Data in tables are not seasonally adjusted.

1. MONEY AND BANKS

Sectorization of banks' data as from April 30, 1999

For data from April 30, 1999 on a new sectorization has been implemented according to ***Regulation on Introduction and Implementation of Standard Classification of Institutional Sectors***, (hereinafter "SKIS") - Official Gazette 56/98. SKIS which implemented a new national standard for economic sectorization is based on European System of Accounts 95 and is in accordance with System of National Accounts 93.

According to SKIS the sectors of the economy are: 1.) Non-financial corporations, 2.) Financial corporations (central bank, commercial banks, other financial institutions), 3.) General government, 4.) Households, 5.) Non-profit institutions serving households and 6.) External Sector (non-residents)

There has been no change regarding definition of *Non-resident*.

Domestic sector is broken down to monetary sector and non-monetary sectors.

Monetary sector consists of the Bank of Slovenia and commercial banks. Commercial banks (hereinafter "banks") are deposit money banks that accept sight deposits and have banking licenses granted by the Bank of Slovenia. Domestic banks, owned by residents or non-residents, are included.

Non-monetary Sectors are: Non-financial corporations, Non-monetary financial institutions, General government, Households, Non-profit institutions serving households.

Non-financial corporations are legal persons - market producers of goods and non-financial services.

Non-monetary financial institutions consist of Savings banks, Co-operatives and ***Other financial institutions***. ***Other financial institutions*** are: 1. Other financial intermediaries, except insurance corporations and pension funds (mutual funds, investment funds and financial leasing comp.), 2. Financial auxiliaries (securities brokers, stock exchanges) and 3. Insurance corporations and pension funds.

Table 1.1.: Main Monetary Aggregates (Statistical Definitions)

Base money is the sum of currency in circulation, banks' reserves with the Bank of Slovenia and Tolar demand deposits of central government, non-monetary financial institutions and other enterprises with the Bank of Slovenia.

M1 is currency in circulation, Tolar demand deposits of central government, enterprises and non-monetary financial institutions with the Bank of Slovenia, and Tolar demand deposits with banks.

M2 is M1, Tolar time deposits of central government with the Bank of Slovenia, Tolar savings and time deposits with banks and deposits of the banks in liquidation at banks.

M3 is M2 and foreign currency deposits of individuals with domestic banks and from September 1999 also foreign currency deposits of enterprises with domestic banks.

Monetary aggregates are calculated as monthly averages of the Bank of Slovenia's and banks' daily data for all calendar days in month.

All aggregates in Table 1.1. are also shown in Table 1.2. Data in Table 1.1. differ from those in Table 1.2. as the first are monthly averages and the latter end of period data. The calculation of monetary aggregates is also not exactly the same due to different data sources. The differences are as follows:

M1:

M1 in the table 1.1. does not include general government, non-monetary financial institutions (including savings banks and co-operatives) and non-profit institutions serving households sight deposits at banks, what is all included into M1 in the table 1.2..

M2:

Between M1 included in M2 in the tables 1.1. and 1.2. there are no differences mentioned, but some other inconsistencies. M2 in the table 1.1. includes Tolar sight and time nonresident deposits, Tolar restricted deposits, securities issued by banks denominated in Tolars and banks subordinated debt (except interbank subordinated debt and subordinated debt to savings banks). These items are not included in M2 in the table 1.2. Beside that the item Tolar savings banks time deposits at banks is part of the M2 in the table 1.1., but not in the table 1.2..

M3:

Until 31.08.1999 monetary aggregate M3 in the table 1.1. includes only foreign currency deposits made by individuals, but M3 in the table 1.2. consists also of foreign currency deposits by other non-monetary sectors. As from 01.09.1999 monetary aggregate M3 in table 1.1. besides foreign currency deposits made by individuals includes also part of foreign currency deposits made by enterprises.

Table 1.2.: Monetary Survey - Consolidated Balance Sheet of the Monetary System

The Table shows consolidated balance sheet of all banks' and Bank of Slovenia on the end of month. Data for banks are aggregated but not consolidated.

