljamo nemoteno poslovanje, prebivalcem in podjetjem pa posredno omogočamo, da uresničujejo svoje življenjske in poslovne cilje.

Ob 30. obletnici Banka Slovenije izdaja zlato in srebrno medaljo. Likovna rešitev medalje s pomočjo točke kot osrednjega likovnega elementa prikazuje soodvisnost države in centralne banke. Medtem ko je na sprednji strani 30 točk urejenih v pravokotno obliko z napisom Banka Slovenije, so te na hrbtni strani prerazporejene v podobo oblike Republike Slovenije. Na sprednji strani točke prikazujejo rast Banke Slovenije od začetkov do danes, na hrbtni strani pa velikost točk odraža poseljenost države.

30th anniversary of Banka Slovenije

GOLD AND SILVER MEDAL

Banka Slovenije is celebrating its 30th anniversary this year. On the same day that the Republic of Slovenia proclaimed its independence, Banka Slovenije was established as one of its key institutions. On that day the Banka Slovenije Act was adopted and its first governor, France Arhar, was elected.

Looking back at the last 30 years, we can see that we have materially contributed to the development of the country and have been a part of numerous significant milestones for Slovenia, spanning the introduction of Slovenia's first currency, the tolar, creating various important connections with international institutions, becoming a member of the European System of Central Banks and adopting the common European currency, the euro. Since being established, our most important task has been providing stable growth of prices by implementing monetary policy together with the other central banks in the Eurosystem. We participate in maintaining the regulatory framework within which financial institutions operate, and together with the other central banks in the Eurosystem we also conduct supervision of the operations of banks and savings banks. We are also jointly responsible for maintaining the stability of the financial system: through macroprudential policy we address the risks that could impair its intermediary function. In this way we ensure its smooth operation, and allow citizens and companies to pursue their life and business objectives.

To mark its 30th anniversary Banka Slovenije is issuing a series of gold and silver medals. The dot providing the central element of its design represents the co-dependence of the country and the central bank. On the front, 30 dots are arranged in a square with the inscription Banka Slovenije above it, and on the back the dots are arranged in the form of the geographical shape of Slovenia on the map. On the front, dots represent Banka Slovenije's growth from its beginnings to the present day and on the back the size of the dots represents the country's population density.