Domestic assets consist of banks' and Bank of Slovenia's claims on General Government arising from succession to former SFR Yugoslavia and bank rehabilitation program, and claims from loans and securities on other non-monetary sectors. Claims from succession and bank rehabilitation program represent claims of the Bank of Slovenia on Succession Fund of the Republic of Slovenia (for the former National Bank of Yugoslavia Dinar cash), counterpart claims for Bank of Slovenia liabilities to International Monetary Fund, government guaranteed bank rehabilitation bonds, government bonds for unpaid foreign currency deposits and claims on former National Bank of Yugoslavia for foreign currency deposits.

Other assets include fixed assets of banks and of the Bank of Slovenia and some other items (doubtful claims, etc.).

M3 consists of M2 and all foreign currency deposits, and not only foreign currency deposits of individuals as in Table 1.1.

Other foreign currency liabilities to Central Government include Central Government foreign currency deposits with the Bank of Slovenia and other foreign currency liabilities of banks with the General Government.

Other liabilities consist of capital and reserves of banks and of the Bank of Slovenia and also include some other items.

It is the table as from April 30, 1999 in conformity with SKIS items of assets and liabilities to *Other general government* mean assets and liabilities to both *Local Government* and *Social Security Funds*. By analogy *Enterprises* means *Non - financial corporations* and *Non - profit institutions serving households*, and *Individuals* means *Households*.

As from July 31, 1996, data for Komercialna banka Triglav are no longer included in banks' data due to its bankruptcy.

Table 1.3.: Balance Sheet of the Bank of Slovenia

The Table shows the Bank of Slovenia's assets and liabilities at the end of month.

The International reserves of the Bank of Slovenia consist of: foreign currency, sight and time deposits abroad, first class securities of foreign issuers, monetary gold, reserve position with the International Monetary Fund and SDR holdings at the International Monetary Fund. Foreign exchange deposits held by Bank of Slovenia on the basis of repurchase agreements are not included.

Other foreign assets mainly include balances on fiduciary accounts and with international financial organizations.

Claims on General Government consist mainly of net claims on the National Bank of Yugoslavia taken over by the Succession Fund of the Republic of Slovenia. Claims on the state budget, which are the counterpart of the succeeded liabilities to the International Monetary Fund, are also included.

Repurchase agreements represent loans extended to banks based on securities or foreign currency.

Other claims include some Bank of Slovenia's small deposits with banks and advance payments to the banks for repayments of Bank of Slovenia bills sold to other buyers through banks as agents.

General Government Deposits comprise deposits of Central Government budget.

Restricted deposits mainly result from deposits earmarked for import payments and deposits covering letters of credit, guarantees and credits taken abroad.

Money transfers in transit comprise money in transit.

Table 1.4.: Balance Sheet of Deposit Money Banks

The Table summarizes data on assets and liabilities of banks at the end of the month.

Demand deposits comprise giro accounts of enterprises and non-profit institutions, General Government, non-monetary financial institutions and giro and current accounts of households (see Table 1.6.).

Savings deposits include short and long-term tolar savings deposits of households (see Table 1.6.).

Time deposits consist of short and long-term time deposits of households, General Government, non-monetary financial institutions, enterprises and non-profit institutions (see Table 1.6.).

Restricted deposits represent deposits of enterprises and non-profit institutions, General Government and individuals to be used for money transfers to foreign countries or in cover of letters of credit, loans taken abroad or euro-checks, and can also be used for foreign currency exchange office transactions.

Note 1: In June 1996 foreign liabilities of banks for the undue foreign debt of former SFR Yugoslavia in the amount of SIT 49,027 million were taken over by the Government. Liabilities of banks to the Government were increased for the same amount. The banks decreased their foreign liabilities and claims on the Government for the part of matured allocated debt which they had been repaying to the government fiduciary account since January 1994 totalling SIT 18,078 million.

Bank of Slovenia's claims on and liabilities to banks are equal to the corresponding items in the banks' aggregated balance sheet with few exceptions: Item 'Reserves' (Giro and reserves accounts) on the assets side of banks' balance sheet is almost the same as item 'Deposits of banks' (Giro and reserves accounts, foreign currency deposits) on the liabilities' side of the Bank of Slovenia's balance sheet (Table 1.3.). Similar applies to items 'Liabilities to the banking system' arising from the Bank of Slovenia loans and 'Claims on domestic banks' based on loans in the Bank of Slovenia balance sheet (Table 1.3.). Discrepancies result from differences in accounting accuracy.

Claims on and liabilities to domestic non-monetary sectors are shown in detail in Tables 1.5. and 1.6.

Foreign assets and foreign liabilities are shown in detail in Tables 1.7. and 1.8.

Table 1.5.: Deposit Money Banks' Claims on Domestic Non-monetary Sector

The Table shows banks' claims resulting from loans and securities classified by domestic non-monetary sectors, which are also represented in Table 1.4. in item 'Claims on non-monetary sectors - Total'. As from April 30, 1999 SKIS has been implemented in the sectorial distribution of the economy and therefore:

- the sector *Enterprises and non-profit institutions* comprises the data on SKIS Sectors *Non financial corporations* and *Non-profit institutions serving households*;
- the sector *Central government* comprises the data on SKIS subsector *Central government*;
- the sector *Other general government* comprises the data on SKIS subsectors *Local government* and *Social security funds*;
- the sector *Individuals* comprises the data on SKIS sector *Households*;
- the sector *Non-monetary financial institutions* comprises the data on *Savings banks* and *Savings cooperatives* as well as the data on SKIS sector *Other financial institutions*.

Marketable securities are long or short-term securities acquired and held by a bank with the intention of reselling them in the short term.

Investment securities are long or short-term securities acquired and held for yield or capital growth purposes and are usually held to maturity.

Table 1.6.: Deposit Money Banks' Liabilities to Domestic Non-monetary Sector

The Table shows banks' liabilities from deposits of domestic non-monetary sectors which correspond to the 'Liabilities to non-monetary sectors - Total' in Table 1.4.

As from April 30, 1999 SKIS has been implemented in the sectorial distribution of the economy and therefore:

- the sector *Enterprises and non-profit institutions* comprises the data on SKIS Sectors *Non financial corporations* and *Non-profit institutions serving households*;
- the sector *Total General government* comprises the data on SKIS sector *General government*;
- the sector *Individuals* comprises the data on SKIS sector *Households*;
- the sector *Non-monetary financial institutions* comprises the data on *Savings banks* and *Savings cooperatives* as well as the data on SKIS sector *Other financial institutions*.

2. FINANCIAL MARKETS

Interest rates (Table 2.1. - 2.6.)

Annual interest rates.

r = real rate over Tolar indexation clause

r(D) = real rate over foreign exchange indexation clause

n = overall nominal rate

TOM = Tolar indexation clause

D = foreign exchange clause (DEM)

Table 2.1.: Bank of Slovenia Interest Rates

Discount rate (End of period): Indicative rate posted by the Bank of Slovenia.

Lombard loan: Within the framework of standing lombard facility Bank of Slovenia provided five-day lombard loans to banks in amounts not higher than 5 percent of foreign currency denominated short-term Bank of Slovenia bills or Treasury bills used as collateral. Interest rate for lombard loans was one percentage point above the Bank of Slovenia discount rate.

Interest rate on banks' obligatory reserves: 1 percent per year since October 1991.

Penalty rate is an official penalty rate set by Bank of Slovenia. Penalty rate is generally used in cases of overdue payments.

Repo interest rate for loans granted on the basis of temporary purchase of Bank of Slovenia's Bills in foreign currency with obligatory repurchase in 28 days is weighted arithmetic average from daily repo interest rates.

Bank of Slovenia uses *liquidity loans* to regulate liquidity of the banking system, and occasionally for regulation of base money.

Overnight liquidity facilities are offered to net borrowers on the interbank market. Bank of Slovenia offers such overnight facilities on the evening interbank market at a uniform interest rate; banks may receive such loans in proportion to available eligible collateral.

Liquidity facilities of last resort are permanently available to banks in case of unexpected liquidity constraints. The interest rate applied is the penalty rate.

Based on the preliminary data on base money, Bank of Slovenia provides up to one-month liquidity to banks with regular *short-term loans* with maturity of one month. *Regular short-term loans* were offered on monthly basis till October 1996. The amount of such loans given to a single bank was determined dependent on its share in the foreign exchange position total of banks, and on the overall volume of loans offered; the latter was subject to the Bank of Slovenia's revision at least once per month.

Table 2.2.: Interbank Money Market Rates and Indexation Clause

Interbank market

The figures are annual interest rates for loans agreed between commercial banks with maturity up to 30 days.

Tolar indexation clause

Tolar indexation clause (TOM) is annual interest rate, determined by Bank of Slovenia and used for indexation of financial liabilities.

TOM (monthly): since 5th August 1995: average of previous 3 months' inflation (until June 1995 indexation was based on so called R that was equal to the previous months' inflation rate, from 1st June till 4th August 1995 indexation was based on the average of previous 3 months' inflation); since February 1996: 4 months; since December 1996: 6 months; since May 1997: 12 months.

Financial liabilities in domestic currency, with maturity exceeding 30 days, are revalued with TOM.

Financial liabilities in domestic currency, with maturity less than 30 days, are not revalued from September 1995.

Foreign exchange indexation clause

Monthly rate is growth rate of Bank of Slovenia's end of month exchange rate for DEM (EUR) or USD.

Annual rate is computed from monthly rate on the conform basis, taking into account the actual number of days in the month and in the year.

Figures for 1993 to 1998 in columns 5, 7 and 9 represent growth of the category in the period December to December.

Table 2.3.: Interest Rates for Bank of Slovenia Bills

Tolar bills are registered securities subscribed by banks with maturity of two, twelve, sixty or 270 days and by savings banks with maturity of sixty and 270 days (Tolar bills with maturity of seven, fourteen and thirty days were abolished on 3rd of April 2000). Since September 1998 Bank of Slovenia offers Tolar Bills of 270 days with nominal interest rate (figures in brackets are indexed interest rates). All bills are offered on a permanent basis. Except for the sixty-day bill, none are issued in series.

Bills with warrants were short-term securities, issued in series of nominal value of half a million Tolars. They were purchased in Tolar at a discount and bear the p.a. nominal interest. The warrant attached to the security represented a hedge against inflation and exchange rate depreciation higher than officially projected. Interest rate for the last edition of the bills was indicated. Bills with warrants were abolished on 25th May 2000.

Twin bills were short-term bearer securities, issued in series in paper form. Through banks they are available

to other legal persons and households. They were composed of a Tolar and a foreign currency part and were sold in Tolars at a discount, with redemption in Tolars and in German Mark. The Tolar part was revalued by Tolar indexation clause (TOM). Twin bills were abolished on 16th March 2000.
Foreign currency bills are transferable registered securities not issued in series. They are offered on permanent basis and can be purchased by banks and by other legal persons through banks. They are sold for Euros (till 16.02.1999 for German Marks) or US Dollars at a discount with maturities of two to twelve months. Interest rates for a certain type of bill in the table are those valid on the last day of the month.

Table 2.4.1.: Average Commercial Banks' Interest Rates

Average interest rates (r and $r(D)$) are weighted arithmetic averages of the minimum and maximum interest rates.

Spread is the difference between the weighted minimum and maximum interest rate: $r_{\min} = r - \text{spread}$, $r_{\max} = r + \text{spread}$.

The figures for the latest month are always provisional; updated figures in the following Monthly Bulletin are not marked with sign *.

Table 2.5.: Average Effective Commercial Banks' Interest Rates

Average effective interest rates are calculated on the basis of the interest accounted in the period.

In most respects the Slovenian Balance of Payments (BOP) conforms to the methodology of the IMF's *Balance of Payments Manual, fifth edition (1993)*.

Characteristics of the Data

Minus sign (-) indicates imports or surplus of imports over exports in the current account, increase in assets or decrease in liabilities in the capital and financial accounts, and growth of reserve assets. Data for transactions are converted from original currencies to USD using the daily Bank of Slovenia exchange rates, or average exchange rates of the period if the exact date of transaction is not known.

Data sources

BOP is compiled on the basis of monthly available data on transactions (ITRS), stock positions and estimates.

- Reports on transactions
 - accounts of domestic banks held with correspondent banks abroad (including the central bank),
 - nonresident accounts held with domestic banks,
 - non-bank resident accounts abroad,
 - other accounts between residents and nonresidents,
 - payments between residents and nonresidents in Slovenian Tolars.

Classification of transactions is using the descriptions of transactions provided by the banks' clients;

- **Customs declarations;**
- **Reports to the Bank of Slovenia on registered credits granted to and disbursed abroad;** For the period from 1997 also data on nature of direct payments from foreign creditors, which settle liabilities of domestic debtors to other nonresidents, are available from these reports.
- **Accounting data of the Bank of Slovenia;**
- **Commercial banks balance sheet data;**
- **Estimates.**

There are several estimation models used in the BOP for the valuation of data on imports, incoming travel, labor income, Italian pensions (till the end of 1998), short-term commercial credits, foreign currency and deposits of resident households.

Current account

Goods

Data for the General merchandise are based on customs declarations. Data on imports c.i.f. and exports f.o.b. are compiled by the Statistical Office. **Adjustments for valuation** of data on imports and **coverage** of data on imports and exports are made by the Bank of Slovenia. The imports data are adjusted from c.i.f. basis to f.o.b. basis by the coefficient which is equal to the weighted average of coefficients between the c.i.f. and f.o.b. values of imported goods (for the available sample), separately calculated for each type of merchandise, transport means and country of the exporter. The **coverage adjustments** are made for goods imported without customs declaration and for which data are available from ITRS or reports of duty free shops and consignment warehouses.

Services

Transport

The source for recording of transportation services is the ITRS.

Travel

The ITRS sources used in the compilation of the **incoming travel** item include: a.) health and education related services, b.) payments made by nonresidents to Slovenian tourist agencies, c.) the expenditure in Tolars by nonresidents, d.) money spent in casinos by nonresidents, e.) data on sales of goods to

nonresidents in duty free shops and consignment warehouses, f.) payments with credit cards and g.) sales of Tolars to nonresidents abroad.

The data on sales of Tolars to nonresidents in Slovenia are estimated on the number of border crossings of foreign travellers and on the number of nights spent by foreign tourists.

Data source for the item expenditure on travel are ITRS and estimations.

Construction services

The source of data is ITRS. All construction works are recorded under construction services.

Insurance services

Premiums on life and non-life insurance are split into two components: (i) the service charge included in insurance services and (ii) the premium in a narrow sense recorded as current transfer. The calculation of service charge is based on a fixed percentage (5% till the end of 1998 and 25% from 1999 on) of the premium payments.

Government services

All transactions settled through accounts of Slovenian embassies abroad as well as transactions coded as government services settled through accounts of Slovenian banks with foreign correspondents are included in this item.

Income

The ITRS is used as a main source for recording of **compensation of employees**. As many wages are not paid through domestic banks, supplementary estimations of such receipts from the neighboring countries are made. Data on **reinvested earnings and income on equity** are available in an annual survey of Slovenian direct investors abroad and of foreign direct investment enterprises in Slovenia. These data have not been included in the balance of payments. The present recording of **other investment income** (interest income) is based on the actual payments.

Current transfers

In this item workers' remittances, insurance and other transfers of other sectors are included. The insurance item is calculated as a difference between the insurance premiums received and the claims paid on the credit side and vice versa on the debit side. The main source for other transfers are the ITRS and the customs documents.

Capital and financial account

Capital account

Capital transfers

Migrants' transfers covers not only payments recorded by domestic banks but also the changes in residency of accounts held with these banks.

Financial account

Direct investment

Direct investment is recorded on the basis of reporting of payments through domestic banks and of data from customs declarations and does not include reinvested earnings neither other net liabilities (claims) to (on) investors according to definition on Foreign Direct Investment.

Until 1997 purchase and sale of all shares and equity have been included in this item.

From the beginning of 1997, purchase and sale of shares that assure more than 50 percent of company's equity, a control package of shares, shares issued by domestic companies on the primary markets with the purpose to increase the nominal capital of the company are included in this item, due to capital control measures. With the new Foreign Exchange Act in 1999 direct investment 10% rule is applied.

Portfolio investment

Until 1997 only data on sales and purchases of debt securities through banks were included in this item. Since February 1997 equity securities, not having the characteristics described in the note on Direct investment are included in this item too. With the new Foreign Exchange Act in 1999 portfolio investment transactions include all transactions below the 10% rule describes in Direct Investment.

Other investment

Other investments except equity between affiliated enterprises are included here and not under Direct investment. Short-term trade credits are estimated and recorded on net basis as change of assets. Estimation is based on comparison of data on imports and exports from customs declarations with corresponding settlements. Item currency and deposits of households is estimated by using data on net purchases of foreign currency in foreign exchange offices, net deposits to households' foreign exchange accounts at domestic banks, estimated expenditure of resident households abroad (see Travel).

Tables 3.1., 3.3. and 3.4.: Balance of Payments

The data for 2000 are revised every month for all previous months.

In 1999 additional information from some data sources was included:

- from customs declarations: additional breakdown of goods (goods on processing, goods procured

in ports by carriers and nonmonetary gold), additional information was added to coverage adjustment, included foreign direct investment and transfers in kind,

- estimation of Italian pensions was replaced with the data from reports on transactions, and some methodological changes introduced:
 - the new cif/fob coefficient (1,0393),
 - the percentage of the insurance premiums payments for the calculation of service charge was changed from the previous 5% to 25%.

Note 1: CD: customs declarations - foreign trade definitions (Statistical Office of Republic of Slovenia).

Note 2: 1996 data include cash flows only, without investments in kind.

International Liquidity (Table 3.8.)

Table 3.8.: International Liquidity

Foreign exchange reserves of the Bank of Slovenia and banks include foreign cash in convertible currencies, deposits abroad and first class securities of foreign issuers. Balances on fiduciary accounts are included in 'Other foreign assets'.

Foreign exchange reserves of the Bank of Slovenia equals the item 'International monetary reserves' in

balance sheet of the Bank of Slovenia (Table 1.3.) except that item 'Monetary gold' is not presented in Table 3.8. and that foreign exchange deposits acquired on the basis of repurchase agreements with domestic banks are excluded from the data on foreign exchange reserves in Table 1.3. These assets are included in Table 1.3. under item 'Claims on domestic banks - Loans - Repurchase agreements'. Foreign exchange reserves of banks are only part of item 'Foreign Assets' in Table 1.4. Foreign assets also include other foreign currencies, deposits abroad, foreign securities and other foreign assets, which do not have the nature of high liquid international funds.

External debt (Tables 3.9. to 3.11.)

General Notes

The tables are based on World Bank concepts (World Debt Tables, External Debt of Developing Countries, The World Bank, Washington D.C.).

External Debt

Long-term external debt is defined as debt with original or extended maturity of more than one year owed to nonresidents and repayable in foreign currencies, goods, or services. Long-term external debt has three components:

- public debt, which is an external obligation of a public debtor, including the national government, a political subdivision (or an agency of either) and autonomous public bodies;
- publicly guaranteed debt, which is an external obligation of a private debtor that is guaranteed for repayment by a public entity;
- private non-guaranteed external debt, which is an external obligation of a private debtor that is not guaranteed by a public entity.

Short-term external debt is defined as debt with an original maturity of one year or less.

Interest arrears on long-term debt are interest payments due but not paid during the year (period) specified. Total debt stocks or total external debt is defined as the sum of (1) public and publicly guaranteed long-term debt, (2) private non-guaranteed long-term debt, (3) use of IMF credit, and (4) short-term debt.

Debt service: Total debt service is defined as the sum of (1) principal repayments and interest payments made on long-term debt (public and publicly guaranteed and private non-guaranteed), (2) repurchases and charges paid on use of IMF resources; and (3) reductions in stock and interest payments made on short-term debt.

Debt Flows

Disbursements are drawings on loan commitments during the year (period) specified.

Principal repayments are actual amounts of principal (amortization) paid in foreign currency, goods, or services in the year (period) specified.

Interest payments are actual amounts of interest paid in foreign currency, goods, or services in the year (period) specified.

Net flows (or net lending or net disbursements) are disbursements minus principal repayments. In the "Total debt flows" chapter only, net flows also include short-term debt. It is assumed that a disbursement has taken place if the change in stock of short-term debt outstanding is positive; if negative, a repayment is assumed to have been made.

Net transfers are net flows minus interest payments (or disbursements minus total service payments).

Principal Ratios

Exports of goods and services are the total value of exported goods, services, income received (Table 3.3.) and worker remittances received.

Imports of goods and services are the total value of imported goods, services and income paid (Table 3.3.).

International reserves are the sum of the Bank of Slovenia's holdings of special drawing rights (SDRs), its reserve position in the IMF, its holdings of foreign exchange (Table 3.8.) and its holdings of gold.

Foreign exchange reserves are equal to the sum of foreign exchange reserves of the Bank of Slovenia and commercial banks (Table 3.8.).

Categories of Creditors

Debt from official creditors includes:

- loans from international organizations (multilateral loans): loans and credits from the World Bank, regional development banks, and other multilateral and intergovernmental agencies. Excluded are loans from funds administered by an international organization on behalf of a single donor government; these are classified as loans from governments.
- loans from governments (bilateral loans): loans from governments and their agencies (including central bank), loans from autonomous bodies, and direct loans from official export credit agencies.

Debt from private creditors includes:

- bonds either publicly issued or privately placed;
- commercial banks: loans from private banks and other private financial institutions;
- other private: credits from manufacturers, exporters, and other suppliers of goods, and bank credits covered by a guarantee of an export credit agency.

Borrowing Terms

The average terms of borrowing are given for all new loans contracted during the year (period) and separately for loans from official and private creditors. To obtain averages, the interest rates, maturities, and grace periods in each category have been weighted by the amount of the loans.

Loans with an original grant element of 25 percent and above are defined as concessional.

Two characteristics are given for long-term debt outstanding and disbursed:

- concessional LDOD. This item conveys information about the borrowers dependence on aid from official lenders;
- variable interest rates LDOD (that is, interest rates that float with movements on a key market rate; for example, the London Interbank Offered Rate (LIBOR) or the U.S. prime rate). This item conveys information about the borrower's exposure to changes in international interest rates.

Debt Service Projections on Existing Pipeline

Projected service payments are estimates of payments due on existing debt outstanding, including undisbursed. They do not include service payments that may become due as a result of new loans contracted in subsequent years. Nor do they allow for effects on service payments of changes in repayment patterns owing to prepayment of loans or to rescheduling or refinancing, including repayment of outstanding arrears that occurred after the latest year of reported debt data. Projection in current year refers only repayments due in the following period of the year.

Exchange Rates

Debt outstanding and disbursed at the end of the year (period) specified is converted to U.S. dollars at the rate in effect at the end of the year (period). Service payments, commitments, and disbursements (flows) are converted to U.S. dollars at the rates valid in the moments of transaction.

Table 3.9.: External Debt**Table 3.10.: Regional Composition and Breakdown by Creditors**

Note 1: Debt data apply to loans used directly by Slovenian beneficiaries, and to obligations from credits of the former SFR Yugoslavia taken over by the Republic of Slovenia in separate bilateral agreements with foreign creditors. The Republic of Slovenia is engaged in process of ratification, i.e., negotiations for the assumption of the remaining obligations of former SFR Yugoslavia with government of one country and with creditors from the Alternative Participation Instruments Exchange Agreement (APIEA).

Note 2: The Republic of Slovenia became member of the IMF in January 1993; by decision of the Executive Board of the IMF in December 1992 Slovenia was declared successor state to a percentage share of the assets and liabilities of former SFR Yugoslavia.

Note 3: Data include a portion of obligations assumed in June 1996 in the amount of USD 812 million by the Republic of Slovenia and related 1988 New Financing Agreement. Together with the 1988 Trade and Deposit Facility Agreement and 1988 Alternative Participation Instruments Exchange Agreement, this agreement regulated restructuring of the debt of former SFR Yugoslavia owed to foreign commercial banks.

Negotiations are not yet concluded with creditors under the 1988 Yugoslavia Alternative Participation Instruments Exchange Agreement. Table 3.10., item 3: 'Refinancing -Commercial Banks' shows obligations of Slovenian final beneficiaries under the two Agreements.

Note 4: Excluding IFC credits from 1995, included in private non-guaranteed debt.

Note 5: Including debt assumed with agreements: a.) between the governments of the Republic of Slovenia and FR Germany on the take-over of foreign debt of former SFR Yugoslavia, pertaining to previous restructuring and to liabilities from original bilateral arrangements; b.) between the governments of the Republic of Slovenia and the state Kuwait on the consolidation and rescheduling of certain debts of the Republic of Slovenia owed to the state of Kuwait. The data are not shown in disbursements and in average terms of new commitments, however, it effects the increase of external debt for the amount assumed; c.) between the Government of the Republic of Slovenia and the Government of Japan on the consolidation unallocated obligation of former SFR Yugoslavia owed to Japan.

Table 3.11.: Payments of Obligations Effected to the Fiduciary Account

Starting from September 30, 1994 payments have been effected to the fiduciary account of the Bank of Slovenia with the Dresdner Bank Luxembourg Sa, Luxembourg (agreement dated 27.9.1994) of annual installments of the Republic of Slovenia under the Osimo Treaty (10.11.1975) and the Rome Treaty (18.2.1993) between the Republic of Italy and the former SFR Yugoslavia.

Overdue liabilities in the amount of USD 45.8 million were effected by June 30, 2000 on the fiduciary account.

International Investment Position of Slovenia (Table 3.12)

General notes

Methodology of the international investment position (IIP) of Slovenia is based on the fifth edition of the *Balance of Payments Manual*, IMF, 1993.

Data sources

Data sources for the international investment position of Slovenia are mainly the same as those for the balance of payments financial account. However, there are differences with some items as follows:

Direct investment

Data on direct investment are collected from *surveys of enterprises on stock and transactions with affiliated enterprises* - form SN. (Source for the balance of payments is *international transactions' reporting system* - ITRS). In accordance with the recommendations of IMF, this item comprises investment where direct investor owns 10 percent or more of ordinary shares or voting power, while in ITRS the distinction could not be made. In the IIP all claims on and liabilities to affiliated enterprises are included, except short-term claims and liabilities of banks.

Data on investment of Slovene enterprises in indirectly affiliated enterprises from 1996 onwards are included in the item 'Direct investment abroad' (in case when enterprise abroad having Slovene direct investment holds 10% or more of equity in other foreign enterprise). In the item 'Direct investment in Slovenia' data on investment of foreign enterprises in indirectly affiliated enterprises in Slovenia are included (in case that Slovene enterprise with foreign direct investment holds 10% or more of equity in other Slovene enterprise). Reinvested earnings are included in IIP, but not yet in balance of payments.

Portfolio investment

Data on equity securities and other equity shares are also available from enterprises' surveys (form SN), but only data from surveys where direct investor owns less than 10 percent of ordinary shares or voting power, are included. (In the balance of payments, transactions with equity securities and other shares are collected from ITRS (see note to Tables 3.1. to 3.4. /Capital and financial account/Portofolio investment).

Data on debt securities are available from credit registration forms and forms SN. (For the balance of payments these data are collected from ITRS).

Trade credits and loans

Source for short-term trade credits are *reports of enterprises on stock of external claims and liabilities* (form SKV) and *surveys on transactions with their accounts abroad* (form C). (In the balance of payments the item short-term commercial credits is estimated.)

Sources for long-term trade credits and loans are credit registration forms and are the same for the international investment position and the balance of payments. In the IIP claims and liabilities between affiliated enterprises are recorded under direct investment and are excluded from items trade credits and loans.

Currency & deposits, other assets, other liabilities and reserve assets

Sources of data for these items are banks' reports and Bank of Slovenia accounting data and are consistent with those for the balance of payments.

The item "Assets / Currency and deposits of other sectors" in international investment position also includes data from the Bank for International Settlements (BIS) on deposits of Slovenian households in the banks in member states of BIS.

The item "Other liabilities of other sectors" in the IIP consists of the data on contractual joint ventures, which are not available for the balance of payments.

Table 3.12.: International Investment Position of Slovenia

IIP data do not include:

- data on real estate owned by Slovenian households abroad (mainly real estate in Croatia),
- claims on other countries on the territory of former SFR Yugoslavia, subject of negotiations on succession, expropriated assets in these territories and other assets transferred to the Slovenian government during the process of privatization.

Additional data on Direct Investment are available in a special publication of the Bank of Slovenia: 'Neposredne naložbe – Direct Investment, 1994 - 1998' and on Bank of Slovenia Web site: <http://www.bsi.si/html/eng/publications/index.html>.
